October, 2014

Abstract:

Dolomite cemented zones have been recognized in both Otway and Gippsland Basins. These cemented zones have significant effects on the reservoir performance as they can degrade or enhance reservoir sweep. The CO2CRC CO₂ sequestration project in Otway Basin may be affected by these carbonate cemented zones, where it has been detected in CRC-2 and CRC-1. Therefore, the aim of this project is to generate an empirical model using well log data to detect the dolomite cemented zones in the Otway and Gippsland Basins.

To achieve this goal, log data have been analyzed to firstly create a motif of cemented zones in the on-shore lower Paaratte Formation of Otway Basin. Then, verify cemented zones in the Casino Field of the Shipwreck Trough (offshore Paaratte Formation). As a result, the dolomitisation interval motifs will be generated from Paaratte Formation of Otway Basin and will be used to detect the cemented zones in the Gippsland basin.

Table of Content

Abstract:.....	2
Acknowledgments:.....	3
Table of Content.....	4
Chapter 1: Introduction	6
1.1 Rationale	6
1.2 Study Area	7
1.2.1 Otway Basin:.....	7
1.2.2 Gippsland Basin.....	7
1.3 Previous Study:.....	10
1.4 Aim	10
1.5 Objectives:.....	10
Chapter Two: Geology setting of the Otway and Gippsland.....	11
2.1 Otway Tectonic Evolution, Basin Setting and Stratigraphy	11
2.1.1 Sherbrook Group (Paaratte Formation)	12
2.2 Gippsland Tectonic Evolution and Stratigraphy	14
2.2.1 Latrobe Group.....	16
Chapter Three: Dolomite cementation and Dedolomitization	17
3.1 Diagenetic Processes:.....	17
3.2 Dolomite Cement Evolution:	17
3.3 Cement Development and Dissolution	18
Chapter Four: 4 Methodology.....	20
4.1 Well Log Data Analysis	20
4.1.1 Preparing the Data for the Analysis	20
4.1.2 Log Data Analysis:.....	21
4.1.3 Compression between average probability of CRC-2 and CCA_20 log: ..	23
4.1.4 Detecting Cemented Zones on Other Wells in Otway Basin:	24
Chapter Five: 5 Results	25
5.1 Control Logs and Mean Probability Logs of CRC-2.....	25
5.2 Mean Probability Logs of Nearby Wells	31
5.2.1 Onshore Otway Paaratte Formation	31
5.2.2 Offshore Otway Paaratte Formation.....	35

5.2.3 Comparison Between Onshore and Offshore Otway Paaratte Formation.	41
5.2.4 Offshore Gippsland (Eocene top Latrobe Group)	42
Chapter 6: Discussion:	45
6.1 Control Logs and Mean Probability Logs of CRC-2.....	45
6.2 Otway Basin.....	45
6.3 Onshore and Offshore Otway.....	46
6.4 Gippsland Basin	46
Chapter 7 :Conclusion.....	47
8 References:.....	48
9 Appendix	49
9.1 Appendix A	49
9.2 Appendix B.....	52
9.3 Appendix C, D, E, F	57
