TABLE OF CONTENTS

Abstract	i
Declaration	ii
Acknowledgements	iii
CHAPTER 1: Introduction	1
1.1 Overview.....	1
1.2 Human-horse interaction.....	1
1.3 ‘Partnership’.....	2
1.4 Interspecies sport.....	5
1.5 Eventing.....	6
1.6 Risk.....	7
1.7 Aim of the present study.....	8
CHAPTER 2: Methodology	10
2.1 Theoretical framework.....	10
2.2 Analytic approach.....	11
2.3 Participants and recruitment.....	11
2.4 Ethics.....	12
2.5 Data collection.....	12
2.6 Data analysis.....	13
CHAPTER 3: Analysis and Discussion	14
3.1 Overview.....	14
3.2 The Horse as Autonomous Agent.....	14
3.2.1 <i>Horse in control</i>	15
3.2.1.1 <i>Horse as rational decision maker</i>	15
3.2.1.2 <i>Horse as disobedient decision maker</i>	19
3.2.2 <i>Rider in control</i>	21
3.2.2.1 <i>Development of ‘natural abilities’</i>	22
3.2.1.2 <i>Rider as training negotiator</i>	23
3.3 The Horse as Social Being.....	25

3.3.1 'Careful' horses.....	25
3.3.2 Constructions of a 'careful' event horse.....	26
3.3.2.1 'Careful' as a negative attribute in horses.....	26
3.3.2.2 'Careful' as a positive attribute in horses.....	30
3.3.3 'Careful' vs 'Brave' vs 'Heart'.....	31
3.3.4 Rider in control of dispositional attributes.....	36
3.4 Summary.....	38
CHAPTER 4: Conclusion.....	40
4.1 Summary.....	40
4.2 Implications.....	41
4.3 Limitations and future research.....	42
REFERENCES.....	44
APPENDICES.....	45
Appendix: Semi-structured interview guide.....	47

Abstract

This study aims to explore the horse-rider relationship in elite-level eventing. Current literature suggests that the concept, ‘partnership’, is routinely used to describe a fundamental aspect of rider-horse compatibility, and that this concept is argued to need time to develop. Highly skilled riders who use multiple horses in competition may not have time to develop such ‘partnerships’, however, such combinations are often found to achieve significant competitive success. Fifteen semi-structured interviews were conducted to explore how elite-level eventing riders account for equestrian performance and how ‘partnership’ between horse and rider is routinely described in discussing achievement at this level. Discursive analysis was used to identify broad patterns in the data, as well as identifying routine linguistic practices and rhetorical organisation that recur in elite riders’ constructions of event horses. Event horses were routinely described in two ways: as autonomous, decision-making agent, and as social being, that displays specific dispositional attributes that contribute toward performance success. These constructions were applied to an ‘equine habitus’ framework (Gilbert & Gillett, 2011), to develop the notion of an ‘eventing habitus’. The study’s findings have practical application for riders and trainers in competitive environments as well as for other equestrian professionals (e.g. jockeys and stockmen) who are routinely required to ride unfamiliar horses in high-risk contexts.

Declaration

This thesis contains no material which has been accepted for the award of any other degree or diploma in any University, and, to the best of my knowledge, this thesis contains no materials previously published except where due reference is made. I give consent to this copy of my thesis, when deposited in the University Library, being available for loan and photocopying.

Acknowledgements

I would like to thank my supervisor, Amanda Le Couteur, for her amazing support and guidance throughout the year, and her enthusiasm to take on this project. I would also like to thank my ever-supporting family, particularly my mother, who kept me fed and happy during stressful times. Also, thank you to my friends who kept checking up on me throughout the writing of this thesis. Their continued support and ability to make me laugh all year, was a big help. Lastly, I need to thank my horse, Carlo, who gave me the inspiration to take this project on, and gave me a good distraction when I needed time away from it.
