

STRAIN AGEING IN ALPHA-TITANIUM

A. S. PEARCE

B. Applied Science (Adel)

A thesis submitted for the degree of Master of Applied Science in July 1973. The investigation was carried out in the Materials Science Group, Chemical Engineering Department, University of Adelaide.

## TABLE OF CONTENTS

SUMMARY .....	1
DECLARATION .....	3
ACKNOWLEDGEMENTS .....	4
1. INTRODUCTION .....	5
1.1 Strain ageing mechanisms .....	8
1.2 Slip systems in zirconium and titanium ....	13
1.3 Present work .....	15
2. EXPERIMENTAL .....	16
3. RESULTS .....	24
3.1 Mechanical tests .....	24
3.2 Electron microscopy .....	40
3.3 Burgers vector analyses .....	46
4. DISCUSSION .....	47
5. CONCLUSIONS .....	53
BIBLIOGRAPHY .....	56

APPENDIX I: Preparation of 3mm disk electron microscopy  
foils at subzero temperatures.

APPENDIX II: Automatic plotting of stereographic  
projections.

APPENDIX III: Analysis of burgers vectors in Ti.

---

DECLARATION

This thesis contains no material which has been accepted for the award of any other degree or diploma in any university, and to the best of the author's knowledge and belief the thesis contains no previously published material or that written by any other person except where due reference is made or common knowledge is assumed.

A. S. PEARCE

---

ACKNOWLEDGEMENTS

The author wishes to thank Professor D. R. Miller, his supervisor, for his help during the work.

Particular thanks are also due to Mr. G. Wood for his critical appraisal at various stages and to Mr. B. Ide for his assistance in the design and maintenance of equipment and the preparation of specimens.
