

15/9/78

AN INVESTIGATION OF THE EXCESS VOLUME OF MIXING OF n-ALKANES WITH
CYCLOALKANES

A THESIS PRESENTED BY

LYNNE DOBINSON B.Sc. (HONS.)

for the degree of Master of Science in the Department of Physical
and Inorganic Chemistry at the University of Adelaide.

Awarded March 1977

November, 1975.

This thesis is a record of research carried out in the Department of Physical and Inorganic Chemistry at the University of Adelaide, between January '73 and January '75. To the best of my knowledge and belief it is completely original work, except where due reference is made.

LYNNE DOBINSON

ACKNOWLEDGEMENT

I am indebted to my supervisor Dr. M.L. Martin for his guidance and help throughout the duration of this project.

My thanks go to Miss P. Ramos for typing this work, to Messers G. Duthie, J. Netting, A. Bowers, K. Shepherdson and J. Beard for their assistance in the construction and maintenance of all the apparatus used in this work.

I am grateful to the Australian Government for granting me a Commonwealth Postgraduate Award and the Australian Research Grants Council for supporting this work.

Finally, I would like to thank my family and fellow students, especially Mr. J.M. Symons for his invaluable assistance in the presentation of this work.
