All our newspapers which appeared from the beginning are put together in 3 different books. A few are still in Apaiang. If desired, I can send them to whom it concerns.

The
Central Pacific Equatorial Islands;

A Special Bibliography
prepared for Commission Project E.6.

This bibliography has been prepared, with the agreement of the Executive Officer for Economic Development, for the use of M. and Mme. René Catala in connexion with their work on Project E.6. It includes entries relating to geology, soil, vegetation, agriculture, fish and fishing methods, and food supply and preparation, in the area known as the Central Pacific Equatorial Islands (Gilbert, Ellice, Phoenix, Tokelau, Northern Cook and Line Groups), with special reference to the Gilbert and Ellice Islands.

2. Entries relating to other coral islands possessing similar climatic and other conditions have been included where it was considered that they had a bearing on the work on which M. and Mme. Catala are engaged. There is, in addition, a short appendix on the general question of the Structure of Coral Reefs and Atolls, which can be extended as desired by reference to the bibliography in W.M. Davis' "The Coral Reef Problem".
