

Axisymmetric Spacetimes in Relativity

S. P. Drake

Department of Physics and Mathematical Physics

University of Adelaide

Adelaide, S. A. 5005

Australia

22 July 1998

Contents

1	Introduction	6
1.1	Stationary axisymmetric spacetimes	6
1.2	Literature review	8
1.2.1	Vacuum stationary axisymmetric spacetimes	8
1.2.2	Non-vacuum stationary axisymmetric spacetimes	11
1.2.3	Numerical methods	12
1.3	Current status	13
1.4	Chaotic dynamics in the Hill's reduced model	13
1.5	Outline of chapters	15
2	An Explanation of the Newman-Janis algorithm	17
2.1	Introduction.	17
2.2	The Newman-Janis algorithm.	18
2.3	Application of the Newman-Janis algorithm.	22
2.4	Properties of metrics generated by the Newman-Janis algorithm	25
2.5	Conclusion	28
3	Generalization of the Newman-Janis algorithm.	30

<i>CONTENTS</i>	2
3.1 Introduction	30
3.2 Generalizing the Newman-Janis algorithm	32
3.3 Matching interior solutions to an exterior Kerr	35
3.4 Possible sources for the Kerr metric	40
3.5 A trial solution	41
3.6 Conclusion	46
4 Rigidly rotating perfect fluids	52
4.1 Introduction	52
4.2 Some theorems	53
4.3 Spin alignment	61
4.4 Relativistic centrifugal force	63
4.5 Conclusion	66
5 Introduction to chaos	67
5.1 Deterministic chaos	67
5.2 Attractors and attractor basins	69
5.3 Fractals	71
5.4 Lyapunov exponents	75
5.5 Chaos and computing	76
6 Chaos in special relativistic dynamics	78
6.1 Introduction	78
6.2 Formalism	81
6.3 Relativistic capture	88

<i>CONTENTS</i>	3
6.4 Fractal attractor basin boundaries	91
6.5 Dependence of fractal structure on \mathcal{F}	100
6.6 Conclusion and further work	107
7 Conclusion	109
7.1 Exact solutions to Einstein's field equations for stationary axisymmetric spacetimes.	109
7.1.1 An explanation of the Newman-Janis algorithm.	110
7.1.2 Generalizing the Newman-Janis algorithm.	111
7.1.3 Canonical form of stationary axisymmetric rigidly rotating perfect fluids.	112
7.2 The onset of chaos in the Hill's reduced model	113
7.3 Axisymmetric spacetimes	114
A APPENDIX ON ISRAEL BOUNDARY CONDITIONS	116
A.1 First junction condition	116
A.2 Second junction condition	119
B APPENDIX ON NEWMAN-PENROSE FORMALISM	121
Bibliography	126
