W11

On the Formal Integration of PARTIAL DIFFERENTIAL EQUATIONS

of the second order in two independent variables,

being a Thesis submitted for the degree of Doctor of Science

in the University of Adelaide,

by

J. R. Wilton, M.A., B.Sc.,

Assistant Lecturer in Mathematics at the University of Sheffield.

TABLE OF CONTENTS

Part 1.

Note on the solution of a certain partial differential equation.

Part 2.

Note on the solution of the differential equation $r=f(t)$

Part 3.

On the solution of an equation of the form $F(r,s,t)=0$

Part 4.

Note on the equation $s=f(z)$

Part 5.

Criteria for the success of Darboux' Method of solution of partial differential equations of the second order, in certain cases

Part 6.

Certain conditions for the success of Darboux' Method when applied to the equation $s=f(x,y,z,p,q)$

Other papers submitted:

On plane waves of sound

On the highest wave in deep water

On deep water waves

Some simple transformations of Stokes' Current function equation

Figures of equilibrium of rotating fluid under the restriction that the figure is to be a surface of revolution

A transformation of the ordinary linear differential equation of the second order

Note on the definite integrals
