

Effect of growth factors on the osteoinductive potential of
Hydroxyapatite β -Tricalcium Phosphate (HA-TCP)

A report submitted to the University of Adelaide in partial fulfilment of
the requirements of the Degree of Doctor of Clinical Dentistry
(Periodontology)

Raymond Chun Wai Chan BDS (Otago)

Declaration

This work contains no material which has been accepted for the award of any other degree or diploma in any university or other tertiary institution to Raymond Chun Wai Chan and, to the best of my knowledge and belief, contains no material previously published or written by another person except where due reference has been made in the text.

The input of the co-authors to this work was mainly advisory and I carried out the bulk of the laboratory procedures and all the writing of this manuscript.

I give consent to this copy of my thesis, when deposited in the University Library, being made available for loan and photocopying, subject to the provisions of the Copyright Act 1968.

I also give permission for the digital version of my thesis to be made available on the web, via the University's digital research repository, the Library catalogue, the Australasian Digital Theses Program (ADTP) and also through web search engines, unless permission has been granted by the University to restrict access for a period of time.

Acknowledgments

This study was supported by a grant from the Australian Dental Research Foundation.

I wish to take this opportunity to express my thanks and gratitude to a number of people for their help during this study. My greatest thanks go to my supervisor, Professor Mark Bartold, for his guidance, support, and wisdom throughout the duration of my Doctor of Clinical Dentistry program.

I am indebted to Mr Victor Marino for his energy and patience. His help and expertise in the laboratory and animal house ensured that the study progressed smoothly.

Thank you to the staff of the Department of Histology as well as to Ms Marjorie Quinn, Department of Oral Pathology for their help in the preparation of the histological sections. My thanks also go to Associate Professor Richard Logan, Department of Oral Pathology for his help in microscopy and imaging of the histological sections.

Thank you to Dr Kevin Frisken for his proofreading of the draft manuscript and to Ms Catherine Offler from the Colgate Australian Clinical and Dental Research Centre for her assistance in the final editing of this manuscript.

A special thank you goes to my dental assistant of the last three years, Mrs Yen Wong, whose tireless efforts have always gone beyond the call of duty.

Finally, I thank my partner, Dr Emma Megson for her patience, constant encouragement and unwavering support in all my endeavours.

CHAPTER 1. A REVIEW OF THE OSTEOINDUCTIVE POTENTIAL OF HYDROXYAPATITE β-TRICALCIUM PHOSPHATE (HA-TCP), ENAMEL MATRIX DERIVATIVE (EMD) AND PLATELET DERIVED GROWTH FACTOR-BB (PDGF-BB)	1
1.1 INTRODUCTION	2
1.2 OSTEOGENESIS, OSTEOCONDUCTION, OSTEOINDUCTION	2
1.3 BONE GRAFT MATERIALS	3
1.3.1 AUTOGRAFTS	4
1.3.2 ALLOGRAFTS	4
1.3.3 XENOGRAFTS	5
1.3.4 ALLOPLASTS	5
1.4 CALCIUM PHOSPHATE (CAP) CERAMICS	5
1.4.1 PREPARATION OF CAP CERAMICS	6
1.4.2 BIPHASIC CALCIUM PHOSPHATE (BCP)	6
1.5 OSTEOINDUCTION	8
1.5.1 OSTEOINDUCTION BY CAP CERAMICS	9
1.5.2 OSTEOINDUCTION BY HA-TCP	10
1.5.3 ANIMAL MODEL SPECIFICITY	11
1.5.4 STRUCTURAL INFLUENCES ON CAP CERAMIC ASSOCIATED OSTEOINDUCTION	13
1.5.5 MOLECULAR MECHANISMS OF OSTEOINDUCTION	14
1.6 COMPOSITE GRAFTS	17
1.6.1 COMPOSITE GRAFTS OF CAP CERAMICS AND OSTEOGENIC CELLS	19
1.6.2 COMPOSITE GRAFTS OF CAP CERAMICS AND GROWTH FACTORS	19
1.6.3 ADSORPTION AND RELEASE KINETICS OF GROWTH FACTORS ON CAP CERAMICS	21
1.7 ENAMEL MATRIX PROTEIN DERIVATIVE (EMD)	22
1.7.1 EMDOGAIN®	22
1.7.2 MOLECULAR AND CELLULAR EFFECTS OF EMD	23
1.7.3 EFFECT OF EMD ON OSTEOBLASTIC CELLS	24
1.7.4 EFFECT OF EMD ON PLURIPOTENT MESENCHYMAL STEM CELL DIFFERENTIATION	27
1.7.5 OSTEOINDUCTIVE POTENTIAL OF EMD	27
1.7.6 OSTEOPROMOTIVE EFFECTS OF EMD	28
1.7.7 CLINICAL USE OF EMD	30
1.7.8 COMPOSITE GRAFTS CONTAINING EMD	30

1.8 PLATELET DERIVED GROWTH FACTOR (PDGF)	32
1.8.1 EFFECT OF PDGF IN WOUND HEALING	33
1.8.2 EFFECT OF PDGF ON FIBROBLASTS	34
1.8.3 EFFECT OF PDGF ON OSTEOBLASTS	35
1.8.4 <i>IN VIVO</i> EFFECTS OF PDGF	38
1.8.5 COMPOSITE GRAFTS CONTAINING PDGF	39
1.8.6 CLINICAL RESULTS WITH PDGF-BB AND CAP CERAMICS	42
1.9 CONCLUSIONS	43
1.10 REFERENCES	46
CHAPTER 2. THE EFFECT OF GROWTH FACTORS ON THE OSTEOINDUCTIVE POTENTIAL OF HYDROXYAPATITE TRI-CALCIUM PHOSPHATE (HA-TCP)	86
2.1 ABSTRACT	87
2.2 INTRODUCTION	89
2.2.1 ENAMEL MATRIX DERIVATIVE (EMD, EMDOGAIN®)	92
2.2.2 PLATELET DERIVED GROWTH FACTOR-BB (PDGF-BB)	94
2.2.3 COMBINATION OF CAP CERAMICS WITH EMD OR RHPDGF-BB	96
2.3 MATERIALS AND METHODS	99
2.3.1 ETHICS APPROVAL	99
2.3.2 ANIMALS	99
2.3.3 PREPARATION OF HA-TCP CERAMIC	99
2.3.4 PREPARATION OF GROWTH FACTORS	100
2.3.5 IMPLANTATION PROCEDURE	100
2.3.6 EXPERIMENTAL GROUPS	101
2.3.7 RETRIEVAL SURGERY	102
2.3.8 RADIOGRAPHIC EVALUATION	102
2.3.9 HISTOLOGICAL EVALUATION	103
2.3.10 STATISTICAL ANALYSES	108
2.4 RESULTS	108
2.4.1 SURGICAL AND POSTOPERATIVE COMPLICATIONS	108
2.4.2 RADIOGRAPHIC EVALUATION	109
2.4.3 HISTOLOGICAL EVALUATION	113
2.4.4 QUALITATIVE ANALYSIS	114
2.4.5 HISTOMORPHOMETRIC ANALYSIS	128
2.5 DISCUSSION	134
2.5.1 EXPERIMENTAL DESIGN	134

2.5.2 RADIOGRAPHIC FINDINGS	135
2.5.3 HISTOLOGICAL FINDINGS	135
2.5.4 INFLAMMATORY RESPONSE	136
2.5.5 ENCAPSULATION/FIBROSIS	137
2.5.6 EFFECT OF PARTICLE SIZE AND RESORBABILITY ON SOFT TISSUE REACTION	138
2.5.7 VASCULARISATION	139
2.5.8 ADIPOSE TISSUE	141
2.5.9 BLACK MATERIAL	142
2.5.10 COMPARISONS TO OTHER STUDIES	143
2.5.11 CONCLUSIONS AND FUTURE DIRECTIONS	147
