Chapter One:	1
Multimodal Texts and English Language Proficiency	
1.2 Background of the Study	7
1.2.1 English Language Proficiency	7
1.2.2 Needs Analysis	9
1.2.3 Technology and Multimodal Learning	11
1.2.4 The Emergence of Problems	13
1.3 Statement of Problems	14
1.3.1 Lack of Common Definition of Proficiency	14
1.3.2 Varying Levels of Proficiency	15
1.3.3 Needs Assessment	19
1.3.4 Lack of Acknowledgement for Learners' Technological Experiences	20
1.4 Comments on the Aims and Objectives of the Research Study	21
1.5 Significance of the Study for Language Teaching and Learning	23
1.6 A Personal Perspective	24
Chapter Two:	26
Review of Previous Research into the Acquisition of English Language Proficiency	
2.1 English Language Proficiency	27
2.2 English Language Proficiency Levels	32
2.3 Literacy	33
2.4 Competence	38
2.5 Needs Analysis	40
2.6 Previous Research on Needs Analysis	42
2.7 Summary	46
Chapter Three:	48
Technology and Multimodal Texts	
3.1 Technology	48
3.2 Information Technology	49
3.3 Information Technology in the Malaysian Education System	52
3.4 Multimodal Texts	54
3.4.1 Multimodal Technologies Accessible to Students in Malaysia	58
3.5 Previous Research on Technology and Multimodal Texts	59
3.6 Theoretical Framework	63
3.6.1 Social Constructivism	64
3.6.2 A Modelling Approach	66
3.7 A Theoretical Framework	67
3.7.1 The Causal Framework	69
3.8 Summary	70

Chapter Four:	73
Designing the Study	
4.1 The Design of the Study	73
4.1.1 Research Site	74
4.1.2 The CE1 Course	76
4.1.3 The Course Participants	78
4.2 Design of the Sample	78
4.2.1 Research and Ethics Committee Approval	79
4.3 Analysis Techniques	80
4.4 The Students and their Characteristics	82
4.5 Pilot Study	91
4.6 Summary	92
Chapter Five:	94
Problems of Scaling and Measurement	
5.1 Measurement	94
5.2 Scales and Measurement	95
5.2.1 Types of Variables	96
5.3 Scores	97
5.4 Scaling Procedure	98
5.5 Missing Values	99
5.6 Factor Analysis	100
5.7 Confirmatory Factor Analysis (CFA)	101
5.8 Rasch Measurement	102
5.9 Summary	104
Chapter Six:	106
Problems of Analysis	
6.1 Examining Causation	106
6.1.1 Path Analysis	106
6.1.2 Structural Equation Modelling (SEM)	108
6.1.3 Confirmatory Factor Analyses	109
6.2 Analysing Change	110
6.2.1 Hierarchical Linear Modelling	110
6.3 Summary	112
Chapter Seven:	114
Collecting Information and Data	
7.1 Background of Questionnaires	114
7.1.1 Needs Analysis Questionnaire	114
7.1.2 Multimodal and Language Proficiency Questionnaire	116
7.2 English Proficiency Test	117
7.3 Interviews	120
7.4 Documentation	122
7.5 Open-ended Written Statements	122
7.6 Validity and Reliability of Instruments	124
7.7 Validation of Instruments	126
7.7.1 Needs Analysis Questionnaire	126

7.7.2 Multimodal and Language Proficiency Questionnaire	127
7.8 Summary	129

ABSTRACT

This research study titled ‘The Impact of Multimodal Texts on the Development of English language proficiency’ is conceived from three problem statements: (a) Is the Communicative English One (CE1) course effective? (b) Is the use of multimodal technologies useful? and (c) Is it useful to have knowledge about students’ learning needs in the design of a course, as well as taking cognisance of their needs in the planning? The CE1 course guided this research study. A sample of 400 students was drawn out of a total of 1300. Students’ English language proficiency was assessed before they started the course, at the end of the course and three months after they had completed the course. An English Proficiency Test (EPT) was administered on three occasions to assess change in performance with respect to learning English. Information about students’ background characteristics, in addition to the processes involved in the course and those related to the course was collected. The English Proficiency Test was used to assess the students’ performance on the course and the data were analysed with Partial Least Squares Path Analysis to examine the mediating effects that influenced outcomes. Hierarchical Linear Modelling was used to examine the moderating effects that influenced the outcomes. Thirteen students were also interviewed to obtain an in-depth perspective of the situation. Students’ written responses to open-ended questions were also analysed.

The key findings are: (a) multimodal technologies are effective in English language learning, (b) there is a gain in performance of students who enrolled for the CE1 course with low English proficiency, (c) while the girls do not lose, the boys increase noticeably in performance, (d) students from the East Coast region do not progress as rapidly as other regions, (e) students in some faculties gain more than students in other faculties and (f) there are faculty differences in the benefits obtained from the course. The implication of this research study to the theory of language learning is that multimodal technology increases the informal learning of English as both a second and foreign language alongside formal instruction in the classroom. Thus the use of technology can supplement the learning of a second and a foreign language in ways similar to the learning that takes place within the community in second language learning. This research study indicates that there are important benefits from the application of multimodal technologies that can be used for foreign language learning as well as for broadening second language learning.

Key words: English language proficiency, Multimodal technology, Latent variable path analysis, Multilevel Modelling, Change analysis

DECLARATION

This work contains no material which has been accepted for the award of any other degree or diploma in any university or other tertiary institution and, to the best of my knowledge and belief, contains no material previously published or written by any other person except where due reference has been made in the text.

I give consent to this copy of my thesis, when deposited in the University Library, being made available in all forms of media, now or hereafter known.

ACKNOWLEDGEMENT

No research student writes a thesis without enormous help from others. I have drawn insights and ideas from many sources such as books, journals, seminars and lectures. I have built upon these ideas to support my study: *The Impact of Multimodal Texts on the Development of English Language Proficiency*. Writing this thesis has certainly been a journey of discovery. I am indebted to many people whom I would like to acknowledge for having stood by me during my stint as a research student.

I am forever grateful to my co-supervisor Prof. John P. Keeves, who was unselfish with his time and patience. My understanding of this subject was affected significantly by his invaluable advice, insightful comments and suggestions on my various drafts. This thesis would not have materialised without him. It was an honour having him as a supervisor.

I would also like to thank my principal supervisor, Dr. I Gusti Darmawan for guiding me with the research methods employed and for the detailed analyses of the data.

To my partner Andrew Tarnowskyj who was a pillar of strength during my many trials and tribulations. Thank you for standing by me and for being my friend during the darkest days.

To my family in Malaysia, my mum for her never ending words of encouragement and support. My brother and sisters, who did everything possible to make this journey a little less difficult. I thank you for your love, kindness and support.

To my colleagues at the Professions Learning Centre, Nishani, Athena, Marg and Isabella who lent me the use of their offices and who always had a kind word to say when things did not go well. I am forever grateful for having had the chance to meet all of you and for your friendship. You truly are a great lot.

Finally, thank you to the CE1 students who took part in this study and for letting me into your student lives.

With all these people I share my work.
