

May 11, 1939

Dear Aitken,

I expect you will have received by now Sukhatme's papers, about which I will hope to hear from you later. Perhaps the Genetical Congress in Edinburgh will make a good occasion for talking the whole material over. As you see, he has included some of no great weight, done while he was in the Statistical Department here, but I think you may think well of his later papers.

Yours sincerely,
