Oct. 25, 1932.

Dr R. A. Fisher.

Dear Dr Fisher,

I enclose duplicates of the tables of Tchebycheff polynomials and differences, terminal and centred, which I described in my letters to you. I am sorry the duplicating machine we use has not made as clear a job of the figures as I could have wished.

These may not be of any service to you, but you may make any use of them you please. I do not feel entitled to any proprietary rights over numerical values of polynomials.

Yours sincerely,  
A. C. Aitken
