

8th November, 1958.

Dear Andrade,

I think you may like to see what I say about Charles Singer,  
the Historian of Science.

Sincerely yours,

Enc.

Prof. E. N. da C. Andrade, F.R.S.

A short history of science - C. S. Eager

p 377

Lamarck's . . . . ., he enunciated the 'law of use and disuse', inseparably connected with his name.

I believe he enunciated no such law, but has a great deal about the "sentiment intérieur"

i.e. the will or desire of the animal,

Use and disuse were proposed by Darwin as a probable cause of heritable variations. This notion <sup>is a part of</sup> ~~has often been associated~~ to neo-Lamarckism, the doctrine, more general than Lamarck's, of the inheritance of acquired characters.
