

4.5.36.

My dear Fisher.

Thanks for your letter. I should like to lunch with you although it is really your turn to lunch with me. If I lunched at the Laboratory or near by, I might have the chance to see Pearson & find out if his people would have any objection to my reproducing the pedigree. I can pull up till Friday next. Would that day suit you.

I don't think Chance has any feeling against the second stud-clubship. He is only pointing out to the Council that they will

exceed the figure of £2500 fixed last  
November & if so he wants a definite  
resolution. I imagine it would be  
easier to get the resolution if the  
subject of research was one which  
appealed to the Council. I think  
it would be doubtful that the  
Council would want to disturb  
your Committee's appointment. I hope  
the letters may be circulated by  
the time we meet.

Yours sincerely

BS Brewinwell.
