

14 February 1933.

A.D. Buchanan Smith, Esq., M.A.,
Institute of Animal Genetics,
King's Buildings,
West Mains Road,
EDINBURGH.

Dear Buchanan Smith:

I return the table, in case you have not too many copies. The phenomenon, I mean the difference in the mean squares, looks rather convincing, but there is still room for discussion of the causes. All comparisons are I think within the same herds, though not always for the same year. I wonder if there would be anything in comparing test of the same year, with tests of one year, or two years apart. But it is absurd for me to make suggestions which only mean more work.

Yours sincerely,
