

11th May, 1954.

Dear Mr Hanson,

Thank you for your letter about the Philosophy of Science Club.

I am glad you have a good programme for the coming session, and should be very glad to speak after Professor Braithwaite on, I suppose, topics closely connected with Inductive Inference. His chosen title seems to be a good peg on which to hang a number of possible lines of discussion. At present the 22nd November seems a suitable date.

Sincerely yours,
