

4th. June 1947.

Dear Darlington,

I am now enclosing fair copies of the papers by myself, Lyon and Owen, and also the one by Margaret Wright, so that there may be no danger of delay in publication. I have not heard whether Muldal has made any progress with the cytology, but of course if he found confirmatory evidence it would be appropriate to have a third communication from him on this aspect of the subject. I have no doubt you will let me know as soon as there is any news.

Yours sincerely,

4th, June 1937.

Dear Hogben,

I am enclosing a recent book by Muller, Little and Snyder in the hope that you may be inclined to do a review of it for our new journal, Heredity. If you cannot manage this I should be obliged if you could send it back at once, as we might as well get a review done soon.

Yours sincerely,
