

15th February, 1957.

Dear Professor Dingle,

Thanks for your letter. I am, of course, not a cosmologist, and still less a relativist, and of the questions with which you confront me I am sure that number (1) is wrong in itself, and so far as I can judge would be repudiated by McCrea.

I am sure, however, that you exaggerate when you say that the answer to this question will silence you completely and for ever.

Sincerely yours,
