

30th. October 1946.

Dear Professor Dingle,

I am glad you are taking up the position of the International Academy for the History of Science. So far I think I have not been associated with the Academy, but this subject interests me greatly, and I should be glad to do what I can to help. I enclose a slip with the dates on which I could attend the meeting you have in view, and shall come if I find it at all possible.

Yours sincerely,
