23.5.58

Dear Mr Cirker,

I am sending back the proofs of "The Genetical Theory" at once because there are, as you will see, a few things to attend to, and I do not want to delay the edition further. If it does not come out now it might as well be never. I have put in a few details under 'By the same author' referring to four other books instead of one, and there is a patch of new material I think in the fourth chapter where the symbol \underline{n} has come in in place of \underline{x} , no doubt through my fault which I should now be anxious to correct. Some pages seem to be missing, but that cannot be helped.

Sincerely yours,

The new material reads very well

Encs.

23.5.58. Regret proofs have been delayed
