

Letter 2 _____ 1935

Dear Doctor Fisher.

I wish to acknowledge with thanks the letter carrying information as to the publication issued from the Galton Laboratory. I have submitted it to the Institut des Tabacs, suggesting that they subscribe.

I am preparing a review of Statistical treatment of plant pathology data. Of course I have been getting much inspiration from your books.

would you object to my reproducing essentially Tables 38, 39, 46, 47, 48, 49, 52 from "Statistical Methods," due reference being of course given.

The M.S.S. is being presented for publication in the renewed Annales des Epiphyties, which is the

official publication of our Department.

I am preparing also a review of Statistical
Treatment of Agronomic Data for the Review
of Agronomy which I am scheduled to give
for publication Feb. 30 in *Revue Generale
des Sciences*.

Most truly yours

J. LUPHENY
