March 19th 1937.

DEPARTMENT OF
ZOOLOGY AND COMPARATIVE ANATOMY,
UNIVERSITY MUSEUM, OXFORD.

Dear Fisher,

Many thanks for your letter.

Dowdall has now been through the data, making the correction you suggested. You had made the method so clear that there is no need to bother you over it again. But I hope the information we get next July will be more useful, and it will be of great value to have

your opinion on it. Then, we shall use a system by
which releases and recaptures can be dated.

I hope the Genetical Society meeting
was well attended. I wish I could have been there:
it must have been very interesting. I shall be in
London now or here this vacation, and shall
hope to see you.

Yours sincerely,
E. B. Ford
