

20 WOODSTOCK CLOSE,  
OXFORD.February 26<sup>th</sup> 1936.

My dear Fisher,

Thank you for your most helpful letter, full of interesting suggestions. We will certainly try to get data on the nature of the Polish comb in the way you suggest, now that you have raised the point.

We may not have an opportunity to do this at first, as our accommodation and room is very limited. Two of our pens will be taken up at the start in obtaining normal sitting and Polish chicks for de Beer's embryological material, so that

only one or two crosses can be made  
this year.

Naturally I am very  
keen to see you and talk the  
matter over. Also to look at the  
interesting work you have on hand -  
which you told me about in a  
former letter. Are you likely to  
be in London next Saturday (29<sup>th</sup>)  
for the Senetical Society? If so,  
and you have any time free in  
the morning, I could come up and  
get to you whenever it suits  
you from 11:30 onwards. (My  
train gets to Paddington at 11:10).

Naturally don't allow any arrangements  
on my account, or come up to  
London unless you see doing so  
in any case. However, if really  
convenient for you, it would be  
a great pleasure to me.

Thank you for the  
address, and for your most  
helpful letter.

Yours sincerely,  
L. B. Ford
