

22nd November 1933.

Dr. E.B.Ford,  
Department of Zoology  
and Comparative Anatomy,  
University Museum,  
Oxford.

My dear Ford,

I am enclosing card for the dinner  
on November the 30th.

With respect to the Eugenic Society,  
I expect to see Bramwell fairly soon, and hope  
to impress on him what a ruinous impression  
his reluctance to admit Scientific Members is  
bound, if persisted in, to make on Scientific  
Members.

Yours sincerely,
