

Thursby.
Carlisle.
Cumberland.

July 10th 1933.

My dear Frides,

Many Thanks for your letter which I received this morning, sent on from Oxford. I hope you are quite fit again.

I am afraid I have to remain in Cumberland until July 27th. I am sorry I cannot get back before, but this is a long-standing fixture. But I hope to see you soon after my return. I am delighted to hear that you are going to the Gallon Laboratory. It seems to me a fine thing for Genetics and Eugenics in this

Country; I am very glad about it indeed — and this quite apart from the satisfaction which one naturally feels at the success of one's own friends. It will be a great pleasure and an immense interest to hear something of your programme.

I am just about to be overwhelmed by the Higher Certificate; a dreadful business while it lasts!

Yours sincerely,
P. B. Ford
