

30th April, 1952.

My dear Henry,

Thanks for sending me Komai's paper which I found interesting and promising of something worth publishing at least when he can get some breeding done. What a lot we have to do to counteract the harm done by Universities who teach Genetics on the assumption that breeding work is unnecessary.

I am delighted that you find it possible now to make me a visit and shall look forward to seeing you on Friday, May 9th as early as you can make it.

Sincerely yours,
