

2nd. May 1949.

My dear Hen

Thank you for looking after the primrose. We could certainly do something with it here.

By the way, you have never told me what I suppose is now decided, namely, the result of the election of President^[*]. Only the other day I found that Mather was equally in the dark. Has anything held the procedure up?

Yes, I am sure all that is needed now is for you to look at what we have written about Wright, with a view to publishing a note with which later you will feel fully satisfied. Of course I should be glad to discuss with you any points where Wright's attitude seems to be doubtful, or has been vacillating. I do not myself feel in any doubt as to what concerns our paper on dominula.

Yours sincerely,

[* President of the Zoological Society] - J.H.B.
