

March 28, 1939

My dear Gini,

Many thanks for your letter. I quite appreciate your explanation of the appearance of Baker's article. Since writing to you I have also obtained his address in California and written to him direct.

I am enclosing the article by Romanowski, also a recent brief resumé of my work by the Indian Statistician, Mahalanobis, which he compiled on the occasion of my presiding at the meeting of the Indian Statistical Institute last year.

By the way, his Journal, Sankhya (The Indian Statistical Journal) has been recently containing some really good work.

It was good of you to write to Stevens, letting him know of your article in "Genus". Stevens is still with me, and it is a real encouragement when people like yourself take notice of his work.

Yours sincerely,
