DEMOGRAFICHE ED ATTUARIALI

IL PRESIDE

Roma (30) 18th January 1937.XV

10, Via delle Terme - Tel. 43-138

Dear Dr. Fisher :

I think that you will be back from your long american trip. The enclosed picture will remember to you of the Harvard Tercentenary. It is a pity that Mrs. Fisher was not with you in that moment.

Herewith you will find also a list of your publications from 1912 till 1934 that I have not and that I would be very glad to have in my Library. I will be very obliged to you for the kind sending of a copy of them if available.

You certainly remember that at Cambridge you said to me that you have a typewritten English translation of a russian article by Romanowsky regarding your works and you very kindly offered me to send it. If the copy is always available, I will be extremely grateful to you for the kind sending.

Please remember me to Mrs. Fisher and with the best greetings for the new year, I am

  
(Corrado Gini)

Prof. R.A. Fisher  
Milton Lodge  
HARPENDEN, Herts., England

9 have sent the objects we can  
spare 17/1/37

1912

- 0 - On an absolute criterion for fitting frequency curves. Messenger of Mathematics, XLI, 155-160.

1915

- 0 - Frequency distribution of the values of the correlation coefficient in samples from an indefinitely large population. Biometrika X, 507-521.

1924

- 5 left. - A method of scoring coincidences in tests with playing cards. Proceeding of the Society for Psychical Research, XXXIV, 181-185.

1925

- 0 - Sur la solution de l'équation intégrale de M.V. Romanowsky. Comptes Rendu de l'Académie des Sciences, CLXXI, 88-89/
- ✓ 27 ← - (With P.R. Ansell) Note on the numerical evaluation of a Bessel function derivative. Proceedings of the London Mathematical Society, XXIV, 54-56.

1926

- 0 - Periodical health surveys. Journal of State Medicine, XXXIV, 446-49.
- 0 - "On the random sequence." Quarterly Journal of the Royal Meteorological Society, LII, 250.

1927

- 37 - (with H.G. Thornton) On the existence of daily changes in the bacterial numbers in American soil. Soil Science, XXIII, 253-257.
- 0 - (as Secretary) Recommendations of the British Association Committee on Biological Measurements. British Association, Section D, Leeds, 1927, pp. 13.
- 5 left. - (with T. Eden) Studies in crop variation. IV. The experimental determination of the value of top dressings with cereals. Journal of Agricultural Science, XVII, 548-562.
- 43 - Triplet children in Great Britain and Ireland. Proceedings of the Royal Society of London, B, CII, 286-311.

1928

- 47 - Further note on the capillary forces in an ideal soil. Journal of Agricultural Science, XVIII, 406-410.
- 53 - (with E.B. Ford) The variability of species in the Lepidoptera, with reference to abundance and sex. Transactions of the Entomological Society of London, LXXVI, 367-384.
- 0 - On a property connecting the  $\chi^2$  measure of discrepancy with the method of maximum likelihood. Bologna, Atti del Congresso Internazionale dei Matematici, VI, 94-100.

1929

- 5-8 - (with T. Eden) Studies in crop variation. VI. Experiments on the response of the potato to potash and nitrogen. Journal of Agricultural Science, XIX, 201-213.
- 0 - The statistical method in psychical research. Proceedings of the Society for Psychical Research, XXXIX, 189-192.

./.

73 1930

- The evolution of dominance in certain polymorphic species. The American Naturalist, LXIV, 385-406.
- (with J. Wishart) The arrangement of field experiments and the statistical reduction of the results. Imperial Bureau of Soil Science: Technical Communication n°10, 24 pp.

3 left. 1931

- The evolution of dominance. Biological Reviews, VI, 345-368.
- (with J. Wishart) The derivation of the pattern formulae of two-way partitions from those of simpler patterns. Proceedings of the London Mathematical Society (Series 2), XXXIII, 195-208.
- The sampling error of estimated deviates, together with other illustrations of the properties and applications of the integrals and derivatives of the normal error function. British Association: Mathematical Tables, vol. I, XXVI-XXXV.

1932

- (with F.R. Immer and C. Tedin) The genetical interpretation of statistics of the third degree in the study of quantitative inheritance. Genetics, XVII, 107-124.

1933

- On the evidence against the chemical induction of melanism in Lepidoptera. Proceedings of the Royal Society of London, B, CXII, 407-416.
- Number of Mendelian factors in quantitative inheritance. Nature, CXXXVIII, 400.

1934

- (with C. Diver) Crossing-over in the land snail *Cepoëa nemoralis* L. Nature, CXXXIII, 834.
- Professor Wright on the theory of dominance. The American Naturalist, LXVIII, 370-374.

I hope you  
 will find everything  
 he wants
