

24 September 1943

Dear Gray,

About moving in to the room which you have kindly allotted to me for the time in the Zoology building, I suppose this will already be equipped with tables and chairs, and perhaps some shelf and cupboard room.

I shall be bringing a large number of pamphlet cases, about 350, and shelves built for them, which when things are more sorted out I hope to use for mouse-cages at Whittingehame Lodge.

Could you let me know about the electric supply, whether alternating or direct and the voltage, or whether more than one kind of juice is available in this room?

Yours sincerely,

Phone 2708
