

12th November, 1955.

My dear Harland,

Many thanks for your note. Several people have raised this question of three medals, but it is ^{not} unprecedented, for among living Fellows C.T.R. Wilson is down as having received three, and probably it has been done on previous occasions.

I should much wish to keep touch with you in the more difficult matter of candidates for election to the Society. We ought to make it our business to recognize and promote genetic talent, and indeed the subject has suffered somewhat from the election, under the name of genetics, of people with essentially other interests. Will you be up for the meeting on the 19th?

Sincerely yours,
