enclosed
letter to Dr. Haworth
paragraph describing paper
to be published in Nature

1st. January, 1943.

Dear Sir Arthur,

As the enclosed letter to Dr. Haworth will show, I am looking for the possibility of growing one of Darwin's botanical favourites, *Lythrum salicaria*, experimentally, either in his own garden or in the immediate neighbourhood. I have not yet heard from Haworth but as you know me better than he does, I hope you may be willing to say a word of friendly support for the kind of thing I am aiming at.

Yours sincerely,
