Dear Kendall,

I am afraid you are right about the "Moments of moments" paper. I fancy they ran out some time ago.

It is great news that you have got a satisfying statement proving the rules for finding cumulants of  $k$ -statistics. I should be delighted to put this into the Annals, following and crowning your previous paper in that journal.

I have noted that you are not wanting to order any off-prints beyond the 25 we give free.

Yours sincerely,
