

11th February, 1953.

Dear Dr. Linder,

I have your note of February 6th referring to an early paper by Fisher and Gray. Annals of Eugenics VIII, page 74. The materials for our study were drawn from Boas's book referred to in the first paragraph, published I think in 1912, and I am not clear to what you refer in speaking of the "calculations of the regression on age". I forget whether Boas gives expectations for age in the case of these fraternities.

Sincerely yours,
