[March, 1960]

St. Diego
 Sr. Maria Diaz Lopez, and colleagues,
 Dear Sirs,

I have received your cordial letter of Jan 20, in the name of the Class 1959 of the Bachelors in Statistical Science informing me of my election as Patron of the Class.

I very sincerely appreciate the kindness of this action. Indeed, if there were still an Emperor at Petropolis he could not I believe have done me a greater Honour! The future of Statistics is dear to me, and its future is in your hands.

My delay in replying is easily explained. I ~~was~~ have been in the United States during February and part of January, and I am now living in Adelaide, S. AUSTRALIA. No further I suppose from Rio than in Cambridge, but the air routes via Antarctica have not yet been opened, so, had I known, my best plan would have been to fly from the U.S.

However, my spirit flies faster, and will surely be with you in your post-graduate studies.

I enclose two trifling photos, they are all I have at hand
 Sincerely yours
