

4 July 1933.

A.G. Lowndes, Esq.,  
Marlborough College,  
Wilts.

My dear Lowndes:

You are a perfect Skye-pilot. If you have a map and a 1-inch geological sheet to spare I should like to give some time to them and could not possibly do it better than now when I am not allowed to work.

If I park George with his aunt during the B.A. I can arrange for him to meet us in Glasgow, Wednesday, September 13th. I expect this is the day you had in mind.

It would be a real pleasure to me to hear something of the geology of the place, especially if yours is a heterodox variety, though I suppose this is too much to hope for.

Yours sincerely,
