

March 1, 1938

Dear Lowndes,

I was interested in your letter to "Nature". About Artemia, Miss North has put aside ~~some~~ 50, of which the survivors will be ready to send about the middle of this month. Let me know what day of the week suits you best, so that they can be sent off when you want them. I do not see what there is in your work to annoy Calman, unless it is his general dislike of experimental biology.

Yours sincerely,
