

October 17, 1957

Professor H. W. Norton
Department of Animal Science
University of Illinois
Urbana, Illinois

C My dear Horace,

Thanks for your letter. On consideration I had better fly back Tuesday morning, though the special plane to Chicago was a great thought.

O I have just been superannuated from the Balfour Chair of Genetics in Cambridge; at present I am visiting professor at Michigan State at East Lansing. I am President not Master of Cañus, this being a non-stipendiary office something like official senior fellow, with pleasant duties in respect to hospitality. I should like to see Luria and Rhodes, and talk to the statistics group.

P Would smoking and lung cancer amuse your group with some such title as Experiment and Observation?

Sincerely yours,

Ronald A. Fisher
