

18th October 1933.

Professor K. Pearson,
Department of Zoology,
University College,
W.C.1.

Dear Professor Pearson,

I have been commissioned by the tea club at the Biometric Laboratory, as I hope the two new departments will continue jointly to be called, to invite you to become an Honorary Member. Your acceptance of this modest offer would, I know, give us all a great deal of satisfaction, as it gives me personally to extend it to you.

As you know, we meet quite informally and I am looking forward to the possibility that you may from time to time find it convenient to join us.

Yours sincerely,
