

27th October, 1953.

My dear Rob,

I see the Lecuwenhoek Lecture is on November 5th and the speaker proposes to deal with the virus particles within the cell, so perhaps expanding the story I glanced at in my Croonian Lecture, speaking then from a genetical standpoint. Consequently I should like to go and wondered whether you would care to join me and dine with the Club at the Athenaeum afterwards.

Sincerely yours,
