

11th March, 1952.

My dear Rob,

You know it was as much pleasure to us as it could have been to you and I do hope you will find frequent occasions for visiting us. I find we have Matta's offprint which I enclose with this and return at the same time Otto Hartmann's letter, which I am sure you will want to keep if not to replicate.

Yours sincerely,

If there is anything in Lu and Li as Tage Kemp seems to think, should it not settle Gubb's theory of two factors. I have seen no data yet.

R.A.F.
