

12th November, 1951.

My dear Rob,

Thanks for sending me your last joint note for Heredity. After the first two words "The results", I suggest one might insert "to date", to indicate that this is a progress report of work which it is hoped will be continued. In fact, your bibliography and score table are both fit to stand until brought up to date at some later time. Linkages are so elusive and slippery as cells that one often wonders whether there are other causes of association, perhaps additional or accidental factors, in addition to transmission in the same linkage group.

I am sending your paper in at once to Darlington.

Looking forward to seeing you both on the 30th.

Yours sincerely,
