

30th. October 1947.

Dear Rob,

Thanks for your letter about the proposed meeting in Geneva, which sounds like being useful. At the end of last month Diamond put before me the agenda of a two or three day meeting in Washington, where they hoped to thrash out the whole thing in about six sessions, and where, of all people, Sewell Wright was to expound the CDE system.

I think it is splendid if you have four people on the continent who fully understand the Rh groups. It sounds like quite a good do.

Yours sincerely,
