

11th. December 1945.

My dear Race,

I have been asked by a certain Dr Sherman G. Garrett of Illinois for offprints on the QDE notation of the rhesus factor.

The only references I have thought of so far are to your letter in Nature of June 24th. 1944 and the short report on 44 families in the Annals of Eugénics last November. I wonder if you could let us have offprints of these to send him and of any others which you can recall as throwing light on the development of this theory or notation.

Yours sincerely,
