

23 November 1932.

Dr. J. Rasmusson,
Sveriges Utsädesförening,
Svalöf
Sweden.

My dear Rasmusson:

Thanks for your letter, and enclosed account. I will settle up with the Shipping Agency with pleasure, and would do so without your overpaying the amount.

I am glad you enjoyed your hunt after β . I found the Genetics Congress most enjoyable especially the voyage across where I had the opportunity of meeting adequately some foreign geneticists, and especially Winge, who I now realise is one of the ^{very} best.

America was extremely hot, but the Congress was delightful owing to the excellent exhibits, which did away with the necessity of too much sectional paper reading, and gave good opportunities for personal discussions. Later I saw the eclipse, — yes, actually saw it — and stayed awhile in succession with Little, Morgan and Dunn. And so home through a great storm!

Yours sincerely,
