

December 30th, 1935

My dear Rasmussen,

I have your letter of December 21st and shall be delighted to see you if you can come over here in January. I shall be available nearly all the time at the Galton Laboratory, but you must also visit us some Saturday or Sunday at home, as Mrs Fisher and the children will want to see you again.

Naturally I shall be immensely interested in your programme at Hillesbög, more especially as I know your ideas will be influential in being followed elsewhere.

I do not know van Ginneken's work, and have, unfortunately, now no Dutchman at the Laboratory, though a Mathematician, Dr Koopmans, was here up till Christmas, so we must puzzle out what van Ginneken has done together, but I am not in any sense a linguist.

Yours sincerely,
