

November 27th, 1935

Dear Dr Sjögren,

I have been through your final press proofs, accepting a number of suggestions on points of grammar and a few numerical alterations. The only points I have not dealt with are those on page 308 requiring the date of the reference to Luxemburger ^{about} in the average population of Munich, a query as to what work of Schulz is referred to for the year 1928, and which paper of Bürger gives the average population of Allgäu, also the page reference Weinberg, 1927, on page 315.

I had hoped to save the delay of sending the proofs again to you for final revision, but you will probably prefer to deal with these points yourself.

Yours sincerely,
