

December 29th., 1924.

Prof. Dr. Hj. von Feilitzen,
Centralanstaltens Jordbruksavdelning,
Experimentalfaktet. [Sweden]

Dear Prof. Feilitzen,

I enclose a copy of "Student's" paper, which I can easily spare, since he sent me a number of copies, on account of the fact that some of the formulae were arrived at by myself and communicated to "Student" for use in this paper, see note p. 283.

I am much interested to hear of Prof. Oden's appointment, please give him my kindest remembrances when you see him, and accord my best wishes for the coming year.

Yours sincerely,

(R.A. FISHER)!
