

**THE UNIVERSITY OF**  
**Adelaide**

**CALENDAR VOLUME II**  
**Handbook of Courses**

**1999**

THE UNIVERSITY OF ADELAIDE

Australia

## **address for correspondence**

General correspondence should be addressed to the **Vice-Chancellor**

Correspondence about courses (and related matters such as admission, examinations, scholarships and prizes), educational matters generally to the **Director, Staff and Student Services**

Correspondence about financial matters, and matters relating to buildings and grounds to the **Director, Finance and Infrastructure**

Correspondence about personnel matters and staff appointments to the **Director, Human Resources.**

*The University's postal address is:*

The University of Adelaide  
Australia                    5005

*telephone:* 61 8 8303 4455

*freecall:* 1 800 061 459

*facsimile:* 61 8 8224 0464

*email:* sio@registry.adelaide.edu.au

*Internet:* <http://www.adelaide.edu.au/home.html>

## **the Arms of the University**

The heraldic description of the Coat of Arms  
is as follows:

Per pale Or and Argent an Open Book  
proper edged Gold on a Chief Azure  
five Mullets, one of eight, two of  
seven, one of six and one of five  
points of the second, representing  
the Constellation of the Southern Cross;  
and the Motto associated with the Arms is

**Sub cruce lumen**

'The light (of learning) under the (Southern) Cross'

# Foreword

The University of Adelaide publishes the following official publications:

## Calendar Volume I

Published biennially in May

General information, including:

The University Act, Principal Officers of the University, Statutes, Standing Orders of the Senate, The Elder Conservatorium of Music, Institutions, Foundations and Colleges of the University, Public Lectures and Courses, Service Departments and Divisions of the University, Scholarships and Prizes, Societies Associated with the University.

## Calendar Volume IA

Published biennially in February alternating with Volume I

The Almanac, Membership of Council, Committees, Faculties and Boards, Staff (at 1 January), Amendments made to Volume I during the previous year.

## Calendar Volume II

### Handbook of Courses

Published annually in October of previous year

Regulations, General Course Rules, Specific Course Rules and Syllabuses of courses.

*cost in 1999*                    \$30 including postage

*student price:*                \$15 excluding postage

## Annual Report

Published annually in September of the following year

Available from the Public Relations and Marketing Office.

## Research Report

Published annually in October of the following year

Available from the Public Relations and Marketing Office.

Research grants awarded, staff bibliography.

## Financial Statements

Published annually in August of the following year

Available from Accountant.

## Statistics

Published annually

Staff statistics, student statistics by subject and course.

## External Studies Brochures Faculty of Arts

Published annually in October of previous year

Details of courses available (free of charge) from the Flexible Learning Centre, The University of South Australia, Underdale Campus.

## Calendar Volume IV

### Student Guide and Timetables

Published annually in December

Available from Student Administration Branch.

Contains details of services provided to students together with timetables of courses.

## Undergraduate Prospectus

Published annually in June of previous year

Available free of charge from the Student Administration Branch

Details of undergraduate courses and services provided. This publication is useful to students considering study at University.

## Postgraduate Prospectus

Available free of charge from Graduate Studies and Scholarships Branch.

Details of postgraduate courses. This publication is useful to students considering postgraduate study.

# Contents

The information in this volume is accurate as at 7 September 1998

## General Course Rules

Undergraduate courses.....	3
Postgraduate courses .....	22

## Faculty of Agricultural and Natural Resource Sciences

---

Regulations.....	32
------------------	----

Diplomas and Bachelor of Agriculture, Bachelor of Environmental Management degrees .....	34
--	----

Diploma in Agricultural Production.....	47
---	----

Diploma in Horse Husbandry and Management.....	50
--	----

Diploma in Natural Resources Management.....	54
--	----

Diploma in Wine Marketing.....	60
--------------------------------	----

Bachelor of Agricultural Business .....	77
---	----

Bachelor of Agricultural Science.....	84
---------------------------------------	----

Bachelor of Agricultural Science (Horticultural Science) .....	84
--	----

Bachelor of Agricultural Science (Integrated Pest Management) .....	84
---	----

Bachelor of Agricultural Science (Oenology).....	84
--	----

Bachelor of Agricultural Science (Plant Breeding).....	84
--	----

Bachelor of Agricultural Science (Viticultural Science).....	84
--	----

Bachelor of Agriculture.....	64
------------------------------	----

Bachelor of Environmental Management .....	71
--	----

Bachelor of Environmental Science.....	116
--	-----

Bachelor of Wine Marketing.....	122
---------------------------------	-----

Bachelor of Agriculture (Honours).....	130
--	-----

Bachelor of Environmental Management (Honours).....	132
---	-----

Graduate Certificate .....	133
----------------------------	-----

Graduate Diploma .....	133
------------------------	-----

Master .....	133
--------------	-----

Master of Agricultural Science .....	133
--------------------------------------	-----

Master of Applied Science.....	133
--------------------------------	-----

Postgraduate Diploma .....	133
----------------------------	-----

## Faculty of Architecture and Urban Design

---

Regulations .....	152
-------------------	-----

### Bachelor of Architecture

This course is available only to Continuing Students. For information regarding the rules and regulations governing the course please refer to *The University Calendar Volume II: Handbook of Courses 1998*

Bachelor of Architecture (New) .....	167
--------------------------------------	-----

Bachelor of Design Studies .....	153
----------------------------------	-----

Bachelor of Landscape Architecture .....	173
--	-----

Graduate Certificate in Architecture (Electronic Media).....	180
--	-----

Graduate Certificate in Design Studies .....	186
--	-----

Graduate Certificate in Design Studies (Landscape).....	186
---	-----

Graduate Certificate in Urban Design .....	182
--	-----

Graduate Diploma in Architecture (Electronic Media) .....	191
---	-----

Graduate Diploma in Design Studies .....	186
--	-----

<b>Graduate Diploma in Design Studies (Landscape)</b> .....	186
<b>Graduate Diploma in Urban Design</b> .....	194
<b>Master of Architecture</b> .....	215
<b>Master of Architecture (Coursework)</b> .....	198
<b>Master of Building Science</b> .....	215
<b>Master of Design Studies</b> .....	215
<b>Master of Design Studies (Landscape)</b> .....	215
<b>Master of Landscape Architecture</b> .....	204
<b>Master of Landscape Architecture by Research</b> .....	215
<b>Master of Urban Design</b> .....	215
<b>Master of Urban Design (Coursework)</b> .....	210

## **Faculty of Arts**

---

<b>Regulations</b> .....	224
<b>Bachelor of Arts</b> .....	228
<b>Bachelor of Arts (Honours)</b> .....	351
<b>Bachelor of Arts (Asian Studies)</b> .....	228
<b>Bachelor of Arts (Asian Studies)(Honours)</b> .....	351
<b>Bachelor of Arts (Australian Studies)</b> .....	228
<b>Bachelor of Arts (Australian Studies) (Honours)</b> .....	351
<b>Bachelor of Arts (Cultural Studies)</b> .....	228
<b>Bachelor of Arts (Cultural Studies) (Honours)</b> .....	351
<b>Bachelor of Arts (European Studies)</b> .....	228
<b>Bachelor of Arts (European Studies) (Honours)</b> .....	351
<b>Bachelor of Arts (Gender Studies)</b> .....	228
<b>Bachelor of Arts (International Studies)</b> .....	228
<b>Bachelor of Arts (International Studies) (Honours)</b> .....	351

## **Bachelor of Arts (Jurisprudence)**

This course is available only to Continuing Students. For information regarding the rules and regulations governing the course please refer to *The University Calendar Volume II: Handbook of Courses 1995*

<b>Bachelor of Arts (Labour Studies)</b> .....	228
<b>Bachelor of Educational Studies</b> .....	440
<b>Bachelor of Environmental Studies</b> .....	249
<b>Bachelor of Environmental Studies (Honours)</b> .....	353

## **Bachelor of Labour Studies**

There shall be no further intake into this course For information regarding the rules and regulations governing the course, please refer to *The University Calendar Volume II: Handbook of Courses 1997*

<b>Bachelor of Labour Studies (Honours)</b> .....	355
<b>Bachelor of Social Sciences</b> .....	254
<b>Bachelor of Social Sciences (Honours)</b> .....	356

## **Diploma in Labour Studies and**

### **Diploma in Liberal Studies**

There shall be no further intake into these course. For information regarding the rules and regulations governing the Associate Diploma/Diploma in Liberal Studies, please refer to *The University Calendar Volume II: Handbook of Courses 1994*; for the Diploma of Labour Studies, refer to *The University Calendar Volume II: Handbook of Courses 1997*

<b>Diploma in Languages</b> .....	226
-----------------------------------	-----

## **Graduate Certificate in Applied**

<b>Demography</b> .....	358
-------------------------	-----

<b>Graduate Certificate in Australian Studies</b> .....	359
---	-----

<b>Graduate Certificate in Cognitive Science</b> .....	363
--	-----

<b>Graduate Certificate in Creative Writing</b> .....	365
---	-----

## **Graduate Certificate in Educational Administration**

There shall be no further intake into this course For information regarding the rules and regulations governing the course, please refer to *The University Calendar Volume II: Handbook of Courses 1997*

<b>Graduate Diploma in Advanced Economics</b> .....	636
<b>Graduate Diploma in Applied Economics</b> .....	641
<b>Graduate Diploma in International Economics</b> .....	647
<b>Graduate Diploma of Business Administration</b> .....	643
<b>Master of Business Administration</b> .....	649
<b>Master of Commerce</b> .....	658
<b>Master of Economics</b> .....	660
<b>Master of Economics (Coursework)</b> .....	662
<b>Master of Management (Leadership and Enterprise Development)</b> .....	665

## **Faculty of Engineering**

---

<b>Regulations</b> .....	671
<b>Bachelor of Engineering</b> .....	673
<b>Graduate Certificate in Business Enterprise (SME)</b> .....	741
<b>Graduate Certificate in Engineering (Environmental Engineering)</b> .....	742
<b>Graduate Certificate in Engineering (Fuels, Combustion and Emission Control)</b> .....	744
<b>Graduate Certificate in Engineering (Hydrology and Water Resources)</b> .....	747
<b>Graduate Certificate in Engineering (Signal Processing)</b> .....	749
<b>Graduate Certificate in Engineering (Structural Engineering)</b> .....	753

**Graduate Certificate in Telecommunications**  
This course is jointly managed with the Faculty of Mathematical and Computer Sciences. For details, see under the Faculty of Mathematical and Computer Sciences..... 903

**Graduate Diploma in Business Enterprise (SME)** .....
 755 |

**Graduate Diploma in Engineering (Environmental Engineering)** .....
 758 |

**Graduate Diploma in Engineering (Fuels, Combustion and Emission Control)** ...
 760 |

**Graduate Diploma in Engineering (Hydrology and Water Resources)** .....
 763 |

**Graduate Diploma in Engineering (Materials Welding and Joining)** .....
 765 |

**Graduate Diploma in Engineering (Radio Frequency Engineering)** .....
 767 |

**Graduate Diploma in Engineering (Structural Engineering)** .....
 769 |

**Master of Applied Science** .....
 771 |

**Master of Applied Science (Hydrology and Water Resources)** .....
 774 |

**Master of Applied Science (Materials Welding and Joining)** .....
 776 |

**Master of Engineering** .....
 778 |

**Master of Engineering (Fuels, Combustion and Emission Control)** ...
 779 |

**Master of Engineering (Hydrology and Water Resources)** .....
 784 |

**Master of Engineering (Information Technology and Telecommunications)** .....
 791 |

**Master of Engineering (Materials Welding and Joining)** .....
 799 |

**Master of Engineering (Radio Frequency Engineering)** .....
 802 |

**Master of Engineering Science** .....
 804 |

**Master of Software Engineering** .....
 809 |

**Doctor of Engineering** .....
 814 |

## **Faculty of Law**

---

Regulations.....	818
Bachelor of Laws .....	819
Graduate Diploma in Corporate and Commercial Law .....	839
Graduate Diploma in Environmental Law .....	839
Graduate Diploma in Taxation Law .....	839
Master of Comparative Laws (Adelaide/Mannheim).....	843
Master of Environmental Law .....	845
Master of Laws.....	845
Master of Laws (Corporate and Commercial) .....	845
Master of Laws (General Studies) .....	845
Doctor of Laws.....	857

## **Faculty of Mathematical and Computer Sciences**

---

Regulations.....	860
Bachelor of Computer Science .....	861
Bachelor of Science in the Faculty of Mathematical and Computer Sciences.....	861
Graduate Certificate in Mathematical Signal and Information Processing.....	896
Graduate Certificate in Mathematics Education.....	898
Graduate Certificate in Telecommunications.....	903
Graduate Diploma in Applied Statistics .....	905
Graduate Diploma in Computer Science.....	907
Graduate Diploma in Mathematical Science.....	909
Master of Applied Science (Communications) .....	911

Master of Computer Science.....	914
Master of Mathematical Science .....	916
Master of Mathematical Sciences (Signal and Information Processing) .....	919
Master of Science in the Faculty of Mathematical and Computer Sciences.....	921
Doctor of Science in the Faculty of Mathematical and Computer Sciences.....	923

## **Faculty of Medicine**

---

Regulations.....	927
Bachelor of Health Sciences.....	937
Bachelor of Medical Science .....	946
Bachelor of Medicine and Bachelor of Surgery .....	928
Graduate Certificate in Bereavement and Palliative Care Counselling .....	948
Graduate Certificate in Human Anatomy .....	950
Graduate Certificate in Hyperbaric Nursing.....	952
Graduate Certificate in Occupation Health and Safety Management .....	954

<b>Diplomas and Bachelor degrees</b> .....	1029

**Bachelor of Arts (Dance)**  
**Bachelor of Arts (Drama Studies)**

There shall be no further intake into these courses. For information regarding the rules and regulations governing the courses, please refer to *The University Calendar Volume II: Handbook of Courses 1998*

<b>Diploma in Music</b> .....	1041
<b>Diploma in Music (Jazz)</b> .....	1043
<b>Bachelor of Music (New)</b> .....	1045
<b>Graduate Diploma in Conducting</b> .....	1074
<b>Graduate Diploma in Digital Arts</b> .....	1069

**Graduate Diploma in Educational Theatre**

There shall be no further intake into this course. For information regarding the rules and regulations governing the course, please refer to *The University Calendar Volume II: Handbook of Courses 1998*

<b>Graduate Diploma in Intercultural Music Studies</b> .....	1075
<b>Graduate Diploma in Jazz Performance</b> .....	1077
<b>Graduate Diplomas in Music</b> .....	1071
<b>Graduate Diploma in Music Education</b> .....	1078
<b>Graduate Diploma in Music Performance</b> .....	1079
<b>Graduate Diploma in Music Theory</b> .....	1080
<b>Graduate Diploma in Musicology</b> .....	1081
<b>Graduate Diploma in Radio Broadcasting Studies</b> .....	1082

**Master of Arts (Drama Studies)**

**Master of Arts (Educational Theatre)**

There shall be no further intake into these courses. For information regarding the rules and regulations governing the courses, please refer to *The University Calendar Volume II: Handbook of Courses 1998*

<b>Master of Music</b> .....	1085
<b>Master of Music (Performance)</b> .....	1086
<b>Master of Music Theory</b> .....	1091
<b>Doctor of Music</b> .....	1093

## Faculty of Science

---

Regulations.....	1097
Bachelor of Science in the Faculty of Science.....	1098
Bachelor of Science (Biomedical Science) .....	1098
Bachelor of Science (Exploration Geoscience).....	1098
Bachelor of Science (Jurisprudence).....	1098
Bachelor of Science (Molecular Biology) ...	1098
Bachelor of Biotechnology .....	1147
Graduate Certificate in Ecology and Management .....	1150
Graduate Certificate in Petroleum Geology and Geophysics .....	1151
Graduate Certificate in Physics .....	1153
Graduate Certificate in Science Education .....	1155
Graduate Diploma in Ecology and Management .....	1159
Graduate Diploma in Exercise Physiology.....	1161
Graduate Diploma in Physics .....	1163
Master of Science in the Faculty of Science.....	1165
Master of Science (Applied Physics).....	1167
Master of Science (Astrophysics) .....	1167
Master of Science (Atmospheric Physics) ..	1167
Master of Science (Ecology and Management) .....	1171
Master of Science (Exercise Physiology) ..	1174
Master of Science (Medical and Health Physics)	

This course will not be offered in 1999. For details on regulations and rules please refer to *The University Calendar Volume II: Handbook of Courses 1997*

Master of Science (Medical Physics) .....	1176
Master of Science (Optics and Lasers ).....	1167
Master of Science in Petroleum Geology and Geophysics.....	1180
Master of Science (Theoretical Physics)....	1167
Doctor of Science in the Faculty of Science .....	1183

## Wilto Yerlo - Centre for Aboriginal Studies in Music

---

Associate Diploma in Aboriginal Studies in Music .....	1186
Associate Diploma in Aboriginal Studies in Music (New) .....	1194

## Board of Graduate Studies

---

Doctor of Philosophy .....	1202
Higher degrees by research .....	1206
Specifications for thesis .....	1208

# General Course Rules

## Preamble

The aim of the General Course Rules is to bring together in one place all general policies regarding course matters. If, for reasons of space, the full policy statement on any area is not included in the General Course Rules then appropriate cross-references have been included so that at least students and staff know where to look for policy statements on any given area.

The following rules are prescribed by the Council of the University and apply to all courses offered by the University although there is often a distinction made in the rules between undergraduate and postgraduate courses.

All courses offered by the University have been developed within the framework of the General Course Rules printed below.

As all students must comply with these rules, students are advised to become familiar with them in order to gain an understanding of their rights and responsibilities with regard to course matters.

## Glossary of terms

A glossary of terms is being developed for approval.

## 1 Undergraduate courses

### 1.1 Admission requirements

#### 1.1.1 Undergraduate courses

Chapter 9 of the Statutes, Of Admission and Enrolment, states that Council may prescribe rules and establish procedures for the selection and admission of students. Rules for entry to undergraduate courses are to be provided in full in the Calendar, Vol I.

#### 1.1.2 Graduate Bachelor degree courses

The Bachelor of Laws (LL.B.), Bachelor of Architecture (B. Arch.), Bachelor of Architecture (New) (B. Arch. (New)), Bachelor of Landscape Architecture (B. L.Arch.) and the Bachelor of Educational Studies (B.Ed.St.) are Graduate Bachelor degrees requiring prior tertiary study on point of entry. The specific admission requirements for these courses are contained in the appropriate Specific Course Rules.

#### 1.1.3 Honours degree courses

Details of requirements for Honours degree courses are provided below in section 1.2.3 under Assessment and Examinations, as well as in the Specific Course Rules for individual Honours degree courses.

### 1.2 Assessment and examinations

Chapter 17 of the Statutes - Of Examinations and Other Forms of Assessment, prescribes procedures for dealing with misconduct in examinations and other forms of assessment.

In addition, the University has a detailed policy statement on assessment matters (including Student Appeal and Grievance Procedures) which is reproduced below.

#### 1.2.1 Assessment Policy and Appeals

The Assessment Policy establishes recognised principles and procedures under which Departments conduct assessment of students' work, and under which students may claim a review of an assessment mark or seek resolution of a grievance to do with assessment or academic status for work done elsewhere. The general principles are largely a statement of existing practices in the University: they are not all completely applicable to every course or discipline, and some Faculties and Departments follow additional assessment principles which are appropriate to them but not necessarily relevant to the whole University.

Departmental Assessment Committees will provide an appropriate forum within which staff and students may periodically review assessment processes and make recommendations to the Head of Department, and where disputes may be resolved. The Student Academic Appeals Committee is required to deal with assessment and other grievances that have not been resolved at Departmental level. Its role is primarily to ensure due process and fairness: in assessment appeals it would not override the academic judgment of academic staff expert in a subject, but it may on occasions need to moderate the judgement of one expert with that of others. If the basic principles and procedures in assessment are followed at the Departmental level, there should seldom be grounds on which a student could justifiably appeal.

It is assumed that students will exercise their right to appeal in assessment matters responsibly. That is appeals will be confined to cases where students genuinely believe they have reasonable grounds for expecting a higher mark. If the procedures are exploited merely in the hope of improving marks, the extra

assessment load could become so burdensome that the right of appeal would have to be reviewed.

### General Assessment Policy Principles

- 1 Types of assessed work should be appropriate to the learning objectives of the subject.
- 2 As much assessed work as possible should be discussed with the students who produced it, and where appropriate returned with written comments, to provide feedback about their strengths and weaknesses.
- 3 The total burden of assessed work should not be such as to affect students' approaches to learning in ways that are inconsistent with the learning objectives of the subject.
- 4 In many disciplines, there are a variety of ways in which students may demonstrate their understanding and mastery of subject matter and techniques. Where this is compatible with the need to assess various objectives, students should be given some choice in the types of work they submit, or the relative weight of different components. In some disciplines it will be appropriate for students to have some choice in the particular subject matter they focus on.
- 5 Departments should, with the active participation of students, periodically review the methods of assessment, the relative importance and validity of different types of assessment, the range of choice and the quantity of work required.
- 6 Students should have the opportunity to undertake supplementary\* assessment if they fail a subject, provided that they have made a reasonable effort, and it is considered that they have a reasonable possibility of passing at the second attempt. Where a substantial piece of work submitted during the teaching of a subject is judged below pass standard, students should have the opportunity of submitting another piece of work for assessment.  
  
\*note: Please see under 1.2.7 Supplementary Examinations below.
- 7 Departments are required to inform all students in writing, either before or within the first two weeks of the teaching of each subject, precisely what its assessment requirements are, including any choices, deadlines, opportunity for re-submission

or supplementary assessment etc. Opportunity should be given for students to ask questions and discuss the modes of assessment.

- 8 Where practicable, assessment procedures should be designed to allow for the participation of more than one assessor for each student. (It is recognised that many specialist subjects in the later years of courses are taught and assessed by one person. Departmental moderation of standards is advisable to ensure maintenance of comparability.)
- 9 Departments should take steps to ensure accuracy and to guard against bias. Checking of additions, and of the assessment of students with marks at the borderline between assessment grades, should be standard procedure. Anonymity of work submitted may be desirable as a protection against bias.

### Grading Schemes

There shall normally be four classifications of pass in subjects for Ordinary and Master degrees, Graduate Certificates and Graduate Diplomas:

Pass with High Distinction

Pass with Distinction

Pass with Credit

Pass

If the list of candidates who pass is published in two divisions, a pass in the higher division may be prescribed in the syllabus as a prerequisite for admission to another subject.

There is also a classification of Conceded Pass. In some Faculties a candidate may present for an Ordinary degree only a limited number of subjects for which a Conceded Pass has been awarded - see the Specific Course Rules for details.

If marks are to be recorded on the academic transcript, then the range of marks for each classification of Pass is as follows:

High Distinction	85-100
Distinction	75-84
Credit	65-74
Pass	50-64
Conceded Pass	45-49

For certain subjects the grade of Pass is unclassified as either Non-Graded Pass or Satisfactory.

The grading scheme for Honours degrees is contained in section 1.2.3.

There are also grades used within the University mainly for administrative purposes such as 'Withdraw (Not Fail)' and 'Continuing'. Please refer to the Student Administration Branch for details.

## Assessment Procedures and Appeals

### 1 Departmental Assessment Committees

- 1 All Departments shall have an Assessment Committee consisting of staff and students; it may be an existing sub-committee of the Departmental Committee with other functions as well. (In small Departments it could appropriately be the Departmental Committee itself.)
- 2 The Committee should be primarily concerned with giving advice and making recommendations on assessment matters, including assessment disputes. Every staff member and student has the right to refer any assessment matter to this Committee.
- 3 The Committee shall be concerned with assessment in course-work subjects, not theses or research projects.
- 4 The Committee shall periodically review assessment schemes and procedures, and their relationship to course aims.
- 5 The Committee may receive complaints from staff or students relating to assessment schemes, the way an assessment scheme or procedure has been administered or the fairness of assessments actually made. (For appeals procedures against particular assessments, see Appeals below)
- 6 The Committee shall act as a lower tribunal in hearing allegations of offences against Statute Chapter XVII or against particular Faculty or Departmental rules concerning assessment.

### 2 Right to Request Review of Assessment

- 1 Where qualitative judgment is involved in assessment, a student may request that a piece of work assessed by one person be re-assessed, if, after discussing the piece of work and the mark with the assessor, the student remains aggrieved about the mark awarded.
- 2 In the first instance the request should be made to the lecturer in charge of the subject. If, after discussing the result with the lecturer, the student still wishes to have it re-assessed, the lecturer in charge should arrange for this to be done by a different person in the Department or elsewhere in the University, wherever this is practicable.
- 3 If the assessor is the only person assessing the subject, the student may make the request to the Head of Department, who should appoint a second assessor, unless there is no appropriately qualified person available.
- 4 The second assessor shall independently mark the piece of work. The two assessors shall then compare marks and endeavour to reach an agreed mark. If the two cannot agree, the Head of Department shall decide what mark shall be awarded.
- 5 If a student is denied a request for a second assessor, the student may take the matter to the Departmental Assessment Committee.
- 6 The Departmental Assessment Committee shall consider whether the student's grounds for requesting a second assessor are sufficient, and if so, advise the Head of Department to appoint a second assessor. If there is no appropriately qualified person available within the University, the Head, after consulting the lecturer in charge of a subject, shall ask an appropriate person outside the University to re-assess the work.
- 7 Where two or more staff members teach a subject, in which qualitative judgement forms a significant part of the assessment, at least two

assessors should, whenever practicable, take part in the assessment of each student. No student should be given a Fail for such a subject unless two assessors have assessed at least part of that student's work, and agree that a Fail classification is appropriate.

- 8 A student who has been denied a request by the Departmental Assessment Committee for a second assessor may appeal to the Student Academic Appeals Committee (see below).

### 3 Assessment Appeals

- 1 Any student dissatisfied with the final grade awarded for a subject should discuss the result with the lecturer in charge of the subject as soon as possible after being notified of the result.
- 2 The Head of Department may endeavour to resolve the matter, or may refer it directly to the Departmental Assessment Committee. The student shall in any case have the right to take the matter to the Assessment Committee.
- 3 The Committee shall consider the appeal, discussing the matter with the student, the Head of Department and all staff members who have participated in assessing the subject, and may seek advice from other persons as it thinks fit.
- 4 The Committee shall make a recommendation to the Head of Department who shall either accept it or refer it to the full Departmental Committee for further advice and shall inform the student of the Department's decision.
- 5 Where the examining body is a Faculty Board of Examiners, the student should discuss the result with the convener of the Board of Examiners, and may appeal to the Faculty Student Matters Committee.
- 6 A student who believes he or she has not been justly dealt with by the foregoing process may appeal to the Student Academic Appeals Committee.

### 4 Preclusion

Please refer to the section on 'Review of Academic Progress'.

### 5 Student Academic Appeals Committee

- 1 Students shall have the right to appeal against final grades for subjects, and committee decisions concerning assessment procedures. (The Student Academic Appeals Committee shall not hear appeals relating to misconduct.)
- 2 The following appeals policy and procedures do not apply to the progress or examination of postgraduate theses or research projects, for which the appeal body is the Board of Graduate Studies.
- 3 The Student Academic Appeals Committee shall be composed as follows:
  - two members of Council who are not employees or students of the University;
  - two members of the academic staff who are not members of the Department or Departments concerned in the appeal;
  - two students who are not enrolled for subjects in the Department or Departments concerned in the appeal.

For appeals concerning administrative operations of the University, a nominee of the Registrar shall be added to the Committee.

- 4 The Council shall appoint the two Council members, one of them to be Convener of the Committee. The Vice-Chancellor shall nominate six members of the academic staff and, in consultation with the Students' Association, six students to a pool of potential Committee members. On notification by a student of intention to appeal, the Secretary of the Student Academic Appeals Committee shall select two academic and two student representatives from this pool in accordance with the restriction specified above.

- 5 An appeal against a decision shall be heard after the student concerned gives notice in writing of intention to appeal. Notice of appeal must give all relevant information regarding attempts which have been made to have the decision changed, and state the grounds for the appeal. Where there is no evidence that the matter has been previously taken to the appropriate Departmental or Faculty Committee the appeal will not be heard.
- 6 Adequate notification of the date of meeting shall be given both to the student and to the Department or Faculty defending the appeal.
- 7 The student may ask a Student Counsellor, another student, a staff member or an officer of a Students' Association, to assist in presenting the appeal.
- 8 The Appeals Committee shall determine its own procedures, but shall not itself re-assess a student's work which may be in dispute. If satisfied that there are sufficient grounds for so doing, it may order that a piece of work be re-assessed by a person with appropriate expertise outside the Department concerned, selected in consultation with the Head of Department.
- 9 The Academic Appeals Committee may refuse to continue hearing an appeal or complaint if it decides that the appeal or complaint is vexatious or malicious.

note: Malicious or persistently vexatious appeals or complaints against individual members of the academic staff, or against Departments may be treated as misconduct, and the student may be proceeded against by an affected member of the University, or by the Student Academic Appeals Committee, under the provisions of Chapter XII of the Statutes, which state: 'misconduct means any... unjustified act or omission of a student which adversely affects the University or any member of the University in his or her capacity as such'.

### 1.2.2 Attendance requirements

Students are advised to check the Specific Course Rules for any policies on required attendance as these requirements may vary from course to course.

### 1.2.3 Honours degree courses

#### 1 Admission and qualification requirements

To be eligible to be admitted to an Honours degree course, a candidate shall complete the requirements for an Ordinary degree or equivalent to a standard which is acceptable to the Faculty for the purpose of admission to the Honours degree with the exception of the degrees specified below.

##### *Bachelor of Agricultural Science*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Agricultural Science.

##### *Bachelor of Agricultural Science (Horticultural Science)*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Agricultural Science (Horticultural Science).

##### *Bachelor of Agricultural Science (Viticultural Science)*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Agricultural Science (Viticultural Science).

##### *Bachelor of Agricultural Science (Oenology)*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Agricultural Science (Oenology).

##### *Bachelor of Environmental Science*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Environmental Science.

##### *Bachelor of Architecture*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Architecture.

*Bachelor of Architecture (New)*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Architecture (New).

*Bachelor of Landscape Architecture*

Detailed requirements for admission to and qualification for the Honours degree course are contained in the Specific Course Rules for the Bachelor of Landscape Architecture.

*Bachelor of Laws*

Detailed requirements for admission to and qualification for the Honours degree and the degree with Honours are contained in the Specific Course Rules for the Bachelor of Laws.

*Honours degree of Bachelor of Medical Science*

A candidate may intermit the course for the degrees of Bachelor of Medicine and Bachelor of Surgery for the purpose of proceeding to the Honours degree of Bachelor of Medical Science; or for such period and on such conditions as may in each case be determined by the Faculty.

*Honours degree of Bachelor of Science in Dentistry*

See the Specific Course Rules for details.

To qualify for an Honours degree course, a candidate shall comply with the provisions of the appropriate Specific Course Rules for Honours.

**2 Honours grading scheme**

A candidate who satisfies the requirements for Honours shall be awarded the Honours degree, but the Faculty shall decide within which of the following classes and divisions the degree shall be awarded:

- 1 First class
- 2A Second class div A
- 2B Second class div B
- 3 Third class
- NAH Not awarded

1.2.4 Degree courses with Honours

*Bachelor of Engineering (Chemical Engineering)*

*Bachelor of Engineering (Civil Engineering)*

*Bachelor of Engineering (Civil and Environmental Engineering)*

*Bachelor of Engineering (Computer Systems Engineering)*

*Bachelor of Engineering (Electrical and Electronic Engineering)*

*Bachelor of Engineering (Information Technology and Telecommunications)*

*Bachelor of Engineering (Mechanical Engineering)*

The Bachelor of Engineering degree in the specialisations listed above may be awarded in the Pass or Honours grade.

The award of the Honours grade shall be made for meritorious performance in the course with greatest weight given to performance in the later years.

The Honours grade may be awarded in one of the following classifications: First Class, Second Class Division A, Second Class Division B. (There is no Third Class for the Bachelor of Engineering degree).

To qualify for the degree a candidate shall regularly attend lectures and do written, laboratory, and other practical work (where such is required), and pass examinations in the subjects prescribed in the Specific Course Rules for one of the specialisations listed above.

Before being admitted to the degree a candidate shall also submit satisfactory evidence of completion of a period of practical experience in work approved by the Faculty of Engineering as appropriate to the course which the candidate has followed.

*Bachelor of Laws*

Detailed requirements for admission to and qualification for the Honours degree and the degree with Honours are contained in the Specific Course Rules for the Bachelor of Laws. The degree with Honours is awarded in one of the following classifications: Second Class Division A, Second Class Division B.

*Bachelor of Medicine and Bachelor of Surgery (with Honours)*

A candidate whose results in the third-year, fourth-year, fifth-year and final (sixth-year) examinations, in the medicine course have been adjudged by the Faculty of Medicine to have been

of distinguished merit may, by the decision of the Faculty on the recommendation of the Board of Examiners in the final year of the course, be awarded the degrees of Bachelor of Medicine and Bachelor of Surgery (with Honours).

### 1.2.5 Plagiarism and related forms of cheating

Section 7.12 of the Handbook of Administrative Policies and Procedures states the University's policy on dealing with plagiarism as follows:

#### 1 Statement and definition of plagiarism and related forms of cheating

Plagiarism is expressly prohibited by Statute XVII 'Of Examinations and Assessment' which states under Section 2:

'No candidate shall submit for assessment, whether by examination or otherwise, any piece of work which is not entirely the candidate's own, except where either:

- (a) use of the words or ideas of others is appropriate and duly acknowledged, or
- (b) the examiner has given prior permission for joint or collaborative work to be submitted.

#### 2 Definition

Plagiarism consists of a person using the words or ideas of another as if they were his or her own. The University of Adelaide regards plagiarism as a very serious offence. At the very least it is a misuse of academic conventions; where it is deliberate and systematic, plagiarism is cheating and false pretences. It is the obligation of every member of the University to understand and respect the rules concerning plagiarism; the excuse of ignorance will not be accepted. Plagiarism can take several forms:

- 1 presenting substantial extracts from books, articles, theses, and other published or unpublished works such as working papers, seminar and conference papers, internal reports, computer software, lecture notes or tapes, and other students' work, without clearly indicating their origin with quotation marks and references such as footnotes;
- 2 using very close paraphrasing of sentences or whole paragraphs without due acknowledgment in the form of reference to the original work;

- 3 quoting directly from a source and failing to insert quotation marks around the quoted passages. In such cases, it is not adequate to merely acknowledge the source.

#### 3 Related forms of cheating

Other forms of cheating which will also be treated with the utmost seriousness include:

- 1 submitting work written by someone else on the student's behalf;
- 2 submitting another student's work whether or not it has been previously submitted by that student;
- 3 two students separately submitting the same piece of work upon which they have illicitly collaborated;
- 4 a student submitting a piece of his or her own work for two different subjects.

#### 4 Disciplinary action

Cases of plagiarism or related forms of cheating will be dealt with under the terms of Statute XII 'Of Conduct of Students in the University'.

### 1.2.6 Rules for the conduct of examinations

The following are the University's approved rules for the conduct of examinations:

- 1 No candidate shall enter the examination room during any examination more than forty minutes after the time fixed for the beginning of the reading period of the examination except with the consent of a Supervisor.
- 2 No candidate shall be allowed to leave the examination room during any examination before forty minutes have elapsed from the commencement of the reading period of the examination except with the consent of a Supervisor.
- 3
  - (1) A candidate who wishes to leave the room temporarily must obtain the consent of a Supervisor before doing so.
  - (2) A candidate who leaves the examination room may be permitted to return to it during that examination only at the absolute discretion of a Supervisor.

- 4 (1) When the five-minute warning before the end of the examination is given, all candidates shall remain seated until their examination papers have been collected.
- (2) All candidates shall remain seated until all examination papers have been collected and an announcement is made by a Supervisor that candidates may leave the room.

It is recommended that students carefully read the Statutes, Chapter XVII 'Examinations and Other Forms of Assessment'.

note: Special arrangements

When a student's performance in an examination could be affected by a physical condition of a permanent or temporary nature or for any other reason, such as language difficulty, the student should consult the Examinations Officer in the first instance as early as possible. Students who, because of religious beliefs, are unable to sit examinations on certain days (or at particular times), should also contact the Examinations Officer as early as possible.

#### 1.2.7 Supplementary examinations

A candidate may be granted a supplementary examination in a subject only in circumstances approved by the Department or Centre administering such subject and consistent with any expressed Council policy.

- 1 Supplementary examinations may be awarded on academic grounds, as well as on medical and compassionate grounds.
- 2 Supplementary examinations shall be granted on the recommendation of the Department responsible for the subject.
- 3 Except with respect to specific courses or subjects on grounds approved by the Council, students shall have the opportunity to undertake supplementary assessment if they fail a subject, provided that they have made a reasonable effort, and it is considered that they have a reasonable possibility of passing at the second attempt.

(This shall apply to results of Conceded Pass as well.)

Each Department is responsible for defining its policy on academic supplementary examinations which shall be made available to students at the commencement of teaching of each subject.

- 4 All students will receive a single final result for each subject, regardless of whether some supplementary or redemption work was necessary to achieve that result.

The results of supplementary examinations granted on medical, compassionate and mixed grounds will be classified.

- 5 The results of supplementary examinations granted on academic grounds shall not be classified above the level of 50 Pass, except where a higher division pass is required to proceed to the next level in a subject. In subjects with two Divisions of Pass, the Pass result after the supplementary examination on academic grounds shall be either 50 Pass Division II or 55 Pass Division I.

- 6 The medical conditions of students who apply for supplementary examinations on medical grounds shall be confidential and medical information from a student's private doctor shall be forwarded to the University Health Service for an assessment of the applicant's fitness to prepare for and/or undertake examinations.

- 7 Provided that the assessment by the Health Service justifies it, the opportunity to undertake supplementary examinations on medical or compassionate grounds shall be granted not only to students who have failed subjects, but also to those who have passed but wish to upgrade their results.

- 8 A candidate who has failed in only one full-year subject or one or two semester subjects which would complete his or her course for a degree may be granted a supplementary examination in the subject(s) concerned.

- 9 Supplementary examinations may be held between Semester I and Semester II and in December, as well as in the January examination period established by the Council.

- 10 (i) Students should lodge applications for supplementary examinations on medical and compassionate grounds with their Faculty Registrar within seven days of the corresponding primary examinations; and  
(ii) Applications for medical and compassionate supplementary examinations and the granting of discretionary supplementary

examinations on academic grounds shall be considered by a committee of Departmental examiners\*; and

- (iii) The above procedures shall be widely publicised for the information of students.

notes

1 In many cases, a 'reasonable effort' for the purposes of granting academic supplementary examinations is defined as results in the range of 40 - 49, with supplementary examinations being awarded automatically to students who achieve marks of 45 - 49 and at the discretion of the examiners' committee to students who achieve marks of 40 - 44.

2 The maximum result to be recorded on the academic transcript shall be the minimum results which will allow a student to pass to the next level in a subject: namely, a Pass mark of 50 shall be awarded for those subjects with a grading scheme of HD, D, C, P (CP), and F, or a Pass Division 1 mark of 55 for those subjects with a grading scheme HD, D, C, P1, P2, F.

For subjects with a grading scheme of HD, D, C, P1, P2, F, a result of 50 Pass Division 2 may also be recorded on the transcript. That is, the student can achieve the minimum Pass result in the subject but cannot proceed to the next level in the discipline if a Pass Division 1 is required for enrolment. For example, a final mark of 53 after a supplementary examination in Biology I will be recorded on the transcript as 50 P2. This would allow the subject to be counted towards the student's degree but would not permit the student to enrol in Botany 2 or any other subject for which Biology I is a pre-requisite.

\*The term 'Departmental examiners' encompasses faculty examiners.

### 1.3 Computing facilities: rules for student use

#### 1.3.1 General

Computing facilities provided by the University for students are primarily for use in association with a course of study and activities related to that course.

It is expected that all students will make use of University computing facilities in a manner which is ethical, legal and does not interfere with use by others.

Failure to abide by the following rules will be treated as misconduct and may result in disciplinary action.

#### 1.3.2 Rules for students

- (a) You may use only those facilities which have been authorised for your use. If access is protected by a password, you may not make this password available to others. You may not use any account set up for another user, nor may you attempt to find out the password of another user.

- (b) You may only use authorised facilities for authorised purposes. For example, facilities made available for learning and teaching may not be used for private purposes.

#### 1.3.3 Breach of rules

- (a) Failure to observe these requirements could mean that an action for misconduct will be brought against you. The University's Board of Conduct has the power to impose a fine of up to \$100 or suspend a student's right to use any University facility for up to one year. It can also recommend to Council that a student be suspended or expelled from the University.
- (b) Misconduct that amounts to sexual harassment may be dealt with by the University's Sexual Harassment Committee. Some types of harassment or offensive conduct may be in breach of the Equal Opportunities Act.
- (c) Some forms of conduct may be criminal offences. These include hacking, theft, and unauthorised copying. Using a password protected computer system without authority could result in a fine of up to \$2000 and imprisonment. Sending an offensive message may also be a criminal offence.
- (d) Some conduct, in particular unauthorised copying, could result in civil legal action being taken against you.
- (e) Academic staff have a general power to dismiss students from their classes if they consider the student is disrupting the class; and a Head of department may exclude any student from any class in that department 'for any cause he or she shall deem sufficient'. (Such exclusion may be reversed, varied or confirmed by University Council).
- (f) Breaches or suspected breaches of the rules should be reported to a supervisor, the Chair of the relevant Local Management Group, or the Director, University Computing Services.

### 1.4 Enrolment and re-enrolment

#### 1.4.1 Academic year

What follows is clause 1 of Statute Chapter VIII - Of the Academic Year.

- 1 (a) Subject to the following subsections of this clause the Council shall from time to time specify the

periods of the calendar year that shall constitute the academic year for teaching, examinations and vacation periods. Such specifications may divide the calendar year into semesters or into three or more terms.

- (b) The normal academic year shall begin on the Monday nearest 1 March and shall extend over a period of forty-two weeks with such vacation weeks within that period as may be determined from time to time and specified in advance by the Council.
- (c) For the clinical years of the medical and dental courses the Council may prescribe dates other than those of the normal academic year for the performance by undergraduates of part of their training and work in hospitals; provided that such undergraduates shall be enabled to have not less than eight weeks of vacation in any calendar year.
- (d) For practical tuition in music within the degree courses and all single subject tuition in the Elder Conservatorium of Music the Council may prescribe dates other than those of the normal academic year.
- (e) For candidates proceeding to a degree of master or doctor the academic year shall be the same as a calendar year; provided that any such student may have a vacation period or periods aggregating four weeks in each full year of study and research.
- (f) The Council shall have power to vary these dates to meet any special circumstances arising in any year.

Statute allowed 16 December, 1971.

Amended: 23 Jan. 1975: 1(b); 15 Jan. 1976: 2(c); 24 Feb. 1983: 1(d), 1(e), 1(f), 2; 20 July, 1989: 1(b), 2, 3(a), 3(b), 3(c); 1 Mar. 1990: 1(b)

note

- 1 The Australian Vice-Chancellors' Committee regularly prescribes certain weeks as 'common vacation weeks' for purposes of national conferences, inter-varsity contests, etc For the purpose of calculating those common weeks, the first teaching week as defined in 1(b) above shall be regarded as Week 1.
- 2 The academic year comprises two semesters, each consisting of two terms separated by a mid-semester break.

#### 1.4.2 Amendment to enrolment

Any amendment to an enrolment must be requested on the approved form and must be approved by the relevant Faculty. Except with the permission of the Faculty withdrawal from an annual or semester subject after the date prescribed by Council for such changes shall be counted as failure. [See also 1.4.23 Withdrawal Dates].

#### 1.4.3 Availability of subjects

If in any year/semester the student enrolment for a particular subject offered by the Faculty is less than the minimum specified by the Faculty, the Faculty shall not be bound to offer that subject.

The availability of any subject is conditional upon a minimum enrolment and the availability of staff and resources.

#### 1.4.4 Compliance with rules

Clause 15 of Chapter 25 of the Statutes, states the following: .

On each enrolment a student shall complete the following declaration: 'I undertake to obey the statutes and regulations of the University of Adelaide and to comply with such Rules as may from time to time lawfully have been made by or with the authority of the Council of the University.'

#### 1.4.5 Course overloads

The following is sub-section 7.9 of the Handbook of Administrative Policies and Procedures:

##### 1 Principles relating to student overloads

The following statements of principle and suggestions for practical implementation have been approved by Council in regard to students wishing to undertake course work study which constitutes more than a normal year's workload:

- 1 The problem of course overloads does not lie in the freedom of students to overload, since no difficulty is encountered by many students who attempt more than a normal workload. The problem lies with students who, in exercising their right of choice, decide badly. The University seeks therefore to assist the decision making capabilities of a student rather than to limit the choices available to all.
- 2 All students seeking to enrol with overload must be identified and interviewed by a Course Adviser.

Course Advisers should have available to them the previous academic record of the student, and both Adviser and student should be informed about the problems which may be associated with overload.

- 3 If the student after a full discussion and despite advice from the Course Adviser persists with the overload enrolment, it should not be prevented.
- 4 In the case of all overloads by students the Dean/Course Adviser should periodically consider the progress of the student concerned so that in the case where the student appeared not likely to be successful in his or her work, advice could be given for withdrawal from a subject prior to the scheduled last date of withdrawal.
- 5 In the case of a student wishing to take an overload, the Course Adviser should put his or her advice to the student in writing.
- 6 A student may decline the advice of a course adviser in which event the student risks the possibility in some Faculties of exclusion provisions being applied in the event of failure.

#### 1.4.6 Cross-institutional enrolment

Students enrolled in a course of study at one higher education institution who want to count subjects or topics offered at one (or more) of the other institutions as part of their award may be admitted to such subjects as Cross-Institutional Students.

The institution at which the award is to be completed is referred to as the 'home institution'. The institution at which cross enrolment in subjects is sought is referred to as the 'other institution'.

##### *Quotas*

Normal quotas on admission to award courses do not apply. However, the other institution may not admit Cross-Institutional students in subjects where insufficient places are available for its own students.

##### *Conditions of Admission*

Cross-Institutional Students are subject to the same Statutes, Regulations and rules as apply to students enrolled in an award course at the other institution at which they are allowed to enrol. If

a Cross-Institutional Student is subsequently admitted to a course leading to an award at the other institution at which they have been allowed cross-institutional enrolment, subjects or topics passed while enrolled on a cross-institutional basis may only be counted towards an award of the other institution if specific approval is granted by the other institution.

##### *Union membership and Fee*

Cross-Institutional Students will be required to pay the appropriate Union fee at the home institution and may be required to pay a statutory fee at the other institution.

note: In the case of Adelaide University, Council has delegated the authority to grant approval to students wishing to count cross-institutional subjects towards an award to the Dean of the Faculty concerned.

#### 1.4.7 Duration of courses

What follows are general statements about course duration. Please refer to the Specific Course Rules for each course for any precise statements about course duration.

##### **1 Associate Diplomas**

The course of study for an Associate Diploma will normally require at least two years of full-time study or the part-time equivalent.

##### **2 Diplomas**

The course of study for a Diploma will normally require at least the equivalent of three years of full-time study.

##### **3 Undergraduate degrees**

As the duration of undergraduate degrees may vary, please refer to the Specific Course Rules for details.

##### **4 Honours degrees**

Please refer to section 1.2.3 on Honours degrees as well as to the Specific Course Rules for details.

#### 1.4.8 Enrolment by prescribed date & payment of fees

Under Chapter IX 'Of Admission and Enrolment', clause 2 states the following:

An applicant may enrol in the University only if the applicant

- (a) has satisfied the requirements for admission under the Rules approved by Council;

- (b) has been offered a place in a course of study or subject in accordance with the selection criteria and procedures approved by Council; and
- (c) has lodged a completed enrolment form and has paid, or made arrangements satisfactory to the Registrar for payment of, the prescribed fees and charges.

The following are clauses 2 and 3 of Chapter 8 of the Statutes - Of the Academic Year:

- 2 A candidate shall enrol for the year's work not later than the date prescribed by the Council. An enrolment submitted after that date shall not necessarily be accepted, and if accepted shall incur such late enrolment fee as the Council may prescribe unless there be adequate reason why it had not been submitted by the prescribed date. Application for remission of the late enrolment fee must be made in writing and be addressed to the Registrar.
- 3 (a) Subject to subsections (b) and (c) of this clause, all fees and charges in any academic year shall be paid at the time of enrolment.
- (b) A student shall be liable for any increase, or entitled to refund of any decrease, in the total fee so paid that may arise through variation of enrolment during the year.
- (c) The Registrar may allow in individual cases an extension of time for payment of fees. A student who fails to pay fees as prescribed in sub-section (a) of this clause or within such extended time as may have been allowed by the Registrar shall incur such additional fee as may be prescribed by the Council.

Statute allowed 16 December, 1971.

Amended: 23 Jan. 1975: 1(b); 15 Jan. 1976: 2(c); 24 Feb. 1983: 1(d), 1(e), 1(f), 2; 20 July, 1989: 1(b), 2, 3(a), 3(b), 3(c); 1 Mar. 1990: 1(b)

See also section 5 on Fees.

#### 1.4.9 External studies

Some courses for awards offered by the Faculty of Arts are available by external study. Please consult *The University of Adelaide Faculty of Arts Handbook for External Studies*. Some courses for awards offered by the Faculty of Agricultural and Natural Resource Sciences are also available externally.

#### 1.4.10 Hepatitis B, HIV and medical and dental students

It is a condition of enrolment in the courses for the degree of Bachelor of Dental Surgery, the degree of Bachelor of Medicine and Bachelor of Surgery, and for all higher degrees in the Faculties of Medicine and Dentistry involving human experimentation or patient studies, that students abide by the following policy:

- 1 All new students (ie all students who have not previously been students in the Faculties of Medicine or Dentistry) must be screened by the University Health Service to establish their antibody and antigen status in respect of Hepatitis B, or must provide evidence which satisfies the Health Service of such status. The screening must occur within four weeks of enrolment. Screening performed by the Health Service will be at no cost to the student.
- 2 Where a screening test shows that a student does not have appropriate immunity against Hepatitis B, the student must either begin a vaccination program through the Health Service, or must provide evidence which satisfies the Health Service that the student has begun and duly completed such program. Immunisation provided by the Health Service will be at no cost to the student.
- 3 Students may choose to be screened to establish their HIV antibody status, but this is not compulsory.
- 4 Where a screening test shows that a student has a positive e-antigen status in respect of Hepatitis B, or a positive antibody status in respect of HIV/AIDS, the student must accede to counselling by a member of the medical staff of the Health Service. At all times the student's right to confidential treatment of information about himself or herself will be respected by the Director and staff of the Health Service.
- 5 The counselling will be directed at informing the student about Hepatitis B or HIV/AIDS as an illness, and having the student accept and acknowledge a duty of care, including the need to learn and use effective, safe, work practices. It will also include reference to current standards and work practices in the medical and dental professions, and their academic and professional implications. As part of the counselling, students will be encouraged

to consult with the Dean of their Faculty about these matters. Where appropriate, a student will be referred to an infectious diseases specialist.

- 6 A student who has a positive e-antigen status in respect of Hepatitis B, or a positive antibody status in respect of HIV, will not be excluded from the course in which they are enrolled.
- 7 The Occupational Health and Safety HIV/AIDS/Hepatitis B Policy and Procedures (see sub-section 18.4 of the Handbook of Administrative Policies and Procedures ) will apply to all students who have a positive e-antigen status in respect of Hepatitis B, or a positive antibody status in respect of HIV/AIDS.
- 8 The University may revoke the enrolment of any student who does not comply with the screening, immunisation and counselling requirements of this policy.

#### 1.4.11 Hospital, Health Centre and IMVS rules

Rules for the admission of medical students to the practice of the teaching hospitals, health centres and the Institute of Medical and Veterinary Science may be found in the *The University Calendar Volume II: Handbook of Courses* following the Specific Course Rules for the M.B.,B.S. degree.

#### 1.4.12 Leave of absence

Please refer to the Specific Course Rules for individual courses for any precise policy statements about leave of absence; notably the Specific Course Rules for the M.B.,B.S. contain statements about 'intermission'. The Faculty of Performing Arts may require students to re-audition if they have been absent from a course - see the Specific Course Rules for details.

#### 1.4.13 Non-award enrolment

The following is clause 12 of Statute Chapter 25 - Miscellaneous:

'A person wishing to be admitted to a course of study not leading to a degree may be so admitted, upon such terms and conditions as the Council may prescribe. Such a person shall be known as a Non-award Student'.

##### *Quotas*

Normal quotas on admission to award courses do not apply. However, for some individual subjects, the University is not able to provide sufficient places for students enrolled in award courses. In these circumstances, Non-award Students will not be admitted to such subjects except with the prior approval of Council.

##### *Conditions of Admission*

Non-Award Students are subject to the same Statutes, Regulations and rules as apply to students enrolled in award courses.

Subject to the normal conditions, Non-Award Students may be admitted to examinations; results will be recorded on the student's academic transcript.

Should a Non-Award Student subsequently be admitted to a course of study leading to an award, credit may be given for subjects passed as a Non-Award Student, at the discretion of Council\* .

\* Council has delegated this authority to Deans of Faculties.

##### *Union membership and Fees*

Non-Award Students are required to pay tuition fees. Non-Award Students are also required to pay the Statutory annual fee appropriate to their student load and consequently are members of the Adelaide University Union .

#### 1.4.14 Prerequisite and corequisite studies

Except by permission of the relevant Faculty, a student shall not enrol in any subject for which the pre-requisite or corequisite requirements prescribed in the syllabus have not been met. Pre-requisites must be passed at the minimum level prescribed by the Faculty.

#### 1.4.15 Prior knowledge

What follows is clause 3C of Chapter 25 of the Statutes:

A subject designed for students with no prior knowledge of it need not be made available to students who have such knowledge. A Faculty may refuse to allow a student to enrol in a subject if, after receiving advice from the Head of the department which teaches the subject, it considers that the student's background and qualifications are fully adequate for another subject which is taught in that department and which is available as an alternative.

#### 1.4.16 Quotas

Clause 3 of Statute Chapter 9 - Of Admission and Enrolment states:

With due regard to the resources and educational objectives of the University, the Council may place quotas on courses and subjects.

(Sub-section 12.4 of the Handbook of Administrative Policies and Procedures provides details of the policy and procedures for administering subject quotas).

#### 1.4.17 Re-enrolment

See 1.4.7 Enrolment by Prescribed Date & Payment of Fees.

For re-enrolment *in subjects*, see also 1.4.19 Repeating a subject.

#### 1.4.18 Repeal or alterations of course of study

In all cases where regulations and rules affecting the course of study for any degree or diploma of the University have been or shall be repealed or altered, the Council may nevertheless allow candidates who have previously entered under the regulations repealed or altered to complete their course thereunder, but may impose such conditions or modifications as may seem good to the Council in each individual case.

In all cases where the regulations and rules affecting the degree of Master or Doctor in any faculty have been or shall be repealed or altered, the Council may nevertheless allow a candidate, who has qualified under the regulations repealed or altered to proceed to that degree, to complete his [or her] qualification under the regulations so repealed or altered, provided that [the candidate] complete his [or her] qualification for admission to the degree under those regulations within three years of the date of such repeal or alteration.

#### 1.4.19 Repeating a subject

##### *Exemptions*

##### *Repeating a subject for the second time - enrolment restriction*

No student shall repeat a subject already passed except where:

- (a) a higher classification of pass is necessary to enable the student to satisfy prerequisite subject requirements for a higher level subject;
- (b) a student needs to convert a conceded pass to a higher level pass in order to qualify for an award;
- (c) Specific Course Rules for an award provide for the repeating of a subject, notwithstanding that it may have been previously passed, or for the possibility of it in respect to special features of the structure or process of the award; or
- (d) there are sound academic reasons for the Council to permit it.

For rules on such matters as exemptions available or enrolment restrictions, please refer to the Specific Course Rules.

#### 1.4.20 Status/exemption\*/credit transfer

A candidate who has passed subjects in other faculties or tertiary institutions or who has other qualifications may, on written application to the Faculty, be granted such status in those subjects or exemption from the relevant course or subject requirements as the Faculty may determine, (provided always that the candidate shall give such evidence of their status as in the opinion of the Faculty shall be sufficient).

Students wanting to apply for prospective status for studies to be undertaken at another institution at a future date should apply to the Faculty.

##### notes

Within the Bachelor of Engineering degree, any exemptions granted from part of the requirements for a subject are approved by Heads of Departments and shall hold for one academic year only.

Specific courses for awards offered by the Faculty of Agricultural and Natural Resource Sciences use a broader definition of status than other Faculties within the University. Refer to the 'definitions' section of the Specific Course Rules for the Faculty.

\*See also section 1.4.19 on Repeating a Subject

#### 1.4.21 Tuberculosis screening of overseas and Australian students

Under the umbrella of Statute Chapter 32, Infectious diseases, the following policy has been approved:

- 1 All overseas students studying at the University of Adelaide shall attend the University Health Service to have the standard screening tests to TB done to ensure that their TB status is satisfactory and that there is no transmission of infection. The standard screening test will comprise a short history to determine risk factors and a Mantoux test at the Health Service, followed up by a Chest X-ray at the RAH Chest Clinic. Information/results will be exchanged between the Health Service and the Chest Clinic and utilised for reporting, contact tracing and surveillance purposes.
- 2 Overseas students requiring treatment (both active and non-active) will be managed jointly by the Chest Clinic and University Health Service following the standard protocols for treatment developed by the RAH Chest Clinic.
- 3 Australian students and University staff at risk of infection will be screened as in 1. above, and any requiring treatment managed as in 2. above.

- 4 Those persons screened who do not show evidence of infection will be offered vaccination (BCG) by the University Health Service.

#### 14.22 Unacceptable combinations of subjects

No candidate will be permitted to count towards an award any subject, together with any other subject, which, in the opinion of the Faculty concerned, contains a substantial amount of the same material; and no subject or portion of a subject may be counted twice towards an award.

#### 14.23 Withdrawal dates

The last day for withdrawing from subjects *without* the withdrawal counting as a failure is as follows:

- semester 1 subjects:** the end of the ninth teaching week of the semester (excluding the mid-semester break)
- semester 2 subjects:** the end of the ninth teaching week of the semester (excluding the mid-semester break)
- full year subjects:** the end of the fourth teaching week of second semester

For withdrawal dates for summer semester subjects and for the MBA trimester subjects, please contact Student Administration or the Faculty concerned for details.

## 1.5 Fees

Chapter 89 of the Statutes - Of Fees, states the following:

- 1 (a) The Council may impose fees in respect of instruction, tuition, applications for awards, or any other matters.
- (b) The Council shall prescribe by rule those matters in respect of which a fee is to be charged, the categories of persons who are to pay them, the amounts to be charged and the time and manner of payment.
- (c) The Registrar may allow in individual cases an extension of time for payment of fees. A student who fails to pay the prescribed fees at the time prescribed by the Council or within such extended time as may have been allowed by the Registrar shall incur such

additional fee as may be prescribed by the Council.

- 2 (a) Every student proceeding to a degree, diploma, or certificate of the University and such other students as the Council may from time to time decide shall, unless exempted therefrom by the Council, pay an entrance fee and an annual fee for membership of the Adelaide University Union.
- (b) The Council shall from time to time prescribe the entrance fee and the annual fee. The entrance fee shall be the same for all classes of students, but the annual fee may differ for different classes of students as determined from time to time by the Council.
- (c) The Council may determine whether the entrance fee may be paid by instalments over the first two years of the student's enrolment in the University and whether any individual student or any class of student may be exempted from payment of either the entrance fee or the annual fee or both.
- (d) The entrance and annual fees prescribed from time to time by the Council and the conditions under which they may be paid shall be published in the University Calendar.
- 3 When it deems there are adequate reasons for so doing the Council may:
- (i) reduce any fee payable by a student, or
- (ii) exempt a student from liability to pay any fee.
- 4 Subject to Clause 3 of this Statute a student may not re-enrol in the University and not withstanding the provisions of the separate degree, diploma or certificate regulations applicable a candidate shall not be admitted to a degree, diploma or certificate of the University unless all outstanding fees and all other financial obligations due to the University have been discharged or arrangements of their discharge have been approved by the Registrar.

note: *The University Calendar Volume II: Student Guide and Timetables* contains some general information about Statutory fees (commonly called Union fees), tuition fees and other charges. See also the Specific Course Rules for any additional course-specific fees or special items which may need to be purchased.

## 1.6 Grievance procedures

The University has adopted the following procedures for dealing with student complaints in a range of areas, including academic programs, individual staff members and administrative operations and decisions. The University has also adopted an additional set of policies and procedures for the resolution of grievances by **postgraduate** students.

These procedures recognise that most complaints will be dealt with directly with the staff member, and resolved 'on the spot'.

Complaints are of distinct kinds, which are dealt with separately:

- 1 complaints relating to academic programs and status
- 2 complaints relating to individual staff members
- 3 complaints concerning administrative operations or decisions of the University
- 4 complaints relating to a grade for assessed work - refer to the section on Assessment and Examinations - Student Assessment Procedures and Appeals.

For complaints relating to sexual harassment and equal opportunity issues, refer to *The University Calendar Volume II: Student Guide and Timetables*.

### 1.6.1 Complaints relating to academic programs and status

- 1 Students may raise a problem or issue relating to academic programs, eg the content or structure of a subject, or of a whole course, or its means of assessment, or academic status for work done elsewhere, in the appropriate academic committee through one of their student representatives, or by personal approach to the Secretary or Convener of the relevant body, ie
  - the Departmental Committee
  - the Departmental Assessment Committee
  - the Faculty Curriculum Committee
  - the Faculty
  - the Faculty Student Applications/Matters Committee.
- 2 Alternatively, a student may make a specific and formal complaint about such a matter, to the person or body with immediate responsibility.

If a student decides that it is appropriate to raise the issue as a complaint, he or she should complain to:

- (a) the subject coordinator, for complaints relating to a particular subject
- (b) the Head of Department, for complaints relating to a Department's subjects and academic procedures generally
- (c) the Dean of the Faculty for complaints relating more generally to a course, or faculty policies concerning curriculum, teaching or assessment.

3 Oral complaints shall be dealt with informally.

4 With written complaints, the person receiving the written complaint shall acknowledge its receipt in writing within one week, and shall reply within one month informing students of the outcome of the complaint, or stating what progress has been made and when the next report to the student(s) will be made, and so on, until the matter is resolved. Where a complaint has a particular impact on individual staff member(s) responsible for a subject, they shall be kept fully informed as to the progress of the matter.

5 Responsibility for dealing with the complaint may be transferred to a Head of Department, Faculty Course Coordinator or Convener of a Faculty Curriculum Committee or Student Matters Committee, but the student must be kept informed as to who has carriage of the matter at any time.

6 If the matter is not resolved to the satisfaction of the complainant he/she may appeal to the Student Academic Appeals Committee which, if it agrees that it requires further consideration, may refer it back to the Faculty or to the Academic (Educational) Matters Sub-Committee.

### 1.6.2 Complaints relating to individual staff members

- 1 Students should direct grievances about individual staff members (for example, unsatisfactory teaching, unsatisfactory relationship with a staff member) orally to the staff member concerned in the first instance, if possible. Most grievances can be resolved quickly with direct discussion between the student(s) and the lecturer. Complaints by postgraduate research students concerning their supervisor or Head of Department or otherwise

pertaining to their status as research students shall be dealt with according to the procedures of the Board of Graduate Studies.

(For more information on procedures for postgraduate students see the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*) Students and staff may enlist the aid of a disinterested third party to assist in these discussions (for example, Student Counsellor, Director - Equal Opportunity, a student representative on the Departmental Committee or on the Faculty).

- 2 If it is not feasible to approach the staff member directly and informally as above, or if there has been no satisfactory resolution from the direct and informal contact, then the student(s) may lodge a complaint in writing with the staff member's Head of Department (where the Head of Department is the person complained about, the student may lodge the complaint with the Dean of the Faculty\*). This document shall state the evidence on which the complaint rests.

(\*note: Where the words 'Head of Department' occur they may be read as 'Dean of the Faculty' where appropriate.)

- 3 Students may complain orally to the Head of Department. Where a complaint is made orally the Head of Department shall make a written note of the complaint and communicate it to the staff member concerned. If the Head of Department believes that the complaint warrants investigation he or she may ask the student to put the complaint in writing.
- 4 The Head shall acknowledge receipt of the complaint within five working days, inform the staff member complained about, and shall deal with the complaint as expeditiously as possible. Within one month of receipt, the student(s) shall be informed in writing of the outcome of the complaint, or what progress has been made and when the next written advice as to progress/outcome will be given, and so on until the matter is resolved. This does not preclude face-to-face meetings between the student(s) and the staff member, which may be convened by the Head or other person requested by the Head to assist.
- 5 Victimisation of students who lodge complaints is prohibited. The Head of

Department will counsel the staff member accordingly. If the students fear they may be victimised, they may request the Head to make arrangements to protect the students' interests - including allocating the students to other classes, moderating the assessment, etc The Director, Equal Opportunity, is available to advise students, staff and Heads of Departments about such arrangements.

#### Confidentiality

- 6 Students must state whether or not their identities are to be kept confidential from the staff member. If a student requests that his or her identity be kept confidential from the staff member, then;
  - 1 If the matter can be resolved with the identity being kept confidential, then the student's name or any other information which will identify her or him shall be withheld from the staff member.
  - 2 If in the opinion of the Head of Department the matter cannot be resolved with the identity of the student being kept confidential, then the student must agree to lifting the requirement for confidentiality, or else the complaint shall lapse (because it cannot proceed). The Head of Department shall take into account whether or not the staff member can properly defend him or herself without knowing the identity of a complainant.

#### Outcomes

- 7 (1) The Head of Department shall inform the student(s) who lodged the complaint, and the staff member concerned, of the final outcome.
  - (2) Furthermore, the Head of Department shall consider whether there are any other students who might have been affected by the same complaint, and who should benefit from the same outcome.
  - (3) A staff member dissatisfied by the Head of Department's determination of a complaint may appeal to the Vice-Chancellor.
- 8 If students are not satisfied with the outcome or progress with dealing with the complaint, then they may complain in writing to the Registrar. The same response schedule then applies as above.

*Record Keeping*

- 9
- (1) For oral complaints which are satisfactorily resolved with nothing in writing, no records shall be kept.
  - (2) File records relating to a complaint which is not yet resolved shall be maintained by the Head of the Department.
  - (3) For written complaints for which there is an outcome which reflects adversely on the staff member's performance, all records which relate to the complaint shall be placed on the staff member's personal file. Where this occurs, the staff member shall be given a copy of the record and entitled to attach his or her own comments.
  - (4) For written complaints for which there is an outcome which does not reflect adversely on the staff member's performance, all records which relate to the complaint shall be destroyed. Furthermore, if the complaint has become public, then the Head of Department shall take action to update and correct the public record.
  - (5) Apart from the records defined in 9.2 and 9.3 no other records shall be kept that identify the staff member concerned.

1.6.3 Complaints concerning administrative operations or decisions of the University or of some department, unit, branch, etc, thereof

- 1 Students should direct complaints concerning some administrative action, inaction, procedure or decision orally to the person with immediate responsibility in the first instance (or the person likely to have responsibility for this function, if the situation is not clear).
- 2 The officer or other employee of the University approached shall ascertain the nature of the complaint or problem, and either take immediate steps to have it rectified, or refer the matter to the officer with the authority to investigate the matter and if necessary initiate reform or redress. This shall be done either by referring the student directly to the superior officer, or by informing the officer in writing of the complaint, and informing the student to whom the complaint has been referred.

3 The person who accepts responsibility for investigating the complaint shall inform the student within a reasonable time whether it is accepted that the complaint has substance, and if so, what is being done by way of redress and/or rectification. If the matter remains under consideration for a prolonged period, the student shall be kept informed of progress, and of the final outcome.

4 If a complaint was found to have substance, the officer who took responsibility for dealing with it shall consider whether other students' interests could be, or could have been, affected by the problem experienced by the complaining student. The officer shall take whatever steps are practicable to ensure equitable treatment, and shall also recommend any changes to procedures which might prevent a recurrence of the problem.

5 A student dissatisfied with the outcome of such a complaint may appeal to the Student Academic Appeals Committee.

**6 Complaints relating to a grade for assessed work**

The procedures relating to complaints in relation to grades are provided in the section on Assessment and Examinations.

**7 Complaints relating to sexual harassment**

The procedures relating to Sexual Harassment are outlined in the section 'Sexual Harassment' in the Student Guide.

**8 Complaints relating to equal opportunity issues**

The procedures relating to Equal Opportunity are outlined in the section 'Equal Opportunity' in the Student Guide.

**1.7 Intellectual property**

The University's policy on intellectual property is contained in section 10.13 of the Handbook of Administrative Policies and Practices. The policy is also reproduced in the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*.

**1.8 Safety Procedures**

Under the South Australian Occupational Health, Safety and Welfare Act, 1986, students have a responsibility to work safely, taking reasonable care to protect their own health and safety and that of other students and staff. Specific responsibilities are outlined in the

University's Health, Safety and Welfare Policy (Sub-section 18.1 of the Handbook of Administrative Policies and Procedures).

*Laboratory conduct procedures*

The University's approved laboratory conduct procedures are included as Appendix A to the General Course Rules.

The University also has the following sub-sections under *Research* in the Handbook of Administrative Policies and Procedures:

10.4 Experiments involving Animals

10.14 Ethics of Human Experimentation

**1.9 Qualification requirements**

Statute Chapter 11 - Of Degrees states the following:

- 1 Subject to Chapter LXXXIX \* candidates who shall have fulfilled all the conditions prescribed by the statutes and regulations for any degree, diploma, certificate or other award of the University shall be admitted to that degree or awarded that diploma, certificate or other award.

\* Statute Chapter 89 - Of Fees

**1.10 Review of academic progress**

Under the provisions of Clause 4C of Chapter 25 of the Statutes, students whose academic progress is considered to be unsatisfactory may be precluded from taking further studies in the course for which they are enrolled; or further enrolment in that course may not be permitted for one academic year; or they may be permitted to re-enrol, but with a restricted program of study.

Clause 4C is reproduced in full below.

- 4C (a) A faculty or board of studies may review the academic progress of any student enrolled for studies within the curriculum of that faculty or board at any time after the student has been enrolled for two semesters and, in the case of a student enrolled for a subject or subjects, has presented or has had an opportunity of presenting for the final examination in the subject or subjects for which (the student) was enrolled.
- (b) As a result of such review the faculty or board may decide (i) to take no action, or (ii) to permit the student to take during the current or next ensuing academic year only such programme of study as it may approve, or (iii) to recommend to

the Council that the student be not permitted to enrol for further studies within its curriculum during the next ensuing academic year, or (iv) to recommend to the Council that the student be precluded from taking further studies in the subject or course for which [the student] was enrolled.

- (c) Whenever a student who has been enrolled for studies within the curriculum of a faculty or board of studies seeks enrolment for studies within the curriculum of another faculty or board of studies, or when a student who has been precluded under (b) seeks readmission to the faculty or board of studies from which he was precluded, the faculty or board of studies in which enrolment or re-enrolment is sought may consider the candidate's previous academic record in the University and elsewhere and may recommend to the Council that the enrolment be rejected.
- (d) Every student or candidate whose position is to be considered under the foregoing sections of this clause shall be notified accordingly, and may be requested to submit in writing for consideration by the faculty or board of studies such explanations as [the student] can offer for lack of satisfactory progress and reasons why [the student] should be permitted to enrol for further studies in the University. If the faculty or board of studies decides to recommend preclusion under section (b) or rejection under section (c) of this clause the recommendation shall be submitted to the Council which, after making such enquiry as it thinks fit, may confirm, vary or set aside the recommendation.
- (e) For the purposes of the foregoing sections of this clause and for the purposes of reducing the potential for delay in resolving the action to be taken with respect to the student a faculty or board of studies may delegate its responsibilities and powers to a sub-committee consisting of a number of members of the faculty or the board of studies

or to the dean of the faculty or the Convener of the board of studies. If, after making a review of the academic progress or history (as the case may require) of the student, the sub-committee or the dean or the Convener (as the case may be) decides to recommend preclusion under section (b) or rejection under section (c), the sub-committee or the dean or the Convener shall submit a recommendation directly to the Council and send a copy thereof to the faculty or board of studies.

Any delegation of its responsibilities and powers to a sub-committee or to its dean or Convener shall not thereby preclude the faculty or board of studies itself acting under the foregoing sections in relation to the student.

(note: Sub-section 7.10 of the Handbook of Administrative Policies and Procedures deals with the procedures for administering the '4C' policy and refers students to a document 'Academic Progress: Application of Clause 4C of Chapter 25 of the Statutes: Information for Students' available to students on request. Not all Faculties apply the clause 4C policy while some other Faculties may have additional requirements with regard to review of academic progress - see the Specific Course Rules for each course for details.)

### 1.11 Scholarships and prizes

Most of the rules for the scholarships and prizes available at the University of Adelaide are described in *The University Calendar, Volume I*.

### 1.12 Special circumstances

When in the opinion of the relevant Faculty special circumstances exist, the Council, on the recommendation of the Faculty in each case, may vary any of the provisions of the Specific Course Rules for any particular award.

## 2 Postgraduate courses

### 2.1 Admission requirements

What follows are *general* rules for admission to postgraduate courses.

Detailed admission requirements for each postgraduate course are contained in the appropriate set of Specific Course Rules.

#### 2.1.1 Graduate certificates

##### 1 Standard admission

An applicant for admission to the course of study for the Graduate Certificate shall *normally*:

- (a) have qualified for an appropriate degree or an appropriate Honours degree of the University or
- (b) hold qualifications from another institution accepted by the Faculty for the purpose and
- (c) have completed such other prerequisite work as may be prescribed in the Specific Course Rules for the Graduate Certificate.

Courses within the Faculty of Performing Arts normally require a satisfactory audition as well.

##### 2 Discretionary admission

The Council\* may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of (1) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

\*Council has delegated this authority to Deans of Faculties.

#### 2.1.2 Graduate diplomas

##### 1 Standard admission

An applicant for admission to the course of study for the Graduate Diploma shall *normally*:

- (a) have qualified for an appropriate degree or an appropriate Honours degree of the University or
- (b) hold qualifications from another institution accepted by the Faculty for the purpose and
- (c) have completed such other prerequisite work as may be prescribed in the Specific Course Rules for the Graduate Diploma.

Courses within the Faculty of Performing Arts normally require a satisfactory audition as well.

**2 Discretionary admission**

The Council\* may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of (1) above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

\*Council has delegated this authority to Deans of Faculties

**2.1.3 Postgraduate diplomas**

An applicant for admission to the course of study for a Postgraduate Diploma shall

- (i) have qualified for a Graduate Certificate of the University in an approved field of study or an equivalent award of another institution accepted for the purpose by the Faculty; or
- (ii) have qualified for a degree or a three year diploma of the University in an approved field of study, or for an equivalent award of another institution accepted for the purpose by the Faculty.

**2.1.4 Master degrees**

**1 Standard admission**

An applicant for admission to the course of study for the degree of Master shall normally:

- (a) have qualified for an appropriate degree or an appropriate Honours degree of the University, or
- (b) hold qualifications from another University or institution accepted by the Faculty for the purpose, and
- (c) have completed such other prerequisite work as may be prescribed in the Specific Course Rules for the Master degree.

Courses within the Faculty of Performing Arts normally require a satisfactory audition as well

**2 Discretionary admission**

With the approval of the Board of Graduate Studies, acting with authority wittingly devolved to it by Council\*, the Dean of Graduate Studies may, acting on a recommendation from the head of the

department concerned, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree of Master a person who does not satisfy the requirements of (1) above but who has given evidence satisfactory to the Board of fitness to undertake work for the degree of Master.

\* Council has delegated authority to the Dean of Faculty in the case of Master degrees by coursework.

**3 Conditional Admission — qualifying or probationary period for Master degrees**

A candidate admitted under (1) or (2) above may be required to pass such qualifying work or bridging work as the Board of Graduate Studies\*, acting on a recommendation from the head of the department concerned, shall determine before the candidate's admission to the Master degree may be confirmed by the Board.

\*The Faculty in the case of Master degrees by coursework.

**2.1.5 Degrees of Doctor of Philosophy (Ph.Ds)**

The degree of Doctor of Philosophy has its own set of Regulations contained in *The University Calendar Volume II: Handbook of Courses*.

Regulation 6 of the Ph.D. states:

Except as otherwise prescribed in the schedules, the academic standing required for acceptance as a candidate shall be an Honours degree of Bachelor of at least a IIA Standard or a degree of Master of the University of Adelaide or the equivalent thereof. Applications from students with other qualifications will require the approval of the Board of Graduate Studies.

**2.1.6 Higher doctorates**

Higher doctorates offered by the University have their own sets of Regulations contained in *The University Calendar Volume II: Handbook of Courses*. Please refer to these Regulations for admission requirements.

**2.2 Assessment and examinations**

Section 1.2 of the General Course Rules on assessment and examinations for undergraduate students also applies to students undertaking coursework postgraduate studies.

In addition, section 1.2.5 on Plagiarism and Related Forms of Cheating applies to students undertaking postgraduate studies by research.

Postgraduate students should consult the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees* and the University of Adelaide's booklet on *Higher Degree Administration* as well as the Guidelines on Higher Degrees by Research and Specifications for Thesis contained in the *Calendar Volume II: Handbook of Courses*.

Postgraduate students should consult the Specific Course Rules for the course they are undertaking.

### 2.3 Computing facilities: rules for student use

Section 1.3 of the General Course Rules for undergraduate students also applies to postgraduate students.

### 2.4 Enrolment and re-enrolment

Section 1.4 of the General Course Rules for undergraduate students also applies to postgraduate students.

#### 2.4.1 Duration of courses

What follows are general statements about course duration. Please refer to the Specific Course Rules for each course for any precise statements about course duration.

##### 1 Graduate certificates

The course of study will normally be completed in one semester of full-time study or in not more than two years of part-time study.

##### 2 Graduate diplomas

The course of study will normally be completed in one year of full-time study or in not more than three years of part-time study.

##### 3 Postgraduate diplomas

The course of study will normally be completed in one year of full-time study or the part-time equivalent.

##### 4 Master degrees

The length of Master degrees varies from one year full-time to up to three years full-time. Please consult the Specific Course Rules for individual Master degrees for details on course duration.

##### 5 Degrees of Doctor of Philosophy (Ph.Ds)

Regulation 8 for the degree of Doctor of Philosophy covers the length of study.

#### 2.4.2 Repeal or alterations of course of study

In all cases where regulations and rules affecting the course of study for any degree or diploma of the University have been or shall be repealed or altered, the Council may nevertheless allow candidates who have previously entered under the regulations repealed or altered to complete their course thereunder, but may impose such conditions or modifications as may seem good to the Council in each individual case.

In all cases where the regulations and rules affecting the degree of Master or Doctor in any faculty have been or shall be repealed or altered, the Council may nevertheless allow a candidate, who has qualified under the regulations repealed or altered to proceed to that degree, to complete his [or her] qualification under the regulations so repealed or altered, provided that [the candidate] complete his [or her] qualification for admission to the degree under those regulations within three years of the date of such repeal or alteration.

#### 2.4.3 Leave of absence

Please refer to the Specific Course Rules for individual courses for any precise policy statements about leave of absence.

The usual practice with regard to Master degree courses is that a maximum period of candidature is stipulated in the Specific Course Rules with the Faculty\* concerned being permitted to change the period of candidature - for details on suspensions, extensions and intermissions of candidature, see also the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees* and the University of Adelaide's booklet on *Higher Degree Administration*.

\*The Faculty in the case of Master degrees by coursework and the Board of Graduate Studies in the case of Master degrees by research.

The Faculty of Performing Arts may require students to re-audition if they have been absent from a course - see the Specific Course Rules for details.

#### 2.4.4 Withdrawal dates

Please refer to section 1.4.23.

### 2.5 Fees

Section 1.5 of the General Course Rules for undergraduate students also applies to postgraduate students.

## 2.6 Grievance procedures

The Grievance Procedures for postgraduate students are contained in the University's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*.

## 2.7 Intellectual property

The University's policy on intellectual property is contained in sub-section 10.13 of the Handbook of Administrative Policies and Practices.

The policy is also reproduced in the University of Adelaide's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees*.

## 2.8 Safety Procedures

Under the South Australian Occupational Health, Safety and Welfare Act, 1986, students have a responsibility to work safely, taking reasonable care to protect their own health and safety and that of other students and staff. Specific responsibilities are outlined in the University's Health, Safety and Welfare Policy (Sub-section 18.1 of the Handbook of Administrative Policies and Procedures).

### *Laboratory conduct procedures*

The University's approved laboratory conduct procedures are included as Appendix A to the General Course Rules.

The University also has the following subsections under *Research* in the Handbook of Administrative Policies and Procedures:

10.4 Experiments involving Animals

10.14 Ethics of Human Experimentation

## 2.9 Qualification requirements

Statute Chapter 11 - Of Degrees states the following:

- 1 Subject to Chapter LXXXIX \* candidates who shall have fulfilled all the conditions prescribed by the statutes and regulations for any degree, diploma, certificate or other award of the University shall be admitted to that degree or awarded that diploma, certificate or other award.

\*Statute Chapter 89 - Of Fees

## 2.10 Review of academic progress

Postgraduate students should consult the University's *Code of Practice for Maintaining and Monitoring Academic Quality and Standards in Higher Degrees* or the Specific

Course Rules for the course they are undertaking.

## 2.11 Scholarships and prizes

note: Most of the rules for the scholarships and prizes available at the University of Adelaide are described in The University Calendar, Volume I.

## 2.12 Special circumstances

When in the opinion of the relevant Faculty special circumstances exist, the Council, on the recommendation of the Faculty in each case, may vary any of the provisions of the Specific Course Rules

## Appendix A

### Laboratory conduct procedures

*These procedures have been developed from information supplied by the South Australian Department for Industrial Affairs and the Standards Association of Australia Standard AS2243, 'Safety in Laboratories'.*

The University of Adelaide recognises its obligation to take all reasonable precautions to safeguard the health, safety and welfare of its employees and students while they are at work.

The University of Adelaide also believes that students leaving this University must take with them an attitude which accepts good health and safety practice as normal.

To this end, the following Laboratory Conduct Procedures have been developed and must be adhered to by all who work in laboratories. It is strongly recommended that new students and research workers view the film entitled 'Safety in Laboratories' available from the Occupational Health & Safety Unit.

*Persons who fail to comply with these procedures will not be allowed to work in the laboratory.*

### General safety rules

- Eating, drinking and the application of cosmetics in laboratories is prohibited. (Wine tasting, which occurs as part of the Wine Science and Wine Marketing Courses at Roseworthy Campus is permitted in designated laboratories only.)
- Do not store food and/or drink in laboratory refrigerators or laboratory storage units.
- Do not run or indulge in horseplay.

### Fire prevention

- No smoking in laboratories.
- No open flames should be left unattended and no open flames should be used near any flammable solvents.
- Chemical waste should not be disposed of via sinks, drains or stormwater channels. Departments must provide suitable waste disposal containers and are responsible for removal by an approved waste disposal contractor.
- Keep fire escape routes clear at all times.
- Be familiar with FIRE PROCEDURES within the laboratory.
- Be familiar with the use of fire-fighting equipment.

### Personal protection

- Approved safety spectacles, goggles or safety shields must be worn in all areas where tools or substances such as chemicals, liquids, UV light or radiation may cause eye injury.
- Laboratory coats, or gowns tied at the back, must be worn. Gloves should be worn at the discretion of the supervisor.
- Wear closed-in footwear at all times. Bare feet, thongs and sandals are prohibited.
- Cover all open wounds when handling chemicals and animals.

- Wash hands after work and before leaving the laboratory.
- Use disinfectants after handling suspected infectious materials.
- Do not pipette by mouth, use mechanical pipetting devices.
- Avoid lifting heavy objects - use trolleys where appropriate. Where lifting is unavoidable, seek assistance (share the load).
- Do not use any machines or laboratory apparatus without prior instruction by the supervisor on safe work procedures and practices.
- Button loose clothing and tie back long hair. When using machinery, remove jewellery, rings etc should the possibility exist for such items to be caught in moving parts.

### Housekeeping

- Keep floors tidy and dry.
- Keep benches clean and free from chemicals and apparatus that are not being used.
- Keep aisles free from obstructions.
- Clean working area and equipment thoroughly after use.
- If last to leave the laboratory, make sure equipment is turned off, flames are extinguished etc.
- Keep the interior of fume cupboards and nearby areas clean and clear.
- Observe safety signs at all times.
- All apparatus left running overnight should be shielded and labelled with name and telephone number of person to be contacted, and the Security Office notified.
- If contractors are working in your area, make known to them any hazards which may exist in your area, ie flammable liquids.

## Chemicals

- Clearly label all containers in use within the laboratory.
- Always use safety carriers for transporting glass or plastic containers with a capacity of 2 litres or greater.
- Read the Material Safety Data Sheet before commencing work.
- Regard all substances as hazardous unless there is definite information to the contrary.
- Carry out work in fume cupboards if material is likely to give off toxic or unpleasant odours.
- Keep fume cupboard sashes closed whenever practicable.
- Do not place objects near fume cupboard baffles so that airflow is prevented.
- Do not allow flammable materials to accumulate in the laboratory.
- Use the correct containers provided to dispose of glass, sharps, metal, paper, infectious waste etc.
- Wash hands frequently and upon completion of work.

## Electrical equipment

- The use of electric open bar radiators or any fan heaters is prohibited.
- Switch off all electrical appliances when equipment is not in use.
- Display a 'LEAVE ON' sign on any equipment required to be left on for an extended period.
- Use Residual Current Devices (RCDs) for all hand held electrical appliances.

## Emergency/First Aid

- It is the responsibility of all supervisors to ensure that persons working in a laboratory know the location of:
  - (a) the nearest fire extinguishers
  - (b) first aid box
  - (c) emergency shower/eye wash facilities
  - (d) isolation devices for gas, water and power (where fitted)
  - (e) emergency spill containment equipment and procedures
  - (f) emergency personal protective equipment
  - (g) fire/emergency escape exits
- Wash skin immediately with plenty of water if contaminated with acids and alkalis.

- Eyes splashed with any chemical must be washed with water and medical advice obtained immediately.
- All breakages and spills must be reported to the supervisor and dealt with immediately. Materials should be cleaned up and a bin provided for broken glass and materials etc.

## After hours working in laboratories

Work outside of core hours 8:00am to 6:00pm, or at weekends, is regarded as after hours.

There is an extra danger in laboratory work after hours, when your supervisor may not be present, and it is particularly dangerous to work alone in a building or even far removed from other people.

Personnel of Departments who wish to work outside normal hours may be required to fill in a form on arrival and again on leaving the building. (Such a system operates in the Biochemistry, P&I Chemistry and Organic Chemistry Departments).

This form requires you to:

- Write your name
- Indicate the room(s) you are working in
- Indicate the times you commence and finish
- Notify the last person in the building that you are leaving

note: Work by undergraduate students can only be performed when supervised by an academic staff member (or nominee) during or outside core hours.

### Please note:

For work with recombinant DNA organisms, refer to the University of Adelaide Handbook of Administrative Policies and Procedures, Sub-Section: 10.2 (paragraphs 1-15).

For work with carcinogenic chemicals, refer to the NH&MRC publication, 'Guidelines for laboratory personnel working with carcinogenic or highly toxic chemicals', available from the OH&S Unit.

For work with radioactive substances, refer to rules available from the OH&S Unit.

*These procedures shall be read in conjunction with the Department's Health and Safety Manual and Australian Standard 2243, 'Safety in Laboratories', Parts 1 to 10 inclusive.*

# Appendix B

## General Syllabus Information for Undergraduate and Graduate Courses

---

The following information pertains to both Undergraduate and graduate course unless otherwise stipulated in the preamble to course syllabus details.

### **textbooks**

Information on appropriate textbooks will be provided by the department concerned, and at preliminary lectures in Orientation Week.

In general, students are expected to have their own copies of textbooks but they are advised to await advice from the lecturer concerned before buying any particular book. Only the prescribed edition of any text-book should be bought.

### **reference books**

Although lists of books and journals for reference purposes are regarded as important, details have not been included in this Volume. These will however be issued from time to time by the departments concerned. It is hoped that all books and journals set for reference will be available to be consulted in the Barr Smith Library and/or the Waite Campus or Roseworthy Campus Libraries.

### **examinations**

For each subject students may obtain from the department concerned details of the assessment in that subject including the relative weights given to the components (eg such of the following as are relevant: assignments, semester tests, essays or other written or practical work, final written examinations, *viva voce* examinations)

### **contact hours**

Although information on contact hours is often listed under the subject entries for the various courses, they are subject to change. Detailed information will be available to students at the commencement of lectures.

## Appendix C

### CONDUCT AT THE UNIVERSITY OF ADELAIDE

The University believes that although an education institution is necessarily challenging and competitive, a comfortable, supportive and tolerant atmosphere is vital.

Thus the University of Adelaide expects:

- All students and staff of the University to treat each other with respect
- All students and staff of the University to treat the University environment and property with care
- All students and staff of the University to become familiar with and to follow all University policies and practices that are relevant to their field of study or work
- All students and staff of the University to observe their colleagues' right to work and study in an environment free from harassment in the form of intimidation, threat and humiliation.

The University recognises that academics have a duty of care to their students. Academics have an obligation to diligently teach and assess students. Academic and general staff are expected to respond to the diversity of students' needs and to pay due attention to student feedback.

Actions which take the form of harassment or assault or which are coercive, including those which are justified on the basis of being an initiation into, or punishment within, a group, club or residential college, are unacceptable.

The University expects staff, students and affiliate bodies to take reasonable steps to ensure that discrimination and harassment does not take place.

#### Who is covered by this statement?

All members of the University, academic staff, general staff, students (award, non-award and Continuing Education), contractors and visitors are expected to observe the standards described in this document.

#### What is the statement for?

Its purpose is to establish and communicate the standards of behaviour expected at this university. Information about specific policies on unlawful behaviour can be obtained from the Equal Opportunity Office.

Other policies on matters such as disabled access, appropriate language and discrimination can be found in the Student Information Guide (for students), in the Handbook of Administrative Policies and Procedures, and the University of Adelaide website (for staff).

This document exists separately to University policies, as it is a general statement of what the University recognises as appropriate behaviour

#### What if the guidelines are ignored?

If you believe that you have suffered as a result of someone behaving outside these stated expectations, contact the offices listed below to discuss the best way to deal with the issue. There are processes for dealing with general misconduct. The people below can advise on the specific application of these procedures in an individual case.

#### Contact Details

For further information about the issues raised in this guide please contact:

## Faculty of Agricultural and Natural Resource Sciences

### Regulations

#### Of Awards in the Faculty of Agricultural and Natural Resource Sciences

1 In the Faculty of Agricultural and Natural Resource Sciences there shall be the following awards:

(a) Diploma in Agricultural Production

Diploma in Horse Husbandry and Management

Diploma in Natural Resources Management

Diploma in Wine Marketing

Ordinary degree of Bachelor of Agricultural Business

Ordinary degree of Bachelor of Agricultural Science

Ordinary degree of Bachelor of Agricultural Science (Horticultural Science)

Ordinary degree of Bachelor of Agricultural Science (Integrated Pest Management)\*

Ordinary degree of Bachelor of Agricultural Science (Oenology)

Ordinary degree of Bachelor of Agricultural Science (Plant Breeding)\*

Ordinary degree of Bachelor of Agricultural Science (Viticultural Science)

Ordinary degree of Bachelor of Agriculture

Ordinary degree of Bachelor of Environmental Management

Ordinary degree of Bachelor of Environmental Science

Ordinary degree of Bachelor of Wine Marketing\*

Honours degree of Bachelor of Agricultural Business

Honours degree of Bachelor of Agricultural Science

Honours degree of Bachelor of Agricultural Science (Horticultural Science)

Honours degree of Bachelor of Agricultural Science (Integrated Pest Management)\*

Honours degree of Bachelor of Agricultural Science (Oenology)

Honours degree of Bachelor of Agricultural Science (Plant Breeding)\*

Honours degree of Bachelor of Agricultural Science (Viticultural Science)

Honours degree of Bachelor of Agriculture

Honours degree of Bachelor of Environmental Management

Honours degree of Bachelor of Environmental Science

Master of Agricultural Science

Master of Applied Science

(b) Graduate Certificate

Graduate Diploma

Postgraduate Diploma

Master

each of which shall be defined by one of the following fields of study:

Agricultural Biotechnology

Agricultural Business

Agronomy and Farming Systems

Animal Production

Crop Protection

Food Safety and Veterinary Public Health

Horticulture

Natural Resources Management

Oenology

Plant Science

Rangeland Management

Soil Management and Conservation

Spatial Information Science

Veterinary Studies

Viticulture

Wine Business

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

Regulations amended 23 February 1995, 20 February 1997,  
19 March 1998.

\* Awaiting approval and confirmation

notes (not forming part of the Regulations)

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Convenor of the Academic Board.
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.

## Diplomas in

Agricultural Production

Horse Husbandry and Management

Natural Resources Management

Wine Marketing

Bachelor of Agriculture

Bachelor of Environmental Management

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

#### 1.1 Normal admission

##### (a) General requirements

For admission to the above degree courses, an applicant must have completed SACE Stage 2 in South Australia with a minimum aggregate score specified by Council from time to time, or the equivalent

For admission to the above diploma courses, an applicant must have completed SACE Stage 2 in South Australia with a minimum aggregate score specified by Council from time to time, or the equivalent. An applicant who holds a TAFE stream 3100–3300 award which is equivalent to a year of full-time study and who has also completed SACE Stage 1 will be deemed to have met the academic requirements for admission to the diploma courses.

##### (b) Particular requirements

For admission to the Bachelor of Agriculture or Diploma of Agricultural Production an applicant must hold a South Australian Class 1 Drivers Licence or interstate equivalent

For admission to the Diploma in Horse Husbandry and Management, experience with horses of a nature and for a period acceptable to the Faculty is required

##### (c) Exceptions

Notwithstanding the requirements specified in (1)(a) and (1)(b) of this rule

an applicant who does not meet these requirements may be admitted at the discretion of Faculty if Faculty is of the opinion that the applicant has reasonable prospects of success in the course

Preference in selection for admission may be given to applicants who have obtained relevant experience or who have undertaken certain subjects in secondary school.

#### 1.2 Special admission

Special admission is available to those who have, or will have, reached the age of 21 years by 1 January of the year in which they seek admission.

Special admission does not require any precisely defined academic attainment but depends upon an assessment by the Faculty of the applicant's ability to complete the course.

### 2 Enrolment

#### 2.1 Eligibility for enrolment

No student may be enrolled in a course unless an offer of a place in the course has been made and an acceptance has been received, and all the conditions for enrolment as prescribed in these Rules have been met, including the payment of all fees and charges.

#### 2.2 Period when enrolment must be completed

All students shall enrol prior to the commencement of first semester on a date or dates determined by Council from time to time. A charge will be made by the University in cases of late enrolment.

## **2.3 Responsibility for correct enrolment**

Each student is responsible for ensuring that he/she is correctly enrolled each semester. This includes ensuring that

- (a) information required on all enrolment forms is complete and correct
- (b) the subjects are part of the course in which the student is enrolled
- (c) prerequisites have been met
- (d) the number of subjects taken does not (without the approval of the Course Adviser) exceed a normal load
- (e) approval has been granted by Faculty to enrol for a third time in a subject which has been failed at two previous attempts
- (f) all other enrolment conditions, including the payment of fees, are met by the date/s specified.

## **2.4 Last date for enrolment in a subject**

Applications to add a subject must be made on an Amendment to Enrolment form available from the Student Records Office at the Roseworthy Campus. The Amendment to Enrolment form must be signed by the Course Adviser.

External students may add subjects to their enrolment up until the Friday before the start of semester, provided that a place is available in the quota for any subject(s) chosen. Applications to add a subject must be made in writing on an Amendment to Enrolment form and lodged in the Student Records Office at the Roseworthy Campus. If time does not permit, the request should be made by telephone to the Student Records Office at the Roseworthy Campus with confirmation in writing; notification by facsimile will be accepted.

## **2.5 Enrolments in additional subjects**

Students may only enrol in subjects additional to those required to meet course requirements, or as permitted in 2.9 below of this rule with the approval of the Course Adviser.

## **2.6 Prerequisites**

The prerequisite for a particular subject is a condition or set of conditions which must be met by a student before being permitted to enrol in that subject. Subject prerequisites are specified in the University Calendar.

### **2.6.1 Equivalent subjects**

Where a student has not met the prerequisite for a subject as specified in the University Calendar the Subject Coordinator, after consultation with the Course Adviser, may approve the student's enrolment in the subject on the basis of either

- (a) the completion of other subjects deemed to be equivalent to the prerequisite *or*
- (b) the demonstration by the student of other experience which suggests that the student would be able to complete the subject successfully.

### **2.6.2 Grades and prerequisites**

The following grades will not satisfy prerequisite requirements: Conceded Pass, Fail, Withdraw-Fail and the following grades used by Roseworthy Agricultural College up until (and including) 1990: F, F\*, N, WF, An I (Incomplete) or WH (Withheld) recorded for a subject will not satisfy a prerequisite.

### **2.6.3 Failure to meet a prerequisite**

Enrolment in a subject is invalid if a student has not met the prerequisite, other than as permitted under Clauses 2.6(1)(a) and 2.6(1)(b) above. A student who enrolls in a subject in anticipation of passing its prerequisite must withdraw from the subject if the prerequisite is subsequently failed.

### **2.6.4 Status**

The granting of status in a subject is equivalent to a pass in the subject for prerequisite purposes. However, a student may not, without the permission of the Course Adviser, enrol in a subject in anticipation of being granted status in its prerequisite.

### **2.6.5 Changes to prerequisites**

A student shall not be disadvantaged by any change in prerequisites for subjects in a course provided that the student remains continually enrolled in the course. Should a student withdraw from a course and be subsequently re-admitted the student will be required to satisfy prerequisites applying at the time of re-admission.

## **2.7 Multi-mode enrolment**

An internal student may apply to enrol in one or more external subjects in a semester. Permission may be granted, for example, to avoid a timetable clash, or to allow a student to graduate sooner than would be possible if time were to be spent waiting for a subject to be offered internally.

Application by an internal student for permission to take an external subject must be made to the Student Records Office at the Roseworthy Campus. Approval will be granted only with the consent of the Course Adviser, and will be subject to a place being available in the subject quota. Internal students may not add an external subject to their enrolment after the second week of semester.

## 2.8 Transfer from the internal to the external mode

Subject to the availability of subject offerings and to quotas, a student may transfer from enrolment in the internal mode to enrolment in the external mode and vice versa provided the enrolment is completed within the time specified in 2.4 above.

Application for permission to effect such a transfer must be made to the Course Adviser and the result of the application lodged with the Student Records Office at the Roseworthy Campus.

Any additions to a student's enrolment must be lodged with the Student Records Office at the Roseworthy Campus.

## 2.9 Variations to course

Under special circumstances, Faculty, on the recommendation of the relevant Course Adviser, may approve the variation of a student's course by permitting the replacement of stream or elective subjects with subjects from other courses or streams, either from another tertiary institution or from the University of Adelaide, provided that

- (a) such variation may not exceed 15 points for a Bachelor's degree or 9 points for a Diploma or Associate Diploma *and*
- (b) approval for such variation is given by Faculty before the student enrolls in the alternative subject or subjects *and*
- (c) any subject presented as a replacement for an elective in a course must be at least at the same level as the course in which the student is enrolled.

## 2.10 Refusal of enrolment

Enrolment may be refused by the University if

- (a) a student is indebted to the University by reason of non-payment of any fee or charge and has failed to make satisfactory settlement of indebtedness after receipt of due notice.
- (b) a student is overseas, unless the requirements of enrolment (including attendance at residential schools) are fulfilled
- (c) a student who is not a permanent resident of Australia has not met all the requirements laid down by the Department of Employment, Education, Training and Youth Affairs.

## 2.11 Withdrawal from subjects

Notification of withdrawal

Students must notify their withdrawal from subjects on the Amendment to Enrolment form available from the Student Records Office at the Roseworthy Campus.

Late withdrawal

If withdrawal is effected after the deadlines specified in the General Course Rules, WF will be recorded for the subject except

- (a) if upon application by the student the Head of Department, on the recommendation of the Subject Coordinator, approves a WNF being recorded for a late withdrawal *or*
- (b) if the Head of Department, on the recommendation of the Subject Coordinator, approves a WNF being recorded for a student who takes leave from a course of study at the end of a semester when one half of a subject which extends over two semesters has been completed.

comment: The HECS Liability which a student has incurred will stand for any subject for which a withdrawal occurs after 31 March (for a first semester subject or a full-year (Code F) subject) or after 31 August (for a second semester subject), whether the withdrawal is with or without academic penalty (that is, whether WF or WNF has been recorded).

Withdrawal in the last three weeks of a semester

Applications for withdrawal without penalty from a subject in the last three weeks of a semester will not normally be granted. Instead, in cases of proven extenuating circumstances, the Subject Coordinator may approve an extension of time to complete the subject, and/or, where the student is prevented from sitting the final examination, the Subject Coordinator may approve a special examination.

Only where the misadventure is such as to prevent the student from completing the subject within a reasonable time (usually the end of the second week of the following semester) is withdrawal without academic penalty likely to be approved.

## 2.12 Withdrawal from a course

A student who wishes to withdraw from his/her course must notify the Student Records Office at the Roseworthy Campus on the appropriate form.

## 3 Assessment

See also the General Course Rules at the beginning of this volume.

### 3.1 Responsibility for assessment

The Subject Coordinator appointed by the Head of Department is responsible to the Head for deciding the manner in which a subject will be assessed, and for awarding a grade to each student enrolled in the subject.

### 3.2 Informing students of assessment schemes

Details of assessment to be given in writing

At the beginning of each semester (by the beginning of the second week of classes for internal students and in Booklet 1 of the subject material for external students), students will be provided with a subject outline by the Subject Coordinator. Subject outlines will include the following:

#### Administrative information

- the subject number and name
- the name of the Subject Coordinator;
- the number and type of class hours per week, if appropriate
- details of residential schools, if appropriate
- details of any trips and/or tours to be undertaken.

#### Academic information

- the subject description, including the aims and objectives of the subject
- the method by which the subject material will be presented (lectures, tutorials, practicals, directed self-learning)
- what is expected of the students, particularly related to directed self-learning aspects of the presentation of the subject
- editorial and other standards with which the students must comply
- a semester plan for the subject showing the relative weighting of major components of the subject
- details of which sessions (if any) are designated for compulsory attendance
- prescribed textbooks and references
- details of farm practice, field studies and the like to be undertaken.

#### Assessment information

- the work to be submitted for assessment which counts towards the final grade
- other work which may or may not be assessable, which does not count towards the final grade, but which must be submitted to meet subject requirements

- the relative weighting of each item assessed
- any special requirements which must be satisfied for a student to pass the subject (for example, whether a pass must be obtained in both the assignment work and the examination)
- the date for the submission of each piece of work
- the dates of any tests to be administered.

#### Examination information

- whether an examination is to be conducted and, if so, the duration and format of the examination
- the weighting given to the examination mark in the final grade.

Students must also be informed of the availability of staff members teaching the subject for consultation and have their attention drawn to Volume IV of the Calendar: The Student Guide.

No assessable work in subjects which have a final examination may have a due date falling after the completion of lecture week 13 of any semester.

### 3.3 Grades

See also the General Course Rules at the beginning of this volume of the Calendar.

The work of all students in each subject will be reported in terms of the following grades: High Distinction, Distinction, Credit, Pass, Conceded Pass, Status granted, Fail, Withdraw Fail and Withdraw (Not Fail).

If a subject is incomplete because it is conducted over more than one semester, CN (Continuing) will be recorded. If it is incomplete because work is still outstanding and an extension of time has been granted or because a result is not available at the time the notification of results are prepared for students WH (Withheld) will be recorded.

#### Conceded Pass

A student may present for any of the following courses:

- Diploma in Agricultural Production
- Diploma in Horse Husbandry and Management
- Diploma in Natural Resources Management
- Diploma in Wine Marketing
- Bachelor of Agriculture

Bachelor of Environmental Management  
Bachelor of Applied Science  
(Wine Science)

conceded passes in subjects to a maximum value of six points, provided that such subjects shall not satisfy prerequisite requirements.

#### 4 Examinations

The following clauses refer specifically to the above courses. Students are advised to refer to the Rules for the Conduct of Examinations which are to be found in the General Course Rules.

Examinations will be conducted at the end of each semester, during the approved examination period, and in accordance with Statute XVII.

No student may take an examination at any time other than on the day and at the time it is timetabled.

External supervisors are required to certify that the requirements of this clause have been adhered to.

If it is established that a student sat an examination other than on the day and at the time it is timetabled, the student will receive zero marks for that examination.

##### 4.1 Applications for special consideration

Permanent or prolonged disability /  
Illness and misadventure

Students are referred to the General Course Rules at the beginning of this volume of the Calendar and to Volume IV: Student Guide and Timetables.

Applications for special consideration above will not normally be approved where:

- a student's work commitments prevented attendance at a scheduled examination
- a student missed an examination by misreading the examination timetable
- an external student fails to nominate an external supervisor when requested to do so.

#### 5 Compulsory Attendance

Attendance at, and participation in, all designated classes, trips and tours is compulsory.

In the case of illness of a student or a member of a student's immediate family or of other extenuating circumstances, attendance may be excused but associated work must be completed to the satisfaction of the Subject Coordinator. In the event of illness of the student a medical certificate must be provided. In the event of illness of a member of the immediate family a

medical certificate together with a statement confirming that no suitable alternative arrangements could be made must be provided; for extenuating circumstances, other suitable evidence must be provided. Medical certificates or other such evidence as may be required must be lodged with the Student Records Officer at the Roseworthy Campus as soon as practicable but normally within three (3) working days.

note: In interpreting this clause, immediate family will include any person domiciled with or under the immediate responsibility of the student concerned and each case will be considered on its merits.

#### 6 Plagiarism

See also the General Course Rules at the beginning of this volume of the Calendar.

A student may not submit as his/her own work that which has been derived from another source, other than when properly acknowledged in the appropriate manner, nor may he/she improperly assist or obtain assistance from any other student.

#### 7 Review of academic progress

See also the General Course Rules at the beginning of this volume of the Calendar.

The academic progress of students is liable to review in terms of Clause 4C of Chapter XXV of the Statutes and the attendant policy of the Faculty as determined from time to time.

#### 8 Status, exemption and credit transfer

A student may be granted status for subjects in any of the above courses by the Faculty. Status may be granted in one of two ways:

Transfer status

Transfer status may be granted by virtue of subjects completed in another course at the University or the former Roseworthy Agricultural College, or by virtue of subjects completed at another educational institution approved by the University for the purpose of this Rule.

Proficiency status

Proficiency status may be granted where the student demonstrates proficiency in the subject matter of a subject to the satisfaction of the Head of a Department, who shall decide the method of assessment after consultation with the Subject Coordinator.

Where a student has failed a subject at the University of Adelaide or at the former Roseworthy Agricultural College he/she may not apply for proficiency status in the subject in lieu of repeating it.

Where status has been granted, the number of subjects required to complete a course shall be reduced by the number of subjects for which status has been granted.

#### Exemption

Where status has not been granted a student may request exemption from part of the subject. The Subject Coordinator will make all decisions on the granting of exemption.

### 8.1 Limits on the granting of status

Normally status will only be considered for subjects passed within the previous ten years. Status may be granted on a subject-for-subject basis or on the basis of subject for group of subjects. Status will be granted only for subjects which meet the academic requirements of the award towards which credit is sought.

Candidates who have previously passed subjects in courses of the University or other tertiary educational institutions may, on written application to the Faculty Registrar, be granted such status in appropriate subjects in the award as the Faculty in each case shall determine. Students must complete a minimum of 24 points towards the award, as defined in Specific Rule 12, at the University of Adelaide.

Status will not be granted for part of a subject. Neither will a student be granted conditional status.

Students who do not receive full status in a subject may apply for exemption from part or parts of the subject.

### 8.2 Applications for Transfer status

An application for transfer status must be made on the appropriate form available from the Student Records Office at the Roseworthy Campus and must be lodged with that Office.

Applications must be accompanied by

- (a) certified copies of transcripts of academic qualifications
- (b) an explanation of the grading system used, supplied by the institution where the studies being offered for status were taken
- (c) a photocopy of subject outlines taken from an institution's Calendar or Handbook for the year in which the subjects were successfully completed. Subject outlines provided should include:
  - detailed list of the topics covered in the subject
  - the size and duration of the subject (for example, 3 hours per week for 15 weeks)

- the prescribed text book(s) and recommended readings (if the subject outlines do not include this information it should be supplied separately)

- (d) a certified translation if any of the documents is not in English.

Applications will be referred to the Faculty for decision. In reaching a decision the Faculty will be guided by recommendations made by the Head of Department and the Subject Coordinators.

Students will receive advice, in writing from the Faculty Registrar, of the results of their applications. Subjects for which a student receives status will be shown as such on the student's transcript. No grades will be shown for such subjects.

### 8.3 Applications for Proficiency status

An application for proficiency status must be made on the appropriate form available from the Student Records Office at the Roseworthy Campus and must be lodged with that Office.

A list of subjects which the Head of Department has decided are not open to an application for proficiency status will be kept in the Student Records Office on the Roseworthy Campus and promulgated from time to time.

The student must provide on the application form the basis upon which he/she believes he/she is proficient in the subject. Appropriate documents (for example a statement from an employer regarding work experience) should accompany the application.

The Head of Department will decide which subjects in the courses in his/her Department are open to an application for proficiency status. Applications will be referred to the Head of Department who, after consultation with the Subject Coordinator, will decide:

- (a) whether or not a particular student's application for proficiency status should be granted
- (b) if an examination is required, where and when the examination is to be conducted and whether the examination is to be written or oral, or a combination of written and oral, or a demonstration of skill
- (c) what costs (to be met by the applicant) are involved in any special assessment.

Students will receive advice, in writing from the Faculty Registrar, of the results of their applications. Subjects for which a

student receives proficiency status will be shown as having been granted status on the student's transcript. No grades will be shown for such subjects.

#### 8.4 Status between courses offered at the Roseworthy Campus

Where a student is permitted to transfer from one Roseworthy course to another Roseworthy course, or where a student, having either graduated from, withdrawn from or been precluded from a Roseworthy course is admitted to a different Roseworthy course, the student may apply for transfer status or proficiency status in the new course on the basis of study undertaken in the earlier course.

Where such a student is granted either transfer or proficiency status, the subjects for which status has been granted will be shown as 'status granted' on the student's new course record and transcript.

In the case of subjects common to both courses, the result from the previous course may be counted towards the current course, and status is not given.

#### 8.5 Review of applications

A student who is dissatisfied with a decision not to grant him/her status in a subject should follow the procedures for appeal as set out in the General Course Rules at the beginning of this volume of the Calendar.

### 9 Qualification Requirements

To be entitled to an award a student shall

- (a) unless otherwise approved by the Council, have completed the appropriate course of study prescribed in 12, 13 or 14 below
- (b) have completed all subjects specified in the appropriate section of 12, 13 or 14 below
- (c) complete satisfactorily any practical requirements, such as industry experience, which may be specified as part of the course of study
- (d) attend such tours, trips or field study exercises which may be specified as part of the course of study
- (e) meet the provisions of other conditions prescribed from time to time by Council.

### 10 Changes to course of study

Please refer to the General Course Rules printed at the beginning of this volume of the Calendar.

### 11 Student appeals

Please refer to the General Course Rules at the beginning of this volume and to The University Calendar Volume IV: Student Guide and Timetables.

### 12 Courses of study

note: Semester codes referred to in the Programs of Study below are:

1	=	First semester
2	=	Second semester
F	=	Subject taught over the whole of the year
U	=	Subject completed in summer semester plus semester 1.

#### 12.1 Bachelor of Agriculture

There shall be an Ordinary degree and an Honours degree of Bachelor of Agriculture. For details of the Honours degree, please refer to 14 below.

For the Ordinary degree of Bachelor of Agriculture a student shall complete all subjects listed for First Year, Second and Third Year in the course of study, including one of the streams

- Dryland Farming
- Livestock Production
- Horticulture and Irrigation

#### First Year

##### semester 1

9812	Agricultural Production Systems	3
4821	Cell Biology and Genetics	3
8420	Chemistry and Introductory Biochemistry A	3

##### semester 2

3951	Biology of Plants and Animals	3
6330	Biomathematics and Statistics R	3
9756	Rural Business Planning A	3
3283	Soils	3

##### full year

7447	Agricultural Experience I	3
------	---------------------------	---

#### Second Year

##### Core subjects

##### semester 1

9756	Rural Business Planning A	3
------	---------------------------	---

##### semester 2

9100	Engineering Science	3
3052	Rural Finance and Marketing	3

##### full year

6937	Agricultural Experience II	3
------	----------------------------	---

**Dryland Farming Stream**

*semester 1*

6739 Physiology of Farm Animals 3

*semester 2*

5636 Nutrition, Breeding and Health of Farm Animals 3

*full year*

1028 Principles of Sustainable Agriculture 6

**Livestock Production Stream**

*semester 1*

6739 Physiology of Farm Animals 3

*semester 2*

5636 Nutrition, Breeding and Health of Farm Animals 3

*full year*

1028 Principles of Sustainable Agriculture 6

**Horticulture and Irrigation Stream**

*semester 1*

7020 Horticultural Systems 3

5478 Integrated Pest Management A 3

*semester 2*

6603 Fruit and Nut Crops\* 3

1018 Horticultural Production\* *or*

9638 Ornamental Horticulture\* *or*

8645 Reproductive and Postharvest Horticulture\* 3

\* these subjects are offered in alternate years. Students must complete both subjects, the year in which each is being taken determined by its availability.

**Third Year**

Core subjects

*semester 1*

8826 Principles and Practice of Communications 3

*full year*

5295 Stream Enterprise Contract/Project 3

**Dryland Farming Stream**

*semester 1*

3507 Crop Agronomy 3

5813 Farm Management A 3

*semester 2*

1981 Pasture Agronomy 3

*semester 1 or 2*

Electives 9

**Livestock Production Stream**

*semester 1*

8165 Dairy Production 3

5813 Farm Management A 3

*semester 2*

6127 Meat Production 3

2514 Pig and Poultry Production 3

*semester 1 or 2*

Electives 6

**Horticultural and Irrigation Stream**

*semester 1*

3066 Irrigation Science 3

5882 Horticultural Science *or*

3434 Mineral Nutrition of Plants *or*

5903 Vegetable Crops *or*

Elective 3

*semester 2*

1018 Horticultural Production \* *or*

8645 Reproductive and Postharvest Horticultures\* 3

8561 Irrigation Systems Design A 3

6213 Issues in Food and Beverage Marketing 3

9638 Ornamental Horticulture\* *or*

8645 Fruit and Nut Crops\* 3

\* these subjects are offered in alternate years. Students must complete both subjects, the year in which each is being taken determined by its availability.

**Electives**

Students in a stream may select approved subjects from other streams, or from the Bachelor of Agricultural Business, the Bachelor of Environmental Management or the Bachelor of Agricultural Science courses provided that any prerequisites have been satisfied. *Elective subjects of particular relevance to this course include:*

*semester 1*

4619 Agricultural Business Finance 3

5478 Integrated Pest Management A 3

3434 Mineral Nutrition of Plants 3

4988 Remote Sensing and Land Capability Assessment A 3

1936 Soil Management and Conservation 3

*semester 2*

1536 Agroforestry	3
4534 Biological Control	3
8271 Crop and Pasture Ecology	3
9867 Crop Physiology III	3
4694 Economics of Resource Management	3
7250 Farm Management B	3
2332 Issues in Australian Agribusiness	3

*full year*

9078 Integrated Weed Management	3
---------------------------------	---

Students selecting electives from the Bachelor of Agricultural Science course will be required to attend classes at the Waite Campus. Students wishing to proceed to Honours in a Waite Campus department must consult with the Head of Department in order to select electives which might be required as prerequisites and/or assumed knowledge.

## 12.2 Diploma in Agricultural Production

For the award of Diploma in Agricultural Production a student shall complete all subjects listed in the Program of Study for both years of the course.

The program of study for students who commenced the course prior to 1996 is set out in the *Calendar Volume II: Handbook of Courses*, 1997.

The program of study for students who commenced the course in 1996 and subsequent years is as follows:

### First Year

*semester 1*

9812 Agricultural Production Systems	3
5789 Computing and Statistics	1.5
7557 Communication and Learning A	3
7075 Soils D	1.5

*semester 2*

8111 Animal Production A	3
2033 Engineering in Agriculture	3
9756 Rural Business Planning A	3

*full year*

7447 Agricultural Experience I	3
1395 Biology and Pest Control	3

### Second Year

Core subject

*full year*

6937 Agricultural Experience II	3
---------------------------------	---

### Electives

Students complete electives to the value of 21 points from the listed subjects.

*semester 1*

7246 Basic Irrigation A	3
3507 Crop Agronomy	3
8165 Dairy Production A	3
5813 Farm Management A	3
7020 Horticultural Systems	3
5478 Integrated Pest Management A <sup>#</sup>	3
9576 Wool Production	3
2788 Wool Technology and Metrology	3

*semester 2*

7576 Agricultural Equipment	3
1536 Agroforestry	3
3052 Finance and Marketing	3
6127 Meat Production	3
1981 Pasture Agronomy	3
2514 Pig and Poultry Production	3

*full year*

1221 Individual Studies A.P.	3
5395 Stream Enterprise Contract/Project	3
9078 Integrated Weed Management	3

<sup>#</sup> prerequisites must be passed at credit level or better

Students must include amongst their electives one plant production subject and one animal production subject.

The following combinations of elective subjects are recommended to students wishing to specialise in the area indicated:

#### Agronomy:

7576 Agricultural Equipment
1936 Agroforestry
3507 Crop Agronomy
5478 Integrated Pest Management A
1981 Pasture Agronomy

#### Livestock:

7576 Agricultural Equipment
7725 Dairy Production
6127 Meat Production
1981 Pasture Agronomy
2641 Pig and Poultry Production
9576 Wool Production

Farm Management:

- 3507 Crop Agronomy
- 5813 Farm Management A
- 1981 Pasture Agronomy

### 12.3 Diploma in Horse Husbandry and Management

For the award of Diploma in Horse Husbandry and Management a student shall complete all subjects listed for both years of the course in the Program of Study, including one of the streams Racing or Equitation.

The program of study for students who commenced the course prior to 1997 is set out in the *Calendar Volume II: Handbook of Courses*, 1997.

The program of study for students who commenced the course in 1997 or later is set out below:

#### First Year

*semester 1*

7557 Communication and Learning A	3
6117 Horse Husbandry IA	3
1439 Horse Industry Project IA	1.5
1541 Stable Management I	3

*semester 2*

3102 Horse Husbandry IB	1.5
6724 Horse Industry Project IB	1.5
6977 Land Management for Horse Properties	3
4075 Reproduction and Stud Management	3

*full year*

5231 Anatomy, Physiology and Health	3
-------------------------------------	---

#### Second Year

*semester 1*

8185 Education to Saddle and Harness	3
1226 Horse Business Management	3
9353 Horse Floats and Vehicles	1.5
7035 Yearling Preparation	2

*semester 2*

1329 Horse Industry Careers	2
4415 Horse Property Maintenance	3
5860 Practical Horse Nutrition and Genetics	1.5

*full year*

one of:

8236 Industry Training (Equitation)	8
9659 Industry Training (Horse Business)	8
4767 Industry Training (Standardbred)	8
4225 Industry Training (Stud)	8
3850 Industry Training (Thoroughbred)	8

### 12.4 Bachelor of Environmental Management

There shall be an Ordinary and an Honours degree of Bachelor of Environmental Management. For details of the Honours course, please refer to 13 below.

For the Ordinary degree Bachelor of Environmental Management a student shall complete 72 points from the subjects listed below, including all core subjects and between 24 and 30 points of Level I subjects and between 18 and 24 points of Level II subjects.

#### Level I

Students must complete **one** of the following groups of subjects:

##### Group I

*semester 1*

8057 Biology INR <i>or</i>	
4821 Cell Biology and Genetics	3
7151 Chemistry IHA <i>or</i>	
8420 Chemistry and Introductory Biochemistry A	3
1550 Environment and Society	3
1775 Field Studies IA	3

*semester 2*

3951 Biology of Plants and Animals	3
6330 Biomathematics and Statistics R	3
7911 Plant and Animal Diversity	3
3283 Soils	3

##### Group 2

*semester 1*

1550 Environment and Society	3
1775 Field Studies IA	3

*semester 2*

6976 Biomathematics and Statistics	3
5683 Earth Science I	3

*full year*

3174 Biology I	6
7312 Chemistry I ANR	6

**Level II**

*semester 1*

1498 Applied Ecosystem Modelling	3
4217 Plant and Animal Adaptations	3
6254 Population Ecology	3
8231 Resource Mapping and Survey	3

*semester 2*

2184 Community Ecology	3
4697 Economics of Resource Management II	3

and two of

5178 Basic Genetics	3
1699 Environmental Chemistry III (NR)	3
7083 Fauna Management III	3
4113 Field Studies IIA	3
1151 Microorganisms and Invertebrates*	3
3283 Soils*	3

\* If not completed in first year

**Level III electives**

Students complete electives to the value of 24 points. Elective subjects will not necessarily be offered in all years. The subjects will be timetabled in streams which are discipline oriented. Timetabling constraints may well prevent cross-stream enrolment. Quotas may apply to some electives.

*semester 1*

4078 Biology and Diversity of Insects	3
7931 Biometry	3
5852 Ecology and Management of Freshwater Systems III	3
9774 Indigenous Australians and Environmental Management	3
7499 Individual Studies A	3
5478 Integrated Pest Management A	3
8826 Principles and Practice of Communications	3
4988 Remote Sensing and Land Capability Assessment A	3
4633 Soil Ecology	3
1936 Soil Management and Conservation	3

*semester 2*

1536 Agroforestry	3
4534 Biological Control	3
9273 Conservation Biology	3
8271 Crop and Pasture Ecology	3

1134 Ecology and Management of Rangelands	3
2990 Individual Studies B	3

*full year*

7014 Individual Studies C	6
9078 Integrated Weed Management	3

*summer semester (U)*

4234 Environmental Toxicology	3
4774 GIS for Environmental Management	3
7023 Vertebrate Pest Control III	3

Footnotes not forming part of the Specific Course Rules:

- (1) It is recommended that students wishing to specialise in biological conservation include amongst their Level III subjects:
 

9273 Conservation Biology	
1134 Ecology and Management of Rangelands	
7083 Fauna Management III (if not taken in second year)	
9774 Indigenous Australians and Environmental Management	
7023 Vertebrate Pest Control	
- (2) It is recommended that students wishing to specialise in environmental computer applications include amongst their Level III subjects:
 

4988 Remote Sensing and Land Capability Assessment A	
4774 GIS for Environmental Management	
- (3) It is recommended that students wishing to specialise in environmental monitoring include amongst their subjects:
 

5852 Ecology and Management of Freshwater Systems	
1699 Environmental Chemistry III [NR]	
4234 Environmental Toxicology	
- (4) 7931 Biometry will be presented at Waite Campus
- (5) One of 7083 Fauna Management III and 1699 Environmental Chemistry III (NR) will normally be taken in the second year of the course. The other may be taken as an elective in the third year of the course.

**12.5 Diploma in Natural Resources Management**

For the award Diploma in Natural Resources Management a student shall complete all subjects listed in the Program of Study for both years of the course:

**First Year**

*semester 1*

4821 Cell Biology and Genetics	3
7557 Communications and Learning A	3
1550 Environment and Society	3
1775 Field Studies IA	3

*semester 2*

3951 Biology of Plants and Animals	3
1254 Field Studies IB	3
1151 Microorganisms and Invertebrates	3
3283 Soils	3

**Second Year**

*semester 1*

6254 Population Ecology	3
8231 Resource Mapping and Survey	3
electives	6

*semester 2*

electives	12
-----------	----

*Electives*

Electives are to be selected from the following list:

*semester 1*

8420 Chemistry and Introductory Biochemistry	3
3507 Crop Agronomy	3
9934 Ecology and Management of Freshwater Systems D	3
9126 Indigenous Australians and Environmental Management D	3
5478 Integrated Pest Management A	3
4217 Plant and Animal Adaptations	3

*semester 2*

1536 Agroforestry	3
6330 Biomathematics and Statistics R	3
2184 Community Ecology	3
5439 Conservation Biology D	3
4500 Fauna Management D	3
4373 Individual Studies D	3
1981 Pasture Agronomy	3

*full year*

2558 Ecology and Management of Rangelands D	3
5031 Integrated Weed Management D	3

*summer semester (U)*

7306 Vertebrate Pest Control D	3
--------------------------------	---

**12.6 Diploma in Wine Marketing**

12.6.1 For the award Diploma in Wine Marketing a student shall complete all subjects listed in the Program of Study for both years of the course. This course is available in both the internal and the external modes.

The program of study for students commencing the course **prior to 1996** is set out in the *Calendar Volume II: Handbook of Courses, 1998*

The program of study for students **commencing the course in 1996 and subsequent years** is as follows.

**First Year**

*semester 1*

9101 Business Data Analysis	3
8901 Introductory Grape and Wine Knowledge	3
2440 Legal Issues in Wine Marketing	3
4932 Principles of Marketing (Wine Marketing)	3

*semester 2*

9682 Economic Principles	3
6234 Introduction to Business Management	3
4478 Introduction to Managerial and Financial Accounting	3
4605 Vineyard and Winery Operations I	3

**Second Year**

*semester 1*

1244 Advertising and Promotion	3
1053 Consumer Behavioural and Analysis	3
7435 Vineyard and Winery Operations II	3
5693 Wine and Marketing in Society	3

*semester 2*

7927 Applied Marketing Research	3
4418 Fortified Wines, Spirits and Non-grape Beverages	3
8590 International Marketing of Wine and Agricultural Products	3
2086 Retail Selling and Practice	3

**13 Honours degree of Bachelor of Environmental Management**

13.1 A candidate may, subject to the approval of the Head of Department concerned, proceed to the Honours degree in one of the following subjects:

1315 Honours Environmental Science and Management (B.Env.Mgt.)
2147 Honours Environmental Science and Management (B.Env.Mgt.) (M-Y)
8459 Honours Soil Science (B.Env.Mgt.)
3422 Honours Soil Science (B.Env.Mgt.)(M-Y)

or, with the approval of the Faculty in each case, in a subject taught by another Department of the University.

- 13.2** The work of the Honours year will normally be completed in one year of full-time study. The Faculty may permit a candidate to take two years, but no more, under such conditions as it may determine.
- 13.3** A candidate for the Honours degree in any subject shall not begin the final year Honours work in that subject until he or she has qualified for the Ordinary Degree of Bachelor of Environmental Management or has qualified for a degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent, and has completed such prerequisite subjects as may be prescribed in the syllabus.

#### **14 Honours degree of Bachelor of Agriculture**

- 14.1** A candidate may, subject to the approval of the Head of Department concerned, proceed to the Honours degree in one of the following subjects:

5556 Honours Agricultural Business (B.Ag.)  
9438 Honours Agronomy and Farming Systems (B.Ag.)  
3662 Honours Agronomy and Farming Systems (B.Ag) (M-Y)  
1164 Honours Animal Science (B.Ag.)  
6940 Honours Animal Science (B.Ag.)(M-Y)  
1983 Honours Crop Protection (B.Ag.)  
8997 Honours Hort.Vit. and Oenology (B.Ag.)  
7624 Honours Plant Science (B.Ag.)  
8450 Honours Soil Science (B.Ag.)

or, with the approval of the Faculty in each case, in a subject taught by another Department of the University.

- 14.2** The work of the Honours year will normally be completed in one year of full-time study. The Faculty may permit a candidate to take two years, but no more, under such conditions as it may determine.
- 14.3** A candidate for the Honours degree in any subject shall not begin the final year Honours work in that subject until he or she has qualified for the Ordinary Degree of Bachelor of Agriculture or has qualified for a degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent, and has completed such prerequisite subjects as may be prescribed in the syllabus.

# Diploma in Agricultural Production

## Syllabuses

### Level I

#### 7447 Agricultural Experience I

3 points full year

See Bachelor of Agriculture for syllabus details

#### 8111 Animal Production A

3 points semester 2

3 lectures, 1 tutorial, 2 hours practicals per week

*restrictions:* 3492 Introductory Animal Production

This subject covers the basic animal science components to enhance student appreciation of husbandry and production subjects to follow in the second year of the course. Areas covered in this subject include: anatomy of farm animals; digestion and nutrition; reproduction and lactation; growth and development and its relationship to meat science; genetics and animal breeding; health and disease control; fibre growth and development.

*assessment:* assignments, practicals 40%; exam 60%

#### 9812 Agricultural Production Systems

3 points semester 1

See Bachelor of Agriculture for syllabus details

#### 1395 Biology and Pest Control

3 points full year

2 lectures per week, 1 practical per fortnight

Biology: includes structure and function of cells; cell division, mitosis and meiosis, cytokinesis, reproduction. Mendelian genetics. Description and morphological characteristics of viruses, Monera, Protista, Fungi, Plantae, Animalia. Introduction to Ecology: includes biosphere, biogeochemical cycles, nutrient budgets, trophic levels, communities and populations, succession, carrying capacity, competition symbiosis, predator-prey relationships. Entomology: includes classification, insect anatomy, reproduction and life-cycles, feeding behaviour, key pests and beneficials, monitoring and control strategies. Plant Pathology: includes pathogens, biotrophs, necrotrophs, key diseases, monitoring and control strategies. Occupational Health and Safety issues included when and where appropriate.

*assessment:* theory exam - mid year 25%, final 25%; practical exam - mid year 10%, final 10%; insect collection 20%; disease collection 10%

#### 7557 Communication and Learning A

3 points semester 1

3 hours per week

Communications in theory and practice: why communicate? why study communication? Methods of studying communications, feedback; report writing; informal and formal communications, non-verbal communication; writing for various audiences, speaking, including public speaking, preparation of material for groups and consideration of other media such as audio and video tapes, slides, charts, aids and standards required for reports. The learning process, information, management, recording, general study skills. Word processor: software characteristics, introduction to usage. Electronic information transfer: systems and packages available, where to go for skills development.

*assessment:* assignment, inclass exercises, 70%, exam 30%

#### 5789 Computing and Statistics

1.5 points semester 1

1 lecture, 2 hours of practicals per week

*assumed knowledge:* 7557 Communications and Learning

Statistics: experimental design, sampling, frequency tables and diagrams; mean, median and mode; standard deviation; ANOVAR: one- and two-way, factorial experiments, linear correlation and regression. Computing: development of spreadsheet building, statistical procedures.

*assessment:* computing 50%; statistics 50%

#### 2033 Engineering in Agriculture

3 points semester 2

2 lectures, 1 tutorial, 2 hours practical per week

Engineering has made modern agriculture possible and a knowledge of some aspects of the discipline can be used in the improved management of many enterprises. This subject covers basic principles and practical applications of engineering to assist managers. Topics covered by the subject include the basic principles of machinery and fluids and elementary concepts of structures and electricity. These concepts will then be used to look at tractor/implement sizing, pump and pipe systems and tension and electric fencing. Students will also be taught basic levelling.

*assessment:* assignments, practicals 40%; exam 60%

**9756 Rural Business Planning A**

3 points semester 2

See Bachelor of Agriculture for syllabus details

**7075 Soils D**

1.5 points semester 1

1 lecture, four hours practical per week

The subject provides an introduction to the nature of soils and their management. Topics covered include the major soil types in Australia, how to describe soils, surveying soil, soil structure, colloids, salinity, acidity, erosion, fertility, soil biology, biodiversity and Landcare. Practical sessions include work in the laboratory, field and computer suite.

Students completing the subject will have a good understanding of how soils work, an appreciation of the scale and processes of soil degradation in Australia, will learn skills needed to manage soils and gain experience in solving land management problems. There is an emphasis in the subject on developing both written and oral communication skills and an ability to work effectively with others in groups. The use of computers and technology to communicate with others and solve land-related problems is demonstrated.

*assessment:* theory 35%, practical 20 %; practical assignments 30%; computer-based tutorial 10%; essays 5%

**Level II**

**6937 Agricultural Experience II**

3 points full year

See Bachelor of Agriculture for syllabus details

**7576 Agricultural Equipment \***

3 points semester 2

2 lectures, 2 hours practicals; tutorials conducted in lectures as required; one day trip may be arranged

Students will learn about the principles, operation and maintenance of tillage, seeding, spraying, fodder conservation and harvesting equipment as well as studying equipment subsystems such as oil hydraulics, vee belt and chain drives, materials handling and electronic monitors. Although the main emphasis will be broad acre equipment horticultural or other equipment may be included to suit student needs.

*assessment:* theory 40%, practical 30%; seminar 30%

**1536 Agroforestry**

3 points semester 2

**3507 Crop Agronomy**

3 points semester 1

**8165 Dairy Production**

3 points semester 1

**5813 Farm Management A**

3 points semester 1

**7020 Horticultural Systems**

3 points semester 2

See Bachelor of Agriculture for syllabus details

**1221 Individual Studies A.P.**

3 points full year

Formal contact between student and supervisor during the project by mutual agreement

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, industry surveys, seminars and written reports. It is the student's responsibility to discuss his/her project with the subject coordinator (and member of staff who will supervise the project).

*assessment:* to be advised

**5478 Integrated Pest Management A**

3 points semester 1

*prerequisite:* 1395 Biology and Pest Control - credit or better

**9078 Integrated Weed Management**

3 points full year

*prerequisite:* 1395 Biology and Pest Control - credit or better

**3066 Irrigation Science**

3 points semester 1

See Bachelor of Agricultural Science for syllabus details

**5039 Marketing and Financial Control in Agriculture**

3 points semester 2

5 lectures/tutorials per week

*restriction:* 6736 Grape and Wine Business Management

A systems approach to the principles of accounting, budgeting, financial mathematics and marketing as it applies to the management of a farm or related business. Accounting: financial and management accounting as an information system, concepts and skills relevant to single and double entry accounting up to Profit and Loss Statement and Balance Sheet Methods of budgeting appropriate to agricultural businesses, their uses and variance analysis, computer spreadsheets as aids to budgeting. Financial

**Mathematics:** purpose of financial management, NPV, IRR, DCF, annuities. Spreadsheet financial functions and other computer-based financial decision support.  
**Marketing:** Development of the marketing concept, market analysis, market segmentation, targeting and positioning, product, pricing, promotion and distribution strategies, elementary marketing plans.

*assessment:* assignments and tutorial exercises 45%, three hour final examination 55%

**6127 Meat Production**

3 points semester 2

**1981 Pasture Agronomy**

3 points semester 2

**2514 Pig and Poultry Production**

3 points semester 2

**3052 Rural Finance and Marketing**

3 points semester 1

**5295 Stream Enterprise Contract/Project**

3 points full year

**9576 Wool Production**

3 points semester 1

**2780 Wool Technology and Metrology**

3 points semester 1

See Bachelor of Agriculture for syllabus details

## Diploma in Horse Husbandry and Management

### Syllabuses

#### Level I

##### 5231 Anatomy, Physiology and Health

3 points full year

3 lectures, 3 hours of practicals a week

*restrictions:* 6653 Anatomy and Physiology H, 8913 Horse Health II

Anatomy, physiology and common health problems of the following systems of horses - skeletal, muscular, digestive, respiratory, cardiovascular, urinary, nervous, endocrine, special senses. Parasites (60 hours). Exercise Physiology (18 hours) - this module will show how a horse obtains its energy for different types of exercise; how to develop more effective training regimes. It will look at factors involved in selection and training of horses - blood tests [including lactates], electrocardiography, heart scores, maturity estimation by radiography, echocardiography, muscle biopsy, gait analysis, racetrack design. Interval training, and conventional training; the roles of long slow distance work, swimming and hill work. Signs of overwork.

*assessment:* to be advised

##### 7557 Communication and Learning A

3 points semester 1

See Diploma of Agricultural Production for syllabus details

##### 6117 Horse Husbandry IA

3 points semester 1

2 lectures, 4 hours of practicals a week

*restrictions:* 9395 Horse Husbandry and Handling

Handling and restraint. Comparison of handling methods. Handling for horses when only the minimum facilities are available. Use of sidelines, twitch, hobbles and crushes of various sorts. Chemical restraint. Mouth examination. Picking up feet for examination. Horses with behavioural problems.

Weaning and foal handling to provide life time ease of handling. Correct procedures for weaning. Features of the ideal facilities. Restraint of mare and foal. Husbandry procedures on mare and foal at weaning. Foal inspection for problems and conformation. Post weaning attention for mare. Teaching the foal to lead; nutrition for the weaned foal. Paddock for weaned foals.

Saddlery harness and tack (20 hours). Various types and uses of saddles, girths and surcingles, bridles and

bits, reins, harness, rugs and hoods, boots, lunging gear, blinkers, martingales, bit lifters and keepers, hackamores, spurs, whips and chambons. Knots, whipping and splicing. Quality differences in saddlery, harness and tack. Minor leather repair. Cleaning, preserving and storage.

*assessment:* to be advised

##### 3102 Horse Husbandry IB

3 points semester 2

3 lectures, 3 hours of practicals a week

Identification and branding (20 hours). Farriery fundamentals (20 hours) - anatomy and physiology of the lower limb. Conformation of the lower limb. Leg movement and hoof flight patterns. Routine hoof care. Farriery equipment tools. Basic farriery techniques and procedures. Pathology of the lower limb and foot. Lameness and gait abnormalities. Conformation, horse selection and genetics (20 hours) - normal conformation and conformation which may lead to problems. Selections for particular activities and for breeding. Basic genetics. Horse pursuits (20 hours) - this subject will give students an insight into the range of horse activities and employment opportunities. It will include a selection from amongst thoroughbred, harness horse, eventing, dressage, riding schools, agistment, tent pegging, heavy horses, pony clubs, steeple and hurdle racing, western horses, campdrafting, trail rides and ecotourism, side saddle, endurance horses, hunting, rodeo/rough riding, professional stunt riding, horses for the film industry, police horses, miniature horses, riding for the disabled, polo/polocrosse, carriages for hire, combined driving, vaulting, hippotherapy, stock horses, circus horses, military light horses, quarter horse racing.

*assessment:* to be advised

##### 1439 Horse Industry Project IA

1.5 points semester 1

1.5 hours practical, 1.5 hours assignment work per week

Riding skills (20 hours). Introduction to basic riding skills, including equipment usage, safety, work at walk, trot and canter.

Elective (20 hours) - students will have the opportunity to investigate further the stream choices available in year 2, namely Thoroughbred, Harness horse, Equitation, Stud and Horse Business Management and Marketing.

Students in equitation will progress in their riding skills. Students in the other disciplines will research the industry of their choice to include career options, career pathways, salaries and awards, investment needed, gaining access to employment in the industry and industry size.

*assessment:* to be advised

### 6724 Horse Industry Project 1B

1.5 points semester 2

contact hours to be advised

Students will prepare a major project on the industry of their choice in one of Thoroughbred, Harness horse, Equitation, Stud, or Horse Stud Management. At the same time, students will continue to develop their skills in their chosen areas.

*assessment:* to be advised

### 6977 Land Management for Horse Properties

3 points semester 2

2 lectures, 4 hours of practicals a week

quota will apply

Principles of land management (20 hours) -soils, how horses degrade land, regulations to preserve land; techniques of land preservation. Pasture management for horse properties (20 hours) - legumes, grasses, annuals, biennials and perennials. Environment, usage and resource impact on pastures. Pasture species and management. Weed and pest control. Soils, nutrients and fertilisers. Grazing and management systems and pasture costs. Hay production. The difference in pasture needs with horses compared to ruminants. Equipment and implementation of pasture management (20 hours). Crop management for horse properties (20 hours) -plant growth and morphology; climatology; plant nutrition; crop species for horses; crop and pasture rotations; tillage systems; indicators of sustainability.

*assessment:* to be advised

### 4075 Reproduction and Stud Management

3 points semester 2

3 lectures, 3 hours of practicals a week

*restrictions:* 4654 Breeding Management H

Horse reproduction (20 hours) - reproductive biology of the mare. Physiology of fertilisation, pregnancy, foaling and lactation. Obstetrics, infertility, abortion and venereal diseases. Determining oestrus. Various tests for pregnancy. Reproductive biology of the stallion. Care and management, mating procedures. Infertility. Semen evaluation. Artificial breeding

(insemination and embryo transfer). Horse stud management (20 hours) - stud design: site, layout, facilities and safety plans; stud management: promotion and public relations, labour management; quarantine and health. Management of stallion, broodmare, young stock and physical farm. Stud records - physical records, contracts and policy statements, financial records, promotion and public relations. Financial management - syndication agreements and other contracts, cost/benefit analyses, cash flow, investment policies, capital costs and sources, credit policies, tax considerations, permanent financial records. Horse stud activities (40 hours) - students will participate in the routines for a horse stud.

*assessment:* to be advised

### 1541 Stable Management I

3 points semester 2

2 lectures, 4 hours of practicals a week

*restrictions:* 2047 Stable Management

Stable management theory (20 hours) - basic feed components and feeding and watering routines, grooming, clipping and rugging, basic transportation. Reasons for stabling - stable/property design relating to size of areas, layout and furnishings, facilities provided for horses and people and specific design features of loose boxes, tack room, feed room, day yards, hosing area, rolling pit, round yards, crush, loading ramps, fences and gates, shade, effect of prevailing weather conditions, consideration of neighbours, feed and bedding storage, manure pits, vermin control, and the labour efficiency of the property. Bedding and cleaning routines. Stable management routines will be carried out by students as part of the subject (40 hours). Horse industry occupational health, safety and welfare (20 hours)- basic legal requirements related to OH&S. Identifying potential workplace hazards in the stables, tracks, and properties, prevention and control measures. Procedures for reporting accidents/injuries and claiming compensation. Dealing with workplace injuries. Complete OH&S Level I. Workplace First Aid Certificate, welfare issues in the horse industry.

*assessment:* to be advised

### 8185 Education to Saddle and Harness

3 points semester 1

6 hours per week

*prerequisites:* 9395 Horse Husbandry and Handling 7637, Equitation 1H

Initial training of young horses prior to riding including leading, lunging and long-reining; the initial saddling, mounting and riding of young horses; the initial training of young horses to harness and driving.

*assessment:* to be advised at first lecture

### 1226 Horse Business Management

3 points semester 1

6 hours per week

*prerequisites:* 1541 Stable Management I; 4472 Horse Husbandry I; 1511 Horse Husbandry II

Rural record keeping - design and use of appropriate physical records for management of a horse property; completion of appropriate financial records to satisfy internal and external management requirements of a horse business enterprise. Rural business planning - development of a business report for a horse enterprise: goals, objectives, resources and constraints; prepare a preliminary (annual) business plan; use appropriate decision making tools to assist in refining the enterprise mix of a horse enterprise business plan and operational plan for the horse enterprise. Rural business analysis - assessment of the profitability of a horse business and each of its components; calculating appropriate business performance indicators; comparing horse business performance with the business plan, objects and goals and identify logical changes.

*assessment:* to be advised

### 9353 Horse Floats and Vehicles

1.5 points semester 1

3 hours per week

*prerequisites:* 4472 Horse Husbandry I; 1511 Horse Husbandry II; 1541 Stable Management I

Mechanics - basic motor maintenance covering vehicles, systems, engines, fuel system, cooling system, lubrication, batteries, tyres, ignition, lighting, service information. Stable skills and practices (transport a horse) - evaluation of the different forms of horse transport; procedures for preparing a horse for transport; procedures and practices for loading, unloading and transportation of horses; hazard recognition and prevention.

*assessment:* to be advised

### 1329 Horse Industry Careers

3 points semester 2

3 hours per week

Job seeking skills and career planning - gathering and evaluating information on employment opportunities; preparing and applying for a job; undertaking job interviews; evaluation of personal performance in job application; career planning and personal career plans. Horse pursuits (completed and assessed in Year I in Horse Husbandry 2. Horse service industry pursuits.

This subject examines some of the many career opportunities servicing the horse industry. For example, horse insurance, horse fodder supplies, horse

nutritional analysis, specialised horse nutritional products, equine veterinary nursing, horse financing, horse transport (local, interstate and overseas), horse equipment manufacturing and repair (saddlery, harness and tack, vehicles and floats, yards, clothing, fodder), equine journalism (radio, TV, newspaper and speciality magazines), horse dentistry, horse chiropractic, horse photography, painting and drawing, computing, administration, teaching and instruction, event management, consulting (pastures, facility design), betting industry involvement, sales representatives, buying and selling horses internationally.

*assessment:* to be advised

### 4415 Horse Property Maintenance

3 points semester 2

6 hours per week

Horse fencing and water supply - fencing materials and types; erecting and repairing fences; yard design; electric fencing. Water requirements of horses. Water harvesting - dams, wells, bores, pumps, windmills and tanks. Reticulation - storage tanks, troughs, pipes, valves and cocks. Factors affecting water quality. Maintaining small power plant - characteristics and features of a range of small stationary engines; basic operation of two stroke and four stroke engines; major service operations to small stationary spark ignition engines; identification of faulty conditions and effecting repairs. Basic concrete and construction skills - factors in producing quality concrete; concrete compaction; concrete curing; different types of cements; reinforcing concrete; lay, compact, finish and cure concrete; footings; repairs of concrete and masonry. Basic carpentry - use of handtools; use of fastening devices; use of power tools; maintenance of structures; material selection and preservation.

*assessment:* to be advised

### 8236 Industry Training (Equitation)

8 points full year

contact hours variable, equivalent to 6 hours per week

*assumed knowledge:* 1439 Horse Industry Project IAS, 6724 Horse Industry Project IB

Equitation - 2 (80) hours to complete Module 3 (personal Riding Skills) from EFA/NCPS Level One. Coaching qualifications plus industry based training and assessment (nominal 160 hours) from the equitation areas of basic husbandry skills plus Level 2 instruction. Horse riding centres, assist managing the competition of performance of one horse in at least one of the Olympic disciplines (eventing, showjumping or dressage), assisting as an official in competition, riding for the disabled.

*assessment:* to be advised

**9659 Industry Training (Horse Business)**

8 points full year  
6 hours per week

*prerequisites:* 1541 Stable Management I

Students select 240 hours of subjects not previously completed from the Rural Business Management program from the range of core (26 subjects), marketing (4 subjects), production (6 subjects) human resources (6 subjects), physical resources (4 subjects), natural resources (13 subjects), legal and taxation (6 subjects), administration of computing (12 subjects), business and strategic planning (4 subjects), financial management (4 subjects), general management (2 subjects) and communication (8 subjects). In addition students spend 4 weeks working in a horse business area of their choice.

*assessment:* to be advised

**4767 Industry Training (Standardbred)**

8 points full year  
contact hours variable, equivalent to 6 hours per week

*prerequisites:* 1541 Stable Management I

Utilising the industry standards from the Certificate IV in Harness Racing (Trainer/Driver), students will complete racing rules and management, driving skills, facilities design and management, training practicum and basic shoeing. These are the industry specific skills to be developed to industry standards within industry.

*assessment:* to be advised

**4225 Industry Training (Stud)**

8 points full year  
contact hours variable, equivalent to 6 hours per week

*prerequisite:* 1541 Stable Management I

Basic husbandry skills - fitting gear, teaching foals to lead, record details of mares, identifying mares, recording details of foals at birth, recognition and treatment of mares that slip foals, care of in-foal mares, handling mares for service; servicing mares; post service procedures; care for orphans; care for yearlings; stallion handling. Management skills - maintaining health and fitness (accommodation, nutrition, health); breeding (education of horses, individual breeding programs); management (breeding programs, plant equipment and property).

*assessment:* to be advised

**3850 Industry Training (Thoroughbred)**

8 points full year  
contact hours variable, equivalent to 6 hours per week

*prerequisite:* 1439 Horse Industry Project IAS, 6724 Horse Industry Project IB

Basic husbandry skills in stable management, feeding and watering, transport, grooming, hoof care, horse handling and horse health. Management skills (assisting with) the processes involved in running a racing stable of horses. This will include maintaining health and fitness, assisting the training and racing of individual horses, assisting the management of a racing stable

*assessment:* to be advised

**5860 Practical Horse Nutrition and Genetics**

1.5 points semester 2  
3 hours per week

*prerequisite:* 1541 Stable Management I

Practical horse nutrition - anatomy and physiology of the digestive system of horses; nutrients and their role in horse metabolism; nutrient requirements of foals, yearlings, stallions, pregnant and lactating mares and horses in work; factors affecting digestive efficiency; common nutritional problems; common horse feedstuffs, their quality and nutrient content; feed additives and nutrient supplementation; estimating the weight, fatness and condition of horses; preparing rations for horses in work and recreation; feeding regimes and management practices. Practical horse genetics - genetic and environmental variation, characters determined by single and many pairs of genes, genetic defects, selection progress associated with heritability; selection differential and generation interval, selection aids, sire lines; Bruce Lowe numbers, pedigrees, progeny; breeding plans, inbreeding, cross breeding and line breeding; compensatory mating; assessment of bloodlines and pedigrees.

*assessment:* to be advised

**7035 Yearling Preparation**

2 points semester 1  
4 hours per week

Preparation of thoroughbred and standardbred yearlings; methods of yearling conditioning; yearling presentation; participation at the annual Thoroughbred and Standardbred Yearling Sales.

*assessment:* to be advised at first lecture

## Diploma in Natural Resources Management

### Syllabuses

#### Level I

##### 3951 Biology of Plants and Animals

3 points semester 2

2 lectures, 1 tutorial, 3 hours practical work per week.

*assumed knowledge:* 4821 Cell Biology and Genetics or 9520 Biology A or 8057 Biology INR

*restrictions:* 8280 Biology of Organisms, 3174 Biology 1

This subject is an introduction to the diversity of form and function in higher plants and animals. Examples of both native and agricultural species are used to illustrate the structure and function of flowering plants and vertebrate animals, their reproduction, growth, nutrition, control systems, and interactions with the environment.

*assessment:* exam 50%, tutorial exercises, practical reports 50%

##### 4821 Cell Biology and Genetics

3 points semester 1

2 lectures, 1 tutorial, 3 hours practical work per week.

*Restrictions:* 9520 Biology A, 8057 Biology INR, 3174 Biology 1

The subject is an introduction to cell biology and genetics and also provides an introduction to further studies in agricultural production and environmental management. It does not assume previous biological knowledge. Topics include: structure of bacteria, plant and animal cells and introduction and role of main cellular components; role of membranes in the regulation of the cell environment; respiration and energy production; fermentation; photosynthetic processes and synthesis of sugars; cell interaction and cell division, chromosome structure and inheritance; location and structure of genes; genotype and phenotype; DNA, its replication, transcription and translation; protein synthesis; mutation; introduction to plant and animal breeding and genetic engineering, role in biodiversity and conservation.

*assessment:* practical reports and tutorial exercises 30%; final exam 70%

##### 7557 Communication and Learning A

3 points semester 1

3 hours per week

Communications in theory and practice: why communicate? why study communication? Methods of

studying communications, feedback; report writing; informal and formal communications, non-verbal communication; writing for various audiences, speaking, including public speaking, preparation of material for groups and consideration of other media such as audio and video tapes, slides, charts, aids and standards required for reports. The learning process: information management, general study skills Word processor: software characteristics, introduction to usage. Electronic information transfer: systems and packages available, where to go for skills development.

*assessment:* assignment, class exercises 70%, exam 30%

##### 1550 Environment and Society

3 points semester 1

3 lectures, 1 tutorial per week

An introduction to the physical and biological resources of Australia and the impact on them of rural and urban society with an evaluation of their sustainable use in relation to the economy of Australia and its role in the world community. Topics to be considered include land use allocation, Australia's contribution to global food, mineral and energy demands, adaptation of agricultural practice to the Australian environment, soil protection, biodiversity and importance of conservation of the unique flora and fauna of Australia, maintenance of food and water quality, role for agrichemicals, ecotourism, impact of biotechnology and management of industrial and urban waste. related ethical, economic and political factors will be discussed such as the relationship between economic sustainability and ecological sustainability, the farming of native animals and economic rationalism versus natural resource management.

*assessment:* essays 25%; tutorial projects 25%; final exam 50%

##### 1775 Field Studies IA

3 points semester 1

1 full day (6 hours) per week

This subject covers a range of techniques for recording and analysing environmental data: animal capture and measurement; fauna handling and maintenance; radio-telemetry; plant propagation techniques; electronic data management and analysis; soil analysis and mapping; aquatic sampling.

*assessment:* reports, portfolios, seminars, field aptitude

**1254 Field Studies IB**

3 points semester 2

6 hours per week

restrictions: 4113 Field Studies IIA

This subject builds on techniques presented in Field Studies IA. The students will work on group projects that involve environmental survey work. Each project will be supervised by a member of academic staff. Students will have flexibility in the project they choose. Examples might include plant and animal surveys and management planning for environmental rehabilitation. An industry or community group link is encouraged.

*assessment:* group project report

**1151 Microorganisms and Invertebrates**

3 points semester 2

6 hours per week

Continuing students only

*assumed knowledge:* 9520 Biology A, 8057 Biology INR or equivalent

Biology of bacteria, algae, protozoa, fungi, viruses, platyhelminthes and nematodes. Systems to be studied include antibiotics, the rhizosphere, fresh and waste water, and the release of genetically engineered microorganisms. Classification of insects and other arthropods, external and internal anatomy, reproduction and life cycles, feeding relationships, behaviour, predators, parasites and pathogens.

*assessment:* theory exam 65%, practical reports 15%, arthropod collection 20%

**7911 Plant and Animal Diversity**

3 points semester 2

3 lectures, 3 hours practical work per week

*assumed knowledge:* 8057 Biology INR or 7138 Molecular and Cell Biology or 4821 Cell Biology and Genetics, 3951 Biology of Plants and Animals

This subject deals with the origins, history and diversity of the Australian flora and fauna, and their adaptations to life in different environments. The topics focus mainly on the higher plants and animals, with some emphasis on their responses to major environmental stresses, including fire, aridity and the availability of nutrients. The practical component of the subject provides the skills needed for accurate identification of flowering plants and vertebrate fauna.

*assessment:* theory 50%; practical work 50%

**3283 Soils**

3 points semester 2

2 lectures, 4 hours of practical (or equivalent) per week

*assumed knowledge:* SACE Science subjects

The aim of the subject is to provide an understanding of the composition, genesis, classification and distribution of soils, the processes important to soil fertility and the principles of soil conservation. The major topics considered are: soil materials: organic, inorganic components of soils and their influence on soil properties and land use. Physical, chemical and biological properties of soils: soil structure, infiltration, storage and movement of water, salinity, chemical fertility, cation and anion exchange, soil biology. Soil conservation: wind and water erosion, causes and effects of erosion, land evaluation, methods of controlling degradation and erosion, reclamation.

*assessment:* exam, essay, tutorials and practical assignments

**Level II**

**1536 Agroforestry**

3 points semester 2

2 hours lectures, practical work, excursions each week

The focus of this subject is the practical application of agroforestry in low and high rainfall environments in Australia. It also exposes students to agroforestry as it is practised elsewhere in the world.

Topics include: the management of trees/shrubs for timber, fodder and other products; agroforestry for the control of salinity and ground water, soil erosion, and habitat management; practical tree establishment, maintenance and harvest; ecological interactions in agroforestry systems; the effect of shelter on crop, pasture and animal productivity, planning agroforestry on the farm; modelling agroforestry systems; agroforestry research and development in Australia; agroforestry in developing countries.

*assessment:* theory exam 55%; practical exam 15% assignments 30%

**6330 Biomathematics and Statistics R**

3 points semester 2

4 lectures, 2 computer lab sessions/tutorials per week

*assumed knowledge:* Stage 2 Mathematics I

restriction: 5543 Statistical Practice I; 9786 Mathematics I; 4357 Mathematics IH; 3617 Mathematics IM. Available only to students enrolled in B.Ag., B.Env. Mgt., Dip.Nat.Res.Mgt.

The subject is intended to equip students with basic skills in mathematics and statistics, as an introduction to the use of quantitative methods in agriculture.

Where possible, examples and data sets drawn from agricultural and natural resource sciences will be used. The subject will involve the use of modern computing methods. Topics will include: the notion of a mathematical model, growth and decay functions, rates of change, matrices, data collection and presentation, probability distributions, principles of experimentation and sampling, estimation, hypothesis testing, confidence intervals, regressions and correlation.

*assessment:* formal exam - at least 70%; exercise, practicals and project work - at most 30%

### **8420 Chemistry and Introductory Biochemistry A**

3 points semester 1

2 lectures, 1 tutorial, 3 hours practical work a week

*assumed knowledge:* Stage I/Year 11 Chemistry

A study of the chemistry and biochemistry relevant to current agricultural practices including: pH and buffers; oxidation and reduction reactions with reference to nitrogen compounds, chemistry of superphosphate and potash; electrochemical series and metal activity; photochemistry; chemical composition and chemical properties of plant and animal products – sugars, fats and proteins; chemistry of the major classes of pesticides; hydrocarbon fuels.

*assessment:* to be advised

### **2184 Community Ecology**

3 points semester 1

3 hours lectures, 4 hours practical per week, including a vacation field camp

*assumed knowledge:* 8057 Biology INR or 9520 Biology A

The subject examines major ecological principles applied at community and ecosystem levels and demonstrates these with reference to Australian ecosystems. At community level topics are: concepts of community, detection and delineation of communities, community organisation, succession, species diversity measures, response to disturbance, and the stability/diversity controversy. Theory is applied in practical work covering quantification of vegetation, sampling systems, image-based and ground survey, numerical classification, temporal survey, habitat definition and assessment, and conservation evaluation. At ecosystem level structural and functional components of ecosystems are analysed, leading to examination of energy transfers, primary and secondary productivities, ecological efficiency, nutrient movements and budgets and ecosystem dynamics.

*assessment:* theory 60%; practicals/assignments 40%

### **5439 Conservation Biology D**

3 points semester 2

2 weeks in mid-semester break including a field camp

*assumed knowledge:* 6254 Population Ecology, 2184 Community Ecology; 6976 Biomathematics and Statistics or equivalent

This subject deals with key biological characteristics of native plant and animal species which influence their survival in increasingly disturbed and fragmented habitats. Topics include reproduction and renewal, population genetics, plant-animal interactions, habitat management, endangered species management, population viability analysis, reserve design in theory and practice, fragmentation. The politics, legislation and economics of conservation issues like endangered species and regional biodiversity management planning.

*assessment:* theory 60%; practicals/assignments 40%

### **3507 Crop Agronomy**

3 points semester 2

3 lectures/seminars, 3 hours of practical per week

*assumed knowledge:* 9812 Agricultural Production Systems

The principles and practices of cereal grain legume, oilseed and summer fodder crop production. Fodder trees and shrubs; special-purpose temperate crops as renewable energy sources. The design and maintenance of farming systems with crop and pasture components; precision farming; the Landcare movement; the organic/biodynamic farming movement. Environmental considerations: soils, climate, water; species and cultivar selection; crop water requirements, including monitoring for moisture stress and salinity effects; use of models for irrigated crop management; integration of irrigation into farming systems; cultural practices; irrigation scheduling, ways in which irrigation can enhance marketing flexibility and profitability.

*assessment:* to be advised

### **9934 Ecology and Management of Freshwater Systems D**

3 points semester 1

2 lectures per week; 40 hours laboratory practical classes and/or field day trips

*assumed knowledge:* 2184 Community Ecology

*restrictions:* 8896 Freshwater Ecology

Genesis and nature of freshwater ecosystems; morphometry of lakes; characteristics of underwater irradiance in lakes; characteristics of vertical stratified lakes; catchment areas and chemical characteristics of

lakes; characteristics of size-classes of plankton and nekton in lakes; Taxonomy of bacterioplankton, phytoplankton, zooplankton and fish in lakes; structure and functioning of lake ecosystems: food web, microbial loop, nutrient flux and cycles; diurnal and annual dynamics in lakes ecosystems, ecological characteristics of streams and rivers; ecological characteristics of freshwater wetlands; waste stabilisation ponds: characteristics, design and control; eutrophication in lakes and rivers: characteristics, assessment, modelling, prediction; concepts of eutrophication control: control of external/internal nutrient sources, artificial aeration/destratification, food web manipulation; algal blooms in lakes and rivers: modelling prediction and control; acidification of lakes: causes and management; salinity in lakes and rivers: causes and management; BOD-loads of rivers: modelling, prediction and control.

Field work is an essential part of this course with excursions to the South Para Reservoirs and Murray Valley Wetlands near Renmark. During practicals water quality and plankton are monitored in the Warren, South Para and Barossa Reservoir.

*assessment:* exam 60%, practical reports 20%, essay 20%

### 2558 Ecology and Management of Rangelands D

3 points semester 2  
part winter vacation

2 weeks in July or September, including a 10-day field camp (Middleback Field Centre)

*assumed knowledge:* 6254 Population Ecology, 2184 Community Ecology, or equivalent

A subject in ecology emphasising the study of interactions between grazing animals and the vegetation in arid areas, the principles involved and their application to management practices. Particular attention is paid to the impact of domestic, feral and native herbivores on the population dynamics of the dominant woody perennials, and the maintenance of their stabilising influence on the landscape. The bulk of the teaching is done at Middleback, a working sheep station set in the western myall woodlands on the southern margins of the north-west pastoral district of South Australia. The main focus on ecology of these arid woodlands and their highly productive saltbush-bluebush understorey, is taught in the context of the history of land use, subsequent research, the ensuing legislation, and its administration, with input from pastoralists and government officers where appropriate.

*assessment:* project reports 40%, theory exam 60%

### 4500 Fauna Management D

3 points semester 2

3 lectures, 1 tutorial per week

*assumed knowledge:* 6254 Population Ecology, 4217 Plant and Animal Adaptations or equivalents

The subject deals with the management of captive and wild populations. Topics covered include: the reasons for management; conflicts between man and wildlife; the philosophical rationale for maintaining captive collections; management of diseases; development of ecologically-based management strategies for the purpose of conservation, commercial harvesting and pest control; management of captive collections; legal and administrative framework

*assessment:* theory 60%; practicals/assignments 40%

### 9126 Indigenous Australians and Environmental Management D

3 points semester 1

5 hours per week (includes vacation field camp)

quota will apply

Contemporary land and resource use and management by Aboriginal people, and its relationship to sustainable development. Theoretical frameworks drawing on development studies, emphasising concepts of empowerment and indigenous self determination, and participatory approaches to resource management. Exploration of the positive and negative impacts of Australian resource management on indigenous people. Aboriginal world views, social organisation and relationships to country. Skills in communicating and negotiating with Aboriginal people. Specific topics covered include Aboriginal ecologies; subsistence economies; land and sea rights including native title; co-management regimes; heritage management; the role of Aboriginal organisations in environmental management.

*assessment:* practicals/assignments

### 4373 Individual Studies D

3 points semester 1

Individual or small group contact on a regular weekly basis

*prerequisites:* credit level in at least one relevant Level II subject, and approval by Senior Course Adviser. Only one Individual Studies subject can be credited towards the Bachelor of Environmental Management

This subject is to enable students as individuals or small teams to undertake a laboratory or field-based research project, a literature review, and/or essays relevant to natural resource management. The objectives and nature of the program will be

determined through consultation with the Senior Course Adviser as Subject Coordinator.

*assessment:* determined in consultation with students

### **5478 Integrated Pest Management A**

3 points semester 1

2 lectures; four-hour practical per week

This subject provides an introduction to the theory and practice of pest management. Topics considered are: the development, regulation and use of pesticides; strategies and tactics for managing pests (biological, cultural, genetic and chemical control). Integrated pest management. Economics of pest management. The diagnosis of disease. Strategies and tactics for managing disease outbreaks. Integrated weed management.

*assessment:* exam 70%, practical exercises 30%

### **5031 Integrated Weed Management D**

3 points full year

Modules at student's pace, with two day residency for practicals in first mid-semester break

The impact of weeds on agricultural and natural ecosystems. Important characteristics of weed biology. Ecology of weeds. Methods of sampling and monitoring weed infestations. Biological, cultural and chemical methods for weed management. Integrating management techniques for weeds in a range of ecosystems, including: cropping enterprises, perennial pastures, national parks and recreation areas and horticultural systems.

*assessment:* five assignments during the year

### **1981 Pasture Agronomy**

3 points semester 2

2 lectures, 3 hour practical per week

*assumed knowledge:* 1028 Principles of Sustainable Agriculture or 2847 Agricultural Production and Economics or 9812 Agricultural Production Systems

Pasture Agronomy builds on knowledge and concepts of pasture science and practice introduced in Principles of Sustainable Agriculture. It deals with the selection, establishment, management and utilisation of pastures in the main rainfall and soil environments encountered in Australia. It deals with a wide range of pasture species - annual and perennial legumes, grasses and shrubs, particularly those used in southern Australia.

Particular topics include genetic variability and evolution; environmental adaptation; pasture improvement; pasture establishment; species and cultivar identification; assessment of pasture condition and performance; regulation of pasture quality,

productivity and persistence; grazing management; management of weeds, pests and diseases; fodder conservation; grass-legume relations; and seedbank ecology. Attention will be given to important current issues such as legume decline, the role of grasses in ley pastures and soil processes under pastures. Practical work will be based on the above topics and include a high proportion of field exercises.

*assessment:* exam 60%; practical reports 30%; review and essays 10%

### **1936 Soil Management and Conservation**

3 points semester 1 Waite

2 lectures, 4 hours practical work or equivalent a week

This subject covers topics important to students of agriculture, horticulture and natural resource management. Degradative processes which pose the greatest threats to the soil resources of Australia are examined and their avoidance, management and amelioration are discussed. These processes include: erosion of soil by water and wind, water repellence, irrigation and dryland salinity, induced soil acidity, soil structure decline and sodicity. Other issues addressed are soil conservation legislation and land capability.

Practical work will consist of laboratory exercises, field excursions and other exercises related to the above topics.

*assessment:* exam; essay; practical, other assignments

### **6254 Population Ecology**

3 points semester 1

3 lectures, tutorial per week, 4 hours practical per fortnight including a vacation field camp

*assumed knowledge:* 8057 Biology INR or 9520 Biology A

This subject aims to provide a theoretical and practical understanding of the ecology of populations. Topics covered include: demographic attributes of populations which illustrate the structure, organisation and dynamic nature of populations (including density, natality, mortality, survivorship, dispersal); the adaptive nature of these attributes in terms of for example, life-history strategies; models of population growth and regulation; and the nature of interspecific interactions. Theoretical principles are combined with practical work to investigate the methodology of population surveys with particular regard to fauna populations and their utilisation of the environment.

*assessment:* theory 60%; practicals/assignments 40%

### **8231 Resource Mapping and Survey**

3 points semester 1

2 lectures, 1 tutorial, 4 hours practical per week. Some practicals are in the field.

Introduces students to a range of mapping, surveying and remote sensing techniques and their application to natural resource surveys, and develops practical skills in map and remote imagery interpretation, basic surveying techniques and preparation of plans for resource survey; practical application of equipment and techniques used in surveying to exercises involving traversing, siting and contouring; construction of original thematic maps from image interpretation and ground survey; review of the theory and use of vertical air photos and their application in natural resource surveys; an introduction to the sources and nature of remotely-sensed imagery and the principles of earth-electromagnetic radiation interactions.

*assessment:* theory 60%; practicals/assignments 40%

### **7306 Vertebrate Pest Control D**

3 points summer semester  
semester 1

10 days during the summer vacation

quota will apply

assumed knowledge: 4217 Plant and Animal Adaptation, 6254 Population Ecology or equivalents

This subject, presented in conjunction with the Animal and Plant Control Commission, strongly emphasises the field application of vertebrate pest control techniques and provides the theoretical bases for these techniques. Topics covered are the biology and ecology of vertebrate pests; the damage caused by pest animals; the legislative and administrative aspects of vertebrate pest control; district organisations; extension; vertebrate pest control practice.

*assessment:* theory 60%; practicals/assignments 40%

## Diploma in Wine Marketing

All subjects in this course are available in full-time, part-time and external modes

### Syllabuses

#### Level I

##### 9101 Business Data Analysis

3 points semester 1

See Bachelor of Economics for syllabus details

##### 9682 Economic Principles

3 points semester 2

2 lectures, 1 tutorial per week

This subject provides an introduction to economic principles as a basis for other subjects. It covers both micro and macro theory. The subject is in two parts. The first part provides basic tools required for analysing individual and organisational economic decision-making. Topics include: fundamentals of supply and demand analysis, consumer equilibrium theory including utility and indifference approaches, production theory, analysis of short and long-run cost of production, market structures and objectives of the firm, pricing policies and methods, market failure, welfare and public policy issues. The second part focuses on the workings of the Australian economy in its international context. Topics include theories of employment, inflation, interest rates and exchange rates, as well as an examination of relating to monetary policy and fiscal issues. Coverage of the subject includes applications of economic principles to agricultural business or wine marketing through interactive tutorial programs.

*assessment:* exam 50%; assignments 50%

##### 6234 Introduction to Business Management

3 points semester 2

2 lectures and 1 tutorial per week

Introduction to management, evolution of management, management environments, decision making, planning, strategic management, organising, organisational structure, human resource management, managing change and innovation, behaviour, motivation, leadership, communication, control, operations management, international management.

*assessment:* assignments, tests, final examination

##### 4478 Introduction to Managerial and Financial Accounting

3 points semester 2

2 lectures, tutorial, 1 hour computer practical per week

This subject provides an introduction to the nature and purpose of financial, managerial and cost accounting as an information specialisation, with particular emphasis on agricultural businesses. Topics included are designed to demonstrate how the processes of measurement of financial events and the collection, sorting, classification, analysis and reporting of financial information (manually and computerised) are determined by the objective of accounting, which is to provide financial information for the purpose of decision-making by internal management and external parties, eg. Financial Statements, CVP, Product Costing, Budgeting Ratios.

*assessment:* exams 50%; assignments 50%

##### 8901 Introductory Grape and Wine Knowledge

3 points semester 1

2 lectures per week, 3 hours of practicals/tutorials per week or 4-day residential school together with external students

History of grapegrowing and winemaking in Australia; grapevine morphology, growth and development; grape berry development; changes in grape berry composition during ripening; physiology of smell and taste; basic winemaking principles; taste and aroma interactions. Exercises in practical sessions designed to train student's palate in wine sensory evaluation and to differentiate between Australian wine types and styles.

*assessment:* exam 50%, assignments and practical tests 50%

##### 2440 Legal Issues in Wine Marketing

3 points semester 1

2 lectures, 1 tutorial per week; seminars as notified

The aim of this subjects is to acquaint students with the legal issues relating to marketing in general and wine marketing in particular. Over the last two decades there have been very significant legislative changes designed to realign the common law rules in this area to suit the evolving needs of business and consumers. The wine

aspects covered will relate to laws governing grades and standards, health, rights and obligations of buyers and suppliers of goods and services, etc.

*assessment:* exam, assignments

### **4932 Principles of Marketing (Wine Marketing)**

3 points semester 1

2 lectures, 1 tutorial per week

The aim of this subject is to give wine marketing students an understanding of the role of the marketing manager through an introduction to the basic concepts and practices in marketing with particular emphasis on agricultural products, especially wine products. The topics covered include the marketing environment and marketing strategy formulation. There will be particular examination of product, price, place and promotion strategies.

*assessment:* exam 50%, assignments and tutorials 50%

### **4605 Vineyard and Winery Operations I**

3 points semester 2

2 lectures per week, 3 hours tutorials/practicals to be advised, residential school for external students

*prerequisites:* 8901 Introductory Grape and Wine Knowledge

Climatic requirements for viticulture, vineyard design, establishment and operations including pruning, irrigation, canopy management, soil management and pest and disease management. Characteristics of major white wine grape varieties. Principles and practices of white and sparkling wine production. Major white wine styles of the world. Oak in winemaking, oak production and cooperage.

Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* written exam 55%, assignments and practicals 45%

## **Level II**

### **1244 Advertising and Promotion**

3 point semester 1

3 hours per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing) or 4843 Agricultural Marketing Principles and Strategies

This subject will provide the student with an overview of the Integrated Marketing Communications process. Students will learn to manage the formal communications process in the context of wine and

agricultural businesses. Attention will be paid to developing communication plans and understanding strategic applications of advertising, sales promotion and public relations tools. Students should expect to gain knowledge of communications theory as well as practical application through study of texts and real world cases.

*assessment:* exam 50%; assignments 50%

### **7927 Applied Marketing Research**

3 point semester 2

2 lectures, 1 tutorial, 1 practical per week

*assumed knowledge:* 9101 Business Data Analysis I

The aim of this subject is to study quantitative and qualitative marketing research for pro-active and reactive marketing intelligence systems as it applies to wine and agricultural marketers. Topics included are problem analysis, types of data collection systems, steps in research projects, controls of a research project, questionnaire design, statistical methodology for data reduction, sampling theory and the industry and operative organisations. Dealing with a market research organisation will be a significant aspect of the subject which is not aimed at producing researchers but clients who understand the intricacies of the process - and the limitations. The focus will be the application of the theory for use in new wine/agricultural product evaluation, advertising measurement, corporate/product/range analysis, attitudinal research, as primary sources. Secondary sources such as trade, governmental or syndicated data will be explored and assessed.

*assessment:* exam 50%; assignments 50%

### **1053 Consumer Behavioural Analysis**

3 point semester 1

2 lectures, 2 tutorials per week

*assumed knowledge:* 4471 Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing)

The aim of this subject is to alert wine and agricultural marketing students to the many variables which impinge upon the purchase of goods and services. Within this most important multi-disciplinary subject are the studies of perception, attitudes, human motivation, consumer information processing and decision-making, the sociology of people, external and internal variables, group influences and the segmentation of people into manageable communicable target groups for niche markets. The implications for marketing are in providing direction and substance for all marketing efforts such as in advertising, promotion, public relations, packaging, pricing, distribution and the nature of the product.

*assessment:* exam 50%; assignments 50%

#### **4418 Fortified Wines, Spirits and Non-grape Beverages**

3 point semester 2

2 lectures per week, 3 hours tutorials/practicals per week, or 4 day residential school with external students

*prerequisites:* 7435 Vineyard and Winery Operations II

Characteristics of grape varieties for fortified wine and brandy production; production of Australian, Spanish and Portuguese fortified wines; grape spirit and brandy productions; production of non-grape beverages, such as beer, cider and non-grape spirits. Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* exam 60%; tests, assignments, practical reports 40%

#### **2307 Individual Project II**

3 point full year

Individual consultation with the Subject Coordinator by arrangement

Continuing external students only

*corequisite:* 2002 Strategic Marketing II

The emphasis of this subject is on the application of marketing theory to a marketing problem. The student must select a topic relevant to the wine market specifically or to an aspect of marketing, subject to the approval of the Subject Coordinator. The topic may be an existing marketing situation, a proposed scenario or, with a view to adding to the industry's knowledge, an issue in which research is lacking.

The project will include a literature search and may incorporate data collection methodology. Innovation and lateral thinking in problem solving are the key elements in this subject.

*assessment:* proposal 10%; progress report 10%; final report 80%

#### **8590 International Marketing of Wine and Agricultural Products**

3 point semester 2

2 lectures, tutorial, seminar per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing)

This subject aims to provide a comprehensive review of the theory and practice of international marketing mainly in relation to wine and agricultural products. Special emphasis will be given to marketing in the European and Asian regions and under GATT. Topics include the economic analysis of international trade and Australian business involvement, environmental

factors affecting international marketing, strategic planning and organising for international marketing, decisions on segmentation, product policy including geographical indicators and product planning, pricing, channels of distribution, international advertising and coordinating and controlling global marketing operations. It also focuses on international market research, multi-country data analysis and international marketing information.

*assessment:* exam 50%, assignments 50%

#### **1069 Market Experience II**

2 point semester 1

240 hours practical marketing experience

Continuing external students only

*prerequisite:* 1864 Introductory Marketing I

The student must complete 6 weeks' experience in at least one of the following areas: cellar door sales in a position necessitating dealing with the attending public; the sales or marketing departments of a wine producer; a retail wine outlet or a wholesaler/agent/distributor; an agreed marketing environment where hands-on experience can be associated with marketing theory.

*assessment:* minimum 3000 word essay 100%

#### **2086 Retail Selling and Practice**

3 point semester 2

2 lectures, 2 hours of practicals a week

*prerequisites:* 4932 Principles of Marketing (W.M.) or 9129 Principles of Agricultural Business Marketing

This subject focuses on the principles of establishing and managing a retail concern. It will expose the student to the theoretical and practical aspects of selling and retail practices. Some of the areas this subject will cover include: distribution and information systems, selling and marketing technology and trends, retail and wholesale operations, negotiation skills. The subject can involve some fieldwork, guest lectures and practical case studies.

*assessment:* examination 40%, assignments 60%

#### **2002 Strategic Marketing II**

3 point semester 2

3 hours per week

*prerequisite:* 4932 Principles of Marketing (Wine Marketing) or 9129 Principles of Agricultural Business Marketing or equivalent

This subject focuses on the marketing planning process, strategic market management and implementation. The emphasis is on long term

strategic planning and analysis and understanding appropriate marketing strategies for increasingly dynamic marketing environments.

*assessment:* exam 50%; assignments 50%

### **7435 Vineyard and Winery Operations II**

3 point semester 1

2 lectures per week, 3 hours tutorials/practicals to be advised, residential school for external students

*prerequisites:* 4605 Vineyard and Winery Operations I

Characteristics of major red wine grape varieties; principles and practices of red wine production; major red wine styles of the world; history and structure of the Australian and world wine industry; wine packaging, bottling operations and quality standards; wine laws and health; sensory science. Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* exam 60%; tests, assignments, practical reports 40%

### **5693 Wine and Marketing in Society**

3 points semester 1

The student will be exposed to studies that cover the history and future of the Australian wine grape growing industry including organisations which represent that industry and their structure and functions; alcohol and wine consumption habits and attitudes including societal influences on human behaviour; education and awareness programs, communication of wine information, introduction to wine, food, licensing, labelling and product laws and standards and distribution.

*assessment:* to be advised

## Bachelor of Agriculture

### Syllabuses

#### Level I

##### 7447 Agricultural Experience I

3 points full year  
40 days practical agricultural experience; 12 three-hour demonstrations; 5 days agricultural business experience

Students are rostered on agricultural enterprises where skills and knowledge in the practice of agriculture are developed. Practical demonstrations on a broad range of farm enterprise operations are presented and involve students in developing their skills and knowledge. Students are required to negotiate 5 days work experience with an agribusiness company which provides a service to the rural industry.

*assessment:* to be advised

##### 9812 Agricultural Production Systems

3 points semester 1  
6 hours per week

An introduction to agriculture which covers concepts and issues of sustainable agriculture, the evolution of Australian farming systems, understanding weather systems, extensive and intensive livestock systems, horticultural systems, cropping and pasture systems.

*assessment:* practical reports 20%; written assignments 20%; exam 60%

##### 3951 Biology of Plants and Animals

3 points semester 2  
2 lectures, 1 tutorial and 3 hours of practical work per week.

*assumed knowledge:* 4821 Cell Biology and Genetics or 9520 Biology A or 8057; Biology INR

*restrictions:* 8280 Biology of Organisms, 3174 Biology 1

This subject is an introduction to the diversity of form and function in higher plants and animals. Examples of both native and agricultural species are used to illustrate the structure and function of flowering plants and vertebrate animals, their reproduction, growth, nutrition, control systems, and interactions with the environment.

*assessment:* exam 50%, tutorial exercises and practical reports 50%

##### 6330 Biomathematics and Statistics R

3 points semester 2

See Diploma in Natural Resource Management for syllabus details

##### 4821 Cell Biology and Genetics

3 points semester 1  
2 lectures, tutorial, 3 hours of practical work per week.

*Restrictions:* 9520 Biology A, 8057 Biology INR, 3174 Biology 1

The subject is an introduction to cell biology and genetics and also provides an introduction to further studies in agricultural production and environmental management. It does not assume previous biological knowledge. Topics include: structure of bacteria, plant and animal cells and introduction and role of main cellular components; role of membranes in the regulation of the cell environment; respiration and energy production; fermentation; photosynthetic processes and synthesis of sugars; cell interaction and cell division, chromosome structure and inheritance; location and structure of genes; genotype and phenotype; DNA, its replication, transcription and translation; protein synthesis; mutation; introduction to plant and animal breeding and genetic engineering, role in biodiversity and conservation.

*assessment:* practical reports, tutorial exercises 30%; final exam 70%

##### 8420 Chemistry and Introductory Biochemistry A

3 points semester 1  
2 lectures, 1 tutorial, 3 hours practical work a week

*assumed knowledge:* SACE Stage 1 Chemistry

A study of the chemistry and biochemistry relevant to agricultural production and environmental management including: chemical calculations, pH and buffers; oxidation and reduction reactions; electrochemical series and metal activity; battery operation; corrosion; introduction to the chemistry of fertilisers and pesticides; atmospheric and ozone chemistry; chemical composition and chemical properties of plant and animal products - sugars, fats and proteins; chemistry of hydrocarbon fuels.

*assessment:* to be advised

**1151 Microorganisms and Invertebrates**

3 points semester 2

Continuing students only

6 hours per week

*assumed knowledge:* 9520 Biology A, 8057 Biology INR or equivalent

Biology of bacteria, algae, protozoa, fungi, viruses, platyhelminthes and nematodes. Systems to be studied include antibiotics, the rhizosphere, fresh and waste water, and the release of genetically engineered microorganisms. Classification of insects and other arthropods, external and internal anatomy, reproduction and life cycles, feeding relationships, behaviour, predators, parasites and pathogens.

*assessment:* theory exam 65%, practical reports 15%, arthropod collection 20%

**9756 Rural Business Planning A**

3 points semester 2

5 hours lecture/tutorial per week

The concepts involved in planning a farm business and determining options for land use and enterprise selection are presented and the financial tools for measuring farm performance including gross margins and cash flow budgets introduced.

Topics include: options for land use, enterprise selection and diversification, production management, sustainability and capability of land for production, resource constraints, marketing options, physical and financial records and financial management tools.

*assessment:* to be advised

**3283 Soils**

3 points semester 2

See Bachelor of Environmental Management for syllabus details

**Level II**

**6937 Agricultural Experience II**

3 points full year

13 weekdays of agricultural experience; 6 weekend days of agricultural experience; 35 days off-campus farm experience; weekly tutorials

Students are rostered on agricultural enterprises where skills and knowledge in the practice of agriculture are developed. Student involvement on weekends includes taking responsibility for the operation of enterprises. Students are involved in the management of their elective enterprise and are required to undertake a problem solving contract which addresses the issues and provides practical recommendations. Students are required to undertake 35 days off-campus work

experience on an approved farm, which will provide them with the opportunity to evaluate forms of agricultural productivity and management practices.

*assessment:* to be advised

**9100 Engineering Science**

3 points semester 2

6 hours per week (including lectures and practicals)

*assumed knowledge:* Stage 2 Mathematics I

Fundamental concepts: force, work, power, energy, pressure. Fluids: principles of hydrostatics, elementary hydrodynamics. Properties of fluids, behaviour of real fluids under reduced pressure, elementary pressure-wave theory, fluid pumping. Stress analysis: stress, strain, deformation and failure in elementary components. Thin-walled pressure vessel theory. Electricity: physiology of electric shock, elementary DC and AC circuit theory, single and 3 phase AC power, AC motor types and applications.

*assessment:* practicals, assignments, exams

**7020 Horticultural Systems**

3 points semester 1

2 lectures, 4 hours practicals per week

*assumed knowledge:* Level I of Bachelor of Agriculture or Diploma of Agricultural Production

The importance of horticulture to the community, sustainability and economic value, horticultural production areas and environmental factors involved. Fruit crop growth and its control using cultural and chemical methods. Horticultural propagation methods. The basis of production systems for fruit, nut and vegetable crops, and systems which combine different types of horticulture. The subject covers fruit, flower and vegetable crops of both temperate and tropical climates, and normally includes visits to horticultural enterprises.

*assessment:* theory exam: mid-semester 20%, final 40%; practical reports 20%; practical exam 20%

**5039 Marketing and Financial Control in Agriculture**

3 points semester 1

See Diploma of Agricultural Production for syllabus details

**5636 Nutrition, Breeding and Health of Farm Animals**

3 points semester 2

6 hours per week

*assumed knowledge:* 6739 Physiology of Farm Animals

This subject deals with the following topics: animal nutrition: methods of investigation; evaluation of feeds—digestibility, energy content, protein, feeding standards for maintenance and growth; minerals and vitamins; voluntary feed intake; properties of common feeds. Animal genetics and breeding technologies: genetic and environmental variation; qualitative and quantitative characteristics; correlations; heritability; selection aids, breeding programs, selection differential and generation interval; manipulation of breeding strategies. Animal health: introduction to animal health; causes of disease and response of body to disease, control of animal disease. Epidemiology with reference to some diseases in grazing animals. Animal behaviour, stress and animal welfare.

*assessment:* to be advised

### **6739 Physiology of Farm Animals**

3 points

semester 1

6 hours per week

*assumed knowledge:* B.Ag. students - 9520 Biology A; 8420 Chemistry and Introductory Biochemistry A; B.Ag.Sc. students - 2448 Agricultural Zoology

Animal physiology: the tissues; physiology of the major systems including skeletal and muscular, circulatory, respiratory, digestive, excretory, nervous, endocrine, reproductive, environmental physiology.

*assessment:* to be advised

### **1028 Principles of Sustainable Agriculture**

6 points

full year

2 lectures, 1 tutorial, 3 hour practical per week

*assumed knowledge:* 9812 Agricultural Production Systems

Agricultural production faces increasing pressure to be more productive, profitable, efficient and sustainable. Principles of Sustainable Agriculture provides the scientific basis for agriculture to meet these challenges. Through the application of principles, for example water use efficiency or nutrient cycling, it will be demonstrated that the goals of profitability and sustainability need not be in conflict. Practicals will aim to provide experience in the application of principles under realistic farming conditions. The subject will explore the concept of sustainability, and evaluate farming systems in terms of productivity, efficiency, stability, and social and economic equity. Topics covered will include: agroclimatology, plant growth, morphology and phenology, crop and pasture agronomy, water use efficiency, plant nutrition, plant relations, plant community dynamics, weed management systems, pasture-animal interactions, crop rotations, tillage, indicators of sustainability, economics and geography of production systems. A range of crop and pasture species will be used to

illustrate principles. Knowledge and skills introduced in this subject may be further developed in a range of core and elective level III subjects.

*assessment:* to be advised

### **3052 Rural Finance and Marketing**

3 points

semester 2

5 hours of lecture/tutorial per week

*assumed knowledge:* 9756 Rural Business Planning A

Four main areas will be covered: 1) Financial decision making: measuring business growth, assets, liabilities and equity, financial tools including profit and loss statement and balance sheets. 2) Financing the business: loans, capital purchases, off farm investments, taxation. 3) Business planning: comparative analysis, benchmarking, human resource management 4) Marketing: market analysis, targeting of products, pricing, promotion and distribution strategies.

*assessment:* to be advised

## **Level III**

### **1536 Agroforestry**

3 points

semester 2

2 hours lectures; associated practical work, excursions per week

The focus of this subject is the practical application of agroforestry in low and high rainfall environments in Australia. It also exposes students to agroforestry as it is practised elsewhere in the world.

Topics include: the management of trees/shrubs for timber, fodder and other products; agroforestry for the control of salinity and ground water, soil erosion, and habitat management; practical tree establishment, maintenance and harvest; ecological interactions in agroforestry systems; the effect of shelter on crop, pasture and animal productivity, planning agroforestry on the farm; modelling agroforestry systems; agroforestry research and development in Australia; agroforestry in developing countries.

*assessment:* theory exam 55%; practical exam 15% assignments 30%

### **8049 Animal Breeding Technologies**

3 points

semester 2

### **3172 Animal Biotechnologies**

3 points

semester 2

### **4534 Biological Control**

3 points

semester 2

See Bachelor of Agricultural Science for syllabus details

### 3507 Crop Agronomy

3 points semester 1

3 lectures, 3 hours practical/seminars per week

*assumed knowledge:* 9812 Agricultural Production Systems

The principles and practices of cereal grain legume, oilseed and summer fodder crop production. Fodder trees and shrubs; special-purpose temperate crops as renewable energy sources. The design and maintenance of farming systems with crop and pasture components; precision farming; the Landcare movement; the organic/biodynamic farming movement. Environmental considerations: soils, climate, water; species and cultivar selection; crop water requirements, including monitoring for moisture stress and salinity effects; use of models for irrigated crop management; integration of irrigation into farming systems; cultural practices; irrigation scheduling, ways in which irrigation can enhance marketing flexibility and profitability.

*assessment:* to be advised

### 8271 Crop and Pasture Ecology

3 points semester 2

See Bachelor of Agricultural Science for syllabus details

### 8165 Dairy Production

3 points semester 1

6 hours per week

*prerequisites:* B.Ag. students - 5636 Nutrition, Breeding and Health of Farm Animals; Dip.A.P. students - 8111 Animal Production A; B.Ag.Sc. students - 2448 Agricultural Zoology II

Composition of the dairy herd, feeding practices and management of dairy calves, vealers, replacements, dry stock, milking cows and bulls. Selection of replacements, selection of sires, enhancing reproductive performance of the herd, herd health, factors affecting milk production and composition. Herd dynamics. Milking procedure and hygiene, evaluation of alternative dairy animals. Milk production from, and management of dairy goats and dairy sheep. Integration of dairy enterprises in farming systems. Gross margins of typical dairy enterprises of cattle, goats and sheep.

*assessment:* to be advised

### 7906 Diseases and Nutrition of Livestock

3 points semester 1

See Bachelor of Agricultural Science for syllabus details

### 5813 Farm Management A

3 points semester 1

5 lectures/tutorials each week

*assumed knowledge:* 8111 Animal Production A or equivalent, 5039 Marketing and Financial Control in Agriculture or 4478 Introduction to Managerial and Financial Accounting or equivalent.

An introductory farm management subject designed to encourage students to apply a systems approach to the analysis and planning of the specialist grazing and livestock farm in South Australia. The syllabus includes the principles underlying the integration of livestock, pastures and forage crops in the farming system, factors determining profitability of livestock enterprises and techniques to evaluate the technical and economic performance of the livestock farm. Special emphasis will be placed on the complexities of physical planning giving consideration to changes in size and herd and flock composition, sales, purchases, transfers in and out, technical coefficients such as mortality, natural increase and feed availability. Financial planning will involve use of the enterprise gross margin planning and profit and loss system and cash flow planning. Presentation will be through lectures, tutorials and workshops requiring considerable student participation. Visits will be made to a specialist livestock farming enterprise to analyse system performance and propose development and management strategies that will lead to an improvement in profitability.

*assessment:* to be advised

### 7250 Farm Management B

3 points semester 2

5 lectures/ tutorials and visits

Continuing students only

*assumed knowledge:* 5813 Farm Management A

This subject will extend students ability to apply a systems approach in the general management context to the analysis and planning of a dryland farm business in South Australia. The syllabus includes the principles underlying the integration of crops, pastures and livestock in the farming system, the relationship between various environmental, economic and biological components of farming systems for the purpose of effective management, techniques to evaluate the performance of the dryland farm in terms of its technical and economic sustainability and flexibility, define major factors limiting performance, plan improvements and alternative management strategies to improve performance within the constraints imposed upon the farm business, and compare the projected performance of the proposed system with the performance of current farming policy.

Visits will be made to a number of dryland farming enterprises in the Mid-North to analyse system performance and propose development and management strategies that will lead to an improvement in technical and economic sustainability. Considerable student participation is required.

*assessment:* To be advised

### 6603 Fruit and Nut Crops

3 points semester 2  
odd years only

### 1018 Horticultural Production

3 points semester 2  
even years only

### 5882 Horticultural Science

3 points semester 1

See Bachelor of Agricultural Science for syllabus details

### 7338 Integrated Catchment Management III

3 points semester 2

See Bachelor of Environmental Management for syllabus details

### 5478 Integrated Pest Management A

3 points semester 1

### 9078 Integrated Weed Management

3 points full year

### 3066 Irrigation Science

3 points semester 1

See Bachelor of Agricultural Science for syllabus details

### 8561 Irrigation Systems Design A

3 points semester 2

6 hours per week

*assumed knowledge:* 7246 Basic Irrigation A, or 3066 Irrigation Science

This subject includes techniques of irrigation system design further to those studied in Basic Irrigation A, particularly including computer-aided design methods. Students will be given a series of design exercises in which they will be provided with appropriate information (soil, climate, crop, topography and water supply characteristics) and given the task of producing a suitable irrigation system design.

*assessment:* to be advised

### 6213 Issues in Food and Beverage Marketing

3 points semester 2

3 hours per week

*prerequisite:* 9129 Principles of Agricultural Business Marketing, or 9548 Business Systems A, or 5039 Marketing and Financial Control in Agriculture, or equivalent pass in a basic business subject.

This subject will examine key issues in the development and marketing of primary and processed food and beverage products. Attention will be paid to such areas as supply chain management, managing product development, exporting Australian food and beverage products, market research, packaging and labelling, consumer food consumption trends and food marketing strategies. Special attention will be paid to value-adding in Australian food and beverage industries.

*assessment:* to be advised

### 6127 Meat Production

3 points semester 2

2 lectures, 4 hour practical per week

*assumed knowledge:* 9812 Agricultural Production Systems

*restrictions:* 4784 Beef, Sheep and Goat Production A; 4018 Beef, Sheep and Goat Production B

This subject deals with all aspects of the practical management, breeding and nutrition of beef, cattle, sheep, deer and other meat-producing animals; management of animals on-farm, during transport, pre-slaughter and post-slaughter, to ensure maximum quality of meat products for different markets; feedlotting of beef cattle and sheep; the economics of meat production systems; importance of lean meat yields, bruising, muscle to bone ratios, growth rates and feed conversion efficiencies; meat science and how it can be manipulated to improve product quality. Practical classes include meat taste testing; assessment of the composition of live animals and carcasses using ultra sound, condition scoring, and chemical analysis; abattoir and farm visits.

*assessment:* to be advised

### 3434 Mineral Nutrition of Plants

3 points semester 1

See Bachelor of Agricultural Science for syllabus details

### 1981 Pasture Agronomy

3 points semester 2

2 lectures, 3 hour practical per week

*assumed knowledge:* 2847 Agricultural Production and Economics or 9812 Agricultural Production Systems

The subject deals with the selection, establishment, management and utilisation of pastures in the main rainfall and soil environments encountered in southern Australia. It deals with a wide range of pasture species - annual and perennial legumes, grasses and shrubs, particularly those used in southern Australia.

Particular topics include genetic variability and evolution; environmental adaptation; pasture improvement; pasture establishment; species and cultivar identification; assessment of pasture condition and performance; regulation of pasture quality, productivity and persistence; grazing management; management of weeds, pests and diseases; fodder conservation; grass-legume relations; and seedbank ecology. Attention will be given to important current issues such as legume decline, the role of grasses in ley pastures and soil processes under pastures. Practical work will be based on the above topics and include a high proportion of field exercises.

*assessment:* exam 50%; practical reports 30%; review, essays 20%

### 2514 Pig and Poultry Production

3 points semester 2

4 lectures, 2 hour practical a week

*prerequisites:* B.Ag. students - 5636 Nutrition, Breeding and Health of Farm Animals; B.Ag.Sc. students - 2448 Agricultural Zoology II; Dip.A.P. students - 8111 Animal Production A

The influence of the environment on the production of housed animals: social environment, temperature, humidity, ventilation and light; control of environment for production. Male and female reproduction in avian species. Housing requirements, housing types and equipment; management and nutrition of pigs (young stock, growers and breeders) and poultry (replacement stock, layers, broilers and breeders); processing of feedstuffs and preparation of proprietary feeds methods, equipment storage, anti-nutritive factors, feed additives, least-cost ration formulation; breeding systems and selection; methods of handling, treating and disposal of wastes, the economics of pig and poultry production; other forms of meat production.

*assessment:* to be advised

### 8826 Principles and Practice of Communications

3 points semester 1

2 lectures, 1 hour tutorial, 2 hour practical per week

This subject considers both the broad context and specific theory and practice of communication. An appreciation of the sociology of agri-industry and environmental management are developed. Various perspectives on current government policy, industry and rural natural resource management are presented and discussed. The process of program planning an evaluation is presented together with the background, development and technology of community based natural resource management. Through a range of specific tasks an activities, the subject fosters the development of flexible, high quality, group and individual communication skills throughout.

*assessment:* exam 50%; assignments, tutorial and practical exercises 50%

### 4988 Remote Sensing and Land Capability Assessment A

3 points semester 1

See Bachelor of Environmental Management for syllabus details

### 6855 Rural Business Management

3 points not offered in 1999

5 hours of lecture/tutorial per week

*assumed knowledge:* 3052 Rural Finance and Marketing

A case study approach incorporating financial, marketing and production management tools will be used and emphasis given to decision making techniques, technology adoption and management of risk, along with monitoring and evaluating the farm business.

Topics include: producing for markets, quality assurance, value adding, international marketing, commodity pricing, forward selling, futures and options, company structures and management of employees.

*assessment:* to be advised

### 8581 Sociology of Agricultural and Social Change

3 points semester 1

2 lectures, 1 tutorial

*assumed knowledge:* 1858 Social Systems

The objective is to provide the opportunity for students to develop a sophisticated understanding of non-urban social environments in modern western countries,

particularly Australia. The syllabus will include sociological theories of social change; family farming; agribusiness; Aborigines; the environmental movement; women in agriculture

*assessment:* assignments 100%

### **4633 Soil Ecology**

3 points semester 1

### **1936 Soil Management and Conservation**

3 points semester 1 Waite

See Bachelor of Agricultural Science for syllabus details

### **5295 Stream Enterprise Contract/Project**

3 points full year

Formal contact between student and supervisor during the project by mutual agreement

*assumed knowledge:* 7447 Agricultural Experience I; 6937 Agricultural Experience II (B.Ag.) or 7931 Biometry (B.Ag.Sc.)

Either an individual project/case study of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a major literature review, a research project or some other approved study. Or: a self-directed consultancy/contact which involves the identification of a management issue on either a campus or external commercial enterprise.

*assessment:* contract/project

### **6108 Wool Biology**

3 points semester 2

See Bachelor of Agricultural Science for syllabus details

### **9576 Wool Production**

3 points semester 1

3 lectures, 3 hour practical per week

*assumed knowledge:* 2248 Agricultural Zoology II OR 6739 Physiology of Farm Animals and 5646 Nutrition Breeding and Health of Farm Animals or 8111 Animal Production A

This subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

The subject will focus on the characteristics of Merino wool that influence its value, such as fleece weight, average fibre diameter, staple strength, staple length colour, vegetable matter and style. Students will study in detail the impact of genetics, nutritional, environmental, physiological and management factors of these wool characteristics. The interactions between these factors will be explored in both Mediterranean and non-Mediterranean environments, providing a systems approach to wool production in each, and an understanding of the constraints to wool production at a national level. Students will be able to identify and evaluate the options available to the commercial wool grower for improving productivity and the value of the clip. Attention will also be given to the ram breeding industry in terms of breeding objectives, selection strategies, bloodline comparisons and sire evaluation schemes.

*assessment:* to be advised.

### **2780 Wool Technology and Metrology**

3 points semester 1

3 lectures, 3 hour practical per week

*assumed knowledge:* 2248 Agricultural Zoology II OR 6739 Physiology of Farm Animals and 5646 Nutrition Breeding and Health of Farm Animals or 8111 Animal Production A

This subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

The subject covers the way in which wool is processed and the qualities of wool that affect its processing. This, in turn, includes the measurement of wool fibres, staples and fleeces, the factors that influence the way in which wool can be processed and the prediction of the quality and characteristics of wool tops and yarns using these measurements. The subject also addresses the question of marketing by description, blending of lots to achieve specified outcomes in the processed product and the whole-industry implications of working with particular fleece types. In the practicals students will acquire experience in measurement of all of the main characteristics of wool and an understanding of the implications of these for the wool industry as a whole. Students will also be introduced to traditional wool classing by subjective assessment and will relate the consequences of wool classing techniques to processing performance and preparation for market.

*assessment:* to be advised.

# Bachelor of Environmental Management

## Syllabuses

### Level I

Students will have a choice between North Terrace and Roseworthy subjects eg: 8057 Biology INR/9520 Biology A

#### 3174 Biology I

6 points full year

See Bachelor of Science in the Faculty of Science for syllabus details

#### 8057 Biology INR

3 points semester 1

3 lectures, 1 tutorial per week, 3 hours practical work per fortnight

*prerequisites:* previous study of biology is not assumed. However, previous or concurrent study of chemistry is necessary.

This subject is an introduction to cell biology that will form the basis for your later subjects in biology. It traces the development of life from its chemical origins, via cells through to multicellular organisms. The subject covers cell biology, including cell structure and how cells undertake the functions of membrane transport, fixing and using energy and reproducing by cell division. The discipline of genetics is introduced and the molecular basis of DNA replication and transcription is covered. The evolution of eukaryotes is reviewed and examples of how cells function in multicellular organisms are discussed.

*assessment:* final written exam; laboratory reports; essay; tutorial participation

#### 3951 Biology of Plants and Animals

3 points semester 2

See Bachelor of Agriculture for syllabus details

#### 6976 Biomathematics and Statistics

3 points semester 2

See Bachelor of Agricultural Science for syllabus details

#### 6330 Biomathematics and Statistics R

3 points semester 2

See Diploma in Natural Resources Management for syllabus details

#### 4821 Cell Biology and Genetics

3 points semester 1

See Bachelor of Agriculture for syllabus details

#### 6878 Chemistry I

6 points full year

See Bachelor of Science in the Faculty of Science for syllabus details

#### 7151 Chemistry IHA

3 points semester 1

3 lectures, 1 tutorial per week; 4 x 3 hour practicals; interactive computer assessed exercises

*assumed knowledge:* SACE Stage 2 Chemistry

An introduction to the molecular view of biosphere materials and processes. Introductory theories of molecule formation and structure, of intermolecular forces, of solution formation, reaction rates and equilibria. Chemistry of biological and synthetic polymers - peptides, proteins and polysaccharides; polyalkenes, polyesters and polyamides. Topics in environmental chemistry - solubilities, mobilities, biogeochemical cycles and soils.

*assessment:* end of semester exam 80%; laboratory work assessed during practical classes 20%

#### 8420 Chemistry and Introductory Biochemistry A

3 points semester 1

See Bachelor of Agriculture for syllabus details

#### 1550 Environment and Society

3 points semester 1

See Bachelor of Environmental Science for syllabus details

#### 1775 Field Studies IA

3 points semester 1

1 full day (6 hours) per week

This subject covers a range of techniques for recording and analysing environmental data: animal capture and measurement; fauna handling and maintenance; radio-telemetry; plant propagation techniques; electronic data management and analysis; soil analysis and mapping; aquatic sampling.

*assessment:* reports, portfolios, seminars, field aptitude

### 1151 Microorganisms and Invertebrates

3 points semester 2

Continuing students only

See Bachelor of Agriculture for syllabus details

### 7911 Plant and Animal Diversity

3 points semester 2

3 lectures and 3 hours practical work per week

*assumed knowledge:* 8057 Biology INR or 7138 Molecular and Cell Biology or 4821 Cell Biology and Genetics, 3951 Biology of Plant and Animals or equivalent.

This subject deals with the origins, history and diversity of the Australian flora and fauna, and their adaptations to life in different environments. The topics focus mainly on the higher plants and animals, with some emphasis on their responses to major environmental stresses, including fire, aridity and the availability of nutrients. The practical component of the subject provides the skills needed for accurate identification of flowering plants and vertebrate fauna.

*assessment:* theory 50%; practical work 50%

### 3283 Soils

3 points semester 2

2 lectures, 4 hours of practical (or equivalent) per week

*assumed knowledge:* SACE Science subjects

The aim of the subject is to provide an understanding of the composition, genesis, classification and distribution of soils, the processes important to soil fertility and the principles of soil conservation. The major topics considered are: soil materials: organic, inorganic components of soils and their influence on soil properties and land use. Physical, chemical and biological properties of soils: soil structure, infiltration, storage and movement of water, salinity, chemical fertility, cation and anion exchange, soil biology. Soil conservation: wind and water erosion, causes and effects of erosion, land evaluation, methods of controlling degradation and erosion, reclamation.

*assessment:* exam, essay, tutorials and practical assignments

## Level II

### 1498 Applied Ecosystem Modelling

3 points semester 1

2 lectures, 4 hours of practicals a week

*prerequisites:* 6976 Biomathematics and Statistics

Application of system dynamics theory to the description, investigation, and eventual management of environmental systems. Development of conceptual models of ecosystem structure and function. Applied

statistics for ecological modelling. Steps involved in the construction of mathematical models of ecosystems [system analysis; model synthesis; model validation; model application/system control]. Overview of modelling paradigms with case studies; eg input-output; steady-state; state-determined; autonomous deterministic; non-autonomous deterministic; fuzzing modelling; neural networks; and rule-based modelling.

*assessment:* theory 60%; practicals 40%

### 5178 Basic Genetics

3 points semester 2

See Bachelor of Agricultural Science for syllabus details

### 2184 Community Ecology

3 points semester 2

3 hours lectures, 4 hours practical per week, including a vacation field camp

*assumed knowledge:* 8057 Biology INR or 9520 Biology A

The subject examines major ecological principles applied at community and ecosystem levels and demonstrates these with reference to Australian ecosystems. At community level topics are: concepts of community, detection and delineation of communities, community organisation, succession, species diversity measures, response to disturbance, and the stability/diversity controversy. Theory is applied in practical work covering quantification of vegetation, sampling systems, image-based and ground survey, numerical classification, temporal survey, habitat definition and assessment, and conservation evaluation. At ecosystem level structural and functional components of ecosystems are analysed, leading to examination of energy transfers, primary and secondary productivities, ecological efficiency, nutrient movements and budgets and ecosystem dynamics.

*assessment:* theory 60%; practicals/assignments 40%

### 4697 Economics of Resource Management II

3 points semester 1

3 lectures, tutorial/seminar per week

Principles of micro-economics as they relate to the allocation, use and management of natural resources. Causes of market failure; and opportunities and scope for market intervention and control. Management for sustainable stocks and flows -renewable and exhaustible resources. Time preference, discount rates, and the economics of resource management over time. Development, preservation and conservation. Alternative techniques for valuing environmental

resources. Principles of strategic management. Paradigms of environmental management in development. Environmental ethics.

*assessment:* assignments, exam

#### 4113 Field Studies IIA

3 points semester 2

6 hours per week

This subject builds on techniques presented in Field Studies I. The subject presents students with problems requiring logic and problem solving ability. More advanced techniques used in the analyses and recording of environmental data are presented to the students. The subject allows small groups of students (4-6) to work closely with an academic staff member, exposing students to a research environment. This subject allows students to focus on a particular area of interest common with the streams of the degree.

*assessment:* project report

#### 4217 Plant and Animal Adaptations

3 points semester 1

6 hours per week

*assumed knowledge:* 7911 Plant and Animal Diversity

This subject deals with the physiological and anatomical adaptations of higher plants and animals to life in different environments. Particular emphasis is placed on adaptations of plants to fire, water stress, salinity and nutrient availability, adaptations of animals in regard to osmoregulation and thermoregulation, reproduction, nutrition and digestion.

*assessment:* theory 60%; practicals/assignments 40%

#### 6254 Population Ecology

3 points semester 1

3 lectures, 1 tutorial per week, 4 hours practical per fortnight including a vacation field camp

*assumed knowledge:* 8057 Biology INR or 9520 Biology A

This subject aims to provide a theoretical and practical understanding of the ecology of populations. Topics covered include: demographic attributes of populations which illustrate the structure, organisation and dynamic nature of populations (including density, natality, mortality, survivorship, dispersal); the adaptive nature of these attributes in terms of for example, life-history strategies; models of population growth and regulation; and the nature of interspecific interactions. Theoretical principles are combined with practical work to investigate the methodology of population surveys with particular regard to fauna populations and their utilisation of the environment.

*assessment:* theory 60%; practicals/assignments 40%

#### 8231 Resource Mapping and Survey

3 points semester 1

2 lectures, 1 tutorial, 4 hours practical per week; some field practicals

Introduces students to a range of mapping, surveying and remote sensing techniques and their application to natural resource surveys; develops practical skills in map and remote imagery interpretation, basic surveying techniques and preparation of plans for resource survey; practical application of equipment and techniques used in surveying to exercises involving traversing, siting and contouring; construction of original thematic maps from image interpretation and ground survey; review of the theory and use of vertical air photos and their application in natural resource surveys; introduction to the sources and nature of remotely-sensed imagery and principles of earth-electromagnetic radiation interactions.

*assessment:* theory 60%; practicals/assignments 40%

### Level III

#### 1536 Agroforestry

3 points semester 2

See Bachelor of Agriculture for syllabus details

#### 4534 Biological Control

3 points semester 2

#### 4078 Biology and Diversity of Insects

3 points semester 1

#### 7931 Biometry

3 points semester 2

See Bachelor of Agricultural Science for syllabus details

#### 9273 Conservation Biology

3 points semester 2

2 weeks in mid-semester break including a field camp

*assumed knowledge:* 6254 Population Ecology, 2184 Community Ecology; 6976 Biomathematics and Statistics or equivalent

This subject deals with key biological characteristics of native plant and animal species which influence their survival in increasingly disturbed and fragmented habitats. Topics include reproduction and renewal, population genetics, plant-animal interactions, habitat management, endangered species management, population viability analysis, reserve design in theory and practice, fragmentation. The politics, legislation and economics of conservation issues like endangered species and regional biodiversity management planning.

*assessment:* theory 60%; practicals/assignments 40%

### 8271 Crop and Pasture Ecology

3 points semester 2  
odd years only

See Bachelor of Agricultural Science for syllabus details

### 5852 Ecology and Management of Freshwater Systems III

3 points semester 1

2 lectures per week; 40 hours of laboratory practical classes and/or field day trips

*assumed knowledge:* 2184 Community Ecology

*restrictions:* 8896 Freshwater Ecology

Genesis and nature of freshwater ecosystems; morphometry of lakes; characteristics of underwater irradiance in lakes; characteristics of vertical stratified lakes; catchment areas and chemical characteristics of lakes; characteristics of size-classes of plankton and nekton in lakes; Taxonomy of bacterioplankton, phytoplankton, zooplankton and fish in lakes; structure and functioning of lake ecosystems: food web, microbial loop, nutrient flux and cycles; diurnal and annual dynamics in lakes ecosystems, ecological characteristics of streams and rivers; ecological characteristics of freshwater wetlands; waste stabilisation ponds: characteristics, design and control; eutrophication in lakes and rivers: characteristics, assessment, modelling, prediction; concepts of eutrophication control: control of external/internal nutrient sources, artificial aeration/destratification, food web manipulation; algal blooms in lakes and rivers: modelling prediction and control; acidification of lakes: causes and management; salinity in lakes and rivers: causes and management; BOD-loads of rivers: modelling, prediction and control.

Field work excursions to South Para Reservoirs and Murray Valley Wetlands near Renmark - water quality and plankton are monitored in the Warren, South Para and Barossa Reservoir.

*assessment:* exam 60%, practical reports 20%, essay 20%

### 1134 Ecology and Management of Rangelands

3 points part semester 2,  
part winter vacation

2 weeks in July or September, including a 10-day field camp (Middleback Field Centre)

*assumed knowledge:* 6254 Population Ecology, 2184 Community Ecology, or equivalent

A subject in ecology emphasising the study of interactions between grazing animals and the vegetation in arid areas, the principles involved and

their application to management practices. Particular attention is paid to the impact of domestic, feral and native herbivores on the population dynamics of the dominant woody perennials, and the maintenance of their stabilising influence on the landscape. The bulk of the teaching is done at Middleback, a working sheep station set in the western myall woodlands on the southern margins of the north-west pastoral district of South Australia. The main focus on ecology of these arid woodlands and their highly productive saltbush-bluebush understorey, is taught in the context of the history of land use, subsequent research, the ensuing legislation, and its administration, with input from pastoralists and government officers where appropriate.

*assessment:* project reports 40%, theory exam 60%

### 1699 Environmental Chemistry III (NR)

3 points semester 2

2 lectures, 4 hours practicals each week

*prerequisites:* 7151 Chemistry IHA or equivalent

*restriction:* 2781 Environmental Chemistry II

The aims of this subject are to introduce the student to the environmental chemistry of air, water and soil pollutants. Topics covered include the environmental impact of acid rain, ozone depletion and atmospheric photochemistry. Biogeochemical cycles of selected elements are described, and students are shown how to use system modelling software StellaR to model processes governing environmental fate. Sources and speciation of selected metals and the effect of speciation on toxicity is also described. Ecological buffering capacity is discussed. Wastes and their management are considered along with various disposal strategies.

Chemical ecology, particularly the chemistry of insect pheromones and the role of allelopathic compounds is outlined.

*assessment:* theory 60%; practicals/assignments 40%

### 9296 Environmental Impact Assessment

3 points not offered in 1999

2 lectures, 2 tutorials per week

*prerequisites:* 8231 Resource Mapping and Survey, 2184 Community Ecology.

The purpose, legal requirements and administrative procedures of Impact Assessment in Australia. The methods of identifying, predicting, measuring, weighting and assessing the impacts of different types of proposals. Checklists, matrix and network techniques and their derivatives. Quantification and ranking systems, social impact assessment and cost benefit analysis. Design of impact studies, sources of

data, sampling, monitoring and use of models. Public involvement procedures and decision-making techniques. Case study of a recent impact statement.

*assessment:* theory 60%; practicals/assignments 40%

### 4234 Environmental Toxicology

3 points summer semester

10 days during the summer vacation

*prerequisites:* 7151 Chemistry IHA or equivalent

The goals of this subject are to provide students with an understanding of the fate, consequences and assessment of toxicants in environmental and biological systems. Classes of environmental toxicants discussed include pesticides, air and water pollutants, food-borne toxicants and heavy metals. The properties of toxic chemicals which influence their distribution and transformations and the action of environmental forces which affect toxicant breakdown and accumulation are discussed. Students are introduced to the principles of toxicology necessary for an understanding of the environmental consequences of toxicants.

*assessment:* theory 60%; practicals/assignments 40%

### 7083 Fauna Management III

3 points semester 2

3 lectures, 1 tutorial per week

*assumed knowledge:* 6254 Population Ecology, 4217 Plant and Animal Adaptations or equivalents

The subject deals with the management of captive and wild populations. Topics covered include: the reasons for management; conflicts between man and wildlife; the philosophical rationale for maintaining captive collections; management of diseases; development of ecologically-based management strategies for the purpose of conservation, commercial harvesting and pest control; management of captive collections; legal and administrative framework

*assessment:* theory 60%; practicals/assignments 40%

### 4774 GIS for Environmental Management

3 points summer semester

10 days during the summer vacation

*prerequisites:* 8231 Resource Mapping and Survey

This subject covers the types of Geographical Information Systems (GIS) used for environmental management and monitoring. The subject has a strong emphasis on spatial modelling and database design. Modelling techniques include Venn and Boolean overlays, buffering and digital elevation models; temporal simulation modelling using GIS is also covered. Relational and object oriented database

concepts are introduced. Students gain experience in the use of both raster and vector GIS and the relational database Oracle. Case histories of GIS applications to natural resource management problems are presented throughout the subject.

*assessment:* practical report assignment, written exam

### 9774 Indigenous Australians and Environmental Management

3 points semester 1

5 hours per week (includes vacation field camp)

quota will apply

Contemporary land and resource use and management by Aboriginal people, and its relationship to sustainable development. Theoretical frameworks drawing on development studies, emphasising concepts of empowerment and indigenous self determination, and participatory approaches to resource management. Exploration of the positive and negative impacts of Australian resource management on indigenous people. Aboriginal world views, social organisation and relationships to country. Skills in communicating and negotiating with Aboriginal people. Specific topics covered include Aboriginal ecologies; subsistence economies; land and sea rights including native title; co-management regimes; heritage management; the role of Aboriginal organisations in environmental management.

*assessment:* practicals/assignments

### 7499 Individual Studies A

3 points semester 2

Individual/small group contact each week

*prerequisites:* credit in at least one relevant Level II subject; approval by senior course adviser.

*restriction:* only one Individual Studies subject can be credited towards Bachelor of Environmental Management

This subject is to enable students as individuals or small teams to undertake a laboratory or field-based research project, a literature review, and/or essays relevant to natural resource management. The objectives and nature of the program will be determined through consultation with the Senior Course Adviser as Subject Coordinator.

*assessment:* determined in consultation with students

### 2990 Individual Studies B

3 points semester 2

Individual/small group contact each week

*prerequisites:* credit in at least one relevant Level II subject; approval by senior course adviser

*restriction:* only one Individual Studies subject can be credited towards B.Env.Mgt.

This subject is to enable students as individuals or small teams to undertake a laboratory or field-based research project, a literature review, and/or essays relevant to natural resource management. The objectives and nature of the program will be determined through consultation with the Senior Course Adviser as Subject Coordinator.

*assessment:* determined in consultation with students

### 7014 Individual Studies C

6 points full year

Individual/small group contact each week

*prerequisites:* credit in at least one relevant Level II subject; approval by senior course adviser.

*restriction:* only one Individual Studies subject can be credited towards B.Env.Mgt.

This subject is to enable students as individuals to undertake a major laboratory or field-based research project, a literature review, and/or essays relevant to natural resource management. The objectives and nature of the program will be determined through consultation with the Senior Course Adviser as Subject Coordinator.

*assessment:* determined in consultation with students

### 7338 Integrated Catchment Management III

3 points not offered in 1999

2 lectures, 2 practicals per week

Conflicts in land use; functions of land, definitions and classifications of land; spatial characteristics and processes of land and landscapes; boundary processes in landscapes. Disturbances of components and processes by land use. Land management systems for both single and multiple use. Assessment and planning techniques.

*assessment:* theory 60%; practicals/assignments 40%

### 5478 Integrated Pest Management A

3 points semester 1

### 9078 Integrated Weed Management

3 points semester 1

See Bachelor of Agricultural Science for syllabus details

### 4988 Remote Sensing and Land Capability Assessment A

3 points semester 1

10 days during summer vacation

This subject is applications orientated and presents current theory and methodologies used in studying the spatial variability existing within a variety of environmental and agricultural land management situations. Topics covered include the interaction of electromagnetic radiation with the earth's surface, the measurement of this radiation by a range of sensors, the spectral aspects of earth objects and the way spectral data can be used to identify and characterise those objects and to monitor changes over time. Practical are structured around specific projects and the extraction and utilisation of the digital data by the use of image processing techniques e.g. image interpretation enhancement and classification. Within this remote sensing section of the topic of global positioning systems and their role in image management and rectification will also be briefly introduced. An aspect of the course deals specifically with soil and landscape classification and incorporation of these techniques in land capability assessment. The final part of the course relates to case studies and how the remote sensing and land capability spatial data bases can be manipulated with a geographic information system (GIS).

*assessment:* written exam, practical reports, soil and land evaluation assignment

### 4633 Soil Ecology

3 points semester 1 Waite

### 1936 Soil Management and Conservation

3 points semester 1 Waite

See Bachelor of Agricultural Science for syllabus details

### 7023 Vertebrate Pest Control III

3 points summer semester

10 days during the summer vacation

quota will apply

*assumed knowledge:* 4217 Plant and Animal Adaptation, 6254 Population Ecology or equivalents

This subject, presented in conjunction with the Animal and Plant Control Commission, strongly emphasises the field application of vertebrate pest control techniques and provides the theoretical bases for these techniques. Topics covered are the biology and ecology of vertebrate pests; the damage caused by pest animals; the legislative and administrative aspects of vertebrate pest control; district organisations; extension; vertebrate pest control practice.

*assessment:* theory 60%; practicals/assignments 40%

## Bachelor of Agricultural Business

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Agricultural Business. A candidate may obtain either degree or both.
- 1.2 To qualify for the Honours degree a candidate shall complete the requirements for the Ordinary degree and comply with the provisions of 6 below.

#### 2 Assessment and examinations

- 2.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.
- 2.2 A candidate who fails in a subject or who obtains a lower division pass and who desires to take the subject again shall, unless exempted wholly or partially therefrom by the Head of Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 2.3 A candidate who has twice failed to obtain a Division I pass or higher in the examination in any subject shall not enrol for the subject again, or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and under such conditions as the Faculty may prescribe.
- 2.4 A candidate who does not attend the examination in any subject although eligible to do so, shall be deemed to have failed the examination.
- 2.5 In determining the candidate's final result in a subject the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 2.6 There shall be four classifications of pass in any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

If the pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or other subjects.

There shall also be a classification of Conceded Pass. A Conceded Pass may not be used to satisfy prerequisite requirements. Subjects passed at the Conceded Pass level to a maximum total of six points may be presented for the Ordinary Degree.

#### 3 Status, exemption and credit transfer

- 3.1 Candidates who have previously passed subjects in courses of other faculties in the University or other tertiary educational institutions may, on written application to the Faculty Registrar, be granted such status in appropriate subjects in the course for the degree of Bachelor of Agricultural Business as the Faculty in each case may determine.
- 3.2 Students who hold the Associate Diploma in Wine Marketing may be granted status for subjects passed to the value of up to 45 points in the course for the degree of Bachelor of Agricultural Business provided that, if status of more than 36 points is granted towards the B. Ag. Bus. degree the student shall surrender the Associate Diploma before being admitted to the degree.

#### 4 The Ordinary degree

In order to qualify for the Ordinary degree of Agricultural Business a student shall complete all of the subjects listed for the First Year, Second Year and Third Year in the Program of Study including one of the following streams:

- International Business and Marketing
- Wine Marketing

The program of study for student commencing the course in 1996 and subsequent years is set out below:

**Year I**

**Core subjects**

*semester 1*

9682 Economic Principles 3

9129 Principles of Agricultural Business Marketing 3

*semester 2*

6234 Introduction to Business Management 3

4478 Introduction to Managerial and Financial Accounting 3

*full year*

4844 Research and Quantitative Methods in Agricultural Business 6

**International Business and Marketing Stream**

*semester 1*

9812 Agricultural Production Systems 3

*semester 2*

6784 International Trade and Agricultural Policy 3

**Wine Marketing Stream**

*semester 1*

8901 Introductory Grape and Wine Knowledge 3

*semester 2*

4605 Vineyard and Winery Operations I 3

**Year II**

**Core subjects**

*semester 1*

4619 Agricultural Business Finance 3

8738 Applied Management Science and Decision Theory 3

1053 Consumer Behavioural Analysis 3

*semester 2*

8590 International Marketing of Wine and Agricultural Products 3

2639 Strategic Marketing Management 3

**International Business and Marketing Stream**

*semester 1*

7927 Applied Marketing Research *or*

8358 Sensory Evaluation of Agricultural Products 3

*semester 2*

2332 Issues in Australian Agribusiness 3

Elective 3

**Wine Marketing Stream**

*semester 1*

7435 Vineyard and Winery Operations II 3

*semester 2*

4418 Fortified Wine, Spirits and Non-grape Beverages 3

Elective 3

**Year III**

**Core Subjects**

*semester 1*

1244 Advertising and Promotion 3

4203 Ethical Issues in Agribusiness 3

5481 Legal Issues in Agricultural Marketing 3

*semester 2*

6213 Issues in Food and Beverage Marketing 3

3021 International Business Environment 3

2086 Retail Selling and Practice 3

**International Business and Marketing Stream**

*semester 1*

7927 Applied Marketing Research *or* 3

8358 Sensory Evaluation of Agricultural Products 3

*semester 2*

Elective 3

**Wine Marketing Stream**

*semester 1*

7927 Applied Marketing Research 3

*semester 2*

4143 Issues in Wine Business 3

**Electives**

Students may select approved subjects from within the course, from other courses in the University, or by cross-institutional enrolment from other universities provided that any prerequisites have been satisfied. The option of pursuing a particular interest is provided for by the subject 4684 Special Project (Research Paper) B (3 points).

## **5 The Honours degree**

- 5.1** A candidate for the Honours Degree of Bachelor of Agricultural Business must have completed the requirements for the Ordinary degree of Bachelor of Agricultural Business, or have qualified for a degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent.
- 5.2** Subject to the approval of the Head of the Department of Agricultural Business, the candidate will proceed to the Honours degree in the following subject: 2400 Honours Agricultural Business (B.Ag.Bus.).
- 5.3** A candidate may, subject to the approval of the Heads of the Departments concerned, proceed to the Honours degree taught jointly by the Department of Agricultural Business and another department. The candidate must apply in writing for the proposed course to be approved in advance by the Faculty.
- 5.4** A candidate for the Honours degree shall attend lectures and pass examinations in accordance with the provisions of these Specific Course Rules.
- 5.5** The work of the Honours year will normally be completed in one year of full-time study. The Faculty may permit a candidate to take two years, but no more, under such conditions as it may determine.
- 5.6** A candidate who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be reported to the Faculty, which may permit re-enrolment for an Honours degree under such conditions (if any) as it may determine.
- 5.7** There shall be three classifications for the Honours degree as follows:
- First Class
  - Second Class      Division A  
                                 Division B
  - Third Class
- 5.8** Candidates may not enrol for a second time for the Honours course if they (i) have already qualified for Honours, or (ii) have attended for examination but failed to obtain Honours, or (iii) have withdrawn from the Honours course unless the Faculty on such conditions as it may determine permits re-enrolment.

## Syllabuses

### Level I

#### 9812 Agricultural Production Systems

3 points semester 1

See Bachelor of Agriculture for syllabus details

#### 9682 Economic Principles

3 points semester 1

See Diploma of Wine Marketing for syllabus details

#### 6784 International Trade and Agricultural Policy

3 points semester 2

2 lectures and 1 tutorial per week

*prerequisites:* 9682 Economic Principles or 3366 Business Economics

This subject focuses on a study of the principles of international trade in relation to their implications for agricultural policy, both domestic and international. Topics include: a survey of the theories of international trade; the economic effects of protection; the analysis of the balance of payments; policy projections for external and internal balance; capital flows and foreign investment; the rate of exchange; the problem of international liquidity; international monetary institutions; international trade and development.

*assessment:* exam 50%; assignments 50%

#### 6234 Introduction to Business Management

3 points semester 2

#### 4478 Introduction to Managerial and Financial Accounting

3 points semester 2

#### 8901 Introductory Grape and Wine Knowledge

3 points semester 1

See Diploma of Wine Marketing for syllabus details

#### 9129 Principles of Agricultural Business Marketing

3 points semester 1

2 lectures, 1 tutorial per week

This aim of this subject is to give students an understanding of the role of the marketing manager through an introduction to the basic concepts and practices in marketing with particular emphasis on agricultural products. The topics covered include the marketing environment and marketing strategy

formulation. There will be particular examination of product, price, place and promotion strategies.

*assessment:* exams 50%, assignments, tutorials 50%

#### 4844 Research and Quantitative Methods in Agricultural Business

6 points full year

2 lectures, 1 tutorial, 2 hours practical per week

This subject is designed to provide an introductory overview of research and quantitative methods with applications relevant to business decision-making and strategy formulation. The aspects to be covered are: financial mathematics - simple and compound interest; time value of money; annuities, loans and sinking funds; contracts at flat rates of interest; net present value, internal rates of return; descriptive statistics - presentation of data, frequency distribution, averages and measures of variations; bivariate analysis, correlation and regression, use of simple techniques for finding patterns and relationships, ratios, percentages, etc; published statistics and analysis - major sources of published data, Australian official statistical collections, methods of collection and basic dimensions of economic and social statistics in Australia, national accounts; prices and price index numbers; seasonally adjusted indicators; social indicators.; inferential statistics - probability and theoretical models, binomial and normal distributions, sampling confidence intervals, hypothesis testing for means, proportions, goodness of fit and correlations coefficients; management science - inventory decisions, linear programming applications, decisions theory, network planning.

*assessment:* exams 50%; assignments, tutorial work 50%

#### 4605 Vineyard and Winery Operations I

3 points semester 2

See Diploma in Wine Marketing for syllabus details

### Level II

#### 4619 Agricultural Business Finance

3 points semester 1

2 lectures, 2 tutorial/computer seminars per week

Continuing students only

Valuation, capital budgeting, leverage, financial performance, working capital management, long term financing, loan negotiation, futures and options.

*assessment:* assignments, tests, final exam

**8738 Applied Management Science and Decision Theory**

3 points semester 1

2 lectures, 1 2-hour practical/tutorial per week

*prerequisites:* 9101 Business Data Analysis I or equivalent

The aim of this subject is to introduce a collection of management science techniques that helps business managers make better decisions and to foster a logical, consistent and systematic approach to problem formulation, problem solving and decision making. Emphasis is placed on model formulation and interpretation rather than algorithms. Topics to be covered include mathematical programming, network modelling, Monte Carlo simulation, decision analysis under risk, and time series forecasting.

*assessment:* theory and practical exams, case studies and other assignments

**7927 Applied Marketing Research**

3 points semester 1

**1053 Consumer Behavioural Analysis**

3 points semester 1

**4418 Fortified Wines, Spirits and Non-grape Beverages**

3 points semester 2

**8590 International Marketing of Wine and Agricultural Products**

3 points semester 2

See Diploma in Wine Marketing for syllabus details

**2332 Issues in Australian Agribusiness**

3 points semester 2

2 lectures, 2 hours of tutorials per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing

This subject introduces students to considerations of present and future world food and fibre balances and issues relating to Australia's opportunities and challenges in production and trade. Topics covered include market access, market failure, forms of marketing, counter-trade, standards, alternative industries, the Australian food sector, government policies and the future of the World Trade Organisation.

*assessment:* to be advised.

**2639 Strategic Marketing Management**

3 points semester 2

**7435 Vineyard and Winery Operations II**

3 points semester 1

See Diploma in Wine Marketing for syllabus details

**Level III**

**1244 Advertising and Promotion**

3 points semester 1

See Diploma in Wine Marketing for syllabus details

**4203 Ethical Issues in Agricultural Business**

3 points semester 1

3 hours seminars, lectures, student presentations per week

*prerequisites:* all core Level I and II subjects of course

This subject aims to provide students with an awareness of the ethical environment of business as well as the types of conflict situations in which business managers are likely to find themselves. A problem orientated and practical approach will be adopted to the identification of ethical dilemmas and to the resolution of ethical problems faced by business managers in Australia. The main part of the syllabus material includes an examination of particular ethical situations encountered by agricultural business administrators and is aimed to illustrate and facilitate the discussion of problems encountered by contemporary management.

The problems include grades and standards, public health issues in food products, animal welfare, ecological responsibilities and other more general ethical issues.

*assessment:* exam, tests, assignments

**3021 International Business Environment**

3 points semester 2

3 hours seminars, lectures per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing, 9682 Economic Principles, 6234 Introduction to Business Management

This capstone subject is designed to provide an overview of the international trade and financial environment within which business must function with particular emphasis on the broader Asian region, including the Middle East. It considers comparative advantage and the basis for international trade; factor movement across national boundaries, trade policies such as tariffs, quotas, VERs, administrative regulations, dumping, export subsidies and international commodity agreements; international and

regional commercial policies; exchange rate determination; the balance of payments and its adjustment under alternative exchange rate regimes; exchange control; the international currency system; and exchange rate policies.

*assessment:* exam 50%; assignments 50%

### 5646 International Finance

3 points semester 1

2 lectures, 2 tutorials per week

Continuing students only

*prerequisites:* 4471 Agricultural Business Finance

This subject deals with the financial management of multinational business activities, the operation of international financial markets with reference to recent innovations in financing methods, and with the impact of international transactions on domestic firms. The financial management of asset creation and liability generation processes, and of the international financial risks associated with such activities play a central role in the unit. The emphasis is on providing students with an understanding of recent developments in both international financial markets, and the contribution that the theory of finance is making to international financial management.

*assessment:* exam 50%; assignments 50%

### 6213 Issues in Food and Beverage Marketing

3 points semester 2

See Bachelor of Agriculture for syllabus details

### 4143 Issues in Wine Business

3 points semester 2

3 hours seminars per week

*prerequisites:* all Level I and II subjects in Wine Marketing stream

The subject will offer the opportunity to the student to cover a range of topics in Wine Business as it relates to the student's study program interests and the teaching and research interests of staff and visiting academics. A combination of industry, academic and student prepared seminars will be used.

*assessment:* assignments and exams

### 5481 Legal Issues in Agricultural Marketing

3 points semester 1

2 lectures, 1 tutorial per week

The aim of this subject is to acquaint students with the legal and ethical issues relating to agricultural marketing and marketing in general. Over the last two decades there have been very significant legislative

changes which are designed to re-align the common law rules in this area to suit the evolving needs of business and consumers. The agricultural aspects covered will relate to laws governing grades and standards, health, rights and obligations of buyers and suppliers of goods and services, etc.

*assessment:* exam, assignments

### 2086 Retail Selling and Practice

3 points semester 2

See Diploma in Wine Marketing for syllabus details

### 8358 Sensory Evaluation of Agricultural Products

3 points semester 1

2 lectures per week, 1 practical per fortnight

*prerequisites:* understanding of introductory statistical principles particularly correlation and regression, analysis of variance

The role of sensory evaluation in marketing of food and fabrics, physiological and psychological factors affecting sensory perception, relationships between sensory properties and product acceptability, measurement of sensory perception, design and conduct of sensory evaluation experiments, difference testing, preference testing, panel selection procedures, taste and aroma profiling, texture profiling, shelf life determination, sensory quality control, product development and optimisation, strategies for developing sensory evaluation programs. A range of agricultural products will be assessed using the techniques and principles presented in the lecture program.

*assessment:* written exam, assignment; practical reports

### 6097 Special Project (Research Paper) A

2 points full year

Students work independently with supervisor and/or co-supervisor

Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a literature review (at least 5000 words), research project, case study of a business or related enterprise, or some other approved study.

*assessment:* seminar and dissertation

**4684 Special Project (Research Paper) B**

3 points full year

Students work independently with supervisor and/or co-supervisor

Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a major literature review (at least 8,000 words), research project, case study of a business or related enterprise, or some other approved study.

*assessment:* seminar and dissertation

**5510 Special Project (Research Paper) C**

4 points full year

Students work independently with supervisor and/or co-supervisor

Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a major literature review (at least 10000 words), research project, case study of a business or related enterprise, or some other approved study.

*assessment:* seminar presentation and dissertation

**2880 Strategic Business Management**

3 points semester 2

3 hours seminars per week

*assumed knowledge:* 6034 Studies in Management Theory; 4619 Finance; 4478 Accounting; 9129 Wool Marketing

This is a capstone subject that is concerned with establishing the long-term direction of an organisation, setting specific performance objectives, developing strategies to achieve these and executing appropriate plans. The subject concentrates on creating organisations which achieve superior performance, and the entrepreneurial skills required to create and maintain a competitive advantage. This requires an integrated approach using simulation analysis, and includes an analysis of markets, customers, competitors and technology, together with an understanding of organisational structure and culture, levels of strategy in a divisionalised firm, the role of the corporate centre with consideration given to financial implications of strategy, including acquisitions.

*assessment:* examination, tests, assignments

**2400 Honours Agricultural Business (B.Ag.Bus.)**

24 points full year

*prerequisites:* completion of requirements for Bachelor of Agricultural Business or another degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent; At least a credit in appropriate Level III subjects offered by the Department of Agriculture Business or equivalents acceptable to the Head of Department

*corequisites:* 6946 Research Methodology and Methods

Candidates are expected to acquire a more detailed knowledge of agricultural business than is required for the Ordinary Degree. Candidates are expected to study deeply in one branch of agricultural business. Candidates are required to carry out research in this field, to present seminars and to present the results in a written thesis to the value of 24 points.

*assessment:* the research project/thesis will be assessed by dissertation and seminar

**Bachelor of Agricultural Science**  
**Bachelor of Agricultural Science (Horticultural Science)**  
**Bachelor of Agricultural Science (Integrated Pest Management)**  
**Bachelor of Agricultural Science (Plant Breeding)**  
**Bachelor of Agricultural Science (Viticultural Science)**  
**Bachelor of Agricultural Science (Oenology)**

Students who commenced their course of study towards the Bachelor of Agricultural Science under previous Specific Course Rules in 1995 or Regulations and Schedules in 1994 or earlier are subject to the following provisions:

Students who commenced their studies towards the Bachelor of Agricultural Science majoring in Viticulture or Oenology will complete their studies under the current Specific Course Rules for the Bachelor of Agricultural Science (Viticultural Science) or the Bachelor of Agricultural Science (Oenology). Students who commenced the Bachelor of Agricultural Science not majoring in Viticulture or Oenology will complete their studies under the current Specific Course Rules for the Bachelor of Agricultural Science or Bachelor of Agricultural Science (Horticultural Science).

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these Rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding the course.

## **Specific Course Rules**

### **1. General**

#### **1.1** There shall be:

an Ordinary and an Honours degree of Bachelor of Agricultural Science

an Ordinary and an Honours degree of Bachelor of Agricultural Science (Horticultural Science)

an Ordinary and an Honours degree of Bachelor of Agricultural Science (Integrated Pest Management)

an Ordinary and an Honours degree of Bachelor of Agricultural Science (Viticultural Science)

an Ordinary and an Honours degree of Bachelor of Agricultural Science (Oenology)

an Honours degree of Bachelor of Agricultural Science (Plant Breeding)

#### **1.2** To qualify for:

the Ordinary degree of Bachelor of Agricultural Science students shall comply with the provisions of 4.1 below

the Ordinary degree of Bachelor of Agricultural Science (Horticultural Science) students shall comply with the provisions of 4.2 below

the Ordinary degree of Bachelor of Agricultural Science (Integrated Pest Management) students shall comply with the provisions of 4.5 below

the Ordinary degree of Bachelor of Agricultural Science (Viticultural Science) students shall comply with the provisions of 4.3 below

the Ordinary degree of Bachelor of Agricultural Science (Oenology) students shall comply with the provisions of 4.4 below.

#### **1.3** To qualify for:

the Honours degree of Bachelor of Agricultural Science students shall comply with the provisions of 5.3.1 below

the Honours degree of Bachelor of Agricultural Science (Horticultural Science) students shall comply with 5.3.2 below

the Honours degree of Bachelor of Agricultural Science (Integrated Pest Management) students shall comply with 5.3.5 below.

the Honours degree of Bachelor of Agricultural Science (Plant Breeding) students shall comply with 5.3.6 below

the Honours degree of Bachelor of Agricultural Science (Viticultural Science) students shall comply with 5.3.3 below

the Honours degree of Bachelor of Agricultural Science (Oenology) students shall comply with 5.3.4 below.

- 1.4 A candidate who fails to obtain an Honours classification may be awarded the Ordinary degree provided the candidate has in all other respects completed the work for that degree.
  - 1.5 No candidate may present the same part subjects, section of a subject, unit of a subject or option in more than one subject of a degree.
  - 1.6 Candidates who commenced their courses of study for the Bachelor of Agricultural Science degree prior to 1989 may qualify for the degree by fulfilling the requirements of the present Regulations and Specific Course Rules, with such modifications as the Faculty may deem necessary to ensure that subjects validly passed under previous Regulations and Schedules may be counted under the present Specific Course Rules.
- 2. Assessment and examinations**
- 2.1 A candidate shall not be eligible to present for examination unless the prescribed classes have been regularly attended and the written, practical or other work required has been completed to the satisfaction of the teaching staff concerned.
  - 2.2 In determining the candidate's final result in a subject the examiners may take into account assessments of the candidate's written, practical or other work, and the results of other examinations in that subject provided that the candidate has been given notice at the beginning of the course of study for the subjects of the way in which such assessments will be taken into account and of their relative importance in the final result.
  - 2.3 There shall be four classifications of pass in any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the list of candidates who pass be published in two divisions, a pass in the higher division may be prescribed in the appropriate syllabus as prerequisite for admission to another subject. A candidate with a lower division pass who wishes to gain a higher division pass shall be allowed to repeat the subjects, subject to the provisions of 2.5 below. There shall also be a classification of Conceded Pass. A Conceded Pass may not be used to satisfy prerequisite requirements. A candidate may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been awarded, as specified in 4.1.3 below.
  - 2.4 Notwithstanding results in individual subjects, a candidate shall be deemed to have passed the whole of the first or the second year provided the total mark obtained at final examinations in all the subjects that constitute the year and the lowest mark obtained in any one subject thereof meet such requirements as the Faculty may determine from time to time.
- 2.5** A student may be granted a Faculty Pass in Level I and Level II of the course notwithstanding results in individual subjects, provided that the average mark obtained at annual examinations for all the subjects at that Level is 50 or over, and at least 45 in any one subject. Moreover:
- (a) a Faculty Pass shall not be granted if the subject which the student has failed is a prerequisite for a compulsory subject to be undertaken by the student at a higher level
  - (b) a student who has been granted a Faculty Pass in Level I or II shall not be permitted to take any subject in succeeding levels for which the prerequisites has been failed
  - (c) a student who has been granted a Faculty Pass in Level I or II and who wishes to take a subject at Level III, having failed its prerequisite in the Level in which the Faculty Pass was granted, shall only be permitted to take that subject after having passed the prerequisite.
- 2.6**
- (a) A candidate who fails to pass in a subject or who obtains a lower division pass and who desires to take the subject again shall, unless exempted wholly or partially therefrom by the Head of Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned
  - (b) A candidate who has twice failed to obtain a Division I pass or higher in the examination in any subject shall not enrol for the subject again, or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and under such conditions as the Faculty may prescribe
  - (c) For the purposes of 2.6(a) and (b) above, a candidate who is refused permission to sit for an examination, or who fails to attend the examination in any subject although eligible to do so, shall be deemed to have failed to pass the examination.
- 3. Status, exemption and credit transfer**
- 3.1** Candidates from other Faculties in the University or from other tertiary educational institutions may, on written application to the Faculty Registrar, be granted such status in appropriate subjects in the course for the degree of Bachelor of Agricultural Science, Bachelor of Agricultural Science (Horticultural Science), Bachelor of

Agricultural Science (Integrated Pest Management), Bachelor of Agricultural Science (Plant Breeding), Bachelor of Agricultural Science (Viticultural Science) and Bachelor of Agricultural Science (Oenology) as the Faculty in each case may determine. Candidates undertaking the Bachelor of Agricultural Science, Bachelor of Agricultural Science (Horticultural Science), Bachelor of Agricultural Science (Integrated Pest Management) or Bachelor of Agricultural Science (Plant Breeding) from within the University will, however, be required to satisfy the examiners in the subject 7972 Agricultural Practice, Policy and Communication.

3.2 Extra study as prescribed by the head of the Department concerned may be required in nominated subjects before such candidates enter the course.

#### 4. Requirements for the Ordinary Degrees

4.1 Ordinary degree of Bachelor of Agricultural Science

4.1.1. The course for the Ordinary degree shall occupy four years of full-time study or equivalent.

4.1.2 It is not necessary for a candidate to take all the subjects of any one level simultaneously or to complete all the subjects set out for one level before enrolling for any subjects of the following level provided that the prerequisite subjects have been passed. But a candidate who desires to take a third level subject before completing all compulsory first and second level subjects must obtain the permission of the Dean.

4.1.3 To qualify for the Ordinary degree a candidate shall satisfactorily complete the requirements of the subjects listed below, subject to such conditions and modifications as may be specified or allowed by the Specific Course Rules to the value of at least 96 points which satisfy the following requirements:

- (a) A candidate shall satisfactorily complete Level I subjects to the value of at least 24 points.
- (b) A candidate shall satisfactorily complete Level II subjects to the value of at least 24 points.
- (c) A candidate shall satisfactorily complete Level III subjects to the value of at least 48 points, taken in the third and fourth years of the course. Under the provisions of 2.3 above, a candidate may be deemed to have satisfactorily completed a Level III subject for which a Conceded Pass has been awarded. A Conceded Pass may

only be awarded in a Level III subject with a value of 3 points or less. Subjects passed at the Conceded Pass level to a maximum total value of six points may be presented towards the degree.

##### 4.1.4 Compulsory subjects

###### (a) Level I subjects

9812 Agricultural Production Systems	3
3174 Biology I	6
6976 Biomathematics and Statistics*	3
7312 Chemistry I ANR	6
5683 Earth Science I*	3
1550 Environment and Society	3

###### (b) Level II subjects

9339 Agricultural Botany	3
2448 Agricultural Zoology II	3
5178 Basic Genetics	3
6553 Biological Chemistry	6
7931 Biometry	3
5681 Soil Resources	3
3689 General Microbiology	3

\*Candidates intending to study Level II and Level III subjects in the Faculties of Science or Mathematical and Computer Sciences or Economics and Commerce in the Bachelor of Agricultural Science degree may, with the permission of the Dean, enrol in and count towards the degree:

*one only of*

9786 Mathematics I *in place of*

6976 Biomathematics and Statistics

2136 Geology I *in place of*

5683 Earth Science I

*and both*

4309 Economics IA and 2076 Economics IB  
*in place of*

1550 Environment and Society

Students wishing to enrol in Level II subjects in the Statistics Department will require a pass in 9786 Mathematics I, at least a credit in 7931 Biometry and approval of the Head of that Department.

###### (c) Level III subjects

*compulsory and elective*

5286 Agricultural Experimentation**	3
7972 Agricultural Practice, Policy and Communication	3

and any of the following subjects offered in the following departments and faculties to the value of 42 points taken in the third and fourth years of the course. Subjects taken in the Faculties of Economics and Commerce, Mathematical and Computer Sciences and Science and from other degree programs in the Faculty of Agricultural and Natural Resource Sciences to the value of no more than 20 points may be counted towards the degree of Bachelor of Agricultural Science.

The subjects 5286 Agricultural Experimentation and 7972 Agricultural Practice, Policy and Communication will normally be taken in the third year of the course.

Some of the subjects listed below are only offered in alternate years. See syllabuses for details.

\*\*Candidates counting 4523 Data Analysis and 1675 Linear Models II towards the degree are exempt from 5286 Agricultural Experimentation.

### **Agronomy and Farming Systems**

1536 Agroforestry	3
8394 Business Management for Agricultural Sciences	3
3507 Crop Agronomy	3
8271 Crop and Pasture Ecology	3
3066 Irrigation Science	3
1981 Pasture Agronomy	3
2303 Research Project, Agronomy and Farming Systems	3

### **Animal Science**

3172 Animal Biotechnologies	3
8049 Animal Breeding Technologies	3
8165 Dairy Production	3
7906 Diseases and Nutrition of Livestock	3
6127 Meat Production	3
5636 Nutrition, Breeding and Health of Farm Animals	3
6739 Physiology of Farm Animals	3
2514 Pig and Poultry Production	3
1114 Research Project: Animal Science	3
6108 Wool Biology	3
5851 Wool Marketing	3
9576 Wool Production	3
2780 Wool Technology and Metrology	3

### **Crop Protection**

4534 Biological Control	3
4078 Biology and Diversity of Insects	3
6129 Ecological Biochemistry	3
8867 Fungal Biology	3

5480 Insect Behaviour	3
5478 Integrated Pest Management A	3
9078 Integrated Weed Management	3
6904 Molecular Ecology	3
6265 Pathogen-Plant Interactions	3
3416 Plant Disease and the Environment	3
1616 Research Project: Crop Protection	3

### **Environmental Science and Management**

2830 Research Project: Environmental Science and Management	3
---	---

### **Horticulture, Viticulture and Oenology**

1018 Horticultural Production	3
5882 Horticultural Science	3
6123 Issues in Food and Beverage Marketing	3
8645 Reproductive and Postharvest Horticulture	3
6637 Research Project: Horticulture, Viticulture and Oenology	3

### **Plant Science**

9446 Advanced Biometry	3
7583 Agricultural Biotechnology	3
9867 Crop Physiology III	3
9545 Environmental and Developmental Biology of Plants	3
3434 Mineral Nutrition of Plants	3
1450 Molecular Genetics of Plants III	3
4001 Research Project: Plant Science	3

### **Soil Science**

4449 Research Project: Soil Science	3
1031 Research Project A: Soil Science	3
4633 Soil Ecology	3
6470 Soil Fertility	3
1936 Soil Management and Conservation	3
8816 Soil Water Management	3

### **Soil Science and Geology and Geophysics**

2083 Environmental Geology III	3
--------------------------------	---

note (not forming part of the Specific Course Rules)

Work required to complete an Adelaide degree

- (a) students from other universities and tertiary educational institutions who are granted status under 3.1 of these Specific Course Rules will be required to complete at least the whole of the work of the final year of the course at Adelaide in order to qualify for the degree *and*

- (b) a student who has completed at Adelaide at least the first three years of the degree, or the equivalent, may with permission of the Faculty be permitted to complete the requirements of the degree at another institution.

#### 4.1.5 Practical experience

Before a candidate shall be admitted to the Ordinary or Honours degree, he/she must provide satisfactory evidence of the completion of a minimum of thirteen weeks of work experience on farms or in industry in at least three different enterprises as approved by the Practical Experience Administrator. Candidates must complete a major study of at least eight weeks duration in one of the chosen enterprises. The appropriate experience may be spread over the four years of the course. On completion of the practical experience requirements (and no later than the Friday of Teaching Week 1 of the second semester of fourth year) each candidate is required to submit to the Practical Experience Administrator evidence that the practical experience requirements have been satisfactorily completed and a full written report on the major study. Candidates who have completed an appropriate diploma or degree may be exempted from the practical experience requirement of the course. Candidates should discuss these requirements on first enrolment in the course with the Practical Experience Administrator.

## 4.2 Ordinary degree of Bachelor of Agricultural Science (Horticultural Science)

4.2.1 Candidates for the Ordinary degree shall comply with Specific Course Rules 4.1.1, 4.1.2, 4.1.3 and 4.1.4 (a) and (b) and will be required to present the following subjects:

5286 Agricultural Experimentation	3
7972 Agricultural Practice, Policy and Communication	3
6603 Fruit and Nut Crops	3
1018 Horticultural Production	3
5882 Horticultural Science	3
5478 Integrated Pest Management A	3
3434 Mineral Nutrition of Plants	3
9838 Ornamental Horticulture	3
8645 Reproductive and Postharvest Horticulture	3
5903 Vegetable Crops	3
6637 Research Project: Horticulture, Viticulture and Oenology	3

In addition, students must complete Level III electives to the value of 15 points.

The following are recommended as a suitable electives:

7483 Agricultural Biotechnology	3
4534 Biological Control	3
8394 Business Management for Agricultural Science	3
9100 Engineering Science	3
9545 Environmental and Developmental Biology of Plants	3
3066 Irrigation Science	3
3416 Plant Disease and the Environment	3
4507 Principles of Breeding	3
1242 Viticultural Science	3

Other Bachelor of Agricultural Science subjects may also be considered as electives subject to the permission of the Course Adviser and the Head of Department of Horticulture, Viticulture and Oenology.

#### 4.2.2 Horticultural Practical Experience

Candidates for the major in Horticultural Science must complete thirteen weeks of horticultural practical experience. Students should consult the Practical Experience Coordinator (Horticultural Science major) for allocation of suitable placements, which may be taken up any time during the vacation periods of the four years of the course. A diary of activities should be kept at each placement, and a written report on the activities of the property, business or enterprise presented to the Horticultural Science Coordinator, no later than the Friday of Teaching Week 1 of the second semester of fourth year.

## 4.3 Ordinary degree of Bachelor of Agricultural Science (Viticultural Science)

4.3.1 Candidates shall comply with the requirements of Specific Course Rules 4.1.1, 4.1.2 and 4.1.3 and satisfactorily complete the requirements of Specific Course Rules 4.3.2 and 4.3.3 below.

4.3.2. Subjects for the Ordinary degree of Bachelor of Agricultural Science (Viticulture Science)

### Year I

#### semester 1

3810 Engineering Physics	3
1550 Environment and Society	3

#### semester 2

6976 Biomathematics and Statistics	3
5683 Earth Science I	3

1676 Research Project: Oenology	4.5
---------------------------------	-----

\*Students must complete both of the paired subjects, the year in which each is undertaken being determined by its availability.

**4.5. Ordinary degree of Bachelor of Agricultural Science (Integrated Pest Management)**

4.5.1 Candidates shall comply with Specific Course Rules 4.1.1, 4.1.2, 4.1.3 above and satisfactorily complete the requirements of specific Course

Rule 4.5.2 below.

4.5.2 Subjects for the Ordinary degree of Bachelor of Agricultural Science (Integrated Pest Management):

**Level I**

*semester 1*

1550 Environment and Society	3
9812 Agricultural Production Systems	3

*semester 2*

6976 Biomathematics and Statistics	3
5683 Earth Science I	3

*full year*

3174 Biology I	6
7312 Chemistry I ANR	6

**Level II**

*semester 1*

7931 Biometry	3
3689 General Microbiology	3
5681 Soil Resources	3

*semester 2*

9339 Agricultural Botany	3
8712 Agricultural Zoology (Invertebrate)	1.5
5178 Basic Genetics	3
3768 Professional Practice of Pest Management	1.5

*full year*

6553 Biological Chemistry	6
---------------------------	---

**Level III**

(a) *compulsory subjects*

5286 Agricultural Experimentation	3
7972 Agricultural Practice, Policy and Communication	3
5478 Integrated Pest Management A	3
9054 Business Management, Principles and Practices	3
1192 IPM Internship	3
1616 Research Project: Crop Protection	3

(b) *Four of the following subjects:*

4078 Biology and Diversity of Insects	3
4534 Biological Control	3
9078 Integrated Weed Management	3
6265 Pathogen-Plant Interactions	3
3416 Plant Disease and the Environment	3
7023 Vertebrate Pest Control III	3

(c) *Electives to the value of 18 points:*

The subjects listed below and at (b) above are recommended as suitable electives. However, subject to the approval of the Course Adviser, subjects from other courses in the Faculty of Agricultural and Natural Resource Sciences or Faculty of Science may be presented.

3507	Crop Agronomy	3
8271	Crop and Pasture Ecology	3
6129	Ecological Biochemistry	3
5464	Evolution, Systematics and Biogeography	3
8867	Fungal Biology	3
1018	Horticultural Production	3
5822	Horticultural Science	3
5480	Insect Behaviour	3
3066	Irrigation Science	3
3434	Mineral Nutrition of Plants	3
1918	Pasture Agronomy	3
6254	Population Ecology	3
9462	Remote Sensing and Land Capability Assessment	3
4633	Soil Ecology	3
6470	Soil Fertility	3
1936	Soil Management and Conservation	3

## 5. The Honours Degrees

**5.1** Before entering upon the requirements for an Honours course a candidate must obtain the approval of the Head of Department that will take responsibility for providing relevant supervision. Approval will depend on the candidate's academic record up to the time of application. Normally such approval should be sought at the end of the third year of the course for the Ordinary degree. Candidates must have completed all Level I and Level II subjects before enrolment for Honours.

**5.2** The work of the Honours year shall normally be completed in the final year of study. The Faculty may permit a candidate to present the work over a period of not more than two years on such conditions as it may determine.

**5.3** Candidates may not enrol for a second time for the Honours course if they

- have already qualified for Honours or
- have presented for examination but failed to obtain Honours or
- have withdrawn from the Honours course unless the Faculty on such conditions as it may determine permits re-enrolment.

### 5.3.1 The Honours degree of Bachelor of Agricultural Science

5.3.1.1 A candidate shall complete all requirements for the Ordinary degree as set out in Specific Course Rule 4.1 **except that** in lieu of four of the Level III electives specified in Specific Course Rule 4.1.4, a candidate shall complete one of the project subjects listed below

7142	Honours Agronomy & Farming Systems (B.Ag.Sc.)	12
3490	Honours Agronomy & Farming Systems (B.Ag.Sc.) (M-Y)	12
1584	Honours Animal Science (B.Ag.Sc.)	12
3347	Honours Animal Science (B.Ag.Sc.) (M-Y)	12
7417	Honours Botany (B.Ag.Sc.)	12
2809	Honours Botany (B.Ag.Sc.) (M-Y)	12
5403	Honours Crop Protection (B.Ag.Sc.)	12
5438	Honours Crop Protection (B.Ag.Sc.) (M-Y)	12
7630	Honours Economics (B.Ag.Sc.)	12
5615	Honours Environmental Science and Management (B.Ag.Sc.)	12
7375	Honours Environmental Science and Management (B.Ag.Sc.)(M-Y)	12
1623	Honours Hort. Viticulture and Oenology (B.Ag.Sc.)	12
8312	Hons Hort. Viticulture and Oen. (B.Ag.Sc.) (M-Y)	12
3062	Honours Plant Science (B.Ag.Sc.)	12
1317	Honours Plant Science (B.Ag.Sc.) (M-Y)	12
7232	Honours Soil Science (B.Ag.Sc.)	12
7526	Honours Soil Science (B.Ag.Sc.) (M-Y)	12

### 5.3.2 The Honours degree of Bachelor of Agricultural Science (Horticultural Science)

5.3.2.1 A candidate shall complete all requirements for the Ordinary degree as set out in Specific Course Rule 4.2 **except that** in lieu of four Level III electives specified in Specific Course Rule 4.2.1. a candidate shall complete the project subject.

8788	Honours Horticultural Science (B.Ag.Sc.)	
<i>or</i>		
8983	Honours Horticultural Science (B.Ag.Sc.) (M-Y)	

**5.3.3. The Honours degree of Bachelor of Agricultural Science (Viticultural Science)**

5.3.3.1 A candidate shall complete all requirements for the Ordinary degree as set out in Specific Course Rule 4.3 **except that** in lieu of the Year 4 subjects set out in Specific Course Rule 4.3.2, students shall complete the following subjects

**Year 4**

*semester 1*

9079 Industry Experience (Viticulture) A	3
5412 Table and Drying Grape Production	1.5
elective	1.5

*semester 2*

6736 Grape and Wine Business Management	3
2174 Viticultural Production A	
<i>or</i>	
5153 Viticultural Production B	3

*full year*

5717 Honours Viticultural Science (B.Ag.Sc.)	12
--	----

**5.3.4 The Honours degree of Bachelor of Agricultural Science (Oenology)**

5.3.4.1 A candidate shall complete all requirements for the Ordinary degree as set out in Specific Course Rule 4.4 **except that** in lieu of the Year 4 subjects set out in Specific Course Rule 4.4.2 students shall complete the following subjects.

*semester 1*

2943 Advanced Sensory Practice	1.5
<i>or</i>	
2582 Biotechnology	1.5
2213 Grape Industry Practice, Policy and Communication	1.5
9099 Industry Experience (Oenology)	3

*semester 2*

1958 Wine Packaging and Quality Management	3
<i>or</i>	
9685 Advances in Oenology	3
2174 Viticultural Production A	3
<i>or</i>	
5153 Viticultural Production B	3

*full year*

2127 Honours Oenology (B.Ag.Sc.)	12
----------------------------------	----

**5.3.5 The Honours degree of Bachelor of Agricultural Science (Integrated Pest Management)**

5.3.5.1 A candidate shall complete all requirements for the Ordinary degree as set out in Specific Course Rule 4.4 **except that** in lieu of the Level III electives to the value of 9 points and the subject 1616 Research Project: Crop Protection, a candidate shall complete the project subject.

5295 Honour Integrated Pest Management (B.Ag.Sc.)	<i>or</i>
3264 Honour Integrated Pest Management (B.Ag.Sc.)(M-Y)	

**5.3.6 The Honours degree of Bachelor of Agricultural Science (Plant Breeding)**

5.3.6.1 Candidates shall complete all requirements for Level I and II of the Ordinary degree of Bachelor of Agricultural Sciences as set down in Specific Course Rule 4.1.4 parts (a) and (b)

5.3.6.2 Candidates shall present the following subjects at Level III:

**(a) Compulsory subjects**

5286 Agricultural Experimentation	3
7972 Agricultural Produce, Policy and Communication	3
9306 Environmental and Genetic Control of Plant End Use Quality	3
5926 Honours Plant Breeding A	3
4233 Honours Plant Breeding B	9
5478 Integrated Pest Management A	3
3434 Mineral Nutrition of Plants	3
9500 Plant Breeding	3
3416 Plant Disease and the Environment	3
4507 Principles of Breeding	3

**(b) One of the following two groups of subjects**

*Group (i) - Horticultural Crops*

6882 Horticultural Science	3
two of the following:	
6603 Fruit and Nut Crops	3
8645 Reproduction and Postharvest Physiology	3
9838 Ornamental Horticulture	3
5903 Vegetable Crops	3

*Group (ii) - Broad Acre Crops*

9734 Cereal Processing and Chemistry 3

two of the following:

3507 Crop Agronomy 3

9867 Crop Physiology 3

1981 Pasture Agronomy 3

(c) a 3-point elective which may be an additional subject from Groups (a) or (b) above or a subject from the following:

7583 Agricultural Biotechnology 3

1536 Agroforestry 3

8867 Fungal Biology 3

6213 Horticultural Marketing 3

9078 Integrated Weed Management 3

6234 Introduction to Business Management 3

5636 Nutrition, Breeding and Health of Farm Animals 3

6265 Pathogen-Plant Interactions 3

8358 Sensory Evaluation of Agricultural Products 3

6470 Soil Fertility 3

The elective may also be chosen with the approval of the Course Adviser, from other subjects offered by the Faculty of Agricultural and Natural Resources Sciences or Faculty of Science.

## Syllabuses

### Level I

#### 9812 Agricultural Production Systems

3 points semester 1

See Bachelor of Agriculture for syllabus details

#### 3174 Biology I

6 points full year

See B.Sc. in the Faculty of Science for syllabus details

#### 6976 Biomathematics and Statistics

3 points semester 2

4 lectures and 2 computer lab sessions/tutorials per week

Available only to students in the Faculty of Agricultural and Natural Resource Sciences

*assumed knowledge:* Stage 2 Mathematics I

*restriction:* 5543 Statistical Practice I; 9786 Mathematics I; 4357 Mathematics IH; 3617 Mathematics IM

The subject is intended to equip students with basic skills in mathematics and statistics, as an introduction to the use of quantitative methods in agriculture. Where possible, examples and data sets drawn from agricultural and biological sciences will be used. The course will involve the use of modern computing methods. Topics will include: periodic, exponential and trigonometric functions, matrices and linear equations, integrals, differential equations; data collection and presentation, probability distributions, principles of experimentation (randomisation and application), estimation, hypothesis testing, confidence intervals, regression and correlation.

*assessment:* formal exam - at least 70%; exercise, practicals and project work - at most 30%

#### 6878 Chemistry I

6 points full year

See B.Sc. in the Faculty of Science for syllabus details

#### 7312 Chemistry I ANR

6 points full year

3 lectures, 1 tutorial per week; 6 x 3 hour practicals per semester; interactive computer assessed exercises throughout the year

*assumed knowledge:* SACE Stage 2 Chemistry and Mathematics I (or equivalent) is desirable

An introduction to the molecular view of biosphere materials and processes. Introductory theories of

molecule formation and structure, of intermolecular forces, of solution formation, reaction rates and equilibria. Acids and bases. Electrochemistry. Chemistry of biological and synthetic polymers - peptides, proteins and polysaccharides; polyalkenes, polyesters and polyamides. UV, IR and NMR spectroscopic identification of functional groups and molecular structure. Chemistry of pheromones. Biochemical methylation. Topics in environmental chemistry - solubilities, mobilities, biogeochemical cycles and soils. Introductory chemistry and biochemistry of the elements of the Periodic Table. Chemistry in the atmosphere and of metals in biology.

*assessment:* end of semester exams; laboratory work assessed during practical classes 20% of the total

#### 5683 Earth Science I

3 points semester 2

3 lectures; 3 hours practical/tutorial/field work or equivalent per week

*restriction:* 5339 Geology IW; 3482 Introduction to Physical Geography I

This subject is concerned with the dynamics of the Earth's crust, atmosphere, hydrosphere and biosphere; origin of the Earth's major relief; evolution of landscapes; world climates; climatic influences on landscapes; climatic change over the past 2 million years; river systems, coastal zones and other erosional and depositional environments; soil variation and development; vegetation patterns; ecosystem processes.

We emphasise the interaction and interrelationships of various facets of the Earth's surface through time. We are concerned to examine how the present landscapes and systems came into being. We consider that the natural world is fascinating on its own account, and that human impacts (eg soil degradation, air and water pollution) are better understood if energy and time perspectives are clear.

*assessment:* written exam; essays, tutorial and practical exercises and field excursions

#### 3810 Engineering Physics

3 points semester 1

6 hours per week (including lectures and practicals)

*assumed knowledge:* Stage 2 Mathematics I

**Fundamental concepts:** force, work, power, energy, pressure. **Fluids:** principles of hydrostatics, elementary hydrodynamics. **Properties of fluids,** behaviour of real fluids under reduced pressure, elementary pressure wave theory, fluid pumping. **Stress analysis:** stress, strain, deformation and failure in elementary

components. Thin-walled pressure vessel theory. Electricity: physiology of electric shock, elementary DC and AC circuit theory, single and 3 phase AC power, AC motor types and applications.

*assessment:* practicals, assignments, exams

### 1550 Environment and Society

3 points semester 2

See Bachelor of Environmental Science for syllabus details

### Level II

#### 9339 Agricultural Botany

3 points semester 2

2 lectures, four-hour practical per week

*prerequisites:* 3174 Biology I

*restriction:* 3673 Botany II, 1692 Botany IIA

The botanical and physiological aspects of plants of agricultural significance, emphasising the acquisition of skills required to identify those plants and to relate the structure of the various plant organs and tissues to their function and physiology. This will include the general principles of phylogeny and taxonomy of higher plants including the features used in classification, and the use of floras and keys. Species identification and anatomy will be addressed for the major agricultural families. Speciation, crop domestication and weed taxonomy will also be considered.

The relationship between structure and function will be addressed in terms of plant growth regulating chemicals in the control of root and shoot growth, and in the control of floral initiation and fruit growth. These processes will also be investigated in terms of plant responses to environmental influences including light, water and temperature; the interaction of environmental effects; the mechanism of response; and implications for plant life cycles.

*assessment:* to be advised

#### 2448 Agricultural Zoology II

3 points semester 1

2 lectures, four-hour practical per week

*prerequisites:* Biology I

*restriction:* 8712 Agricultural Zoology (Invertebrates), 5677 Agricultural Microbiology and Zoology

The aim of this subject is to introduce the basic concepts of invertebrate and vertebrate taxonomy, physiology and function with particular emphasis on organisms of agricultural significance. The first half of the subject deals with invertebrates within a comparative framework and covers molluscs,

nematodes, annelids, and arthropods. The remainder deals with vertebrates including their physiological systems, production, disease control and biotechnology.

*assessment:* to be advised

#### 5178 Basic Genetics

3 points semester 2

2 lectures, 1 hour tutorial, 3 hour practicals per week

*prerequisites:* 3174 Biology I

*restriction:* 7267 Genetics IW

Heredity and genetic variation; mitosis and meiosis; genes and chromosomes; linkage; chromosomes and evolution; sex determination; properties of the genetic material and molecular organisation of chromosomes; gene structure and regulation; population genetics and evolution; genetic biodiversity of agriculturally important plants; quantitative inheritance; principles of plant and animal breeding; application of molecular genetics to agriculture.

*assessment:* to be advised

#### 6553 Biological Chemistry

6 points full year

2 lecture, four-hour practical per week

*prerequisites:* 3174 Biology I; 9312 Chemistry I ANR or 6878 Chemistry I

*restriction:* 1874 Chemistry IIA

A study of the chemistry and biochemistry of plant, animal and microbial components as well as consideration of the chemistry of synthetic compounds such as herbicides and pesticides and their effect on cell metabolism. The following topics will be included: chemistry and metabolism of carbohydrates, lipids, proteins and nucleic acids, gene structure and transcriptional regulation, thermodynamic analysis of energy exchanges in the cell, biochemistry of muscle action, photosynthesis, photorespiration and fermentative processes, nitrogen fixation, chemistry of natural and artificial additives used in the food industry, structural features of herbicides and pesticides that contribute to their reactivity plus consideration of their behaviour in the soil. Attention will be given to the relevant enzymology and impact of molecular biology in the understanding of the above processes. In addition, fundamental information on DNA-modifying enzymes and methods for cloning cDNA's and genes will be presented. Practical classes will provide the opportunity for students to gain experience in a range of chemical and biochemical techniques and skills.

*assessment:* exams 60%; practical classes and exercises 30%; essay 10%

### 7931 Biometry

3 points semester 1

2 lectures, three hour tutorial a week

*prerequisite:* 6976 Biomathematics and Statistics or an acceptable equivalent

An extension of statistical methods of importance in agricultural, biological, environmental and wine sciences. Topics covered include: simple and multiple regression, sampling methods, introduction to the design of experiments and analysis of variance (both parametric and non-parametric). The GENSTAT 5 for Windows statistical package is utilised extensively throughout the subject.

*assessment:* written assignments 10%, mid-semester exam 20% and exam 70%

### 3689 General Microbiology II

3 points semester 1

2 lectures; 4 hours of practical/tutorial per week

*prerequisites:* 3174 Biology I

*restriction:* 5677 Agricultural Microbiology and Zoology

An introduction to microbiology, with emphasis on microorganisms important in agriculture and the environment. Topics covered include the biology and classification of bacteria, fungi and viruses important in agricultural and natural environments, nutrient cycling, micro-organisms as pathogens, symbionts and agents of biological control, genetically modified micro-organisms, microbiology of food, wine and animal fodder.

*assessment:* exam 75%; practicals, tutorials 25%

### 3768 Professional Practice of Pest Management

1.5 points second half of semester 1

6 hours of tutorials each week or equivalent

This tutorial-based subject covers communication and extension, ethics, time management, pesticide handling and safety, health and safety in the workplace, and the range of employment opportunities available in integrated pest management. Students must prepare a written proposal to outline the aims and aspirations for their respective internships which are undertaken during the third or fourth year of the degree. This subject formally prepares students for their period away from the university.

*assessment:* to be advised

### 5681 Soil Resources

3 points semester 1

2 lectures; four-hour practical or equivalent per week

*prerequisites:* 5683 Earth Science I or 3482 Introduction to Physical Geography I

Soil is a fundamental resource in the environment and this subject aims to provide an understanding of the important soil physical, chemical and biological properties, plus opportunities to solve practical problems in the form of a project. Topics considered include: water retention, storage and movement, salinity, chemical fertility, microbiology of soil processes, soil conservation (especially with respect to water erosion), spatial analysis tools for soil resources (eg. GIS, GPS and remote sensing).

*assessment:* exam; project, field trip, exam, tutorials, practicals

### Level III

#### Agronomy and Farming Systems

The Department of Agronomy and Farming Systems conducts research and teaching in the following seven areas: crop and pasture agronomy; plant ecology and farming systems; soil management, tillage effects and water use efficiency; agricultural engineering; agroforestry; communications and extension; rural business management.

Students intending to make a career in Agronomy are advised to take at least three of the subjects 3507 Crop Agronomy, 1981 Pasture Agronomy, 8271 Crop and Pasture Ecology, 1536 Agroforestry, 9867 Crop Physiology III. The following additional subjects which are relevant to agronomists are recommended: 3434 Mineral Nutrition of Plants, 6470 Soil Fertility, 1936 Soil Management and Conservation, 2471 Crop Protection and 5501 Principles of Plant Breeding.

#### 1536 Agroforestry

3 points semester 2

See Bachelor of Agriculture for syllabus details

#### 8394 Management for Agricultural Science

3 points semester 2

5 lectures/student centred learning per week

5 lectures/student centred learning per week

The aim of this subject is to provide perspective and understanding of the overall role of business and its place in the agricultural industry and the economy and to demonstrate linkages between various management functions. Aspects covered include what is business? business management, business planning, accounting management, marketing management, strategic

planning, budgeting, investment analysis, organisation design, human resources management and monitoring.

*assessment:* assignments and tutorial exercises 50%, three hour final examination 50%

### 3507 Crop Agronomy

3 points semester 1

See Bachelor of Agriculture for syllabus details

### 8271 Crop and Pasture Ecology

3 points semester 2  
odd years only

2 lectures; four-hour practical per week

*prerequisite:* 3673 Botany II, 1028 Principles of Sustainable Agriculture

Crops and pastures are plant communities that are managed mainly for the production of food and fibre. Those used in agriculture range from natural vegetation to specialised, sown annual monocultures. It is important to understand how these communities function if they are to be productive. Crop and Pasture Ecology examines the structure and functioning of agricultural plant communities. Topics that will be covered include an examination of the similarities to, and differences between sown and natural communities, the effects of climate on the distribution and productivity of crops and pastures, interaction between a crop and its environment, competition, the impact of the grazing animal and the importance of genetic diversity among plants to adaptation to the environment and to agricultural productivity.

*assessment:* exam 50%; practical reports 30%; essays 20%

### 5039 Marketing and Financial Control in Agriculture

3 points semester 1 or 2

### 1981 Pasture Agronomy

3 points semester 2

See Bachelor of Agriculture for syllabus details

### 5851 Wool Marketing

3 points semester 2

3 lectures, 3 hour practical per week

This subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality Wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

In this subject students will study the principles of wool commerce and marketing in a series of lectures and practicals. This includes the wool pipeline, the supply and demand for raw wool and its products and the raw wool marketing system. The unit also addresses the issues of quality assurance, pricing, ownership transfer, information and the roles of government and industry bodies in the marketing of wool.

*assessment:* to be advised

### 7142 Honours Agronomy and Farming Systems (B.Ag.Sc.)

### 3490 Honours Agronomy and Farming Systems (B.Ag.Sc.) (M-Y)

12 points full year

*prerequisites:* credit or higher in two level III subjects relevant to the research topic and approved by Head of Department

*corequisites:* Two additional level III subjects relevant to the proposed research project and approved by Head of Department

Students wishing to undertake an Honours degree should consult the Head of Department as soon as their intention is known, but no later than the end of semester 2 in the third year of their course. Studies commence at the beginning of February (normal intake) or July, (mid-year intake). A candidate will be required to undertake a research project under one or more members of the academic staff and present seminars and a thesis on their research work. The research project could be undertaken in one of the following areas: crop and pasture agronomy; plant ecology and farming systems; soil management; tillage effects and water use efficiency; agricultural engineering; agroforestry; communications and extension.

### Animal Science

The livestock industries earn over half of the total agricultural income of Australia. The Department of Animal Science offers a range of subjects relating to livestock production to allow students to pursue interests in basic or applied science including nutrition, genetics, immunology, reproduction, wool biology, microbiology or molecular biology.

The Department regards 6739 Physiology of Farm Animals and 5636 Nutrition, Breeding and Health of Farm Animals as core subjects and encourages all students wishing to specialise in Animal Science to enrol in these subject.

The following subject groupings indicate some subject combinations that provide for specialisation in Animal Science. Additional subjects can be added to these choices as appropriate.

**Animal Production**

- 7906 Diseases and Nutrition of Livestock
- 8165 Dairy Production
- 6127 Meat Production
- 2514 Pig and Poultry Production
- 9576 Wool Production

**Animal Breeding**

- 8049 Animal Breeding Technologies
- 7531 Applied Genetics

**Animal Biotechnology**

- 8049 Animal Breeding Technologies
- 3172 Animal Biotechnologies
- 7906 Diseases and Nutrition of Livestock

**Wool Production and Processing**

- 6108 Wool Biology
- 5851 Wool Marketing
- 9576 Wool Production
- 2780 Wool Technology and Metrology

**8049 Animal Breeding Technologies**

3 points semester 2  
2 lectures, 1 tutorial, 2 hour practical per week (or equivalent)

*assumed knowledge:* 2448 Agricultural Zoology II and 6739 Physiology of Farm Animals or 5636 Nutrition, Breeding and Health

*restrictions:* 4522 Reproductive Biology and Technology

Anatomy, physiology and endocrinology of the male and female reproductive systems. Gamete production, sexual behaviour, seasonal breeding, pregnancy, growth and development of the fetus, and lactation are discussed with an emphasis on agriculturally important species. The technologies of artificial insemination, in-vitro fertilisation and embryo transfer are introduced with hands-on practical experience. The use of reproductive and genetic technologies to maximise response to selection are examined for a range of livestock industries. This will include estimation of breeding values and the use of DNA markers to assist selection. There will also be a large emphasis on the design of breeding programs which includes definition of breeding objectives.

*assessment:* to be advised

**3172 Animal Biotechnologies**

3 points semester 2  
2 lectures; four-hour practical per week

*assumed knowledge:* 7583 Agricultural Biotechnology

This subject aims to describe advanced concepts in biotechnology, including cell biology, molecular biology, protein engineering, microbiology and genetics, and to show how these technologies can be applied to the animal production industries. Topics include gene expression and control in animal cells, cell signalling and regulations, growth promotants and their function, genetic engineering in animals, synthetic vaccine development, DNA diagnostic technologies.

*assessment:* to be advised

**7906 Diseases and Nutrition of Livestock**

3 points semester 1  
2 lectures, 1 practical per week

*prerequisites:* B.Ag.Sc. students - 2448 Agricultural Zoology II; B.Ag. students - 6739 Physiology of Farm Animals

*restriction:* 9011 Animal Nutrition

Diseases of farm animals caused by viral, bacterial, fungal and parasitic infections; disease symptoms; the scientific basis of diagnosis and treatment; development of deficiencies/toxicities; genetic susceptibility to disease states; genetic diseases; immune response. Ration formulation for domestic livestock; the metabolic roles of vitamins, minerals, amino acids, fatty acids and carbohydrates; the nutritive value of pasture species for sheep and cattle; grains and protein concentrates as sources of nutrients for animals; manipulation of nutrient supply to increase productive efficiency and improve animal product quality. Practical classes include a poultry feeding trial; computer-based ration formulation for pigs, poultry, sheep and cattle; disease diagnosis techniques; post-mortem of animals.

*assessment:* to be advised

**8165 Dairy Production**

3 points semester 1

**6127 Meat Production**

3 points semester 2

**5636 Nutrition, Breeding and Health of Farm Animals**

3 points semester 2

**6739 Physiology of Farm Animals**

3 points semester 1

**2514 Pig and Poultry Production**

3 points semester 2

See Bachelor of Agriculture for syllabus details

**1114 Research Project: Animal Science**

3 points semester 1 or 2

(in some cases (eg, seasonal constraints) a project may be conducted over semester 1 and 2)

10 hours of practical work a week for 1 semester (or equivalent) on their project

*prerequisites:* 7318 Animal Physiology A (Systems) or 4516 Animal Structure and Function or 6739 Physiology of Farm Animals plus one other course work subject offered by the Department of Animal Science.

*corequisites:* at least one other course work subject offered by the Department of Animal Science.

The subject comprises a small research project to be undertaken during the 4th year of the course under the supervision of a staff member in the Department of Animal Science. Students wishing to undertake a research project should consult with the Head of the Department before the beginning of the 4th year.

*assessment:* details to be advised

**6108 Wool Biology**

3 points semester 1

3 lectures, 3 hour practical per week

*assumed knowledge:* 2248 Agricultural Zoology II OR 6739 Physiology of Farm Animals and 5646 Nutrition Breeding and Health of Farm Animals.

This subject is one of four wool-based subjects being offered by the Cooperative Research Centre for Premium Quality wool. The majority of lectures will be offered by experts over the Picture Tel interactive video teaching system simultaneously at four universities.

Students will study the chemical and physical components of the wool as a fibre and its chemical and physical reactivity. It will cover in detail the morphology and function of skin and particularly the development and function of follicles. From this base students will study the molecular control mechanisms for follicle and fibre growth, including the relationship between follicle, fibre, genetics, nutrition and the environment. The physical characteristics of the fleece and their biological control will also be studied in detail and the characteristics of wool will be contrasted with those of other animal, vegetable and synthetic fibres.

Practical work will concentrate on the chemical and histochemical study of wool follicles and the fibres they produce and will include work on manipulation of the type of fibre produced within wool follicles.

*assessment:* to be advised

**9576 Wool Production**

3 points semester 1

**2780 Wool Technology and Metrology**

3 points semester 1

See Bachelor of Agriculture for syllabus details

**1584 Honours Animal Science (B.Ag.Sc.)**

**3347 Honours Animal Science (B.Ag.Sc.)(M-Y)**

12 points full year

*note:* Students must consult the Head of Department preferably before beginning third year, or before beginning fourth year. Students cannot enrol in this subject and 1114 Research Project

10 hours per week; 30 hours per week for 4 weeks during February, or other vacations, on project work; relevant discussions, reading or preparation of thesis

*prerequisite:* pass in all Level I, II and III subjects of the B.Ag.Sc. degree; credit in 6739 Physiology of Farm Animals; credit in another level III subject offered by the Department of Animal Science, or equivalent.

*corequisite:* sufficient number of semester subjects offered by the Department of Animal Science so that by the end of the fourth year, the student will have completed 4 subjects offered by the Department, or the equivalent.

Candidates will be required to undertake a research project under the supervision of one or more members of the Academic staff and present seminars and a thesis on their research work. Candidates will also participate in tutorials and journal club. The research project can be undertaken in any area of animal science or production supported by the department.

Interested candidates should consult with the Head of Department of Animal Science and potential supervisors during the third year of the degree, and be prepared to begin studies in the Department at the beginning of February or July (mid year intake).

*assessment:* to be advised

**Botany**

**7417 Honours Botany (B.Ag.Sc.)**

12 points full year

*prerequisites:* credit or higher in at least 9 points of Level III subjects approved by the Head of Department of Botany

*corequisites:* at least 12 points of Level III subjects approved by the Head of Department of Botany

This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Botany. Intending candidates should

consult the Head of Department, the Honours coordinator and potential supervisors as early as possible and in any case, no later than the end of the semester immediately preceding the start of the Honours program. Research topics will be decided at the end of that semester and full-time work within the Department must begin in February or August (mid-year intake). Research topics would generally fall into one of the following areas: Cell and Molecular Botany; Systematics, Taxonomy and Evolution; Ecology and Environmental Biology.

Entry to this course will be subject to appropriate and acceptable arrangements being made with regard to a supervisor, financial resources, equipment and approval of project by the Botany Departmental Committee.

*assessment:* research project 60%; marks achieved in the corequisite Level III subjects 40%

### 2809 Honours Botany (B.Ag.Sc.)(M-Y)

12 points full year

*prerequisites:* credit or higher in at least 9 points of Level III subjects approved by Head of Botany Department

*corequisites:* at least 12 points of Level III subjects approved by the Head of Department of Botany

This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Botany. Intending candidates should consult the Head of Department, the Honours coordinator and potential supervisors as early as possible and in any case, no, later than the end of the semester immediately preceding the start of the Honours program. Research topics will be decided at the end of that semester and full-time work within the Department must begin in February or August [mid-year intake]. Research topics would generally fall into one of the following areas: Cell and Molecular Botany; Systematics, Taxonomy and Evolution; Ecology and Environmental Biology.

Entry to this course will be subject to appropriate and acceptable arrangements being made with regard to a supervisor, financial resources, equipment and approval of project by the Botany Departmental Committee.

*assessment:* research project 60%; marks achieved in the corequisite Level III subjects 40%

### Crop Protection

The management and control of insects, nematodes, plant diseases and weeds are major costs in the production of agricultural commodities and in the protection of natural ecosystems. The Department of Crop Protection undertakes basic research into the biology, systematics, ecology and molecular biology of

these groups of organisms and options for managing them.

For students wishing to specialise in Crop Protection three main streams have been identified. The core and recommended subjects in these areas are shown below:

#### Entomology

**Core:** 4078 Biology and Diversity of Insects. In addition, students should undertake at least two of the recommended subjects.

**Recommended:** 5478 Integrated Pest Management, 5480 Insect Behaviour, 4534 Biological Control, 5464 Evolution, Systematics and Biogeography.

#### Plant Pathology

**Core:** 6265 Pathogen-Plant Interactions, 3416 Plant Disease and the Environment, 8867 Fungal Biology.

**Recommended:** 5478 Integrated Pest Management, 6219 Ecological Biochemistry, 5501 Principles of Plant Breeding, 4633 Soil Biology and Biochemistry, 7583 Agricultural Biotechnology.

#### Weed Science

**Core:** 5478 Integrated Pest Management, 9078 Integrated Weed Management.

**Recommended:** 1536 Agroforestry, 2179 The Ecology of Terrestrial Plants, 4534 Insect Biological Control, 3416 Plant Disease and the Environment, 8271 Crop and Pasture Ecology, 6129 Ecological Biochemistry, 8867 Fungal Biology; 6265 Pathogen-Plant Interactions.

Students not taking Honours in one of the above areas are encouraged to explore more specialised topics by enrolling in 1616 Research Project.

### 4534 Biological Control

3 points semester 2  
even years Waite  
annually Roseworthy

2 lectures, 4 hours practicals/ tutorials per week

*prerequisites:* 2448 Agricultural Zoology II or 8712 Agricultural Zoology (Invertebrates), and 3689 General Microbiology II; or 3472 Zoology II; or 1151 Microorganisms and Invertebrates; or equivalent subjects approved by Head of Department

Theory and practice of biological control of insects and the use of insects as agents of biological control. Includes: theory of population dynamics; classical biological control of insects, weeds and dung; augmentation of natural enemies; use of pathogens and parasites to control insects.

*assessment:* exam 60%; practical reports, assignments 40%

**4078 Biology and Diversity of Insects**

3 points semester 1

2 lectures, 4 hours practicals a week

*prerequisite:* 2448 Agricultural Zoology (pre-1992: 5677 Agricultural Microbiology and Zoology; pre-1989: 5114 Agricultural Zoology). Students without such qualification must obtain permission of the Head of Department before enrolling.

After a brief review covering the internal anatomy of insects and the processes involved in metamorphosis, excretion and reproduction, a number of specific topics will be explored in more detail, including: morphological and biological characteristics of the major insect orders; life histories of selected pest and beneficial species; sociality, caste formation and nest building in termites; sound production methods and functions; feeding mechanisms; adaptations and biology of vertebrate ectoparasites; insects as disease vectors of plants and animals; production and function of silk in insects and arachnids; mimicry and defensive adaptations; sociality and parasitism in the Hymenoptera.

The practical component will examine collecting techniques; identification of adult insects to family level; identification of immature stages and feeding damage. A requirement of the course is the presentation of a well-curated insect collection.

*assessment:* written exam 50%; practical exam 20%; insect collection project 30%

**6129 Ecological Biochemistry**

3 points semester 2  
even years only

2 lectures, 4 hours practicals a week

*assumed knowledge:* all compulsory Level II subjects

Evolution of defence strategies of plants to insects, pathogens and environmental stresses. Physical and chemical barriers to penetration and metabolic changes associated with the pathogenic state. Allelopathy. Manipulation of natural defence mechanisms into agronomically important crops. The influence of secondary metabolites (non-protein amino acids, polyphenols, cyanogenic glucosides, terpenes) on the exploitation of plants by pathogens and herbivores, including humans. Practical periods will include a project and student seminars.

*assessment:* exam 60%; project and tutorials 40%

**8867 Fungal Biology**

3 points semester 1  
even years only

2 lectures, 4 hours of practical/tutorial per week

*prerequisites:* 3689 General Microbiology II (pre-1992: 5677 Agricultural Microbiology and Zoology) or equivalent approved by the Head of Department prior to enrolment.

Aspects of the biology of fungi, including classification, biodiversity, ecology, physiology, genetics and molecular biology, will be covered. Emphasis will be placed on fungi that are pathogens of economically important crops. Fungi of importance in natural ecosystems, industry, biotechnology and medicine will also be considered.

*assessment:* exam, fungal collection and practical books examined

**5480 Insect Behaviour**

3 points semester 2  
odd years only

2 lectures, 4 hours of practicals a week

*prerequisites:* 4078 Biology and Diversity of Insects (Biology of Insects) or equivalent approved by Head of Department.

This subject will take an evolutionary perspective on animal behaviour using insects as examples. Topics will include nervous coordinating mechanisms, genetics and development of behaviour, orientation and movement, behavioural ecology, mating and reproduction, communication, and social systems of insects.

*assessment:* written exam 60%; practicals, project, tutorials 40%

**5478 Integrated Pest Management A**

3 points semester 1

2 lectures; four-hour practical per week

This subject provides an introduction to the theory and practice of pest management. Topics considered are: the development, regulation and use of pesticides; strategies and tactics for managing pests (biological, cultural, genetic and chemical control); integrated pest management; economics of pest management; the diagnosis of disease; strategies and tactics for managing disease outbreaks; integrated weed management.

*assessment:* exam 70%, practical exercises 30%

**9078 Integrated Weed Management**

3 points full year

Modules at student's pace, with two day residency for practicals in first mid-semester break

The impact of weeds on agricultural and natural ecosystems. Important characteristics of weed biology. Ecology of weeds. Methods of sampling and

monitoring weed infestations. Biological, cultural and chemical methods for weed management. Integrating management techniques for weeds in a range of ecosystems, including: cropping enterprises, perennial pastures, national parks and recreation areas and horticultural systems.

*assessment:* five assignments during the year

### 1 192 IPM Internship

3 points 13 weeks by arrangement  
contact hours by arrangement

*prerequisite:* 5478 Integrated Pest Management A

Candidates for the major in Integrated Pest Management must complete an internship of thirteen weeks in one or more approved workplaces where management of pests is a primary focus of the employer. A minimum of five weeks must be spent with any one sponsor. Students should consult the IPM Internship Coordinator (Integrated Pest Management major) one semester in advance of the intended internship period for allocation of suitable placements, which may be taken up at any time including vacation periods. The internship will normally include elements of the following: evaluation of pest biology and ecology in the field, sampling and decision-making in the management of pest populations, record keeping, client-adviser interactions such as the delivery of information and advice, and the economics of pest management enterprises. A diary of activities must be kept at each placement, and a written report on the activities, history, status and future of the property, business or enterprise presented at the end of the internship.

### 6904 Molecular Ecology

3 points semester 1

2 lectures per week, tutorials, field and practical work of about 50 hours arranged throughout semester

The subject explores new approaches and technologies to evaluate the genetics and population dynamics of organismic interactions in natural and agricultural ecosystems. Emphasis is on a systems approach to investigate the flow of genetic information in natural and genetically modified populations. The relevance of molecular diagnostic probes in assessing genetic diversity and evolutionary adaptations as well as the formulation of new strategies in conservation biology, integrated pest management, biological control, and quarantine policies are discussed and expanded in student presentations.

*assessment:* exam 60%, practical reports 20%, student presentation 20%

### 6265 Pathogen-Plant Interactions

3 points semester 1

2 lectures, four-hour practical per week

*prerequisites:* 3689 General Microbiology II (pre-1992: 5677 Agricultural Microbiology and Zoology) or equivalent approved by the Head of Department prior to enrolment.

This subject focuses on the biology of plant pathogenic fungi, nematodes, bacteria and viruses with emphasis on interactions with hosts, the nature of disease and diagnosis. It provides biological information required for devising disease control strategies and complements Plant Disease and the Environment (3416). Physiological, biochemical, genetic and molecular properties of pathogens will be discussed. Aspects of plant pathogen systems will include host physiology, disease development, resistance and molecular plant-microbe interactions.

*assessment:* written exam 75%, practical reports 25%

### 3416 Plant Disease and the Environment

3 points semester 2

2 lectures, four-hour practical per week

*prerequisites:* 3689 General Microbiology II (pre-1992: 5677 Agricultural Microbiology and Zoology) or equivalent approved by the Head of Department prior to enrolment.

An environmentally responsible approach to the control of plant disease, based on knowledge of the factors which influence disease development and the survival and dispersal of pathogens. Emphasis will be placed on the pathogen - host plant - vector - environment interaction, the nature of disease epidemics, biological control including cultural practices, genetic and induced host plant resistance and the use of antagonistic microorganisms.

*assessment:* final exam, practical books and assignments examined

### 3768 Professional Practice of Pest Management

1.5 points semester 2

The purpose of this subject is to provide students with an opportunity to gain an awareness of the business environment, and to develop an understanding of the culture, practices, challenges and concerns of individuals and organisations within the field of IPM. Topics covered will include communication and time management skills, ethics and project management. Students will gain not only a theoretical understanding of these areas but an ability to make practical use of the knowledge and skills acquired.

The subject also covers pesticide handling and safety, and occupational health and safety and students will prepare a written proposal outlining the aims of and aspirations for their respective internships which are undertaken during the third or fourth year of the degree. Student will gain an awareness of the range and nature of employment opportunities in the field of IPM.

*assessment:* to be advised

### 1616 Research Project: Crop Protection

3 points semester 1 or 2

(in special circumstances - eg, seasonal constraints, summer vacation)

10 hours practical project work a week (or equivalent)

*prerequisites:* at least 55% in each of two Level III subjects offered by the Department.

*corequisites:* consult with Head of Department.

The subject comprises a small research project to be undertaken during the fourth year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Head of the Department before the beginning of the fourth year. The subjects presented as prerequisites should be relevant to the area of the research project.

*assessment:* details to be advised

### 5403 Honours Crop Protection (B.Ag.Sc.)

### 5438 Honours Crop Protection (B.Ag.Sc.)(M-Y)

12 points full year

contact hours equivalent to four Level III subjects

*prerequisites:* pass in all Level I, II and chosen level III subjects of B.Ag.Sc; credit in at least two Level III subjects offered by Department of Crop Protection

*corequisites:* two additional Level III subjects offered by Department. These subjects should be relevant to the proposed research project and be approved by Head of Department. At the discretion of Head of Department, a relevant subject taught by another Department may be accepted

Students wishing to undertake an honours degree should consult the Head of Department as soon as their intention is known, but no later than the end of Semester 2 in the third year of their course. Each candidate will be assigned a research project in an area of entomology, plant pathology, or weed science, which will be carried out under the supervision of one or more members of academic staff. The results will be presented in a dissertation and a seminar at the end of the subject. Candidates will begin studies on 1 February (August for 5438).

*assessment:* to be advised

### 5295 Honours Integrated Pest Management (B.Ag.Sc.)

### 3264 Honours Integrated Pest Management (B.Ag.Sc.) (M-Y)

12 points full year

contact hours equivalent to four Level III subjects

*prerequisites:* pass in all Level I, II subjects and chosen Level III subject of B.Ag.Sc; credit in at least two Level III subjects chosen from list of subjects required for Integrated Pest Management degree

*corequisites:* two additional Level III subjects - relevant to proposed research project, and approved by Head of Department - from those required for IPM degree. At discretion of Head of Department, a subject taught by another department may be accepted

Students wishing to undertake honours should consult the Head of Department as soon as their intention is known, but no later than the end of semester 2 in the third year of the course. Each candidate will be assigned a research project in an area of entomology, plant pathology or weed science, which will be carried out under the supervision of one or more members of academic staff. Results will be presented in a dissertation and seminar at the end of the subject. Candidates will begin studies on 1 February (or early August for 4364).

*assessment:* to be advised

### Economics

For syllabus details of Economics subjects which may be counted towards B.Ag.Sc. refer to B.Ec. in the Faculty of Economics and Commerce

### 7603 Honours Economics (B.Ag.Sc.)

12 points full year

*note:* Students wishing to take the Honours degree in Economics should consult the Head of School of Economics during the second semester of their third year of the B.Ag.Sc.

*prerequisites:* 3658 Microeconomics III

*corequisite:* check with School of Economics

After consultation, each candidate will be assigned a research project, which will be carried out under supervision. The results will be presented in a dissertation at the end of the course. A candidate may also be required to prepare a seminar. Candidates will begin studies on 1 February.

*assessment:* to be advised

## Environmental Science and Management

### 2830 Research Project: Environmental Science and Management

3 points 1 or 2

10 hours minimum per week

*prerequisites:* at least 55% in two level III subjects approved by Head of Department.

*corequisites:* consult with Head of Department

The subject comprises a small research project to be undertaken during the fourth year of the course under the supervision of a staff member in the Department. A student wishing to undertake a research project should consult the Head of the Department before the beginning of the fourth year. The subjects presented as pre-requisites and co-requisite should be relevant to the area of the research project.

*assessment:* details to be provided by Head of Department.

### 5615 Honours Environmental Science and Management (B.Ag.Sc.)

### 7375 Honours Environmental Science and Management (B.Ag.Sc.)(M-Y)

12 points full year

*prerequisites:* credit or higher in two Level III subjects approved by the Head of the Department or with special permission of the Head of Department.

*corequisites:* a Level III subject appropriate to the candidate's interests, with approval of the Head of Department of Environmental Science and Rangeland Management.

After consultation, each candidate will be assigned a research project which will be carried out under supervision. The results will be presented in a dissertation at the end of the course. A candidate may also be required to prepare an essay and give a seminar.

*assessment:* a full written statement will be provided.

## Horticulture, Viticulture and Oenology

The Level III subjects required by students wishing to major in Horticultural Science are listed in Specific Course Rule 7.1.

### 1018 Horticultural Production

3 points semester 2  
even years only

2 lectures, 4 hours practicals a week (practicals may be replaced by a tour)

*prerequisites:* 7312 Chemistry 1ANR or 8637 Biochemistry and Plant Science A

The application of scientific principles to the production of horticultural crops. The basis of decisions regarding the choice of the type of enterprise, including both open and protected cropping. Establishment of orchards, and the concept of alternative horticulture. Training and trellising methods, pruning and shaping, and control of pests and diseases. Root growth of crops, in relation to soil management, irrigation and drainage. Harvesting of the crop, including maturity indices, preharvest and postharvest handling and processing. Marketing of horticultural produce. The subject normally includes visits to horticultural enterprises.

*assessment:* exam 70%; assignments 30%

### 5882 Horticultural Science

3 points semester 1

2 lectures; 4 hours practicals or equivalent per week

*prerequisites:* 7312 Chemistry 1ANR or 8420 Chemistry and Introductory Biochemistry A or equivalent

The scientific principles underlying horticultural production including classification of horticultural crops, aspects of plant growth in relation to environmental and management factors. The basis of horticultural plant growth cycles, organic nutrition, growth regulation and the accumulation of reserves. Methods of vegetative and sexual propagation, and the use of rootstocks; plant improvement and cultivar development. The subject covers fruit, flower and vegetable crops of both temperate and tropical climates, and normally includes visits to horticultural enterprises.

*assessment:* exam 60%; and assignments 40%

### 6213 Issues in Food and Beverage Marketing

3 points semester 2

See Bachelor of Agriculture for syllabus details

### 8645 Reproductive and Postharvest Horticulture

3 points semester 2  
odd years only

2 lectures; 4 hours practicals or equivalent per week

*prerequisites:* 9339 Agricultural Botany or 3673 Botany II

Physiological principles underlying the flowering and fruiting of horticultural crops which are of importance to production of the economic commodity. Floral development, pollination requirements of crops, fruit set, drop, development and maturity. The physiological basis for successful postharvest handling of these crops including fruit ripening and metabolism. Response of horticultural crops to temperature, water, gas and

injury stress in the postharvest phase. The subject normally includes visits to horticultural enterprises.

*assessment:* exam 60%, assignments 40%

**6637 Research Project: Horticulture, Viticulture and Oenology**

3 points full year

10 hours a week of work for 1 semester (or equivalent) on project

*prerequisites:* two Level III subjects offered by Department

*corequisites:* additional Level III subject offered by Department

The subject comprises a small project to be undertaken during the 4th year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Head of Department before the beginning of 4th year.

*assessment:* to be provided by Head of Department

**1623 Honours Horticulture, Viticulture and Oenology (B.Ag.Sc)**

**8312 Honours Horticulture, Viticulture and Oenology (B.Ag.Sc)(M-Y)**

12 points full year

*prerequisites:* credits in two Level III subjects offered by the Department.

*corequisites:* two additional specified Level III subjects offered by the Department

Intending candidates should consult the Head of Department and potential supervisors before October of Year III, and should be prepared to commence studies in the Department on or about 1 February (normal intake) or July (mid-year intake). After consultation, each candidate will be assigned a research project which will be carried out under supervision. The results will be presented in a dissertation at the end of the subject. A candidate may also be required to prepare an essay and give a seminar.

*assessment:* procedures will be discussed at the beginning of the first semester of study.

**Mathematical and Computer Sciences**

For syllabus details of Mathematical and Computer Sciences subjects which may be counted towards B.Ag.Sc. see entries under B.Sc. in the Faculty of Mathematical and Computer Sciences.

**Plant Science**

The Department of Plant Science offers a range of Level III subjects to allow students to pursue particular interests in basic or applied aspects of plant science

with relevance to sustainable crop and pasture improvement. With a particular focus on cereals and legumes, basic studies on the physiology, biochemistry and genetics are linked with both traditional methods of plant breeding and modern biotechnological procedures for plant improvement.

For students wishing to specialise in Plant Science three main streams have been identified and the core and recommended subjects in these are shown below.

**Crop and Pasture Science**

*Core:* 9545 Environmental and Developmental Biology of Plants, 3434 Mineral Nutrition of Plants, 9867 Crop Physiology III and 8271 Crop and Pasture Ecology.

*Recommended:* 5501 Principles of Plant Breeding, 2471 Crop Protection, 3416 Plant Disease and the Environment, 6470 Soil Fertility, 1936 Soil Management and Conservation, 3507 Crop Agronomy, 1981 Pasture Agronomy and 9446 Advanced Biometry.

Students not taking Honours in one of the above areas are encouraged to take 4001 Research Project - Plant Science.

**Plant Biotechnology**

*Core:* 9545 Environmental and Developmental Biology of Plants, 7583 Agricultural Biotechnology, 1450 Molecular Genetics of Plants III.

*Recommended:* 7531 Applied Genetics or 4863 Genetics II, 7630 Genetic Technologies for Plant Improvement, 5486 Molecular Activity of Plant Cells, 3434 Mineral Nutrition of Plants, 6265 Plant Pathogens and Pathogenicity, 6129 Ecological Biochemistry and 1377 Plant Nutrition and Membrane Transport.

**Plant Breeding**

*Core:* 5501 Principles of Plant Breeding, 7531 Applied Genetics or 4863 Genetics II, 8493 Advanced Plant Breeding and 7630 Genetic Technologies for Plant Improvement and 9545 Environmental and Developmental Biology of Plants.

*Recommended:* 7583 Agricultural Biotechnology, 3434 Mineral Nutrition of Plants, 9867 Crop Physiology III, 6265 Plant Pathogens and Pathogenicity, 3416 Plant Disease and the Environment, 6470 Soil Fertility and 9446 Advanced Biometry.

**9446 Advanced Biometry**

3 points semester 2

3 lectures, two hour tutorial per week

Even years only

*prerequisites:* 5286 Agricultural Experimentation.

A selection of topics from the following: fractional replication; confounding; incomplete block designs; spatial analysis of large field trials; components of variance models; genotype x environment analysis (joint regression analysis and cluster analysis); multivariate analysis (principal components, factor analysis, Hotelling's  $T^2$  and the linear discriminant function); harmonic regression and transformations; design and analysis of repeat measures data; non-linear regression; epidemiological methods (logistic regression). As well as GENSTAT 5 for Windows, the statistical packages SAS, REML and S-PLUS may be utilised.

*assessment:* class exercises 10%; individual assignment 30%; final exam 60%

### 7583 Agricultural Biotechnology

3 points semester 1

*prerequisites:* 6553 Biological Chemistry

2 lectures, 4 hours of practicals a week

Biotechnology offers methods for producing exciting new products for agriculture, new ways of controlling pests and diseases and sophisticated diagnostic tools for selection and breeding. This subject is designed to provide students with an opportunity to understand the basic principles, practices and applications of new biotechnological approaches being used to improve agriculture. You will learn some of the modern techniques in plant and animal cell culture, monoclonal antibody production, role of microbes in toxin degradation, use of recombinant DNA methods to express foreign proteins in micro-organisms and obtain an introduction to advanced procedures used in genetic manipulations of plants and animals. You will also gain an appreciation of the benefits, scientific limitations and ethical issues associated with these modern biotechniques.

*assessment:* to be advised at first lecture

### 9867 Crop Physiology III

3 points semester 2  
even years only

2 lectures, 4 hours practicals a week

*prerequisites:* 1692 Botany IIA or 9339 Agricultural Botany

*restriction:* 3507 Crop Agronomy

The development of appropriate management techniques and adapted cultivars of crop and pasture plants requires knowledge of the environmental constraints to growth and yield and of how plants in crops respond to environmental stresses. Crop physiology is a subject that examines the interaction between crops in the field and their environment. Discussions will concentrate on the crop and pasture

canopy as the unit of organisation and the subject will analyse how productivity is affected by the field environment and the genetic and managerial means by which the adverse effects of environmental stress can be reduced and yield improved. The physiological basis for these practices will be stressed. Topics include solar radiation and crop production, water use by crops and water use efficiency, gas exchange by plant communities, dry matter production and partitioning, cereal and legume physiology, nitrogen fixation, the use of physiological characteristics in plant breeding, and case studies of important grain crops.

*assessment:* to be advised

### 9545 Environmental and Developmental Biology of Plants

3 points semester 1

2 lectures, 4 hours practicals a week

*prerequisites:* 9339 Agricultural Botany or 1692 Botany IIA

Form, structure and growth of plants is controlled by a complex interaction of genetic and environmental factors. An understanding of plant growth and development involves a consideration of plant physiology, biochemistry and molecular biology. Coordination of these fields of research is revealing the mechanisms involved in plant cell growth and differentiation and responses to the environment. This subject begins with the cell and progresses through an examination of vegetative growth and reproductive development. Topics include the molecular basis of differentiation, hormonal and environmental control of growth and development and sexual reproduction and senescence.

Responses to the normal range of major environmental factors (including light, temperature, water, salinity, aeration, gravity and biotic factors) which determine the growth of the plant in the field will be examined as well as stress reactions. Crop species will be used as examples. Practical classes will investigate aspects of plant growth and development and responses to selected environmental variations. Students will be encouraged to design and execute their own experiments.

*assessment:* final exam 60%; practical reports 40%

### 3434 Mineral Nutrition of Plants

3 points semester 1

2 lectures, 4 hours practicals a week

*prerequisites:* one of 1692 Botany IIA or 9339 Agricultural Botany or 9529 Biology A, and one of 7312 Chemistry IANR or 6878 Chemistry I or 8420 Chemistry and Introductory Biochemistry A

An advanced course which takes its brief from the acute deficiency in minerals of most South Australian soils, and the pre-eminent role of nutrition in successful agricultural production in this State. Topics are discussed in a context of both agricultural and horticultural industries, and include factors affecting nutrient acquisition by roots, diagnosis and correction of macro and micronutrient problems, fertiliser strategies, nutritional effects on produce quality, including nutritional quality, nutrition and disease resistance, genetic control of adaptation to nutrient limitations in soils, the role of symbiotic dinitrogen fixation, nutritional aspects of nitrogen fixation. A practical course supplements the lectures by providing hands-on experience of the important issues.

*assessment:* exam 60%; practical reports 30%; reviews, essays 10%

### 1450 Molecular Genetics of Plants III

3 points semester 2

2 lectures, 1 tutorial, 4 hours of practicals per week

*assumed knowledge:* 7531 Applied Genetics or 4863 Genetics II or 1404 Biochemistry II or equivalent

*restrictions:* 4793 Molecular Genetics of Plants, 6800 Molecular Genetics of Plants - Laboratory

The dramatic expansion of research in plant molecular genetics over the past few years has resulted in substantially increased understanding of the molecular basis for plant development, environmental responses and plant-microbe interactions. This subject provides a current review of our knowledge about the molecular mechanisms directing plant gene expression under diverse circumstances - an essential first step in understanding the biology of plants and our potential to modify their behaviour and properties. Areas covered include genes and genomes; mechanisms that control plant gene expression; molecular-genetic analysis of important traits; how genes regulate plant development, reproduction and response to the environment; the molecular biology of plant disease resistance and symbioses.

Tutorials will develop comprehension of current research literature and problem solving related to lecture material.

In the laboratory classes students will perform some of the techniques currently used to generate plant molecular biology information and will be able to choose one of a selection of projects of direct relevance to current research in the laboratories of each of the lecturing staff.

*assessment:* to be advised

### 9500 Plant Breeding

3 points semester 2

2 lectures, 4 hours of practicals a week

*prerequisites:* 4507 Principles of Breeding

*restriction:* 8593 Advanced Plant Breeding

This subject explores core methodologies for plant breeding, drawing on the latest scientific and biometric advances. Theory of and experience with the primary plant breeding objectives of quality and resistance to diseases and pests will be emphasised, as will understanding of the use of genetic maps and establishment of a database. Site visits will provide additional dimension to the understanding of a breeding program.

*assessment:* practicals 25%; mid-semester exam 10%; essay 15%; final exam 50%

### 4507 Principles of Breeding

3 points semester 1

2 lectures, 4 hours of practicals a week

*prerequisites:* 5178 Basic Genetics or 4863 Genetics II

*restriction:* 5501 Principles of Plant Breeding

The process of deliberate selection and improvement of animals and plants is integral to the development of civilisation. This subject will introduce the fundamental concepts of breeding: genetic diversity and modes of inheritance; strategies for setting objectives and maximising selection and improvement of key traits; breeding methodologies for self or cross pollinated plants and animals, and perennials.

*assessment:* practicals 25%; mid-semester exam 10%; essay 15%; final exam 50%

### 4001 Research Project: Plant Science

3 points semester 1 or 2

10 hours a week of practical work for one semester (or equivalent) on their project

*prerequisites:* at least 55% in each of two Level III subjects offered by Department

*corequisites:* additional Level III subject approved by Department

The subject comprises a small research project to be undertaken during the fourth year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Head of the Department before the beginning of the fourth year. The subjects presented as prerequisites and corequisite should be relevant to the area of the research project.

*assessment:* average of four Level III subjects 40%; research proposal, seminar, thesis and viva voce 60%

### 5926 Honours Plant Breeding A

3 points semester 2

*corequisites:* 9500 Plant Breeding

Planning of the final year research project including preliminary field and laboratory work

*assessment:* to be advised

### 4233 Honours Plant Breeding B

9 points full year

*prerequisites:* 5926 Honours Plant Breeding A

Field and related experimental work on a plant breeding project with additional theoretical material.

There are two workshops: 'Special Techniques in Plant Improvement Management' covers the advanced techniques now being used for generation of improved genotypes and breeding materials in self and cross-pollinated varieties, annuals and perennials.

'Management and Legal Issues in Plant Breeding' - recognising that plant breeding requires expertise in non-scientific skills, this workshop deals with legal aspects of developing new varieties, as well as practical skills in management of finances, personnel and information.

*assessment:* to be advised

### 3062 Honours Plant Science (B.Ag.Sc.)

#### 1317 Honours Plant Science (B.Ag. Sc.)(M-Y)

12 points full year

*prerequisites:* credit or higher in at least two Level III subjects offered by the Department of Plant Science

*corequisite:* 2 additional Level III subjects offered by Department. These should be relevant to the proposed research project and be approved by Head of Department. At the discretion of Head of Department a relevant subject taught by another department may be accepted

Candidates will be required to undertake a research project under the supervision of one or more members of academic staff and present seminars and a thesis on their research work. The research project could be undertaken in one of the following areas: Biometry, Crop Physiology and Biochemistry, Plant Molecular Biology or Plant Breeding. Intending candidates should consult the Head of the Department of Plant Science and potential supervisors during the third year and be prepared to begin studies in the Department at the beginning of February (normal intake) or July (mid-year intake).

*assessment:* average of four Level III subjects 40%; research project - research proposal, seminar, thesis and viva voce 60%

### Plant Science and Botany

#### 5486 Molecular Activity of Plant Cells

3 points semester 2

See B.Sc. in the Faculty of Science for syllabus details

### Science

For syllabus details of Science subjects which may be counted towards B.Ag.Sc. see entries under B.Sc. in the Faculty of Science.

### Soil Science

The skillful management and conservation of Australian soils, many of which are nutrient deficient and fragile, is our most urgent environmental need. It is also one of our greatest economic needs. Exploitation of soil has led to serious land degradation problems which may undermine Australia's ability to sustain the production of high quality food and fibre into the 21st century. The Federal government has recognised these needs by proclaiming the "Decade of Land Care" and by the creation of the Cooperative Research Centre for Soil and Land Management on the Waite Campus which now has the largest concentration of soil scientists in the southern hemisphere.

The Department of Soil Science teaches the application of scientific principles to the management of soils for the purpose of conserving or improving their quality. Students interested in almost all aspects of agricultural production or natural resource management will inevitably need to be aware of Australia's soil resources and their limitations.

#### 4633 Soil Ecology

3 points semester 1

2 lectures, 4 hours practical work (or equivalent) a week

*prerequisites:* 3174 Biology I and one of 3689 Agricultural Microbiology II or 5681 Earth Science II or an acceptable equivalent.

The subject provides an appreciation of the interactions among plants, microorganisms and animals in the soil. The roles played by organisms in the decomposition of organic materials and availability of nutrients. The biology of the rhizosphere and its relations with the chemical and physical properties of soil. The roles of microorganisms in bioremediation of contaminated soils. Diversity of soil microbes and effects of toxic chemicals on soil functions.

Practical work will consist of laboratory exercises and other assignments related to the above topics.

*assessment:* internet discussion

### 6470 Soil Fertility

3 points semester 2

2 lectures, 4 hours practical work (or equivalent) a week

*prerequisites:* 5681 Earth Science II or 3283 Soils or an acceptable equivalent

The subject provides an understanding of processes in the soil which influence the availability to plants of nutrients in soil and in added fertilisers. The occurrence and reactions of nutrient elements in the soil. Effects of acidity, alkalinity and redox potential. Ion movement in soils and the relationship between root growth and nutrient availability. Principles of fertiliser application; reactions of fertilisers with the soil and the efficiency of fertiliser use by plants. Chemical contamination of soils, remediation.

Practical work will consist of laboratory exercises related to the above topics.

*assessment:* exam, essay, practical and other assignments

### 1936 Soil Management and Conservation

3 points semester 1 Waite  
semester 2 Roseworthy

2 lectures, 4 hours practical work or equivalent a week

*prerequisite:* 5681 Earth Science II/Soil Resources or 3283 Soils or equivalent

This subject covers topics important to students of agriculture, horticulture and natural resource management. Degradative processes which pose the greatest threats to the soil resources of Australia are examined and their avoidance, management and amelioration are discussed. These processes include: erosion of soil by water and wind, water repellence, irrigation and dryland salinity, induced soil acidity, soil structure decline and sodicity. Other issues addressed are soil conservation legislation and land capability. Practical work will consist of laboratory exercises, field excursions and other exercises related to the above topics.

*assessment:* exam, essay, practical and other assignments

### 8816 Soil Water Management

3 points semester 1

10 day series of lectures, tutorials, laboratory/field practicals; field trips during July inter-semester break

This subject covers the theory and practice for measuring and managing soil water using commercially available technology. Topics include the latest technology for measuring soil water content and potential, aeration, resistance to root penetration, water

movement in unsaturated and saturated soils, soil structure and salt-affected soils. Computers will be used to model infiltration, storage and movement of soil water, and to solve problems. Practical classes and field trips will demonstrate important techniques in soil survey for managing soil water in dryland and irrigated situations.

*assessment:* to be advised

### 4449 Research Project: Soil Science

3 points semester 1 or 2

### 1031 Research Project: Soil Science A

3 points full year

10 hours practical work a week for one semester (or the equivalent) on projects

*prerequisites:* at least 55% in each of two level III subjects offered by Department of Soil Science or equivalents acceptable to Head of Department

*corequisites:* two level III subjects offered by Department other than those serving as prerequisites, or equivalents acceptable to Head of Department

The subject consists of a small research project of the student's choosing on a topic acceptable to the Department of Soil Science. It will be undertaken during the 4th year of the course.

*assessment:* oral exam; seminar; written project report

### 7232 Honours Soil Science (B.Ag.Sc.)

### 7526 Honours Soil Science (B.Ag.Sc.)(M-Y)

12 points full year

*prerequisite:* credit or higher in two level III subjects approved by Head of Department

*corequisites:* at least 4 level III subjects approved by Head of Department

This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Soil Science. Intending candidates should consult the Head of Department, the Honours coordinator and potential supervisors as early as possible and in any case, no later than two clear months before the start of the Honours program. Research topics will be decided in these two months and full-time work within the Department must begin no later than February 1 (or August 1 for mid-year intake).

*assessment:* research project, marks in corequisite level III subjects

## Soil Science and Geology and Geophysics

### 2083 Environmental Geology III

3 points semester 2

See B.Sc. in Faculty of Science for syllabus details

## Various Departments

### 5286 Agricultural Experimentation

3 points semester 1

2 lectures, 4 hours of practicals a week

*prerequisites:* 7931 Biometry.

The philosophy of science and the experimental method. Topics covered include: Latin squares, factorial designs, split-plot designs, analysis of covariance, multiple comparisons, linear contrasts, orthogonal polynomials, generalised linear models, probit analysis, transformation of data. The statistical package GENSTAT5 for Windows will be used for the analysis of data sets.

*assessment:* individual assignment 20%; regular written assignments 10%; exam 70%

### 7972 Agricultural Practice, Policy and Communication

3 points semester 2

6 hours per week

*restriction:* 9039 Agricultural Practice and Policy

*prerequisites:* 2847 Agricultural Production and Economics

The aims of this subject is to develop a mature understanding of the place of agriculture in the national and international context. Workshops, discussion groups and invited speakers explore important issues involving current practices and future developments in agricultural production. Practical skills include competence in design and presentation of news bulletins and press releases, job seeking abilities, and computer-mediated communication.

*assessment:* written and oral presentations; poster preparation, class participation

## Extra subjects in Horticultural Science, Viticultural Science or Oenology Majors

### Level II

### 2099 Grape and Wine Microbiology

3 points semester 1

2 lectures, 4 hours practicals/tutorials a week

*prerequisite:* 3174 Biology I

*restrictions:* 3689 General Microbiology II

General features and classification of viruses, bacteria, yeasts and fungi; distribution, microbial growth and reproduction; properties, behaviour and control of microorganisms; soil microbiology and nitrogen fixation; role of bacteria, yeasts and fungi in winemaking; environmental factors influencing growth and activity of yeasts and lactic acid bacteria; wine spoilage microorganisms and their influence on wine quality.

*assessment:* exam 60%; practical exam, reports 40%

### 5896 Introductory Winemaking

3 points semester 2

2 lectures, 4 hours practicals a week

Introduction to the Australian wine industry. Chemistry and unit processes of winemaking. Production of table wines, including dry floral fruity white, full bodied white, sweet white, rose, medium and full bodied red and sparkling wines.

*assessment:* practical reports, written assignments, written exam

### 4789 Sensory Studies

3 points semester 2

contact hours to be advised

Sensory evaluation and its relationship to the winemaking process, physiology of olfaction, taste and the oral mucosa, salivary composition, perception of sweetness, acidity, bitterness and astringency, sensory measurement theory, psychophysics, aroma and taste interactions, threshold measurement, psychological and physiological factors affecting perception, adaptation, elements of good sensory practice including data collection and statistical analysis. The practical program will be used to illustrate concepts presented in lectures and to develop basic skills in sensory assessment of wines leading to the interpretation of wine characteristics in terms of wine style and quality.

*assessment:* practical reports, tasting examination, written examination

### 1242 Viticultural Science

3 points semester 1

2 lectures, four-hour practical per week; practical classes at Waite Campus for a full week prior to start of semester 1

*prerequisites:* 3174 Biology I

Growth and development of the grapevine with particular emphasis on flowering and fruiting. Floral initiation in relation to environmental control and vegetative growth. Fruit development and ripening,

and chemical composition of the grape berry. The morphological and agronomic characteristics of fruiting varieties and rootstocks and their relationship with end-use. Vineyard sampling and yield estimation.

*assessment:* written exam 55%; practical reports, assignments, practical exam 45%

### Levels III and IV

#### 9685 Advances in Oenology

3 points semester 2

2 lectures, 4 hours practicals and industry visits or equivalent per week.

*prerequisite:* 5896 Introductory Winemaking

Current research and practices in oenology. Particular emphasis will be placed on grape and wine training and flavour compounds; oak chemistry; methods of analysis in wine science; yeast biochemistry including nutrition, sugar transport, nitrogen and organic acid metabolism, ethanol toxicity, sulphur dioxide production and tolerance, plus yeast aroma compounds. Wine industry visits will focus on modern practices and recent developments to increase production efficiencies and wine quality.

*assessment:* two written exams and tour report

#### 2943 Advanced Sensory Practice

1.5 points second half of semester 1

2 lectures, 4 hours practicals a week

*prerequisites:* 8469 Sensory Science or 4789 Sensory Studies

Physiology of the mouth, sensory adaptation, threshold testing, panel screening, evaluating panelist performance, advanced sensory experimental designs and their analysis, free choice profiling, time-intensity methods, methods in sensory-instrumental correlation, developing a sensory program and sensory facility design.

*assessment:* written exam and practical reports

#### 8712 Agricultural Zoology (Invertebrates)

1.5 points second half of semester 1

lectures; four-hour practical per week

*prerequisites:* 3174 Biology I

*restriction:* 2448 Agricultural Zoology II

The aim of this subject is to introduce the basic concepts of invertebrate taxonomy, physiology, ecology and function with particular emphasis on organisms of agricultural significance. The subject deals with organisms within a comparative framework and covers molluscs, nematodes, annelids, and arthropods.

*assessment:* to be advised

#### 2582 Biotechnology

1.5 points second half of semester 1

*prerequisites:* 6553 Biological Chemistry

*restrictions:* 7583 Agricultural Biotechnology

Theoretical and practical aspects of biotechnology as applied to agriculture. Topics include genetic engineering, the use of recombinant DNA methods to express foreign proteins in bacteria and yeasts and to produce transgenic plants, enzyme engineering, food preservation, non-alcoholic fermented foods, alcoholic fermentation, malting and brewing.

*assessment:* practical reports, written assignments, written exam

#### 4880 Cellar Management

1.5 points semester 1

2 lectures; 4 hours practicals per week for 6 weeks

*prerequisite:* 5896 Introductory Winemaking

Cellar hygiene, wine spoilage by micro-organisms, basic quality control, vintage planning, winery record keeping and practical winery management.

*assessment:* exams and written assignments

#### 7547 Distillation and Fortified Winemaking

1.5 points second half of semester 1

2 lectures, 4 hours practicals per week for 7 weeks

*prerequisites:* 5896 Introductory Winemaking

Distillation principles and wine distillation practices. Production and maturation of Australian and overseas grape spirits for fortification and brandy production. Legal requirements. Sensory evaluation of fortifying and brandy spirits. Composition and production of Australian and overseas fortified and liqueur wine styles.

*assessment:* practical reports, written assignments, written exam

#### 6603 Fruit and Nut Crops

3 points semester 2  
odd years only

2 lectures, 4-hour practical per week

*prerequisites:* 6553 Biological Chemistry, 3673 Botany II or 8420 Chemistry and Introductory Biochemistry A

This subject examines production aspects of common fruit and nut crops including limits to production and characteristic requirements for cultivars, management, irrigation, integrated pest and disease management, harvesting and marketing. Crops normally considered include citrus, vines, pome, berry, stone fruits, nut

crops and the main tropical fruits. Students are normally required to participate in field visits to horticultural crop enterprises.

*assessment:* exam 60%; assignments 40%

### **6736 Grape and Wine Business Management**

3 points semester 2

3 lectures, 1 tutorial per week

*prerequisites:* 7549 Business Management for Viticulture and Oenology or 8394 Business Management for Agricultural Science

The subject will develop concepts of the strategic management of viticultural enterprises: business planning, particularly developing a marketing plan in the light of domestic and international markets, and financial planning including annual and development budgets. Monitoring will be covered with an emphasis on accounting systems.

*assessment:* 3 three-hour exams 60%, assignments and tutorial exercises 40%

### **2213 Grape Industry, Practice, Policy and Communication**

1.5 points second half of semester 1

6 hours lectures/seminars/tastings per week

*prerequisite:* Oenology students - 3113 Winemaking; Viticultural Science students - 2174 Viticultural Production A or 5153 Viticultural Production B

The aims of the subject are the development of a mature understanding of wine in society, the refinement of students' abilities in written and spoken communication and the provision of a forum for the exchange of information between students and wine industry professionals. Invited speakers explore important issues including occupational health and safety, alcohol awareness and current practices in Australia and the world. Emphasis is placed on student participation in questions, discussions and sensory sessions.

*assessment:* written assignments, seminar participation and presentation

### **9099 Industry Experience (Oenology)**

3 points summer vacation, semester 1

10 weeks work experience

*prerequisites:* 3113 Winemaking

This subject is largely practically orientated, based on work experience at a commercial winery during vintage. A specified level of proficiency in the following operations is expected: grape receival and weighbridge; crushing; draining and pressing; fermentation and post-fermentation operations and

quality control procedures. Furthermore, an understanding of the contribution of each of the specified unit operations to the overall winemaking process is required.

*assessment:* written diary and written report

### **9079 Industry Experience (Viticulture) A**

3 points semester 1, vacations from Yr. 3

10 weeks including one week on campus during a vacation period

*prerequisite:* 7708 Viticultural Engineering and Operations

*restriction:* 5354 Industry Experience (Viticulture) B

Work experience in approved horticultural enterprises. Experience in a range of operations, for example, foliar spraying in spring, irrigation system management, yield estimation, disease and pest control, harvesting and preparation for marketing, the emphasis and expectation being on gaining hands-on commercial experience of selected horticultural practices. A study of the resources of the business; assessment of the practices associated with the horticultural enterprises to evaluate the efficiency of the operations.

*assessment:* includes practical report and assignments

### **5354 Industry Experience (Viticulture) B**

6 points semester 1, vacations from Yr. 3

12 weeks plus 1 week on campus during vacation

*prerequisite:* 7708 Viticultural Engineering and Operations

*restriction:* available only to viticulture majors

Work experience in an approved viticultural enterprise. Experience in a range of operations which must include vintage operations such as scheduling intake to winery, sampling, mechanical harvesting, handling, transportation, quality assessment in the field and at the crusher, grape receival and weighbridge operations. A detailed description of an approved viticultural business enterprise including documentation of the physical resources, financial and managerial aspects of the business; detailed assessment of the practices associated with the vineyard to evaluate the efficiency of the operations; and preparation of a plan and recommendations to management about the future operations of the business.

*assessment:* detailed practical report, employer's report and assignment

*note:* students must return to campus for at least one week in February/March for compulsory tour for 5412 Table and Drying Grape Production

### 3066 Irrigation Science

3 points semester 1

6 hours per week

*prerequisites:* 9100 Engineering Science, 2033 Engineering in Agriculture.

Irrigation principles: evapotranspiration and soil moisture budget, crop requirements (peak rate and crop factor), adjustment for salinity (leaching fraction), sprinkler and dripper characteristics, sprinkler and dripper layout, hydraulics of pressure irrigation systems, irrigation scheduling.

*assessment:* practicals, assignments and written exams

### 9838 Ornamental Horticulture

3 points semester 2

even years only

2 lectures, 4 hour practical per week

*prerequisites:* 9339 Agricultural Botany or 3673 Botany II

The nursery industry, cut flower and pot plant production and amenity use of plants. Principles of production and management of ornamental crops including characteristic requirements for propagation, breeding, management, irrigation, hydroponics, pest and disease control, harvesting and marketing will be considered for major crops including rose, carnation and Australian native plants. The subject will normally include visits to appropriate horticultural enterprises.

*assessment:* exam 60%; assignments 40%

### 1676 Research Project: Oenology

4.5 points full year

10 hours a week for 1 semester or equivalent on project

*prerequisites:* at least Pass Div I in each of two Level III subjects offered by Department

*corequisites:* additional Level III subject offered by Department.

The subject comprises a small research project to be undertaken during the 4th year of the course under the supervision of a staff member in the Department. Students wishing to undertake a research project should consult the Subject Coordinator before the beginning of the 4th year.

*assessment:* Literature review, research proposal, seminar.

### 8469 Sensory Science

3 points semester 2

2 lectures, 4 hours practicals a week

Physiology of taste and olfaction; acidity, sweetness and bitterness; introductory psychophysics, scaling methods, astringency, sensory interactions in olfaction and taste; physiological and psychological factors affecting perception; context effects; discrimination testing; descriptive analysis, consumer testing; judging of wine for style and quality; elements of good sensory practice.

*assessment:* written, tasting exams

### 1045 Sensory Science V

1.5 points semester 1

2 lectures, 4 hours practicals a week

Functioning of physiological receptors, interactions of tastes and aromas, factors affecting sensory perception, introduction to evaluation of juices and wines, discrimination testing, descriptive analysis, the effect of oenological and viticultural practices on juice and wine sensory properties, introduction to wine types and styles.

*assessment:* written exam, tasting exam, written assignments, practical reports

### 2580 Stabilisation and Clarification

3 points semester 1

2 lectures, 4 hours practicals a week

*prerequisites:* 5896 Introductory Winemaking

Principles and practices of wine clarification and stabilisation. Protein, tartrate, metal, colour oxidative, and microbiological stability and stability testing of wine. Wine clarification by means of settling, centrifugation, filtration and fining.

*assessment:* practicals, practical exam, reports, written assignments, written exam

### 5412 Table and Drying Grape Production

1.5 points orientation week, first half of semester 1

6 hours per week including field trips

*prerequisites:* 1242 Viticultural Science or 5882 Horticultural Science

Table grape production: varieties; genetic improvement; vineyard design; techniques to improve table grape quality particularly crop load adjustment and growth regulators; harvesting and handling including maturity standards, harvest methods, packing, post-harvest handling, marketing.

Dried grape production: climatic requirements, principles of grape drying; treatments to enhance drying; dried grape product types; preparation for harvest; harvesting and handling of fresh grapes for drying and trellis dried fruit; finish drying and dehydration; classing, processing and marketing.

*assessment:* assignments 30%; written exam 70%

### 5903 Vegetable Crops

3 points semester 1  
odd years only

2 lectures, 4-hour practical per week

*prerequisites:* 9339 Agricultural Botany or 3673 Botany II

Vegetable crops are categorised according to commercially important families. Primary and secondary centres of diversification, commercially important genes, species identification, propagation, growing conditions, genetic improvement, properties of new varieties and storage. Practicals and visits to horticultural enterprises are included.

*assessment:* exam 75%; assignments 25%

### 7708 Viticultural Engineering and Operations

3 points semester 2  
6 hours per week

*prerequisites:* 1242 Viticultural Science and 3066 Irrigation Science

Machinery operation and application of agricultural chemicals—safety procedures, acts and regulations. Power and torque, engine characteristics, power transmission, traction, hydraulics. Trellis and fence design, load characteristics, stress analysis. Principles and practices of vineyard operations including tractor and machinery operation, spray equipment calibration and spray application. Trellis construction. Irrigation system operation. Pruning and propagation. This subject includes visits to commercial vineyards.

*assessment:* assignments, tutorials, practicals and written exams

### 2174 Viticultural Production A

3 points semester 2  
even years only

2 lectures, four hour practical per week - some practicals may be replaced by lectures and tutorials

*prerequisites:* 1242 Viticultural Science

Principles behind the establishment of a viticultural enterprise comprising site selection, choice of planting material and the design and establishment of the vineyard. Trellising design, pruning principles, practices and mechanisation, and crop harvesting. The relationship between production aspects and the physiology of the vine including phenology and shoot development, effect of node position on fruitfulness, interaction with climate response to pruning, trellising and canopy management. The subject includes visits to commercial vineyards.

*assessment:* exam 60%; assignments 30%; practical reports 10%

### 5153 Viticultural Production B

3 points semester 2  
odd years only

2 lectures, four hour practical per week - some practical hours may be replaced by lectures/tutorials

*prerequisites:* 1242 Viticultural Science

The management aspects of the vineyard including pests and diseases of grapevines, their recognition and control, and principles of plant protection, particularly spray application technology. Soil management comprising weed control, plant nutrition and tissue analysis. The response of the grapevine to irrigation and salinity including plant and soil moisture determination and irrigation scheduling. Use of growth regulators and propagation. Application of biotechnology to Viticulture. The subject includes visits to commercial vineyards and service companies.

*assessment:* assignments 30%; written exam 60%; practical report 10%

### 3113 Winemaking

3 points semester 1

6 hours per week (or equivalent) commencing second week of February

*prerequisites:* 5896 Introductory Winemaking.

*corequisites:* 4880 Cellar Management, 2580 Stabilisation and Clarification

Major winemaking project will be utilised to integrate knowledge of fermentation techniques, decision making involved in wine production and quality control programs.

*assessment:* written exam, wine reports.

### 5974 Winery Engineering III

3 points semester 1

2 lectures, 1 tutorial, 3 hours practical/project exercises per week

*prerequisites:* 9100 Engineering Science or 3810 Engineering Physics

Process calculations (mass and energy balances), process utilities (refrigeration, process heating and cooling), steam systems, electrical power systems, heat transfer and heat exchangers, must, juice and wine transfer methods, centrifugation and filtration, process control and instrumentation.

*assessment:* final exam, tutorials, project work, laboratory reports.

**1958 Wine Packaging and Quality Management**

3 points semester 2

2 lectures, 4 hours practicals/field trips per week

*prerequisites:* 2580 Stabilisation and Clarification.

Science and technology of bottling and packaging systems including chemical and physical properties of packaging materials, principles of filling machinery, design and process control of wine filling/packaging systems.

Wine and food laws and commercial forces as quality standards. Taints and residues in grapes and wine as quality issues. Approaches and systems of quality management using the wine industry as a focus, including the development of corporate quality cultures, standards and specifications, measurement for quality assurance, process and performance analysis methods, quality accreditation. Visits will be made to commercial plants.

*assessment:* practicals, reports, written assignments, written exams

**8788 Honours Horticultural Science (B.Ag.Sc.)**

12 points full year

**8983 Honours Horticultural Science (B.Ag.Sc.)(M-Y)**

12 points full year

15 hours per week; at least 30 hours per week during February and other vacations

*prerequisites:* credit or higher in at least two level III subjects approved by the Head of Department

Substantial research project of the student's choosing on a topic acceptable to the Department of Horticulture, Viticulture and Oenology as well as coursework, essays or other assignments deemed appropriate to each student's Honours program.

Intending candidates should consult the Head of Department, the Departmental Honours Coordinator and potential supervisors as early as possible and, in any case, no later than December 1 immediately preceding the start of the Honours program. Research topics will be decided in December/January and full-time work within the Department must begin no later than February 1 (July/August for 8933).

*assessment:* coursework, essays or other assignments not part of research project 40%, research project - research proposal, seminar, thesis and viva voce 60%

**2127 Honours Oenology(B.Ag.Sc.)**

**7950 Honours Oenology(B.Ag.Sc.)(M-Y)**

12 points full year

15 hours per week; at least 30 hours per week during February and other vacations

*prerequisites:* credit or higher in at least two level III subjects approved by the Head of Department

Substantial research project of the student's choosing on a topic acceptable to the Department of Horticulture, Viticulture and Oenology as well as coursework, essays or other assignments deemed appropriate to each student's Honours program.

Intending candidates should consult the Head of Department, the Departmental Honours Coordinator and potential supervisors as early as possible and, in any case, no later than December 1 immediately preceding the start of the Honours program. Research topics will be decided in December/January and full-time work within the Department must begin no later than February 1 (July/August for 7950).

*assessment:* coursework, essays or other assignments not forming part of the research project 40%, research project: - research proposal, seminar, thesis and viva voce 60%

**5717 Honours Viticultural Science (B.Ag.Sc.)**

**3576 Honours Viticultural Science (B.Ag.Sc.)(M-Y)**

12 points full year

15 hours per week; at least 30 hours per week during February and other vacations

*prerequisites:* credit or higher in at least two level III subjects approved by the Head of Department

Substantial research project of the student's choosing on a topic acceptable to the Department of Horticulture, Viticulture and Oenology as well as coursework, essays or other assignments deemed appropriate to each student's Honours program.

Intending candidates should consult the Head of Department, the Departmental Honours Coordinator and potential supervisors as early as possible and, in any case, no later than December 1 immediately preceding the start of the Honours program. Research topics will be decided in December/January and full-time work within the Department must begin no later than February 1 (July/August for 3576).

*assessment:* coursework, essays or other assignments not part of research project 40%, research project - research proposal, seminar, thesis and viva voce 60%

## Bachelor of Environmental Science

The Bachelor of Environmental Science course is jointly offered by the Faculty of Agricultural and Natural Resource Sciences and the Faculty of Science. The Faculty of Agricultural and Natural Resource Sciences is the administrative manager of the course.

The award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Environmental Science.
- 1.2 To qualify for the Ordinary degree a candidate shall comply with the provisions of Rule 4.
- 1.3 To qualify for the Honours degree a candidate shall comply with the provisions of Rule 5.
- 1.4 A candidate who fails to obtain an Honours classification may be awarded the Ordinary degree provided the candidate has in all other respects completed the work for that degree.

#### 2 Assessment and examinations

- 2.1 A candidate shall not be eligible to present for examination unless the prescribed classes have been regularly attended and the written, practical or other work required has been completed to the satisfaction of the Head of Department concerned.
- 2.2 In determining a candidate's final result in a subject the examiners may take into account assessments of the candidate's written, practical or other work, and the results of other examinations in that subject provided that the candidate has been given notice at the beginning of the course of study for the subject of the way in which such assessments will be taken into account and of their relative weighting in the final result.
- 2.3 There shall be four classifications of pass in any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the list of candidates who pass be published in two divisions, a pass in the higher division may be prescribed in the appropriate syllabus as prerequisite for admission to another subject. There shall also be a classification of Conceded Pass for a Level II or III subject of not more than 3 points. A candidate may only present subjects for which this result has been obtained up to a value of 6 points. A subject for which a result of Conceded Pass has been obtained may not be presented for

a major nor may it be used to satisfy prerequisite requirements.

- 2.4 (a) A candidate who fails to pass in a subject or who obtains a lower division pass and who desires to take the subject again shall, unless exempted wholly or partially therefrom by the Head of Department concerned, again complete the required work in that subject to the satisfaction of the Head of Department concerned.
- (b) A candidate who has twice failed to obtain a Division I pass or higher in the examination in any subject shall not enrol for the subject again, or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and under such conditions as the Faculty may prescribe. For the purpose of this clause a candidate who fails to receive permission to sit for or does not attend the examination in any subject after having attended substantially the full course of instruction in it, shall be deemed to have failed to pass the examination. A candidate who obtains a higher division pass only after being granted permission to enrol for the third time shall not take a subject for which that higher division pass is a prerequisite, save in exceptional circumstances and with the permission of the Faculty.

#### 3 Status, exemption and credit transfer

- 3.1 Candidates from other Faculties in the University or from other tertiary institutions may, on written application to the Faculty, be granted such status in appropriate subjects in the course for the degree of Bachelor of Environmental Science as the Faculty in each case may determine.
- 3.2 Exemption from any part of the course will be granted only in special cases and on grounds approved by Faculty.

**3.3** Candidates from other universities and tertiary institutions who are granted status under 3.1 of these Specific Course Rules will be required to complete at least the whole of the work of Level III of the course at the University of Adelaide in order to qualify for the degree; and a candidate who has completed at the University of Adelaide at least the first three years of the degree, or the equivalent, including the major in an Environmental Science discipline, may with permission of the Faculty be permitted to complete the requirements of the Ordinary degree at another institution.

#### **4 The Ordinary degree**

**4.1** The course for the Ordinary degree shall extend over four years of full-time study or the part-time equivalent.

**4.2** It is not necessary for a candidate to take all the subjects of any one level simultaneously or to complete all the subjects set out for one level before enrolling for any subject of the following level provided that the prerequisite subjects have been passed.

**4.3** To qualify for the Ordinary degree of Bachelor of Environmental Science a student shall present subjects to the value of at least 96 points which satisfy the following requirements:

##### **(i) Level I**

A candidate shall present passes in no less than 24 points and no more than 30 points of Level I subjects as follows:

(a) A candidate shall present 12 points of passes in the compulsory subjects:

5683 Earth Science I	3
<i>and</i>	
8954 Environmental Biology I	3
6878 Chemistry I	
<i>or</i>	
7312 Chemistry 1ANR	6

(b) A candidate shall present passes in Level I subjects to the value of at least 12 but not more than 18 points chosen from Level I subjects available in the Bachelor degree courses in the Faculty of Agricultural and Natural Resource Sciences or the Faculty of Science with the following subjects recommended:

1550 Environment and Society	3
6976 Biomathematics and Statistics	
<i>or</i>	
5543 Statistical Practice I	3

With special approval of the Dean, a candidate may include other Level I subjects available in the Bachelor degree courses in the Faculty of Agricultural and Natural Resource Sciences or the Faculty of Science amongst those presented to satisfy this requirement.

##### **(ii) Level II**

A candidate shall present passes in at least 20 points and no more than 32 points of Level II subjects as follows:-

(a) A candidate shall present passes in the compulsory Level II subjects:-

2781 Environmental Chemistry II	4
<i>and</i>	
9544 Environmental Physics II	4

(b) A candidate shall present passes in at least 12 and no more than 24 points of Level II subjects chosen from those available in the Bachelor degree courses in the Faculty of Agricultural and Natural Resource Sciences or the Faculty of Science.

##### **(iii) Level III**

A candidate shall present passes in no less than 36 points and no more than 48 Points of Level III subjects as follows:-

(a) A candidate shall present passes in the compulsory Level III subjects:

6065 Introduction to Environmental Economics	2
2815 Elements of Environmental Law	2
6033 Team Project (Environmental)	6

and one of the following:

6006 Conservation Law	4
4424 Environmental Protection Law	4
1502 International Environmental Law	4
5572 Land and Water Resources Law	4
7857 Minerals and Energy Law	4
7379 Planning and Heritage Law	4

(b) A candidate shall present a major in an Environmental Science discipline comprising subjects to the value of 12 points.

(c) A candidate shall present passes in further Level III subjects of not less than 12 points and not more than 24 points chosen from the Bachelor degree courses in the Faculty of Agricultural and Natural Resource Sciences or the Faculty of Science. These subjects may include a major in a Science discipline to a value of at least 9 points as outlined in the Bachelor of Science Specific Course Rules.

- (iv) In all cases, a candidate may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.
- (v) With the approval of the Dean candidates may include subjects from other Faculties to a maximum of 12 points.

## **5. The Honours Degree**

**5.1** Before entering upon the requirements for an Honours course a candidate must obtain the approval of the Course Coordinator and Head of the Department who will take responsibility for providing relevant supervision. Approval will depend on the candidate's academic record up to the time of application. Normally such approval should be sought at the end of the third year of the course for the Ordinary degree.

**5.2** A candidate for the Honours degree shall complete all the requirements for the Ordinary degree except that, in lieu of subjects to the value of 12 points prescribed in 4.3 (iii)(c), the candidate shall undertake a project:

7356 Honours Environmental Science      12

The Honours project may be undertaken in any Department in the Faculty of Agricultural and Natural Resource Sciences or the Faculty of Science.

**5.3** The Faculty may permit a candidate to present the work for the Honours Project over a period of not more than two years on such conditions as it may determine.

**5.4** A candidate who has qualified for the Honours requirements shall be awarded the Honours degree of Bachelor of Environmental Science, but the Faculty shall decide within which of the following classes and divisions the degree shall be awarded:

First Class

Second Class      Division A

Division B

Third Class

**5.5** Candidates may not enrol for a second time for the Honours course if they

- (a) have already qualified for Honours or
- (b) have presented for examination but failed to obtain Honours or
- (c) have withdrawn from the Honours course, unless the Faculty on such conditions as it may determine permits re-enrolment.

## Syllabuses

### Level I

#### 6976 Biomathematics and Statistics

3 points semester 2

4 lectures, 2 computer lab sessions/ tutorials per week

*assumed knowledge:* Stage 2 Mathematics I

*restriction:* 5543 Statistical Practice I; 9786 Mathematics I; 4357 Mathematics IH; 3617 Mathematics IM. Available only to students in the Faculty of Agricultural and Natural Resource Sciences.

The subject is intended to equip students with basic skills in mathematics and statistics, as an introduction to the use of quantitative methods in agriculture. Where possible, examples and data sets drawn from agricultural and biological sciences will be used. The course will involve the use of modern computing methods. Topics will include: periodic, exponential and trigonometric functions, matrices and linear equations, integrals, differential equations; data collection and presentation, probability distributions, principles of experimentation (randomisation and application), estimation, hypothesis testing, confidence intervals, regression and correlation .

*assessment:* formal exam - at least 70%; exercises, practicals and project work - at most 30%

#### 6878 Chemistry I

6 points full year

See Bachelor Science in the Faculty of Science for syllabus details

#### 7312 Chemistry I ANR

6 points full year

See Bachelor of Agriculture for syllabus details

#### 5683 Earth Science I

3 points semester 2

3 lectures, equivalent of 3 hours practical/tutorial/field work per week

*restriction:* 5339 Geology IW; 3482 Introduction to Physical Geography I

This subject is concerned with the dynamics of the Earth's crust, atmosphere, hydrosphere and biosphere; origin of the Earth's major relief; evolution of landscapes; world climates; climatic influences on landscapes; climatic change over the past 2 million years; river systems, coastal zones and other erosional and depositional environments; soil variation and development; vegetation patterns; ecosystem processes.

We emphasise the interaction and interrelationships of various facets of the Earth's surface through time. We are concerned to examine how the present landscapes and systems came into being. We consider that the natural world is fascinating on its own account, and that human impacts (eg soil degradation, air and water pollution) are better understood if energy and time perspectives are clear.

*assessment:* written exam, essays, tutorial and practical exercises and field excursions

#### 8954 Environmental Biology I

3 points semester 1

3 lectures per week, 3 hours practical/tutorial per fortnight, 3 field trips.

This subject is an introduction to basic ecological theory in population ecology, community ecology and ecosystem processes and provides a basis for further studies in ecology and environmental biology. It covers population growth and regulation, interactions such as competition, predation and commensalism, the flow of energy and cycles of materials in ecosystems. Terrestrial and aquatic biomes will be studied with special reference to major Australian habitats. Finally global issues and the impact of humans on ecosystems will be considered.

*assessment:* final exam 70%; practical reports 30%

#### 1550 Environment and Society

3 points semester 1

3 lectures, 1 tutorial per week

An introduction to the physical and biological resources of Australia and the impact on them of rural and urban society with an evaluation of their sustainable use in relation to the economy of Australia and its role in the world community. Topics to be considered include land use allocation, Australia's contribution to global food, mineral and energy demands, adaptation of agricultural practice to the Australian environment, soil protection, biodiversity and importance of conservation of the unique flora and fauna of Australia, maintenance of food and water quality, role for agrichemicals, ecotourism, impact of biotechnology and management of industrial and urban waste. Related ethical, economic and political factors will be discussed such as the relationship between economic sustainability and ecological sustainability, the farming of native animals and economic rationalism versus natural resource management.

*assessment:* essays 25%; tutorial projects 25%; exam 50%

### 5543 Statistical Practice I

3 points semester 1 and 2

3 lectures, 2 hours of practicals a week

*assumed knowledge:* SACE stage 2 Mathematics I

*restriction:* 5543 Statistical Practice I and 9101 Business Data Analysis I (pre-1992 8179 Economic Statistics I or 7322 Economic Statistics IA) cannot both be counted towards a degree.

This subject is an introduction to the theory and application of statistical methods to experimental data. It is suitable for students who are likely to be users of statistical methods in the future, or who intend to pursue a degree in mathematical sciences. Topics covered include the organisation, description and presentation of data; the design of experiments and surveys; probability and relative frequency; random variables and probability distributions; binomial distributions; continuous distributions; the Normal distribution; the use of inference to draw conclusions from data; tests of significance for means and variances; confidence intervals; goodness of fit tests; the t, X<sup>2</sup> and F distributions; fitting straight lines to data; the method of least squares; regression and analysis of variance.

Students will be introduced to the statistical computer package Minitab which will be used throughout the course.

*assessment:* exam - min. 80%; exercises, practicals and project work - max. 20%

### Level II

#### 2781 Environmental Chemistry II

4 points semester 1

3 lectures, 1 tutorial, 6 hours of practical work per week

*prerequisite:* 6878 Chemistry 1 or 7312 Chemistry IANR

*restriction:* 1699 Environmental Chemistry III (NR)

The subject aims to establish a sound understanding of the chemical nature of the biosphere and the natural and human induced chemical variations in local and global environments. The atmospheric, terrestrial, riverine and oceanic chemical compositions and their interactions to produce climate and other environmental variations are examined. The natural chemical cycles of major environmental importance, such as those of carbon, nitrogen, oxygen-ozone phosphorus and sulfur, are examined. The chemical environmental impact of human activities such as farming, mining and other industries, will be examined in both general terms and through case studies. Analytical chemistry, spectroscopy and statistical analysis will be included as integral parts of the subject. Teaching will be through lectures and laboratory classes which may include some field study.

*assessment:* to be advised

### 8286 Environmental Physics II

4 points semester 2

3 lectures, 1 tutorial, 6 hours practical work per week

Environmental Physics aims to provide tools and skills derived from the physicist's view of the environment, and to provide guidance in their use in understanding the physical world. The topics covered are selected from the following areas:- The Basic Components of Physics including topics from: Fluid Dynamics; Diffusion; Optics and Thermodynamics. Elementary Atomic and Nuclear Physics. Elementary Spectroscopy including topics from: The Solar Spectrum; The Interaction of Light and Matter, and the Spectroscopy of Atmospheric Gases and Biomolecules. The Ozone Filter, The Scattering of Light, The Global Energy Balance, The Greenhouse Model, Elements of Weather and Climate, Energy for Human Use including: Heat transfer, Heat Engines, Energy Storage and Transport, Renewable Energy Resources and Nuclear Energy. The Transport of Pollutants including topics from, Diffusion, Fluid Flow, Turbulence and Plumes in the Air. Noise including Basic Acoustics and the Control of Sound. Teaching is through lectures, laboratory and project work.

*assessment:* exam 50%; laboratory, project work 50%

### Level III

#### 2815 Elements of Environmental Law

2 points semester 1

1 lecture per week, 2 hour seminar each fortnight

An outline of the following topics will be presented: constitutional roles and responsibilities, environmental dispute resolution, sustainable development and law, environmental planning, precautionary principles in environmental protection, and biodiversity protection..

*assessment:* to be advised

#### 8940 Environmental Economics ES III

4 points semester 2

2 lectures, 1 tutorial per week

The subject is an introduction to Environmental Economics using much of the microeconomics included in 4309 Economics IA and 6065 Introduction to Environmental Microeconomics. It will look at a wide range of environmental issues and problems and apply basic microeconomic analysis to them. Issues such as pollution control, resource use management and provision of environmental public view of economic analysis. Both the potential and limitations of economics will be addressed. Australian examples and case studies will be used wherever possible.

*assessment:* to be advised

**6065 Introduction to Environmental Economics**

2 points semester 1

2 lectures, 1 tutorial per week, second half semester 1

The subject is an introduction to the principles of microeconomics, particularly as they relate to environmental issues and analysis. It will look at the basic economic paradigm: unlimited demands and scarce resources. This will include the free market model, how it fails on various ways and outlines the possible remedies for such failures. The object is to introduce students to relevant economic theory, but not to make them into economists.

*assessment:* to be advised

**6400 Minerals and Energy Law**

4 points semester 2

See Bachelor of Laws for syllabus details

**6033 Team Project Environmental**

4 points full year  
available from 2000

syllabus details to be advised

**6006 Conservation Law**

**4424 Environmental Protection Law**

**1502 International Environmental Law**

**5572 Land and Water Resources Law**

**7379 Planning and Heritage Law**

4 points semester 1 or 2

See Bachelor of Laws for syllabus details

## Bachelor of Wine Marketing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

There shall be an Ordinary and an Honours degree of Bachelor of Wine Marketing. A candidate may obtain either degree or both.

#### 2 Assessment and examinations

2.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible to attend for examination shall be deemed to have failed the examination.

2.2 A candidate who fails in a subject or who obtains a lower division pass and who desires to take the subject again shall, unless exempted, wholly or partially therefrom by the Head of Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

2.3 A candidate who has twice failed to obtain a Division I pass or higher in the examination in any subject shall not enrol for the subject again, or for any other subject which in the opinion of the Faculty contains a substantial amount of the same material, except by permission of the Faculty and under such conditions as the Faculty may prescribe.

2.4 A candidate who does not attend the examination in any subject although eligible to do so, shall be deemed to have failed the examination.

2.5 In determining the candidate's final result in a subject the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final results

2.6 There shall be four classifications of pass in any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

If the pass classification be in two divisions, a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or other subjects.

There shall also be a classification of Conceded Pass. A Conceded Pass may not be used to satisfy prerequisite requirements. Subjects passed at the Conceded Pass level to a maximum total of six points may be presented for the Ordinary Degree.

#### 3 Status, exemption and credit transfer

Candidates who have previously passed subjects in courses in the University or other tertiary educational institutions may, on written application to the Faculty Registrar, be granted such status in appropriate subjects in the course for the degree of Bachelor of Wine Marketing as the Faculty in each case may determine

#### 4 The Ordinary degree

To qualify for the Ordinary degree of Bachelor in Wine Marketing a candidate shall present passes in subjects to a minimum value of 70 points which satisfy the following requirements:

##### Level I

###### semester 1

4309 Economics IA	3
8901 Introductory Grape and Wine Knowledge	3
2440 Legal Issues in Wine Marketing	3
4932 Principles of Marketing (Wine Marketing)	3

###### semester 2

9101 Business Data Analysis I	3
2076 Economics IB	3
4478 Introduction to Managerial and Financial Accounting	3
4605 Vineyard and Winery Operations I	3

##### Level II

###### semester 1

8738 Applied Management Science and Decision Making	3
7435 Vineyard and Winery Operations II	3
electives	6

*semester 2*

7927 Applied Marketing Research	3
4418 Fortified Wines, Spirits and Non-grape Beverages	3
8590 International Marketing of Wine and Agricultural Products	3
elective	3

**Level III**

*semester 1*

4163 Issues in Wine Business	3
9738 The Global Market for Wine B	3
5693 Wine and Marketing in Society	3
elective	3

*semester 2*

2086 Retail Selling and Practice	3
4909 Wine Business Management B	3
electives	6

**Electives**

Electives chosen may be from other courses in the Faculty of Agricultural and Natural Resource Sciences or any subjects in the Bachelor of Commerce or Bachelor of Economics for which the student is eligible to enrol.

Subjects from within the Faculty of Agricultural and Natural Resource Sciences of particular relevance to the course are:

3021 International Business Environment	3
1324 International Wine Law B	3
2332 Issues in Australian Agribusiness	3
6213 Issues in Food and Beverage Marketing	3
8467 Wine and Food Tourism and Festivals B	3

and for student who wish to pursue a particular interest:

4684 Special Project (Research Paper) B	3
---	---

It is recommended that students wishing to specialise in marketing include the following subjects amongst their electives:

1244 Advertising and Promotion	3
1053 Consumer Behavioural Analysis	3
6234 Introduction to Business Management	3

It is recommended that students wishing to specialise in finance, economics and trade include the following subjects amongst their electives:

3730 Finance	3
6695 International Trade III	4
1040 International Trade and Investment Policy II	4
8870 Microeconomics II	4

Note: students without SACE Stage 2 Maths must take 3071 Mathematics for Economists I before 8870 Microeconomics II.

**5. The Honours Degree**

- 5.1** A candidate for the Honours Degree of Bachelor of Wine Marketing must have completed the requirements for the Ordinary degree of Bachelor of Wine Marketing or have qualified for a degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent.
- 5.2** Subject to the approval of the Head of the Department of Horticulture, Viticulture and Oenology, the candidate will proceed to the Honours degree in the following subject:  
9020 Honours Wine Marketing 24
- 5.3** A candidate may, subject to the approval of the Heads of the Departments concerned, proceed to the Honours degree taught jointly by the Department of Horticulture, Viticulture and Oenology and another department. The candidate must apply in writing for the proposed course to be approved in advance by the Faculty
- 5.4** A candidate for the Honours degree shall attend lectures and pass examinations in accordance with the provisions of these Specific Course Rules.
- 5.5** The work of the Honours year will normally be completed in one year of full time study. The Faculty may permit a candidate to take two years, but no more, under such conditions as it may determine.
- 5.6** A candidate who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be reported to the Faculty, which may permit re-enrolment for an Honours degree under such conditions (if any) as it may determine
- 5.7** There shall be three classifications for the Honours degree as follows:
- |              |            |
|--------------|------------|
| First Class  |            |
| Second Class | Division A |
|              | Division B |
| Third Class  |            |
- 5.8** Candidates may not enrol for a second time for the Honours course if they (i) have already qualified for Honours, or (ii) have attended for examination but failed to obtain Honours, or (iii) have withdrawn from the Honours course unless the Faculty on such conditions as it may determine permits re-enrolment

## Syllabuses

### Level I

#### 9101 Business Data Analysis I

3 points semester 1 or 2

2 lectures, 1 tutorial per week; 1 one hour computer tutorial per fortnight

*restriction:* not available to students who have already passed 2394 Economic Statistics II or 9514 Economic Statistics IIA; 8179 Economic Statistics I or 7322 Economic Statistics IA. 9101 Business Data Analysis I and 5543 Statistics I (pre-1989 Statistics IH) cannot both be counted toward the degree.

This is an introductory subject for Commerce and Economics students. The subject covers collecting and organising data, drawing conclusions and commenting intelligently on the statistical results obtained. Topics include descriptive statistics, tabulation, correlation and simple regression, index numbers, business forecasting and an introduction to the use of probability in formal statistical reasoning.

*assessment:* determined in consultation with students.

#### 4309 Economics 1A

3 points semester 1

4 hours lectures/tutorials/workshops per week.

*note:* Students who have passed 6993 Macroeconomics IH or 2740 Microeconomics IH should consult with the faculty course advisers concerning completion of Level I Economics requirements. Students without SACE Stage 2 Mathematics intending to proceed to 9893 Macroeconomics II and/or 8870 Microeconomics II and not planning to take 7263 Mathematics for Economists I should contact the Lecturer-in-charge concerning assumed mathematics background.

*restriction:* not to be counted with 2740 Microeconomics IH (pre-1985) or 8461 Economics I (pre-1992)

The subject provides an introduction to a core area of economics known as microeconomics. It considers the operation of a market economy and the problem of how best to allocate society's scarce resources. It also considers the way in which various decision making units in the economy (individual and firms) make their consumption and production decisions and how these decisions are coordinated; the laws of supply and demand; and introduces the theory of the firm, and its components, production and cost theories and models of market structure. The various causes of market failure are assessed, and consideration is given to public policies designed to correct this market failure. Finally, the market for factors of production is considered in detail.

*assessment:* determined in consultation with students

#### 2076 Economics 1B

3 points semester 2

4 hours lectures/tutorials/workshops per week

*note:* Students who have passed 6993 Macroeconomics IH or 2740 Microeconomics IH should consult with the Faculty course advisers concerning completion of Level I Economics requirements. Students without SACE Stage 2 mathematics intending to proceed to 8870 Microeconomics II and/or 9893 Macroeconomics II and not planning to take 7263 Mathematics for Economics I should contact the Lecturer-in-charge concerning assumed mathematics background. This subject replaces semester 2 of 8461 Economics I.

*restriction:* may not be counted with 6993 Macroeconomics IH (pre-1985); or 8461 Economics I (pre-1992)

This subject provides an introduction to macroeconomic theory and policy in Australia. A consideration of the nature and measure of gross domestic product (GDP), a measure of the total output of income of the economy; the determination of the equilibrium level of GDP and the influence of money and banking on the economy form the theoretic basis for an assessment of Australian policy-making. The influence of fiscal, monetary and incomes policies on the macroeconomic policy objectives of economic growth, low inflation, low unemployment and a sustainable balance of payments position are considered.

*assessment:* determined in consultation with students

#### 8901 Introductory Grape and Wine Knowledge

3 points semester 1

2 lectures, 3 hours practicals/tutorials per week or 4-day residential school together with external students

History of grapegrowing and winemaking in Australia; grapevine morphology, growth and development; grape berry development; changes in grape berry composition during ripening; physiology of smell and taste; basic winemaking principles; taste and aroma interactions. Exercises in practical sessions designed to train student's palate in wine sensory evaluation and to differentiate between Australian wine types and styles.

*assessment:* exam 50%, assignments and practical tests 50%

#### **4478 Introduction to Managerial and Financial Accounting**

3 points semester 2  
2 lectures, 1 tutorial, 1 hour computer practical per week

This subject provides an introduction to the nature and purpose of financial, managerial and cost accounting as an information specialisation, with particular emphasis on agricultural businesses. Topics included are designed to demonstrate how the processes of measurement of financial events and the collection, sorting, classification, analysis and reporting of financial information (manually and computerised) are determined by the objective of accounting, which is to provide financial information for the purpose of decision-making by internal management and external parties, eg. Financial Statements, CVP, Product Costing, Budgeting Ratios.

*assessment:* exams 50%; assignments 50%

#### **2440 Legal Issues in Wine Marketing**

3 points semester 1  
2 lectures, 1 tutorial per week; seminars as notified

The aim of this subjects is to acquaint students with the legal issues relating to marketing in general and wine marketing in particular. Over the last two decades there have been very significant legislative changes designed to realign the common law rules in this area to suit the evolving needs of business and consumers. The wine aspects covered will relate to laws governing grades and standards, health, rights and obligations of buyers and suppliers of goods and services, etc.

*assessment:* exam, assignments

#### **4932 Principles of Marketing (Wine Marketing)**

3 points semester 1  
2 lectures, 1 tutorial per week

The aim of this subject is to give wine marketing students an understanding of the role of the marketing manager through an introduction to the basic concepts and practices in marketing with particular emphasis on agricultural products, especially wine products. The topics covered include the marketing environment and marketing strategy formulation. There will be particular examination of product, price, place and promotion strategies.

*assessment:* exam 50%; assignments, tutorials 50%

#### **4605 Vineyard and Winery Operations I**

3 points semester 2  
2 lectures per week, 3 hours of tutorials/practicals to be advised, residential school for external students

*prerequisites:* 8901 Introductory Grape and Wine Knowledge

Climatic requirements for viticulture, vineyard design, establishment and operations including pruning, irrigation, canopy management, soil management and pest and disease management. Characteristics of major white wine grape varieties. Principles and practices of white and sparkling wine production. Major white wine styles of the world. Oak in winemaking, oak production and cooperage.

Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* written exam 55%; assignments, practicals 45%

### **Level II**

#### **1244 Advertising and Promotion**

3 point semester 1  
3 hours per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing) or 4843 Agricultural Marketing Principles and Strategies

This subject will provide the student with an overview of the Integrated Marketing Communications process. Students will learn to manage the formal communications process in the context of wine and agricultural businesses. Attention will be paid to developing communication plans and understanding strategic applications of advertising, sales promotion and public relations tools. Students should expect to gain knowledge of communications theory as well as practical application through study of texts and real world cases.

*assessment:* exam 50%; assignments 50%

#### **8738 Applied Management Science and Decision Theory**

3 points semester 1  
2 lectures, 1 2-hour practical/tutorial per week

*prerequisites:* 9101 Business Data Analysis I or equivalent

The aim of this subject is to introduce a collection of management science techniques that helps business managers make better decisions and to foster a logical, consistent and systematic approach to problem formulation, problem solving and decision making.

Emphasis is placed on model formulation and interpretation rather than algorithms. Topics to be covered include mathematical programming, network modelling, Monte Carlo simulation, decision analysis under risk, and time series forecasting.

*assessment:* theory, and practical exams, case studies, other assignments

### **7927 Applied Marketing Research**

3 point semester 1

2 lectures, 1 tutorial, 1 practical per week

*assumed knowledge:* 9101 Business Data Analysis I

The aim of this subject is to study quantitative and qualitative marketing research for pro-active and reactive marketing intelligence systems as it applies to wine and agricultural marketers. Topics included are problem analysis, types of data collection systems, steps in research projects, controls of a research project, questionnaire design, statistical methodology for data reduction, sampling theory and the industry and operative organisations. Dealing with a market research organisation will be a significant aspect of the subject which is not aimed at producing researchers but clients who understand the intricacies of the process - and the limitations. The focus will be the application of the theory for use in new wine/agricultural product evaluation, advertising measurement, corporate/product/range analysis, attitudinal research, as primary sources. Secondary sources such as trade, governmental or syndicated data will be explored and assessed.

*assessment:* exam 50%; assignments 50%

### **1053 Consumer Behavioural Analysis**

3 point semester 1

2 lectures, 2 tutorials per week

*assumed knowledge:* 4471 Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing)

The aim of this subject is to alert wine and agricultural marketing students to the many variables which impinge upon the purchase of goods and services. Within this most important multi-disciplinary subject are the studies of perception, attitudes, human motivation, consumer information processing and decision-making, the sociology of people, external and internal variables, group influences and the segmentation of people into manageable communicable target groups for niche markets. The implications for marketing are in providing direction and substance for all marketing efforts such as in advertising, promotion, public relations, packaging, pricing, distribution and the nature of the product.

*assessment:* exam 50%; assignments 50%

### **4418 Fortified Wines, Spirits and Non-grape Beverages**

3 point semester 2

2 lectures, 3 hours tutorials/practicals per week, or 4 day residential school with external students

*prerequisites:* 7435 Vineyard and Winery Operations II

Characteristics of grape varieties for fortified wine and brandy production; production of Australian, Spanish and Portuguese fortified wines; grape spirit and brandy productions; production of non-grape beverages, such as beer, cider and non-grape spirits. Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* exam 60%; tests, assignments, practical reports 40%

### **8590 International Marketing of Wine and Agricultural Products**

3 point semester 2

2 lectures, tutorial, seminar per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing or 4932 Principles of Marketing (Wine Marketing)

This subject aims to provide a comprehensive review of the theory and practice of international marketing mainly in relation to wine and agricultural products. Special emphasis will be given to marketing in the European and Asian regions and under GATT. Topics include the economic analysis of international trade and Australian business involvement, environmental factors affecting international marketing, strategic planning and organising for international marketing, decisions on segmentation, product policy including geographical indicators and product planning, pricing, channels of distribution, international advertising and coordinating and controlling global marketing operations. It also focuses on international market research, multi-country data analysis and international marketing information.

*assessment:* exam 50%, assignments 50%

### **1324 International Wine Law B**

3 point semester 1

2 lectures, 1 tutorial per week

The subject will cover import and export laws, labelling requirements, appellation and place names, the role of the OIV and other international agencies, and tax laws as related to the international wine trade.

*assessment:* to be advised.

### 6234 Introduction to Business Management

3 points semester 2

2 lectures, 1 tutorial per week

Introduction to management, evolution of management, management environments, decision making, planning, strategic management, organising, organisational structure, human resource management, managing change and innovation, behaviour, motivation, leadership, communication, control, operations management, international management.

*assessment:* assignments, tests, final examination

### 7435 Vineyard and Winery Operations II

3 point semester 1

2 lectures per week, 3 hours of tutorials/practicals to be advised, residential school for external students

*prerequisites:* 4605 Vineyard and Winery Operations I

Characteristics of major red wine grape varieties; principles and practices of red wine production; major red wine styles of the world; history and structure of the Australian and world wine industry; wine packaging, bottling operations and quality standards; wine laws and health; sensory science. Practical sessions relate to lecture topics and will include tasting sessions.

*assessment:* exam 60%; tests, assignments, practical reports 40%

### 8467 Wine and Food Tourism and Festivals B

3 point semester 2

2 lectures, 1 tutorial per week

The subject will explore the basics of tourism, the structure and direction of the tourist industry, and the specific application of these concepts to the winery. Specific areas will include event management, working with travel and tourism agents, governmental tourism programs, advertising and promoting the winery cellar door.

*assessment:* to be advised

## Level III

### 3730 Finance I

3 points semester 1

2 lectures, 1 tutorial per week

*corequisites:* 4309 Economics 1A

*assumed knowledge:* SACE Stage II Mathematics I

This subject provides an introduction to Australia's financial institutions, instruments and the economics of financial markets. Topics covered include money, credit, foreign exchange and capital markets.

Instruments include traditional instruments such as equity, bills and bonds. Management of interest rate and foreign exchange risk, including the use of derivatives, is introduced. Elements of financial mathematics are introduced.

*assessment:* determined in consultation with students

### 3021 International Business Environment

3 points semester 2

3 hours seminars, lectures per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing, 9682 Economic Principles, 6234 Introduction to Business Management

This capstone subject is designed to provide an overview of the international trade and financial environment within which business must function with particular emphasis on the broader Asian region, including the Middle East. It considers comparative advantage and the basis for international trade; factor movement across national boundaries, trade policies such as tariffs, quotas, VERs, administrative regulations, dumping, export subsidies and international commodity agreements; international and regional commercial policies; exchange rate determination; the balance of payments and its adjustment under alternative exchange rate regimes; exchange control; the international currency system; and exchange rate policies.

*assessment:* exam 50%; assignments 50%

### 6695 International Trade III

4 point semester 2

2 lectures, 1 tutorial per week

*prerequisites:* 8870 Microeconomics II

*restrictions:* 2261 International Economics III

This subject deals with the theory and practice of international trade and trade-related policies affecting goods, services, and capital. It focuses on analysing the gains from trade, the changing patterns of trade and foreign investment, the income distributional consequences of liberalising foreign trade and investment, the relationship between trade, investment, and economic growth, and the causes and consequences of trade and investment policies.

*assessment:* determined in consultation with students

### 1040 International Trade and Investment Policy II

4 points semester 1  
2 lectures, 1 tutorial per week

*prerequisites:* 4309 Economics IA and SACE Stage 2 Mathematics I or 7263 Mathematics for Economists I

*corequisites:* Microeconomics II

*restriction:* may not be taken by students who have previously completed 6695 International Trade III or 2261 International Economics III or equivalent.

This subject examines the interaction between economic, political, strategic, and legal aspects of trade policies at sub-national, national, regional and global levels, including the ways in which WTO members affect and are affected by regional and multilateral trade and economic integration agreements. The effects of trade policy on the efficiency of resource use, on income distribution, and on national and global trade and economic welfare are analysed using modern trade theories and models.

*assessment:* determined in consultation with students.

### 2332 Issues in Australian Agribusiness

3 points semester 2  
2 lectures, 2 hours tutorials per week

*prerequisites:* 9129 Principles of Agricultural Business Marketing

This subject focuses on current issues relating to the food and fibre business in Australia. Of particular importance are interrelationships between the farm firm and the macro environment. Topics will include the role and functions of agricultural producers, production and consumption decisions, institutions affecting decision-making in agriculture and the relevance of the political economy for changes in business environment facing Australian agricultural producers.

*assessment:* examinations 50%, assignments 50%

### 6213 Issues in Food and Beverage Marketing

3 points semester 2  
3 hours per week

*prerequisite:* 9129 Principles of Agricultural Business Marketing, or 9548 Business Systems A, or 5039 Marketing and Financial Control in Agriculture, or equivalent pass in a basic business subject.

This subject will examine key issues in the development and marketing of primary and processed food and beverage products. Attention will be paid to such areas as supply chain management, managing product development, exporting Australian food and

beverage products, market research, packaging and labelling, consumer food consumption trends and food marketing strategies. Special attention will be paid to value-adding in Australian food and beverage industries.

*assessment:* to be advised

### 4143 Issues in Wine Business

3 point semester 2  
3 hours of seminars per week

The subject will offer the opportunity to the student to cover a range of topics in Wine Business as it relates to the student's study program interests and the teaching and research interests of staff and visiting academics. A combination of industry, academic and student prepared seminars will be used.

*assessment:* to be advised.

### 8870 Microeconomics II

4 point semester 1 or 2  
2 lectures, 1 tutorial a week

*prerequisites:* 4309 Economics 1A and SACE Stage 2 Mathematics I or 7263 Mathematics for Economists I

This subject builds on the microeconomic principles studied in the level I Economics subjects and provides an analysis of the way in which the market system functions as a mechanism for coordinating the independent choices of individual economic agents. It develops a basis for evaluating the efficiency and equity implications of competition and other market structures, and a perspective on the appropriate role of government. Included are the study of consumer choice, production and cost, market structure, and market failure.

*assessment:* exam, other assessment as determined at preliminary lecture.

### 2086 Retail Selling and Practice

3 point semester 2  
2 lectures, 2 hours practicals a week

*prerequisites:* 4932 Principles of Marketing (W.M.) or 9129 Principles of Agricultural Business Marketing

This subject focuses on the principles of establishing and managing a retail concern. It will expose the student to the theoretical and practical aspects of selling and retail practices. Some of the areas this subject will cover include: distribution and information systems, selling and marketing technology and trends, retail and wholesale operations, negotiation skills. The subject can involve some fieldwork, guest lectures and practical case studies.

*assessment:* examination 40%, assignments 60%

**4684 Special Project (Research Paper) B**

3 point full year

Students work independently with supervisor and/or co-supervisor

Each student is to undertake an individual project of significant size which exhibits original investigation, analysis and interpretation, and which results in the production of a well-written and well-presented report. The project may comprise a major literature review (at least 10000 words), research project, case study of a business or related enterprise, or some other approved study.

*assessment:* seminar presentation and dissertation

**9738 The Global Market for Wine B**

3 point semester 1

This subject will examine the structure of the global wine industry, including regulatory agencies, organisation, and major wine producing/consuming areas. Special attention will be paid to consumer behaviour and marketing strategies employed in the major wine consuming markets.

*assessment:* to be advised

**5693 Wine and Marketing in Society**

3 point semester 1

The student will be exposed to studies that cover the history and future of the Australian wine grape growing industry including organisations which represent that industry and their structure and functions; alcohol and wine consumption habits and attitudes including societal influences on human behaviour; education and awareness programs, communication of wine information, introduction to wine, food, licensing, labelling and product laws and standards and distribution.

*assessment:* to be advised

**4909 Wine Business Management B**

3 point semester 2

2 lectures, 1 tutorial per week

The subject will examine linkages between the production of wine and business management, including accounting and financial management, marketing, and organisation development. Key areas of focus will be brand building and management, understanding costs of production, financing growth, application of decision making models to winery operations, and establishing a learning organisation.

**9020 Honours Wine Marketing**

24 points full year

*prerequisites:* requirements for Bachelor of Wine Marketing or a degree regarded by the Faculty of Agricultural and Natural Resource Sciences as equivalent; at least a credit in appropriate Level III subjects offered by Department of Horticulture, Viticulture and Oenology or equivalents acceptable to the head of Department

Candidates are expected to acquire a more detailed knowledge in a selected area of wine marketing or wine business than is required for the Ordinary Degree.

Candidates are required to carry out research in the field, to present seminar(s), and to present the results of the research in a written thesis. The student and the Honours Coordinator may decided to substitute some course works for part of the research, however, a single mark based on 24 points will be assessed.

*assessment:* research project/thesis will be assessed by dissertation and research

## Bachelor of Agriculture (Honours)

### Syllabuses

#### 9438 Honours Agronomy and Farming Systems (B.Ag.)

#### 3662 Honours Agronomy and Farming Systems (B.Ag.)(M-Y)

24 points

full year

*prerequisites:* at least credit standard in appropriate Level II and III stream subjects to the value of 9 points offered by the department or special permission of the Head of Department

Candidates are expected to acquire a more detailed knowledge than is required in the ordinary degree. They are required to complete successfully 12 points of course work including 6495 Research Methodology (4 points) and two of the following 4-point Level IV subjects: 6363 Crops & Pastures, 1581 Dryland Farming Systems, 1328 Extensive Livestock, 1058 Rural Sociology, 2793 Social Psychology, 7518 Communications and Agricultural Extension, 8597 Agricultural Engineering. In addition, candidates are expected to study more deeply one branch of Agronomy and Farming Systems, by undertaking research to the value of 12 points in this field and to present the results in a written thesis and through the presentation of a seminar.

*assessment:* research thesis and associated seminars 50%; the assessment of the remainder of the course will be as presented in the subject descriptions

#### 1164 Honours Animal Science (B.Ag.)

#### 6940 Honours Animal Science (B.Ag.)(M-Y)

24 points

full year

*prerequisites:* credit or higher in at least two Level III subjects approved by the Head of Department.

This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Animal Science, as well as coursework, essays or other assignments deemed appropriate to each student's Honours program.

Intending candidates should consult the Head of Department and potential supervisors during the final year of the ordinary degree and be prepared to begin studies in the Department at the beginning of February, or other vacations.

*assessment:* research thesis and associated seminars 50%; the assessment of the remainder of the course will be as deemed appropriate to each student's honours program

#### 1983 Honours Crop Protection (B.Ag.)

24 points

full year

*prerequisites:* credit or higher in at least two Level III subjects approved by the Head of Department

Candidates will be required to undertake a research project (12 points) and take additional course work relevant to the research project. The course work will usually consist of four Level III subjects from those listed by the Department in the Schedules for the B.Ag.Sc. degree but, at the discretion of the Head of Department, subjects from another department may be accepted. In the Department of Crop Protection, students can undertake research work for their honours degree in one of the following areas: Entomology, Plant Pathology, or Weed Science. The candidate will present oral reports and a thesis on research work undertaken during the year under the supervision of one or more members of academic staff.

Intending candidates should consult the Head of the Department and potential supervisors during the final year of the ordinary degree and be prepared to begin studies in the Department at the beginning of February.

*assessment:* average of four Level III subjects 50%; research project and thesis 50%

#### 8997 Honours Horticulture, Viticulture and Oenology (B.Ag.)

24 points

full year

*prerequisites:* credit or higher in at least 2 Level III subjects approved by the Head of Department

This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Horticulture, Viticulture and Oenology as well as coursework, essays or other assignments deemed appropriate to each student's Honours program.

Intending candidates should consult the Head of Department, the Departmental Honours coordinator and potential supervisors as early as possible and, in any case, no later than December 1 immediately preceding the start of the Honours program. Research topics will be decided in December/January and full-time work within the Department must begin no later than February 1.

*assessment:* coursework, essays or other assignments not forming part of the research project 40%; research proposal, seminar, thesis and *viva voce* 60%

**7624 Honours Plant Science (B.Ag.)**

24 points full year

*prerequisites:* credit or higher in at least two Level III subjects approved by the Head of Department.

This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Plant Science as well as coursework, essays or other assignments deemed appropriate to each student's Honours program.

The coursework will usually consist of four Level III subjects from those listed by the Department in the Schedules for the B.Ag.Sc. degree but at the discretion of the Head of Department subjects from another department may be accepted. In the Department of Plant Science, candidates can undertake the research work for their honours degree in one of the following areas: Crop Physiology and Biochemistry, Plant Molecular Biology, Plant Breeding or Biometry. The candidate will present oral reports and a thesis on research work undertaken during the year under the supervision of one or more members of academic staff.

Intending candidates should consult the Head of the Department and potential supervisors during the final year of the ordinary degree and be prepared to begin studies in the Department at the beginning of February.

*assessment:* average of four Level III subjects 40%; research proposal, seminar, thesis and viva voce 60%

**8450 Honours Soil Science (B.Ag.)**

24 points full year

*prerequisites:* credit or higher in at least two Level III subjects approved by the Head of Department

This subject comprises a substantial research project of the student's choosing on a topic acceptable to the Department of Soil Science as well as coursework, essays or other assignments deemed appropriate to each student's Honours program.

Intending candidates should consult the Head of Department, the Departmental Honours coordinator and potential supervisors as early as possible and, in any case, no later than December 1 immediately preceding the start of the Honours program. Research topics will be decided in December/January and full-time work within the Department must begin no later than February 1.

*assessment:* coursework, essays or other assignments not forming part of the research project 20%; research proposal, seminar, thesis and *viva voce* 80%

**6495 Research Methodology**

4 points semester 1

4 hours per week

*prerequisites:* entry to B.App.Sc.(Hons) or to a post-graduate course offered by the Faculty

This subject introduces students to the research process. It covers topics such as priority-setting and planning; establishing and designing experiments; data collection and management; statistical analysis; scientific writing and communication of research results.

*assessment:* exam 45%; assignments 30%; tutorial exercises 15%; seminar 10%

## Bachelor of Environmental Management (Honours)

### Syllabuses

#### **8860 Honours Crop Protection (B.Env.Mgt.)**

24 points full year

*prerequisite:* credit or higher in at least two Level III subjects approved by the Head of Department

Students can undertake research work (to the value of 12 points) in one of the following areas: Entomology, Plant Pathology or Weed Science. The candidate will present oral reports and a thesis on research work undertaken during the year under the supervision of one or more members of academic staff. In addition, candidates must undertake coursework relevant to the research project, which will usually consist of four Level III subjects from those listed by the Department in the Schedules for the B.Ag.Sc. degree. Subjects from another department may be accepted at the discretion of the Head of Department.

Intending candidates should consult the Head of Department and potential supervisors during the final year of the ordinary degree and be prepared to begin studies in the Department at the beginning of February.

*assessment:* average of four Level III subjects 50%; research project and thesis 50%

#### **1315 Honours Environmental Science and Management (B.Env.Mgt.)**

#### **2147 Honours Environmental Science and Management (B.Env.Mgt.)(M-Y)**

24 points full year

*prerequisites:* credit or better in at least two Level III subjects or by permission of the Head of Department

Candidates are expected to acquire a more detailed knowledge of environmental science and rangeland management than is required for the Ordinary Degree. Candidates are expected to study deeply in one branch of environmental science and rangeland management. Candidates are required to carry out research in this field and present a thesis, which constitutes 50% of their assessment. The remaining 50% will be made up of a combination of essays, a seminar, a formal research proposal, a literature review and Level III or IV subjects approved by the Head of Department.

#### **8459 Honours Soil Science (B.Env.Mgt.)**

#### **3422 Honours Soil Science (B.Env.Mgt.)(M-Y)**

24 points full year

*prerequisites:* credit or higher in at least two Level III subjects approved by the Head of Department.

A substantial research project of the student's choosing on a topic acceptable to the Department of Soil Science. Coursework, essays or other assignments, not directly related to the main research topic, as deemed appropriate to the candidate's Honours program by the Department.

Intending candidates should consult the Head of Department, the Honours coordinator and potential supervisors as early as possible and, in any case, no later than two clear months before the start of the Honours program. Research topics will be decided in these two months and full-time work within the Department must begin no later than February 1 (or August 1 for mid-year intake).

*assessment:* research proposal, seminar, thesis, *viva voce* 80%, assignments not directly related to the main research project 20%

# Postgraduate Courses

by research

**Master of Agricultural Science**

**Master of Applied Science**

by coursework

**Graduate Certificate**

**Graduate Diploma**

**Postgraduate Diploma**

**Master**

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course of study for a Graduate Certificate shall have qualified for a degree of the University in an approved field of study, or a degree of another institution accepted for the purpose by the Faculty.

1.2 An applicant for admission to the course of study for a Graduate Diploma shall

- (a) have qualified for a Graduate Certificate of the University in an approved field of study, or an equivalent award of another institution accepted for the purpose by the Faculty *or*
- (b) have qualified for a degree or a three year diploma of the University or an equivalent award of another institution accepted for the purpose by the Faculty.

1.3 An applicant for admission to the course of study for a Postgraduate Diploma shall

- (a) have qualified for a Graduate Certificate of the University in an approved field of study or an equivalent award of another institution accepted for the purpose by the Faculty *or*
- (b) have qualified for a degree or a three year diploma of the University in an approved field of study, or for an equivalent award of another institution accepted for the purpose by the Faculty.

1.4 An applicant for admission to the course of study for a Master's degree by coursework shall

(a) have qualified for the Bachelor of Agricultural Science (Honours) or the Bachelor of Applied Science (Honours) of the University *or*

(b) have qualified for a degree or other award of the University in an approved field of study or an award of another institution accepted by the Faculty as being equivalent to the Honours degree. Such an award may be a postgraduate Diploma with a significant research component in the field of study of the proposed research *or*

(c) have qualified for a Bachelor's degree of the University in an approved field of study or an equivalent award of another institution accepted for the purpose by the Faculty, and

(i) have completed at a satisfactory standard (normally credit average) subjects to the value of 12 points from the Graduate subject pool in the same field of study *or*

(ii) have other relevant practical experience approved by the Faculty.

1.5 An applicant for admission to the Master of Agricultural Science or the Master of Applied Science shall

- (a) have qualified for an Honours degree offered by the Faculty or its equivalent in an institution accepted for the purpose by the Faculty *or*

- (b) have qualified for a Postgraduate Diploma of the University which contained a significant research component in the field of study of the proposed Master's research or an equivalent award in an institution accepted for the purpose by the Faculty *or*
  - (c) have qualified for a Bachelor's degree of the University in an approved field of study or an equivalent award in an institution accepted for the purpose by the Faculty and have relevant professional experience.
- 1.6 Applicants deemed to have a deficiency in some part of their preparation for candidature may be required to complete such other work as may be prescribed during the first year of their candidature.
- 1.7 Under the authority delegated to it by Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate, the Graduate Diploma or the Postgraduate Diploma a person who does not satisfy the requirements of 1.1, 1.2 or 1.3 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate, the Graduate Diploma or the Postgraduate Diploma.
- 1.8 With the approval of the Board of Graduate Studies, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Master's degree a person who does not satisfy the requirements of 1.4 or 1.5 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the Master's degree.

## **2 Qualification requirements**

- 2.1 To qualify for the Graduate Certificate a candidate shall present subjects to the value of 12 points (which may not include 6043 Research Proposal or a Research Project) from the Graduate Subject Pool.

A candidate who has been enrolled for the coursework Master's degree, the Postgraduate Diploma or the Graduate Diploma and who as such a candidate has completed the work prescribed for a Graduate Certificate and who has not been awarded the Master's degree, the Postgraduate Diploma or the Graduate Diploma shall, on written application to the Faculty Registrar, be awarded the appropriate Graduate Certificate, subject to the student discontinuing candidature for the higher award.

- 2.2 To qualify for the Graduate Diploma a candidate shall present subjects to the value of 24 points, no fewer than half of which are from the Graduate Subject Pool and which may not include 6043 Research Proposal or a Research Project.

A candidate holding a Graduate Certificate of the University who has counted or presented the subjects in the Graduate Certificate towards the requirements of the Graduate Diploma shall surrender the Graduate Certificate before being admitted to the Graduate Diploma.

A candidate who has been enrolled for the coursework Master's degree or the Postgraduate Diploma and who as such a candidate has not been awarded the Master's degree or the Postgraduate Diploma shall, on written application to the Faculty Registrar, be permitted to transfer to the appropriate Graduate Diploma, subject to the student discontinuing candidature for the award of Master's degree or Postgraduate Diploma.

- 2.3 To qualify for the Postgraduate Diploma a candidate shall present subjects to the value of 24 points, including, if required, 6043 Research Proposal, 6495 Research Methodology or 7046 Research Methodology and Experimentation; a minimum of six and a maximum of nine points deriving from research; and the balance from the Graduate Subject Pool.

A candidate holding a Graduate Certificate of the University who has counted or presented the subjects in the Graduate Certificate towards the requirements of the Postgraduate Diploma shall surrender the Graduate Certificate before being admitted to the Postgraduate Diploma.

A candidate who has been enrolled for the coursework Master's degree and who as such a candidate has completed the work prescribed for the Postgraduate Diploma and who has not been awarded the Master's degree shall, on written application to the Faculty Registrar, be awarded the appropriate Postgraduate Diploma, subject to the student discontinuing candidature for the higher award.

- 2.4 To qualify for the Master's degree by coursework a candidate shall present subjects to the value of 36 points, including, if required, 6043 Research Proposal, 6495 Research Methodology or 7046 Research Methodology and Experimentation; a minimum of twelve and a maximum of twenty one points deriving from research; and the balance from the Graduate Subject Pool.

Except with the permission of the Faculty, the Master's degree program, if taken full-time, will normally be completed in eighteen months,

depending on the nature of the project activity, and over not less than two and not more than five years if taken part-time.

A candidate holding a Graduate Certificate or a Postgraduate Diploma of the University who has presented the subjects in the Certificate or Diploma towards the requirements of the Master's degree by coursework shall surrender the Graduate Certificate or Postgraduate Diploma before being admitted to the Master's degree.

- 2.5** To qualify for the Master's degree by research a candidate must submit a satisfactory thesis on a subject approved by the Faculty and shall adduce evidence acceptable to the Faculty that the thesis is the candidate's own work. The thesis shall give the results of original research on which the candidate has been engaged.

Except on the recommendation of the Faculty and with the approval of the Board of Graduate Studies, the work for the degree shall be completed and the thesis submitted in not less than one year and not more than three years from the date of commencement of the candidature in the case of a full-time candidate or not less than two years and not more than six years from the date of commencement of the candidature in the case of a part-time or external candidate.

note: A candidate who holds an Honours degree of the University of Adelaide approved for this purpose or its equivalent in a university recognised by the University of Adelaide may proceed to the degree of Master of Agricultural Science or Master of Applied Science at the expiration of one year from the date of the candidate's admission to the Honours degree of Bachelor; no other candidate may proceed to the degree before the expiration of two years from the date of the beginning of the candidature.

### **3 Graduate Subject Pool**

- 3.1** There shall be a Graduate Subject Pool which will include graduate level subjects, approved supplemented level III subjects (either of which may include intensive workshops) and research projects.

- 3.2** The selection of subjects and activities will be made by students in consultation with and with the approval of Postgraduate Coursework Advisers or supervisors. Such selected components

- (a) shall form part of the formal coursework requirements, or
- (b) may form a preparatory portion of the research degrees.

- 3.3** The following subjects shall comprise the Graduate Subject Pool:

4063	Accounting for Agricultural Business	3
4091	Advanced Biometry S	3
9086	Advances in Oenology S	3
1086	Advanced Recombinant DNA Techniques	1.5
8138	Advanced Plant Breeding S	3
8424	Advertising and Promotion S	3
9515	Agribusiness in the Australian Economy	3
1190	Agricultural and Rural Development	3
1042	Agricultural Biotechnology S	3
4953	Agricultural Business Finance G	3
9002	Agricultural Business Management	3
8597	Agricultural Engineering	4
4843	Agricultural Marketing Principles and Strategies	3
1341	Agroforestry S	3
7824	Animal Breeding Technologies S	3
9477	Animal Biotechnologies S	3
9259	Animal Welfare	3
4497	Applied Genetics S	3
9321	Applied Market Research S	3
3285	Biological Control S	3
5088	Biology and Diversity of Insects S	3
3362	Breeding and Genetics of Animals	1.5
1927	Business Management for Viticulture and Oenology S	3
5370	Cellar Management S	1.5
7518	Communications and Agricultural Extension	4
6957	Communications in Veterinary Public Health	3
3741	Conservation Biology S	3
4726	Crop Physiology III S	3
6363	Crops and Pastures G	4
5264	Current Topics in Animal Diseases	3
8225	Diseases and Nutrition of Livestock S	3
6864	Distillation and Fortified Winemaking S	1.5
1581	Dryland Farming Systems	4
1507	Ecological Biochemistry S	3
4488	Ecological Modelling S	3
3089	Ecology and Management of Freshwater Systems S	3

*Agricultural and Natural Resource Sciences — Postgraduate Courses*

6139 Ecology and Management of Rangelands S	3	8656 Meat Plant Management and Administration	3
7376 Economics for Agricultural Business	3	9110 Mineral Nutrition of Plants S	3
2763 Economics of Resource Management S	3	9238 Molecular Activity of Plant Cells S	3
1756 Economics of Soil Conservation	1.5	7687 Molecular Genetics of Plants IIIS	3
7816 Environmental Chemistry S	3	9503 Molecular Markers in Plant Breeding	1.5
5293 Environmental Systems	4	6627 Molecular Tools for Diagnosis of Plant Pathogens	1.5
1984 Environmental Toxicology S	3	5297 Natural Resources Management	4
7682 Ethical Issues in Agricultural Business S	3	8130 Natural Resources Methodology	4
9359 Expert Systems for Environmental Management S	3	5867 Ornamental Horticulture S	3
6632 Extensive Livestock A	3	3569 Pathogen - Plant Interactions S	3
4423 Farm Management A S	3	8114 Physiology of Farm Animals S	3
6333 Farm Management B S	3	9028 Plant Disease and the Environment S	3
5325 Fauna Management S	3	2724 Plant Nutrition for Productive Systems	1.5
7194 Fruit and Nut Crops S	3	3010 Plant Tissue Culture and Transformation	1.5
5715 Fungal Biology S	3	9105 Problems in Agricultural Business A	3
5698 Genetic Technologies for Plant Improvement S	3	9281 Problems in Agricultural Business B	3
8583 GIS for Environmental Management S	3	5932 Quality Assurance in the Meat Industry	3
2746 Grape Industry Practice, Policy and Communication S	1.5	4837 Quantitative Methods in Agricultural Business	3
4600 Horticultural Production S	3	4311 Remote Sensing and Land Capability Assessment S	3
4539 Horticultural Science S	3	1986 Reproductive and Postharvest Horticulture S	3
8632 Indigenous Australians and Environmental Management S	3	6495 Research Methodology	4
7032 Industry Experience (Oenology) S	3	7046 Research Methodology and Experimentation	3
8962 Insect Behaviour S	3	6946 Research Methodology and Methods	3
9444 Integrated Pest Management S	3	6043 Research Proposal	3
8632 Integrated Spatial Information Systems S	3	8422 Retail Selling and Practice S	3
2729 Intensive Livestock A	3	1058 Rural Sociology	4
7912 International Business Environment S	3	2665 Seminars: Agricultural and Natural Resource Sciences	1
8629 International Finance S	3	2491 Sensory Evaluation of Agricultural Products S	3
7968 Introductory Winemaking S	3	6694 Sensory Science S	3
2820 Issues in Wine Business S	3	7764 Sensory Science V S	1.5
5078 Laboratory Animal Science I	3	2793 Social Psychology	4
6454 Laboratory Animal Science II	3	9000 Soil Classification	1.5
6949 Legal Issues in Agricultural Agricultural Marketing S	3	3065 Soil Conservation G	4
1788 Managing Agricultural Development	3		
8841 Meat Inspection	3		

2282 Soil Ecology S	3	3004 Project C (ANR) (One Semester)	6
5026 Soil Fertility S	3	1320 Project D (ANR)	8
4366 Soil Management and Conservation S	3	8676 Project D (ANR)(Mid-year)	8
7672 Soil Survey	1.5	4621 Project D (ANR)(One Semester)	8
8588 Spatial Information Systems	1.5	2211 Project E (ANR)	9
4477 Stabilisation and Clarification S	3	2018 Project E (ANR)(Mid-year)	9
9022 Strategic Business Management S	3	3522 Project E (ANR)(One Semester)	9
5684 Table and Drying Grape Production S	1.5	2854 Project F (ANR)	12
8381 The Global Market for Wine	3	8492 Project F (ANR)(Mid-year)	12
8409 Topics in Agricultural Business A	3	7382 Project F (ANR)(One Semester)	12
6492 Topics in Agricultural Business B	3	7188 Project G (ANR)	21
4945 Topics in Animal Science	3	3661 Project G (ANR)(Mid-year)	21
6107 Topics in Animal Science A	3	8200 Natural Resources Project I	4
6826 Topics in Crop Protection	3	6846 Natural Resources Project II	12
2379 Topics in Soil Science	3	<b>3.4</b> Candidates may include, within those subjects presented to qualify for a coursework award, graduate level subjects from outside the Graduate Subject Pool subject to the approval of the Postgraduate Coursework Adviser and the Postgraduate Studies Committee.	
9822 Topics in Soil Science A	3	<b>4 Status, exemption and credit transfer</b>	
9508 Topics in Soil Science B	3	<b>4.1</b> No candidate will be permitted to count for an award any subject, project work, dissertation or research thesis which, in the opinion of the Faculty, contains substantially the same material as any other subject, project work, dissertation or research thesis which the candidate has already presented for another qualification.	
5225 Vegetable Crops S	3	<b>4.2</b> A candidate who desires that work completed should be counted towards the requirements of these Specific Course Rules may, on written application to the Faculty Registrar (in the case of the Graduate Certificate, the Graduate Diploma or the Postgraduate Diploma) or the Registrar, Graduate Studies Branch (in the case of the Master's degree by coursework or the Master's degree by research), be granted such exemption from the requirements as the Faculty or the Board of Graduate Studies on the advice of the Faculty shall determine.	
5180 Vineyard and Winery Operations I S	3	<b>5 Program approval</b>	
9607 Vineyard and Winery Operations II S	3	<b>5.1</b> Every candidate for the Graduate Certificate or the Graduate Diploma in consultation with the Postgraduate Coursework Adviser shall prepare a program of subjects and activities to be submitted for the approval of the Postgraduate Coursework Adviser.	
3008 Vertebrate Pest Control S	3		
9630 Viticultural Engineering and Operations S	3		
7536 Viticultural Production A S	3		
2195 Viticultural Production B S	3		
7104 Viticultural Science S	3		
7114 Wine Business Management	3		
6319 Wine and Society	3		
9701 Wine Packaging and Quality Management S	3		
1005 Winemaking S	3		
5059 Winery Engineering III S	3		
<b>Research projects</b>			
4205 Project A (ANR)	3		
7215 Project A (ANR)(Mid-year)	3		
5215 Project A (ANR) (One Semester)	3		
7949 Project B (ANR)	4		
6095 Project B (ANR)(Mid-year)	4		
9502 Project B (ANR) (One Semester)	4		
1717 Project C (ANR)	6		
3653 Project C (ANR)(Mid-year)	6		

5.2 Every candidate for the Postgraduate Diploma or the Master's degree by coursework in consultation with the Postgraduate Coursework Adviser shall prepare a program of coursework and project work to be submitted for the approval of the Postgraduate Coursework Adviser. The project work shall be under the direction of a supervisor or supervisors who shall normally be members of the academic staff of the University, but an external supervisor may also be appointed.

5.3 Every candidate for the Master of Agricultural Science or the Master of Applied Science shall

- (a) prior to enrolment indicate in general terms the subject of the research work on which the candidate proposes to submit a thesis
- (b) provide certification from the Head of Department of the intended supervisor that:
  - (i) the applicant has shown evidence of ability to undertake work for the Master's degree
  - (ii) the proposed research project is appropriate
  - (iii) there are available members of staff qualified and able to provide supervision of the proposed candidacy throughout its likely duration *and*
  - (iv) suitable resources and facilities are available (either in the University or, by arrangement acceptable to the Faculty, elsewhere) for the proposed research to be undertaken.
- (c) complete a structured program of activities within the first twelve months from the commencement of candidature.

Continuation of the candidate's enrolment is conditional upon the completion of the activities to the satisfaction of the department.

If the applicant is accepted as a candidate for the degree concerned the Faculty shall appoint at least two supervisors to guide the candidate in the candidate's work.

- 5.4 (a) Except by permission of the Faculty, the whole of the work for the Master's degree must be completed within the University.
- (b) Subject to such conditions as it may determine in each case, the Faculty may permit project or research work to be undertaken outside the University provided that it can be satisfied that

- (i) this will result in academic benefit to the candidate
- (ii) there will be adequate contact and interaction between the candidate and the candidate's internal supervisor/s
- (iii) the supervisor's access to any experimental work, the candidate's availability for seminars and other discussions, and the publication of results will not thereby be prejudiced.

## 6 Assessment and examinations

### Coursework Awards

- 6.1 There shall be four classifications of pass in each subject in the Graduate Subject Pool: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.
- 6.2 A candidate who fails in a subject and desires to take the subject again shall attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe, unless specifically exempted therefrom after written application to the Head of Department for such exemption.
- 6.3 A candidate who has twice failed in any subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as may be prescribed.
- 6.4 A candidate shall not be eligible for examination in a subject unless the prescribed work has been completed to the satisfaction of the teaching staff concerned. A candidate who is not eligible for examination shall be deemed to have failed the examination.
- 6.5 For the purpose of this Specific Course Rule a candidate who fails, without a reason accepted by the Dean of the Faculty (or nominee), to attend all or part of a final examination (or supplementary examination if granted) after remaining enrolled for at least nine teaching weeks of that semester, shall be deemed to have failed the examination.
- 6.6 On completion of the work for the Postgraduate Diploma or the coursework Master's degree the candidate shall inform the Postgraduate Coursework Adviser concerned and lodge with the Postgraduate Coursework Adviser three copies of the dissertation prepared in accordance with directions given to candidates from time to time.
- 6.7 On the submission or re-submission of the dissertation the Faculty shall nominate examiners who shall normally be members of

the academic staff of the University, but an external examiner may be appointed. The examiners may recommend that the dissertation

- (a) be accepted subject to such amendments as the examiners may have suggested *or*
- (b) be accepted subject to satisfactory oral examination *or*
- (c) be not accepted but sent back to the candidate for revision and re-submission *or*
- (d) be rejected.

The examiners of a dissertation re-submitted following recommendation (c) above may recommend only (a), (b) or (d) above.

Having considered the reports of the examiners the Faculty shall determine whether the dissertation is satisfactory.

### Research Awards

**6.8** On completion of the work for a research Master's degree the candidate shall inform the Head of Department concerned and lodge with the Registrar, Graduate Studies Branch, three copies of the thesis prepared in accordance with directions given to candidates from time to time.

**6.9** On the submission or re-submission of the thesis the Faculty shall appoint two examiners, at least one of whom shall be external to the University, to report on the thesis and any supporting papers which the candidate may submit.

The examiners may recommend that the candidate

- (a) be awarded the degree *or*
- (b) be awarded the degree but that minor amendments be made *or*
- (c) be awarded the degree subject to the specified amendments being made to the thesis *or*
- (d) be not awarded the degree but be permitted to re-submit the thesis in revised form *or*
- (e) not be awarded the degree.

The examiners of a thesis re-submitted following recommendation (d) may recommend only (a), (b) (c) or (e) above.

Having considered the reports of the examiners the Faculty shall determine whether the thesis is satisfactory.

## 7 Review of academic progress

**7.1** The progress of each candidate in the Certificate, Diploma and coursework Master's program shall

be reviewed by the Faculty each academic year.

**7.2** The progress of each candidate in the research Master's programs shall be reviewed annually and satisfactory progress shall be a condition of re-enrolment. Should the candidate's work be unsatisfactory further review and action shall be taken in accordance with University policies and procedures.

## 8 General

**8.1** A candidate who complies with the foregoing conditions shall, on the recommendation of the Faculty, be admitted to the certificate, diploma or degree concerned.

## Syllabuses

### notes

- 1 The complete list of subjects in the Graduate Subject Pool is set out in Specific Course Rule 3. Included in the list are supplemented Level III subjects: that is Level III subjects with supplementary requirements; these subjects are distinguished by an 'S' in the title. Syllabus entries have not been included for these subjects. Please refer to the corresponding Level III entry (see index). Additional information will be provided at the first lecture session.
- 2 Not all subjects listed in the Graduate Subject Pool will be available each year. While every effort has been made to offer accurate information on duration, staffing considerations may necessitate alterations. Information as to which subjects will be offered in a given year will be available from the departments

### 4063 Accounting for Agricultural Business

3 points semester 2  
internal mode

3 hour seminar each week

The subject covers all aspects of Accounting, ie Financial, Management and Cost. It provides an introduction to the nature, purpose, ethics, and legal aspects of accounting as an information specialisation, with particular emphasis on agricultural businesses. It will also enable students to distinguish, classify and analyse different agricultural costs and cost structures in farm and off-farm businesses. The integrated use of computerised systems and legal principles will be used to cover aspects of decision-making in relation to such factors as pricing, investment, break-even and risk.

*assessment:* written, practical assignments 50%; written 3 hour exam 50%

### 1086 Advanced Recombinant DNA Techniques

1,5 points one week in semester 2  
40 hours

*assumed knowledge:* 9503 Molecular Markers in Plant Breeding; or equivalent background knowledge of recombinant DNA methods

This subject builds on the basic recombinant DNA methodologies taught in 9503 Molecular Markers in Plant Breeding. The following techniques will be taught: cloning in lambda vectors; construction of DNA library; screening lambda libraries; lambda DNA isolation; DNA sequencing; computer assisted sequence analysis. Lecturers will describe various cloning techniques, methods of clone analysis and application of molecular genetics. The emphasis will be on plant molecular genetics.

*assessment:* work book assessment

### 9515 Agribusiness in the Australian Economy

3 points semester 2

3 hours lectures/seminars/tutorials a week

this subject focuses on current issues relating to the food and fibre business in Australia. It examines business strategy aspects relevant to production and marketing of food and fibre products, together with related activities of government. Of particular importance are interrelationships between agribusiness firms and the macro environment. Topics will include production and consumption decisions in the firm and household, agribusiness management, the labour market and the agri-food market. These and other topics are examined within the context of organisational and structural changes within the farm and off-farm sectors. Also covered are the implications of the natural environment for farm and off-farm agribusiness decision making.

*assessment:* exam, assignments and presentations

### 4953 Agricultural Business Finance G

3 points semester 1  
internal mode

2 lectures/tutorial/computer sessions a week

Introduction to agricultural financial management, mathematics of finance, risk and return, valuation, capital budgeting, leverage, financial performance, working capital management, long term financing, loan negotiation, futures and options.

*assessment:* assignments, tests, final examination

### 9002 Agricultural Business Management

3 points semester 1  
multi-modal

3 hour seminar each week

The aim of this subject is to provide perspective and understanding of the overall management role, and to demonstrate linkages between various management functions. Aspects covered include business and society, business management, organisational design, entrepreneurship, human resources management, production management, marketing management, accounting management, financial management, information management, business and social ethics, and careers in agricultural business.

*assessment:* assignments, seminar presentations

**8597 Agricultural Engineering**

4 points full year

3 hours per week

The subject consists of a project, negotiated between the student and the Department of Agronomy and Farming Systems, and assignment and tutorial work as directed by the Department.

Each component is complementary in that the assignment and tutorial work is directed toward the theoretical and analytic basis of the topic in which the project has been selected.

*assessment:* written reports

**4843 Agricultural Marketing Principles and Strategies**

3 points semester 1

3 hours per week

The aim of this subject is to give students an understanding of agricultural marketing principles through an introduction to the basic concepts and practices in marketing. Topics covered include the marketing environment, analysing marketing opportunities, organising for marketing, product and price decisions, channel decision, and communication and promotion decisions.

*assessment:* exam 50%, assignments 50%

**1341 Agroforestry S**

3 points semester 1

See 1536 Agroforestry III for content details

*assessment:* as for 1536, but with extra written work

**9259 Animal Welfare**

3 points semester 1

78 hours

The aim of this subject is to provide the necessary knowledge and understanding of the scientific and ethical bases of animal welfare and to be able to review objectively the current animal welfare problems in society. It does not seek to change people's minds, but to ensure that they have, or can find, the relevant information and have the required skills of analysis and integration. The subject addresses animal welfare issues covering a range of disciplines, including biology, veterinary science, medicine, agriculture, philosophy, economics and sociology. It does not include practical animal handling.

The subject will comprise lectures, tutorials and field trips. The two major components, science and ethics are intermingled. In general, the subject develops progressively from simple to complex ethical questions relating to animal welfare.

*assessment:* written assignments, reports 50%; written 3 hour exam 50%

**7518 Communications and Agricultural Extension**

4 points full year  
external, odd years only

3 hours per week

Theory and models of communication. Language, meaning, culture, written and oral communications. Report writing. Readability. Style in writing. Application of learning and communications theories to the presentation of information. Role of different extension techniques in the education process. Credibility, empathy and rapport. Communications for various audiences. The scope, purpose, structure and organisation of the agricultural extension services in the different states of Australia. Comparison of the history and underlying philosophy of agricultural extension services in Australia with those of other countries. Organisations and agencies (government and non-government) with a role in agricultural extension. The audience for agricultural extension. Agricultural extension in developing countries. Legal liability in extension. Group process and leadership. The preparation of press articles, tape-recordings, video-tape programs and micro-teaching presentations are included in practical exercises.

*assessment:* assignments

**6957 Communications in Veterinary Public Health**

3 points semester 1

contact hours to be advised

This subject covers a wide range of communication topics including effective communication skills in the workplace, government standards for workplace communication, training requirements for staff, managing operations and client relationships, customer service, team leadership and supervision, working in a team and negotiation skills. Students will also develop competence in computer operations, software and keyboard skills.

*assessment:* to be advised

**6363 Crops and Pastures G**

4 points full year  
external odd years only

3 hours per week

*assumed knowledge:* degree in Agriculture

An advanced subject providing a detailed knowledge of recent technological developments in the production of crops and pastures in southern Australia with

particular reference to dryland farming and promoting the ability to conduct field experiments and interpret the results of agronomic research.

The syllabus includes the technology of cereal, grain legume and oil-seed crop production, with particular emphasis on the effects of crop rotations, tillage systems and fertiliser usage on crop production; the selection and evaluation of herbage plants in relation to physical and biological factors in the environment; methods of pasture establishment, management, conservation and utilisation; recent advances in the control and management of weeds, pests and diseases of crops and pastures.

*assessment:* to be advised

### 5264 Current Topics in Animal Diseases

3 points semester 1

2 lectures, 4 hours tutorials/practicals per week

*prerequisites:* degree in Biological Science

*restrictions:* 8225 Animal Diseases and Control S

The course will consist of lectures, tutorials and practical classes covering symptoms, causes and effects of production limiting diseases of livestock in Mediterranean and arid zone climates. The primary focus will be diseases of sheep and cattle, pigs and poultry but other grazing species may be covered if there is a demand. Exotic animal diseases of concern to Australian agriculture will also be covered.

*assessment:* seminar 10%; assignment 20%; tutorial/practical participation 20%; examination 50%

### 1581 Dryland Farming Systems

4 points full year  
internal each year  
external even years only

2 lectures/tutorials per week extending to half-day sessions at monthly intervals for seminars; field exercises

*assumed knowledge:* 1028 Principles of Sustainable Agriculture or equivalent

The use of a systems approach, within an ecological framework, for the study of dryland farming. The characteristics and operation of various types of dryland farming systems with emphasis on the Australian cereal belt. The principles underlying the integration of crops, pastures and livestock in dryland farming systems. Methods of defining the conditions and practices under which high productivity may be sustained in the major systems of the Australian cereal belt. Methods of evaluating a particular dryland farming system in order to define major limiting factors, interactions and regulating processes, and to

suggest ways of improving productivity and sustainability.

*assessment:* to be advised

### 7376 Economics for Agricultural Business

3 points semester 1  
internal mode only

3 hour seminar each week

This subject provides a background of economic principles for study of other subjects in agricultural business. The subject is in two parts with a major emphasis on the application of the principles to agricultural related situations: 1 - basic tools required in analysing individual and organisational economic decision-making. Topics include: supply and demand analysis consumer equilibrium theory including utility and indifference approaches, production theory; production functions and analysis of short and long-run costs of production, market structures and objectives of the firm, pricing policies and methods, market failure, welfare and public policy issues. 2 - the workings of the Australian economy in its international context. Topics include: theories of employment, inflation, interest rates and exchange rates; and current policy issues such as the use and abuse of monetary policy, inflation and the foreign debt debate.

*assessment:* written assignments 50%; written 3 hour exam 50%

### 6632 Extensive Livestock A

3 points semester 1 or 2  
external mode only

2 lectures, two hour practical per week

*assumed knowledge:* 1022 Beef, Sheep and Goat Production IA (or equivalent)

This subject presents recent developments in animal science and husbandry relevant to extensive animal production. It examines industry organisation, physiology, breeding, health and nutrition. A degree of specialisation will be allowed in sheep, beef cattle or goat production.

### 2729 Intensive Livestock A

3 points semester 1 or 2  
external mode only

1 lecture, 2 hours tutorials/practical work per week

This subject develops or extends the student's knowledge of the application of the principles and practices of intensive livestock production. The program will involve an examination of the following topics: accommodation of livestock; nutrition; animal behaviour; reproduction and animal breeding; animal health; animal welfare; industry structure and

economics of production; marketing; product evaluation; by-product utilisation; alternative forms of meat production.

assessment: exam 50%; assignments 50%

### 7912 International Business Environment S

3 points semester 2

3 hours seminars/lectures per week

*assumed knowledge:* 4843 Agricultural Marketing Principles and Strategies; 9002 Agricultural Business Management; Economics for Agricultural Business or equivalent.

This capstone subject is designed to provide an overview of the international trade and financial environment within which business must function with particular emphasis on the broader Asian region, including the Middle East. It considers comparative advantage and the basis for international trade; factor movement across national boundaries, trade policies such as tariffs, quotas, VERs, administrative regulations, dumping, export subsidies and international commodity agreements; international and regional commercial policies; exchange rate determination; the balance of payments and its adjustment under alternative exchange rate regimes; exchange control; the international currency system; and exchange rate policies.

*assessment:* exam 50%; assignments 50%

### 5078 Laboratory Animal Science I

3 points not offered in 1999

2 lectures, 4 hours of tutorials per week

*prerequisites:* degree in Biological Science

Basic biology of laboratory animals, including taxonomy, anatomy, physiology, nutrition, behaviour. Husbandry and production of laboratory animals, including housing, reproduction, genetic monitoring and animal handling. Legal, ethical and welfare considerations relating to laboratory animal management, including state, national and international regulations and practices; the principles of reduction, replacement and refinement; the Australian Code of Practice.

*assessment:* presentation of seminar 10%; written project 20%; tutorial/workshop participation 20%; written examination 50%.

### 6454 Laboratory Animal Science II

3 points not offered in 1999

2 lectures, 4 hours tutorials per week

*prerequisites:* 5078 Laboratory Animal Science I

*assumed knowledge:* degree in biological science

Diseases of laboratory animals, diagnosis, treatment and prevention of diseases, health monitoring. Management, organisation and design of animal facilities, staff management, financial control, design and operation of barrier facilities, containment of microbiological or toxic hazards. Use of laboratory animals in research, models of disease, toxicology studies, surgical models. Transgenic animals and their use, occupational health and safety issues. Statistics and data handling.

*assessment:* presentation of seminar 10%; written project 20%; tutorial/workshop participation 20%; written examination 50%

### 1788 Managing Agricultural Development

3 points semester 1

3 hour seminar per week

*assumed knowledge:* degree in Agriculture or equivalent

The subject aims to provide students with an analytical and structural framework for management of agricultural development in developing countries. It deals with functions, structures and organisation in managing agricultural development. Various types of management, for example financial, information and marketing, are studied which link and involve the production and marketing programs. Applications will be studied, eg credit and input supply, land reform, extension and research. Other aspects include: policy making and agricultural development planning, management in government and non-government organisations, and participation at the community level.

*assessment:* as arranged by the supervisor/lecturer

### 8841 Meat Inspection

3 points semester 1

contact hours to be advised

This subject will cover AQIS requirements for ante-mortem and post-mortem inspection, procedures for identification of diseased animals, inspection and disposition procedures, record keeping, animal welfare issues and other regulatory requirements.

*assessment:* to be advised

### 8656 Meat Plant Management and Administration

3 points semester 1

contact hours to be advised

This subject will cover on-plant management and administration, including management of human resources, budgeting, administration of material resources, record keeping and the understanding of

export meat legislation. The structure of the meat industry will be described including regulatory, cultural, technical and environmental aspects. The principles of meat science will be covered.

*assessment:* to be advised

### 9503 Molecular Markers in Plant Breeding

1.5 points one week in semester 1

40 hours

*assumed knowledge:* degree in Agricultural Science or Science

The aim of this subject is to teach the basic principles of recombinant DNA technology with an emphasis on the application of these techniques to plant breeding. The following techniques will be taught: DNA isolation from plant tissue; restriction digestion and gel electrophoresis; cloning DNA in plasmid vectors; plasmid DNA isolation; Polymerase Chain Reaction; Southern hybridisation; construction of linkage maps. Lectures will cover basic aspects of DNA structure and the organisation of the plant genome, the application of molecular markers to breeding programs and various related recombinant DNA techniques.

*assessment:* work book assessment

### 6627 Molecular Tools for Diagnosis of Plant Pathogens

1.5 points beginning of semester 1

35 hours comprising lectures and practicals over 5 days quota of 20

*prerequisites:* degree in Science, Agricultural Science or Environmental Science or equivalent. Some previous experience with techniques in molecular biology would be an advantage.

Molecular methods for the sensitive and rapid diagnosis of fungal, bacterial and viral pathogens, using both immunological and nucleic acid probing techniques appropriate for use by plant pathologists.

*assessment:* to be advised

### 2724 Plant Nutrition for Productive Systems

1.5 points semester 2 break

10 lectures, 5 tutorials, 5-hour field trip, 20 hours laboratory, glasshouse, library work - over one week

*restrictions:* 3434 Mineral Nutrition of Plants

*assumed knowledge:* degree/diploma in Science or Agricultural Science

Topics considered are: symptomatology, diagnosis and prognosis, correction and fertiliser strategies, interactions between nutrients, interactions with other factors in production such as, genotype, disease,

herbicide, climate. Contemporary issues: pollution, profitability, role of plant nutrition in sustainable systems for nutrition of humans and animals. Experimental methodology.

*assessment:* written work, short presentation

### 3010 Plant Tissue Culture and Transformation

1.5 points semester break (July)

8 hours a day for 5 days

*assumed knowledge:* B.Sc. (Biol)/B.Ag.Sc.

This subject is designed to introduce participants to the basic principles and techniques of tissue culture and plant transformation. Each day of the course regular periods of time will be devoted to background information, practical training followed by discussion of results and the application of techniques. The topics covered will be: basic principles, media composition, selection of growth regulators, explant tissue; *in vitro* propagation of horticultural plants; shoot multiplication (direct organogenesis); mass propagation of plants from callus (indirect organogenesis); out planting; hardening and acclimatisation to soil; establishment of a cell suspension culture and its maintenance and applications; plant transformation, using *Agrobacterium* and direct DNA delivery techniques, its application in functional analysis of genes and genetic engineering of crop plants.

*assessment:* practical reports 60%; written assignment 40%

### 9105 Problems in Agricultural Business A

3 points semester 1  
multi-modal

contact arranged with Head of Department

This subject will offer the student the opportunity to investigate a problem in the agricultural business area. The problem will relate to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

### 9281 Problems in Agricultural Business B

3 points semester 2  
Multi-modal

contact arranged with Head of Department

This subject will offer the student the opportunity to investigate a problem in the agricultural business area. The problem will relate to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

**5932 Quality Assurance in the Meat Industry**

3 points semester 1

contact hours to be advised

This subject will describe quality assurance principles, hazard analysis and critical point determinations, monitoring of quality assurance practices, compliance and non-compliance with QA agreements, Federal legislative requirements and National Plant Monitoring System reports. Candidates will learn to perform and supervise QA inspection procedures including water testing, control systems, construction and equipment standards, effluent discharge, pest control and residue testing. The development of an exotic disease emergency plant will be described and implemented.

*assessment:* to be advised

**4837 Quantitative Methods in Agricultural Business**

3 points semester 1

2 lectures, two-hour practical/tutorial per week

*assumed knowledge:* Business Data Analysis or Statistics

The aim of this subject is to introduce a collection of management science/operations research techniques that helps business managers make better decisions and to foster a logical, consistent and systematic approach to problem formulation, problem solving and decision making. Emphasis is placed on model formulation and interpretation rather than algorithms. Topics to be covered include mathematical programming, network modelling, CPM and PERT, inventory models, Monte Carlo simulation, decision analysis under risk, and time series forecasting.

*assessment:* theory and practical exam, case studies, other assignments.

**6495 Research Methodology**

4 points semester 1

2 hours per week

*prerequisites:* admission to B.App.Sc.(Hons) or to a postgraduate course offered by the Faculty.

This subject introduces students to the research process. It covers topics such as priority-setting and planning; establishing and designing experiments; data collection and management; statistical analysis; grant application; scientific writing and communication of research results.

*assessment:* examination 45%; assignments 30%; tutorial exercises 15%; seminar 10%

**7046 Research Methodology and Experimentation**

3 points semester 1 or  
midyear break

3 lectures, 3 hour tutorial per week *or* 9-5 Monday to Friday over two weeks inclusive

*prerequisites:* degree in Agricultural Science or Science

*assumed knowledge:* first course in Biometry or Introductory Statistics

The Statistical Package GENSTAT 5 for Windows is introduced and utilised extensively throughout the subject. Revision of basic regression and analysis of variance methodology. A selection of topics from the following: extension of regression (both linear and non linear); design and analysis of complicated multi-factor experiments; Latin squares; analysis of covariance; generalised linear models (including probit analysis and logistic regression); multiple comparisons; multivariate methods (principal components and orthogonal polynomials).

As part of the subject a selection of 'case studies' will be discussed to illustrate the important steps involved during a research program (ie development of aims, setting of hypotheses, design of the experiment, collection of data, analysis and interpretation of results).

*assessment:* written assignment and final written exam

**6946 Research Methodology and Methods**

3 points semester 1 or 2

3 hours seminars per week

This subject familiarises the student with: the methodology of scientific research in agricultural business, ie. the system of rules and procedures on which agricultural business research is based and against which claims for knowledge are appraised; and the methods or techniques commonly used in agricultural business research, including quantitative techniques and computer techniques. Coverage of techniques emphasise the types of problems each technique is suitable for, and the strength and limitations of each technique. The first half of the subject concentrate on methodology, the second half on methods. Concepts required for writing a research proposal are presented in the first half of the semester. The methods are presented during the second half of the semester. During the second half of the semester, a student completes and successively refines his/her proposal to be presented at the end of the semester.

*assessment:* written assignments and seminar presentations 100%

### **6043 Research Proposal**

3 points semesters 1 or 2

The proposal will include a review of the relevant literature on a research topic, a justification of the proposal in terms of its academic and, if appropriate, industry value and a summary of the methodology which would be used in the investigation. The candidate will also present a seminar as part of the research proposal.

*assessment:* written report and seminar as arranged by the department

### **1058 Rural Sociology**

4 points full year  
internal each year  
external even years only

3 hours per week

This subject provides an introduction to sociology and the sociology of agriculture and natural resources. Topics include classical sociological theories, sociology of agriculture, sociology of natural resources, implications for Australian farmers and research methods — their application and interpretation.

*assessment:* assignment

### **2665 Seminars: Agricultural and Natural Resource Sciences**

1 point semester 1 or 2

Tutorials/discussions with supervisor by arrangement, or series of formal seminars/ discussions, one per fortnight

*prerequisites:* appropriate degree in Science, Agricultural Science, Environmental Science or Agricultural Business

Each student will be required: Either to prepare a substantial seminar paper (3000-5000 words) on a specific topic, present the paper to a selected audience and lead/contribute to the following discussion, the topic for the paper being related to but not covered by other subjects taken by the student; Or prepare assignments on a series of formal seminars attended by the student, on current research topics.

*assessment:* written seminar and/or assignment 70%; oral seminar presentation and discussion 30%

### **2793 Social Psychology**

4 points full year

3 hours per week

Introductory social psychology — educational objectives in learning programs, perception, attitudes, attitude theory and attitude measurement, balanced theories, motivation, needs, wants, goals; groups, group dynamics; principles of educational learning theories,

classical conditioning, operant conditioning, Gestalt psychology, cognitive theories, social learning, personality and motivational theories applied to learning, self-concept, defence mechanisms, non-Freudian personality and learning theories, elements of educational psychology, thinking methods and intelligence; adult education, agricultural education; human transactions, conflict resolutions; expectancy, role theory, social psychology of organisations, formal organisations, psychological implications of technological development, application of social psychology to working in developing countries.

*assessment:* to be advised

### **9000 Soil Classification**

1.5 points part semester 2

1 week intensive course

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

*restrictions:* 9971 Land Evaluation,

This subject deals with the principles and practice of soil classification, in particular the structure and theory of 'Soil Taxonomy', the *de facto* world soil classification system. Topics covered include soil description and application of soil classification to land evaluation for rural and urban use.

*assessment:* to be advised

### **3065 Soil Conservation G**

4 points full year  
external mode only

Attendance at residential school is compulsory

*assumed knowledge:* good basic knowledge of soils

Historical aspects of human activities on soil erosion, mechanics of wind and water erosion with emphasis on the theoretical aspects of soil structure, rainfall. Management of water repellent sands, soil acidity, sodicity, salinity and biology. Introduction to aerial photographic interpretation with respect to erosion features, classification and production of erosion maps. The use of remote sensing imagery for broad scale erosion mapping. Laboratory techniques for soil description. Introduction to the sociological and legal constraints involved in conservation procedures.

*assessment:* written assignments

### **7672 Soil Survey**

1.5 points part semester 2

1 week intensive course

*restrictions:* 9971 Land Evaluation, 9462 Remote Sensing and Land Evaluation, 4311 Remote Sensing and Land Evaluation S

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

This subject examines the theory and practice of soil survey and its role in land evaluation. The scope and limitations of different types of survey will be considered. The subject has a substantial field component in which students will produce their own survey and report.

*assessment:* to be advised

### **8588 Spatial Information Systems**

1.5 points part semester 2

1 week intensive course

*restrictions:* 7072 Remote Sensing, 9462 Remote Sensing and Land Evaluation, 4311 Remote Sensing and Land Evaluation S

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

This subject deals with the use of global positioning units, analysis of satellite imagery and the manipulation of this data within a geographic information base. Use of these systems for the production of land evaluation criteria is discussed.

*assessment:* to be advised

### **8381 The Global Market for Wine**

3 points semester 1

2 hours lectures, 1 tutorial per week

*prerequisites:* 7376 Economics for Agricultural Business; 7803 Marketing Management or 4843 Agricultural Marketing Principles and Strategies; 7168 Financial Reporting and Analysis or 4063 Accounting for Agricultural Business; or equivalent; and consent of subject coordinator

This subject examines the structure of the global wine industry, including regulatory agencies, organisations and major wine producing/consuming areas. Emphasis is given to consumer behaviour and marketing strategies employed in the major wine consuming markets.

*assessment:* written, oral project; exam

### **8409 Topics in Agricultural Business A**

3 points semester 1

3 hours per week

*restrictions:* approval of Head of Department and Agricultural Business Postgraduate Coursework Adviser

The subject will offer the opportunity to the student to cover a range of topics in Agricultural Business as it

relates to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

### **6492 Topics in Agricultural Business B**

3 points semester 2

3 hours per week

*restrictions:* approval of Head of Department and Agricultural Business Postgraduate Coursework Adviser

The subject will offer the opportunity to the student to cover a range of topics in Agricultural Business as it relates to the student's study program and the teaching and research interests of staff and visiting academics.

*assessment:* written assignments and oral presentations

### **4945 Topics in Animal Science**

#### **6107 Topics in Animal Science A**

3 points semester 1 or 2

26 lectures or equivalent; associated practical work

*assumed knowledge:* degree in Agricultural Science or Science

The subject will offer the opportunity to cover a range of topics on Animal Science related to the teaching and research interests of staff. Candidates should consult the Head of Department for topics currently available.

*assessment:* to be advised

### **6826 Topics in Crop Protection**

3 points semester 2

26 lectures or equivalent (comprising essays, tutorials and seminars); associated practical work

*prerequisites:* Bachelor's degree in Science, Environmental Science, Agriculture or equivalent

The subject will review some of the following topics: population dynamics and seasonal occurrence of insect, plant pathogen and weed pests; biology of pests; quantitative methods of sampling, decision making and damage assessment; chemical control; plant resistance and biotechnology; biological control; quarantine procedures; integration and implementation of crop protection practices. Candidates should consult the Head of Department for topics currently available.

*assessment:* to be advised

**2379 Topics in Soil Science**

3 points semester 1 or 2

24 lectures or equivalent; associated practical work

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

This subject may be offered from time to time as a means of examining current topics in soil science, soil management and land evaluation that are related to the research and teaching interests of staff and visiting scientists. Candidates should consult the Head of the Department for topics currently available.

*assessment:* to be advised

**9822 Topics in Soil Science A**

3 points full year

24 lectures or equivalent; associated practical work

*prerequisites:* appropriate degree in Science, Agricultural Science or Environmental Science

This subject may be offered from time to time as a means of examining current topics in soil science, soil management and land evaluation that are related to the research and teaching interests of staff and visiting scientists. Candidates should consult the Head of the Department for topics currently available.

*assessment:* to be advised

**9508 Topics in Soil Science B**

1.5 points semester 1 or 2

12 lectures or equivalent and associated practical work. May be presented as an intensive short course

*prerequisites:* appropriate degree in Science, Agricultural Science, environmental Science or equivalent

This subject may be offered from time to time as a means of examining current topics in soil science, soil management and land evaluation that are related to the research interests of staff and visiting scientists. Candidates should consult the Head of the Department for topics currently available.

**6319 Wine and Society**

3 points semester 1

2 hours lectures, 1 tutorial per week

This subject provides an overview of the origins of grape and wine production, the religious and cultural symbolism of wine, the development of an international wine trade in the 20th century and the role of fashion in those markets, an examination of wine and other forms of alcohol and health issues, an introduction to licensing, labelling, and product laws,

and a brief overview of the structure of the Australian wine industry.

*assessment* to be advised

**7114 Wine Business Management**

3 points semester 2

2 hours lectures, 1 tutorial per week

*prerequisites:* 7376 Economics for Agricultural Business; 7803 Marketing Management or 4843 Agricultural Marketing Principles and Strategies; 7168 Financial Reporting and Analysis or 4063 Accounting for Agricultural Business; or equivalent; and consent of subject coordinator

The subject examines linkages between the production of wine and business management, including accounting and financial management, marketing and organisation development. Key areas of focus are brand building and management, understanding costs of production, financing growth, application of decision making models to winery operations, and establishing a learning organisation.

*assessment:* projects 50%; examination 50%

**Research Projects**

**4205 Project A (ANR)**

**7215 Project A (ANR) (Mid-year)**

3 points full year

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**5215 Project A (ANR) (One Semester)**

3 points semester 1 or 2

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**7949 Project B (ANR)**

**6095 Project B (ANR) (Mid-year)**

4 points full year

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**9502 Project B (ANR) (One Semester)**

4 points semester 1 or 2

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**1717 Project C (ANR)**

**3653 Project C (ANR) (Mid-year)**

6 points full year

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**3004 Project C (ANR) (One Semester)**

6 points semester 1 or 2

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project.

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**1320 Project D (ANR)**

**8676 Project D (ANR) (Mid-year)**

8 points full year

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**4621 Project D (ANR) (One Semester)**

8 points semester 1 or 2

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**2211 Project E (ANR)**

**2018 Project E (ANR) (Mid-year)**

9 points full year

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**3522 Project E (ANR) (One Semester)**

9 points semester 1 or 2

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project.

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**2854 Project F (ANR)**

**8492 Project F (ANR) (Mid-year)**

12 points full year

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project.

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course

**7382 Project F (ANR) (One Semester)**

12 points semester 1 or 2

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project.

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course.

**7188 Project G (ANR)**

**3661 Project G (ANR) (Mid-year)**

21 points full year

contact with supervisor by arrangement

*assumed knowledge:* students may be required to take certain subjects in preparation for the project.

Projects may comprise some or all of literature reviews, field trials, laboratory experiments, seminars and written assignments. Topics for projects may be chosen from any of the subjects included in the course

**8200 Natural Resources Project I**

4 points full year  
internal, external mode

Projects may comprise experiments, surveys, literature reviews, seminars and assignments leading to a written report. Proposals will be individually assessed so that they complement the academic and practical background of each student and his/her course work.

*assessment:* to be advised

**6846 Natural Resources Project II**

12 points full year  
internal, external mode

Projects may comprise experiments, surveys, literature reviews, seminars and assignments leading to a written report. Proposals will be individually assessed so that they complement the academic and practical background of each student and his/her course work.

*assessment:* to be advise

Honours degree of Bachelor of Landscape Architecture

Graduate Certificate in Architecture (Electronic Media)

Graduate Certificate in Design Studies

Graduate Certificate in Design Studies (Landscape)

Graduate Certificate in Urban Design

Graduate Diploma in Architecture (Electronic Media)

Graduate Diploma in Design Studies

Graduate Diploma in Design Studies (Landscape)

Graduate Diploma in Urban Design

Master of Architecture (Coursework)

Master of Landscape Architecture

Master of Urban Design (Coursework)

Master of Architecture

Master of Building Science

Master of Design Studies

Master of Design Studies (Landscape)

Master of Landscape Architecture by Research

Master of Urban Design

2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.

3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

Regulations amended 8 February 1996; 20 February 1997; 19 March 1998

notes (not forming part of the Regulations)

1 Council has delegated the power to approve minor changes to the General Course Rules to the Convenor of the Academic Board.

2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.

3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.

## Bachelor of Design Studies (formerly Bachelor of Architectural Studies)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### Aims and objectives

The Bachelor of Design Studies (B.Des.St.) is a first undergraduate degree in architectural and landscape studies open to applicants with matriculation or Higher School Entry qualifications or mature students who apply for Special Entry. It is intended for two groups of students:

- (1) People wishing to develop the intellectual skills and knowledge involved in combining critical thinking with creative activity and have an interest in the design of the built environment as a context within which to develop these skills. In this respect, the degree serves a similar purpose to other first degrees but is unique in that the selected context of the built environment involves aspects of the arts and the sciences, writing and graphics, design and analysis, and management and engineering.
- (2) People wishing to work in the field of architecture and landscape design, particularly those wishing to become professional architects or landscape architects, who are attracted to a program which emphasises the development of skills in combining critical thinking with creative activity. Second degrees, the Bachelor of Architecture and the Bachelor of Landscape Architecture, lead after necessary practical experience and examinations to registration as architects or landscape architects respectively.

The work of the degree will engage the synthesis of critical thought and creative action manifested in architecture and landscape design. Graduates of the degree should:

- be able to form and express deep criticism of architectural and landscape design objects from a broad perspective;
- be able to generate and present relevant proposals for intervention in situations in the built environment; and
- be able to combine criticism and proposal generation into a working process of design.

Half of the course comprises core or mandatory stream subjects in each year. The remainder are chosen by each student from subjects in the Department of

Architecture and certain other Departments in the University. The Ordinary degree may be completed in three years and students can also apply for entry to an additional Honours year.

Students who have completed at least one year of the degree may apply for admission to Law Studies in their second year. Such students, if accepted, can complete both their B.Des.St. and LL.B. degrees in a total of five years of full time study by taking some overload.

#### Educational objectives

The curriculum and teaching of the degree have both substantive and instrumental objectives.

Substantive objectives pertain to knowledge of the nature of creative action and critical thinking and to the disciplines of architecture and landscape architecture. Instrumental objectives pertain to skills and techniques relevant to critical thinking, creative action and to practice within the architecture and landscape architecture disciplines.

#### Substantive objectives

##### Critical thinking

To present coherent intellectual structures within which observation, analysis, understanding and judgement of situations, texts and objects can be made. To demonstrate the relevance of these structures.

##### Creative action

To present current knowledge of the act of designing, from both theoretical and practical perspectives. To demonstrate its application to the management of design processes.

##### Architecture and Landscape Architecture

To present accounts of the built and human modified environments, the processes of its production, and the positions, values and preferences that influence its forms and patterns. To demonstrate the relevance of these accounts.

#### Instrumental objectives

Finding, ordering, sifting, filtering, organising information

Intelligent use of library resources and research of library material. Information acquisition, collation and management from libraries and other sources.

Visualising, representing and manipulating spatial objects

Perceiving 3D objects.

Drawing and model making using hand and computer techniques.

Writing

Designing, outlining, organising, and refining thought expressed with the written word, using hand and computer techniques.

Speaking

Designing, outlining, organising, and refining thought expressed with the spoken word.

Computing

Computational techniques using algorithms and data relationships.

Working in groups

Acting as both a leader and a member of a group of individuals.

## 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Design Studies. The Ordinary degree shall be awarded with a major in *either* Architectural Studies *or* Landscape Studies *or* Urban Design Studies.
- 1.2 A graduate of the University or of another educational institution who wishes to proceed to the degree of Bachelor of Design Studies may do so under the requirements of these Specific Course Rules.
- 1.3 A candidate who has completed subjects under any repealed regulations for the Bachelor of Architectural Studies shall have status in equivalent subjects under the Specific Course Rules.

## 2 Status, exemption and credit transfer

- 2.1 A candidate who has passed undergraduate, or equivalent, level subjects in the Faculty or in other faculties of the University or in other educational institutions, may on written application to the Dean be granted such exemption from these Specific Course Rules as the Faculty may determine, save that a candidate shall always be required to satisfy the examiners in all subjects of the final year of the course.

## 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## 4 Duration of Course

- 4.1 The course of study for the Ordinary degree shall extend over three years of full-time study or the equivalent. Students shall pass subjects to the value of at least 24 points at each of the three levels. The point values of the subjects are contained in Specific Course Rules 5.1, 5.2 and 5.3.
- 4.2 A candidate may interrupt the course for such periods and on such conditions as may in each case be determined by the Faculty.
- 4.3 Students wishing to interrupt their studies in accordance with 4.2 above must apply through the Faculty Registrar for permission and obtain beforehand the approval of the Dean on behalf of the Faculty for leave of absence for a defined period.
- 4.4 A student who leaves the course without approval or who extends a leave of absence beyond the time period approved under 4.2 above shall be deemed to have withdrawn his or her candidature for the degree but may reapply for admission to the course in accordance with the procedures in operation at the time.
- 4.5 Students who have interrupted their studies in the prescribed subjects may be required to resume at such a point in the course and/or to undertake such additional or special program of study as the Dean of the Faculty deems appropriate.

## 5 Course of study/subjects of study

- 5.1 To qualify for the Ordinary degree of Bachelor of Design Studies with an Architectural Studies major a candidate shall pass the following subjects to the value of at least 72 points:

### Level I

4168	Built Environments I	3
9513	Design and Form IA	3
4830	Design and Form IB	3
7006	Construction I	3
9091	Computer-Aided Design I	3
8169	Image/Text/Architecture I	3
Level I Electives to the value of 6 points.		

### Level II

3006	Technology and the Built Environment II	4
6774	Twentieth Century Architecture and Landscapes II	4
8400	Design and Environments II	4
Level II Electives to the value of 12 points		

**Level III**

4371	Issues in Urban Sustainability III	6
3468	Building Design Studio III	6
Level III Electives to the value of 12 points		

**5.2** To qualify for the Ordinary degree of Bachelor of Design Studies with a Landscape Studies major a candidate shall pass the following subjects to the value of at least 72 points:

**Level I**

4168	Built Environments I	3
9513	Design and Form IA	3
4830	Design and Form IB	3
7006	Construction I	3
9091	Computer-Aided Design I	3
8169	Image/Text/Architecture I	3
Level I Electives to the value of 6 points		

**Level II**

3006	Technology and the Built Environment II	4
6774	Twentieth Century Architecture and Landscapes II	4
8400	Design and Environments II	4
Level II Electives to the value of 12 points		

**Level III**

6886	Issues in Landscape Sustainability III	6
8650	Landscape Design Studio III	6
Level III Electives to the value of 12 points		

**5.3** To qualify for the Ordinary degree of Bachelor of Design Studies with an Urban Design Studies major a candidate shall pass the following subjects to the value of at least 72 points:

**Level I**

4168	Built Environments I	3
9513	Design and Form IA	3
4830	Design and Form IB	3
7006	Construction I	3
9091	Computer-Aided Design I	3
8169	Image/Text/Architecture I	3
Level I Electives to the value of 6 points.		

**Level II**

3006	Technology and the Built Environment II	4
6774	Twentieth Century Architecture and Landscapes II	4
8400	Design and Environments II	4
Level II Electives to the value of 12 points		

**Level III**

4371	Issues in Urban Sustainability III	6
2067	Urban Design Studio III	6
Level III Electives to the value of 12 points		

**5.4** The following subjects have been approved by the Faculty of Architecture and Urban Design as electives towards the Ordinary degree.

**Agricultural and Natural Resource Sciences subjects**

Level I subjects listed in Specific Course Rule 4 of the degree of Bachelor of Agricultural Science.

**Arts subjects**

Level I subjects listed in Specific Course Rule 8.1, Level II subjects listed in Specific Course Rule 8.5, and Level III subjects listed in Specific Course Rule 8.9 of the degree of Bachelor of Arts.

**Design Studies subjects**

Level I, II and III subjects listed below (subject to availability each year):

**Level I**

6879	An Introduction to Arab Culture and Architecture I	3
5468	Art History and Theories IA	3
8361	Art History and Theories IB	3
2006	Australian Architecture and Landscapes I	3
4280	Special Topic in Design Studies IA	3
1454	Special Topic in Design Studies IB	3

**Level II**

9888	Art History and Theories IIA	4
9853	Art History and Theories IIB	4
8062	Arts and Cultures of Asia II (see under B.A.)	4
4842	Chinese Architecture and Landscapes II	4
4670	Colonial and Contemporary Issues in South Asian Architecture II	4
8804	Computer-Aided Design IIA <sup>#</sup>	4
3602	Computer-Aided Design IIB <sup>##</sup>	4
4125	Conservation in the Built Environment II	4
2472	Islamic Architecture and Gardens II <sup>##</sup>	4
8904	Plants and Design II	4
8221	Special Topic in Design Studies IIA	4
3266	Special Topic in Design Studies IIB	4
1425	Special Topic in Design Studies IIC	4

**Level III**

8079 Arts and Cultures of Asia III (see under B.A.)	6
7891 Chinese Architecture and Landscapes III	6
4799 Colonial and Contemporary Issues in South Asian Architecture III	6
2258 Computer-Aided Design IIIA <sup>#</sup>	6
4903 Computer-Aided Design IIIB <sup>##</sup>	6
1287 Conservation in the Built Environment III	6
3547 Critiques, Theories and Architectural History III	6
8660 Islamic Architecture and Gardens III <sup>##</sup>	6
9218 Plants and Design III	6
2784 Special Topic in Design Studies IIIA	6
8842 Special Topic in Design Studies IIIB	6
7273 Special Topic in Design Studies IIIC	6

**Economics Subjects**

Level I, II and III subjects listed below:

**Level I**

9073 Economic History I	3
4309 Economics IA	3
2076 Economics IB	3
7263 Mathematics for Economists I	3
3565 The Australian Economy: Institutions and Policy I	3

**Level II**

5381 Australian Economic History II	4
1802 East Asian Economies II	4
3784 Economic Data Analysis II	4
2744 Industrial Relations II	4
9893 Macroeconomics II	4
3071 Mathematical Economics II	4
8870 Microeconomics II	4
1715 Special Topics II	4

**Level III**

4883 Applied Econometrics III	4
8367 Applied Microeconomics III	4
3195 Development Economics III	4
5284 Business and Government III	4
8771 Econometric Theory III	4
2287 Economics of Law and Politics	4
9029 Environment and Resource Economics III	4
9272 International Economic History III	4
2261 International Economics III	4

5423 Labour Economics III	4
4466 Macroeconomics III	4
3658 Microeconomics Theory III	4
7981 Public Finance III	4
4609 Special Topics III	4

**Engineering subjects**

**Level I**

9167 Design Graphics	1.5
2391 Dynamics	1.5
6714 Electrical Systems	1.5
5729 Engineering Computing I	1.5
2853 Engineering Planning and Design I	1.5
4651 Engineering Programming IE	2.5
6581 Statics	1.5

**Law subjects**

**Level II**

9402 Legal Skills I	4
5272 Contract*	4

**Level III**

5499 Constitutional Law	4
4062 Criminal Law	4
3201 Law of Torts	4
8932 Property	4

\* Available only to students who have gained admission to Law studies through SATAC

# Available even years only

## Available odd years only

**Mathematical and Computer Sciences subjects**

Level I subjects listed in Specific Course Rule 3.1.1, Level II subjects listed in Specific Course Rule 3.2.1, and Level III subjects listed in Specific Course Rule 3.3.1 of the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences.

**Performing Arts subjects**

Level I subjects listed in Specific Course Rules, with the exception of Dance and Drama subjects, of the degrees in the Faculty of Performing Arts and approved by that Faculty.

**Science subjects**

Level I, II and III subjects listed in Specific Course Rule 7 of the degree of Bachelor of Science in the Faculty of Science.

Subjects offered by other faculties but not listed above may be acceptable on application and subject to the recommendation of the Head of the Department of Architecture, the department concerned, and the approval of the Faculty of Architecture and Urban Design.

### Subjects from other institutions

Such subjects provided by other institutions as may be approved from time to time on the recommendation of the Head of the Department of Architecture.

- 5.5 No candidate will be permitted to count for the degree any subject together with any other subject which, in the opinion of the Faculty contains a substantial amount of the same material; and no subject or portion of a subject may be counted twice towards the degree. No candidate may present the same section of a subject in more than one subject for the degree.
- 5.6 A candidate who has completed subjects under any repealed Specific Course Rules in the Bachelor of Architectural Studies degree prior to semesterisation and amendments of the course in 1989, or in the Bachelor of Architectural Studies course between 1989 to 1996, shall have status in equivalent subjects under these Specific Course Rules.
- 5.7 When in the opinion of the Faculty special circumstances exist for a candidate affected by Specific Course Rules 1.3 and 5.6, the Council on the recommendation of the Faculty in each case may vary any of the provisions of these Specific Course Rules.

### 6 The Honours degree

- 6.1 A candidate who wishes to proceed to the Honours degree must obtain the approval of the Head of the Department of Architecture, normally by 15 December of the year preceding enrolment.
- 6.2 A candidate for the Honours degree of Bachelor of Design Studies shall pass examinations in 2493 Honours Design Studies\* which shall consist of either one topic to the value of 24 points or two topics to the value of up to 12 points each of an Honours subject.
- 6.3 A candidate may, subject to the approval of the Head of the Department of Architecture in each case, include in their Honours year a subject to the value of 12 points taught in a department in another faculty; such candidates must consult the Head of the Department concerned and must apply in writing to the Faculty Registrar by 15 December of the year preceding the proposed Honours year, seeking the approval of the Head of the Department of Architecture.
- 6.4 The work of the Honours year may not be commenced before a candidate has qualified for the Ordinary degree, or has qualified for a degree regarded by the Faculty of Architecture and Urban Design as equivalent and has completed such prerequisite subjects (if any) as may be prescribed in the syllabuses.

- 6.5 The work of the Honours year must be completed in one year of full-time study, save that on the recommendation of the Head of the Department, the Faculty may permit a candidate to spread the work over two years but not more, under such conditions as the Faculty may determine.
- 6.6 If a candidate is unable to complete the course for the Honours degree within the time allowed, or if the candidate's work is unsatisfactory at any stage of the course, or if the candidate withdraws from the course such fact shall be reported to the Faculty. The Head of the Department of Architecture may permit the candidate to re-enrol for an Honours degree under such conditions (if any) as the Head of the Department of Architecture may determine.
- 6.7 No exemption from any component of the requirements of 6 is permitted.

\* Information on the approved subjects from which the prescribed combination may be chosen shall be advised in the preceding year by the Department of Architecture.

*note:* The subjects to be offered in a particular year will depend upon the availability of staff.

### 7 Review of academic progress

- 7.1 If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

### 8 Assessment and examinations

- 8.1 There shall normally be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification is in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the Specific Course Rules will not be classified.
- 8.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 8.3 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.

- 8.4** A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 8.5** A candidate may present for the degree subjects at Level I, II or III with an aggregate points value not exceeding 6 points for which a conceded pass grade has been awarded, provided that such subjects do not have a value of more than three points each.
- 8.6** A candidate who has twice failed the examination in any elective subject for the Ordinary degree may not enrol for that subject again or for any other elective subject which in the opinion of the Faculty contains a substantial amount of the same material, except by special permission of the Faculty and then only under such conditions as Faculty may prescribe.
- 8.7** There shall be three classifications of Pass in the final assessment of the subject for the Honours degree as follows: First Class, Second Class and Third Class. The Second Class classification shall be divided into two divisions as follows: Division A and Division B.

\* Conceded Passes are not awarded in the core subjects listed in 5.1, 5.2 and 5.3.

## **9 Articulation with other awards**

- 9.1** Candidates who have gained a reserved place in Law Studies on the basis of their SACE or equivalent results must, at the first attempt, successfully complete subjects to the value of 24 points at Level I of the B.Des.St. before being eligible to take up their place in Law Studies.

Candidates who have successfully completed subjects to the value of 24 points at Level I of the Bachelor of Design Studies degree are eligible to apply for admission to Law Studies. If admitted, candidates may count certain Law subjects towards both the degree of B.Des.St. and the degree of LL.B. Candidates may apply for admission to Law Studies through the South Australian Tertiary Admission Centre by September of their first year in the B.Des.St. course or in a later year of the course.

For candidates who have a reserved place in, or who wish to seek admission to, Law Studies, the following program of study is recommended:

### **Level I**

Subjects listed in Specific Course Rule 5.1, or 5.2 or 5.3 at Level I of the degree of B.Des.St. to the value of at least 24 points.

### **Level II**

- 8400 Design and Environments II  
3006 Technology and the Built Environment II  
6774 Twentieth Century Architecture and Landscapes II  
9402 Legal Skills I  
5272 Contract  
Level II electives to the value of 4 points

### **Level III**

- 4371 Issues in Urban Sustainability III  
*or*  
6886 Issues in Landscape Sustainability III  
3468 Building Design Studio III  
*or*  
8650 Landscape Design Studio III  
*or*  
2067 Urban Design Studio III  
Level III Electives to the value of at least 12 points from:  
5499 Constitution Law  
4062 Criminal Law  
3201 Law of Torts  
8932 Property

To complete the LL.B. degree in minimum time students would need to take all the above Law subjects although this involves an overload and is not a requirement of the B.Des.St. degree.

Before enrolment in the Level III subjects of the above scheme, students should consult the Law Course Adviser.

See also the Specific Course Rules of the LL.B. degree and see, in particular, the Introductory Notes to the LL.B. Syllabuses.

- 9.2** A graduate in another faculty or other educational institution who wishes to qualify for the Ordinary degree of Bachelor of Design Studies in the Faculty and to count towards that degree subjects which have already been presented for another degree may do so providing such a candidate presents a range of subjects which fulfils the requirements of Specific Course Rules 5.1 or 5.2, or 5.3 above, including subjects to the value of 36 points which must include compulsory and elective Level III subjects to the value of at least 24 points which have not been presented for any other degree.

## Syllabuses

### communication competence

In the course of essay, tutorial and project work, students are expected to increase their competence in the use of oral, written and visual communication.

#### Level I

#### 6879 An Introduction to Arab Culture and Architecture

3 points not offered in 1999

2-hour lecture, 1 tutorial per week

quota will apply

An introduction to the major themes of contemporary Arab Culture and architecture. It adopts a multi-disciplinary approach to develop an understanding of the current forces shaping life and built-environment in contemporary Arab societies. The central focus will be upon cross-cultural interpretations in the framework of literature, art and architecture and socio-political thought. Within this framework the issues of gender, religion, identity, nationalism, colonialism and the discourse of orientalism will be discussed.

*assessment:* assignments

#### 5468 Art History and Theories IA

3 points semester 1

Up to 2 lectures, 1 tutorial per week; occasional excursions

quota will apply

*restriction:* 2090 Art History and Theories; or 9888 Art History and Theories IIA

Impressionism and after: a critical view of European art from the time of Manet to the First World War. This subject introduces students to the most influential ideas and theories in the art of the latter part of the 19th century, a time of renegotiation of the relationship between artists and the social context within which they work. Included in the study are the major artists and ideas contributing to the development of impressionism, post-impressionism, symbolism, fauvism, cubism, futurism, constructivism, posters and political art, expressionism and dada. The subject aims to stimulate an awareness that familiarity with the history of ideas can aid each person in the expansion, structuring and enrichment of his or her own life. Development of the following skills will be brought into focus: clear-thinking, verbal communication, written communication, interpretation of written and visual material, and ability to work with historical research methods. Guest lecturers and excursions are incorporated in the subject where appropriate. Use is made of a broad range of visual material.

*assessment:* slide test 40%; essays 35%; and tutorial work 25%

#### 8361 Art History and Theories IB

3 points semester 2

Up to 2 lectures, 1 tutorial per week; occasional excursions

quota will apply

*restriction:* 9853 Art History and Theories IIB

Art history and theories after World War I: modernism and beyond. The subject introduces students to some of the leading ideas and manifestations of visual art from about 1920 to the present day. The term 'visual art' is broadly understood to include film, photography, graphics, posters, performance and the arts of process and idea, as well as painting, sculpture and architecture (although architecture is chiefly dealt with in other subjects). Modernism, abstract expressionism, op, pop and minimalism, art and technology, environments, happenings, performance, body art, conceptual art, process art, video, women's art, murals and photorealism are studied. Guest lecturers and excursions are incorporated in the subject where appropriate. Use is made of a broad range of visual material.

*assessment:* slide test 40%; essays 40%; tutorial work 20%

#### 2006 Australian Architecture and Landscapes I

3 points semester 2

2 lectures, 1 tutorial a week

quota will apply

*restriction:* 8329 History and Theories of Architecture I; or 2006 History and Theories of Architecture IB; or 2006 Australian Architecture I; or 2891 Australian Architecture II

A general introduction to the study of Australian Architecture and landscapes since 1788, with special attention to conceptual issues concerned with the characterisation of the 'Australian' architecture and landscape. The limitations of the formal analysis of built objects, periodisation and stylistic taxonomy will be discussed with reference to selected sites in Adelaide and elsewhere, both professionally designed and otherwise. Australian discourse will be analysed in relation to wider patterns of cultural value. Reference to the wider international context will be made as appropriate.

*assessment:* tutorial papers 40%; final essay 60%

### 4168 Built Environments I

3 points semester 1

Up to 2 lectures, 2 tutorial hours a week

quota will apply

This project-focussed subject introduces students to basic aspects of architecture, landscape architecture, urban design and planning. Students will explore the 'political economy' of decision-making in the built environment, and the interaction of ends and means with technology, the natural environment and socio-cultural imperatives, custom and practice.

The production and interpretation of human environments in Australia will be compared with the situation in other countries and the subject will draw upon the diversity of experience of built environments among the students themselves.

*assessment:* examination 40%; assignments 60%

### 9091 Computer-Aided Design I

3 points semester 1

Up to 3 hours per week

quota will apply

*restriction:* 1530 Computer-Aided Design II

The subject (a) develops the skills of using a current computer-aided design (CAD) graphics system for describing the built environment; and (b) examines the nature, assumptions and characteristics of CAD systems, their relationship to computation, abstraction and representation in design, and ways of looking at designs and designing from a CAD viewpoint.

*assessment:* assignments

### 7006 Construction I

3 points semester 2

Up to 2 lectures, 2 tutorial hours a week

quota will apply

*restriction:* 8334 Building Studies IA or 7006 Building Construction I

An introduction to the theory and practice of building. How buildings are constructed is investigated in relation to the cultural, technological and historical context in which they appear. Theoretical texts and actual buildings under construction are studied simultaneously with the aim of establishing the connection between thinking (imagination) and making (constructing). Theoretical and practical work in this subject includes: building scale models of construction details; reading working drawings; interpreting theoretical texts concerned with technological issues; writing concise theoretical texts;

graphic presentation; investigating the relationship between client, architect, engineer and builder.

*assessment:* assignments

### 9513 Design and Form IA

3 points semester 1

Up to 2 lectures, 2 tutorials a week

quota will apply

*restriction:* 4348 Design and Form I

An introduction to the basic principles, techniques and skills of architectural drawing and form making. The main aim is to develop the student's graphic and model making abilities through simple design exercises and practical involvement. The subject also aims to enhance the student's perceptive ability and representational skills required in expressing and communicating - in two and three dimensional forms - their architectural/landscape design ideas. Students will practise orthographic, paraline and perspective projection, free-hand sketching and model making.

*assessment:* assignments 70%; model 30%

### 4830 Design and Form IB

3 points semester 2

Up to 2 lectures, 2 tutorials a week

quota will apply

*assumed knowledge* 9091 Computer-Aided Design I or equivalent

*restriction:* 4348 Design and Form I

Design in the built environment (architecture, landscape architecture and urban design) is discussed, demonstrated and practised as an iterative activity involving both creative action and critical thought. The primary emphasis of the subject is developing concepts and skills for creative action: designing spatial forms as both visual compositions and as a potential setting for human activities. Concepts covered include composition, derivation, geometric construction and grammatical rules. Skills include drawing, writing, group work, computer graphics and computer modelling. The secondary emphasis is critical thought; designs are examined from multiple and often conflicting positions and values. The subject matter is situated within the history of built environment design through the use of examples.

*assessment:* assignments

**8169 Image/Text/Architecture I**

3 points semester 2

Up to 2 lectures, 2 tutorial hours a week  
quota will apply

*restriction:* 2713 Design Studies IB

A general introduction to architectural thought emphasising major thresholds in Western architectural history. The key issues examined will include: geometric and iconographic order, the status and role of architectural designers and writers, methods of representation and reproduction involved in constructing and propagating architectural ideas, and important historical perspectives that situate 20th-century developments. Practical work includes exercises in typographic design and in writing short analytical texts.

*assessment:* assignments

**4280 Special Topic in Design Studies IA**

3 points semester 1

Up to 3 hours of lectures/tutorials/seminars per week  
quota will apply

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* to be advised

**1454 Special Topic in Design Studies IB**

3 points semester 2

Up to 3 hours of lectures/tutorials/seminars per week  
quota will apply

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* to be advised

**Level II**

**9888 Art History and Theories IIA**

4 points semester 1

Up to 2 lectures, 1 tutorial hour per week; occasional excursions  
quota will apply

*restriction:* 2090 Art History and Theories; or 5468 Art History and Theories IA

See 5468 Art History and Theories IA for syllabus details

**9853 Art History and Theories IIB**

4 points semester 2

Up to 2 lectures, 1 tutorial hour per week; occasional excursions

quota will apply

*restriction:* 2090 Art History and Theories; or 8361 Art History and Theories IB

See 8361 Art History and Theories IB for syllabus details

*assessment:* slide test 40%; essays 35%; tutorial work 25%

**8062 Arts and Cultures of Asia II**

See entry in B.A. in Faculty of Arts for syllabus details

**4842 Chinese Architecture and Landscapes II**

4 points semester 2

Up to 2 lectures, 2 tutorials per week

quota will apply

*restriction:* 3700 Asian Architecture I or 5094 History and Theories of Architecture IIC or 5094 Asian Architecture II or 8149 Asian Architecture III or 7891 Chinese Architecture and Landscapes III

A study of living environments in traditional China with special emphasis on the domestic architecture and gardens of the Jiangnan area. The subject explores the relationship between Chinese architecture and gardens and aspects of Chinese thought and literature. Various modern and contemporary approaches to the study of this relationship are also presented for discussion. Specific attention is devoted to examples of palaces, gardens and other traditional sites of significance which are open to contemporary visitors.

*assessments:* assignments

**4670 Colonial and Contemporary Issues in South Asian Architecture II**

4 points not offered in 1999

Up to 2 lectures, 2 tutorials per week

quota will apply

*restriction:* 5094 Asian Architecture and Landscapes II (1996 only) or 8149 Asian Architecture and Landscapes III (1996 only) or 4799 Colonial and Contemporary Issues in South Asian Architecture III

This subject explores historical and theoretical issues arising from the colonial encounter of Europe and Asia, and their implications for contemporary architectural thought and practice. Lectures will focus on the historical case of India since the rarely 19th century.

Through a critical interpretation of British colonial efforts to 'construct' a modern Indian architecture and the subsequent efforts of post-colonial architects and theorists to 'deconstruct' that spatial and conceptual legacy, the subject will consider the discursive nature of architectural knowledge and the built environments it may prescribe, with particular regard to power and the politics of cultural identity. The colonial case study will also draw attention to problems in intercultural understanding, and the relation of architecture to myths, rituals and cosmologies.

*assessment:* 2 tutorial assignments 40%; 3000 word final paper 60%

### **8804 Computer-Aided Design IIA**

4 points semester 2, even years only

Up to 4 hours per week

quota will apply

*prerequisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 2258 Computer-Aided Design IIIA

The use of computer media in design in architecture and/or urban design and/or landscape architecture. The subject explores selected topics through significant project work, including making and using CAD models. The work may include building, urban and landscape modelling, the use of procedures, parametric design, animation, investigating issues of abstraction, accuracy and realism, computational design, the multimedia presentation of designs, and environmental simulation. Computer Aided Design IIA and IIIA will investigate topics not covered by Computer Aided Design IIB and IIIB in the previous year.

*assessment:* assignments

### **3602 Computer-Aided Design IIB**

4 points semester 2, odd years only

Up to 4 hours per week

quota will apply

*prerequisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 4903 Computer-Aided Design IIIB

the use of computer media in design in architecture and/or urban design and/or landscape architecture. The subject explores selected topics through significant project work, including making and using CAD models. The work may include building, urban and landscape modelling, the use of procedures, parametric design, animation, investigating issues of abstraction, accuracy and realism, computational design, the multimedia presentation of designs, and environmental simulation. Computer Aided Design IIB and IIIB will

investigate topics not covered by Computer Aided Design IIA and IIIA in the previous year.

*assessment:* assignments

### **4125 Conservation in the Built Environment II**

4 points check availability with Dept

Up to 4 hours per week

quota will apply

*assumed knowledge:* 4168 Built Environments I

*restriction:* 1287 Conservation in the Built Environment III

This subject examines the reasons, the what, where and why of conservation in the built environment. It considers how heritage items are identified, recorded, assessed and protected, and questions the validity of these actions. It also examines the various forms of conservation (preservation, restoration, reconstruction etc) and the uses and misuses of traditional and contemporary materials and construction methods. Urban conservation and the complexities of townscape character are canvassed together with the reuse of old buildings and the effects of current popular industries, such as tourism..

*assessment:* assignments

### **8400 Design and Environments II**

4 points semester 2

quota will apply

Up to 2 lectures, 3 hours of tutorials/seminars/studios per week

*assumed knowledge:* 9513 Design and Form IA, 4830 Design and Form IB, 4348 Design and Form I, 4168 Built Environments I, 8169 Image/Text/Architecture I (Students taking the Environmental Design major in the B.Env.St. course do not need assumed knowledge of 4348 Design and Form I or 4168 Image/Text/Architecture I)

*restriction:* 4696 Representation, Knowledge, Architecture II

The intersection of theory and practice in architecture and landscape architecture, developed in the context of student design projects. The subject will examine the range of theoretical and ideological discourses which influence approaches to 'place-making' in the urban environment.

*assessment:* assignments and projects

**2472 Islamic Architecture and Gardens II**

4 points semester 2, odd years only

Up to 2 lectures, 2 tutorials per week

quota will apply

*restriction:* 8660 Islamic Architecture and Gardens III

An introduction to aspects of the social, cultural and religious content of Islamic architecture and gardens both in traditional and contemporary contexts. Issues concerning the contemporary search for cultural identity will be discussed. The primary focus will be upon the notion of order in space, spatial organisation as revealed in traditional built forms, places and gardens in various parts of the Islamic world and the symbolic significance associated with these forms.

*assessment:* assignments

**8904 Plants and Design II**

4 points semester 2

Up to 4 hours lectures/seminars/studios per week; occasional field study trips

quota will apply

*restriction:* 9218 Plants and Design III

This subject will examine the palette of vegetation primarily appropriate for Adelaide and South Australia and its use in planting design applications. Attention will be given, in part, to the characteristics of and opportunities in indigenous and exotic species, weeds and grasses, trees and plants, Aboriginal and Western medicinal and food harvesting plants, and their relationships to soils, drainage, erosion, pollution and vehicular design issues, revegetation and for particular eco-system creation applications.

*assessment:* assignments and projects

**8221 Special Topic in Design Studies IIA**

4 points semester 1

Up to 4 hours lectures/seminars/studios per week; field study trips.

quota will apply

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects

**3266 Special Topic in Design Studies IIB**

4 points semester 2

Up to 4 hours lectures/seminars studios per week; field study trips

quota will apply

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects

**1425 Special Topic in Design Studies IIC**

4 points semester 1, 2 or summer

quota will apply

Up to 4 hours lectures/seminars/studios per week; field study trips

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects

**3006 Technology and the Built Environment II**

4 points semester 1

Up to 2 lectures and up to 2 tutorials a week

*restriction:* 3006 Science and the Built Environment II

*assumed knowledge:* 4168 Built Environments I and 7006 Construction I or their equivalents

Taking a project-based approach, the subject will examine the application of science to the design and construction of built environments. Key topics covered will include design in relation to acoustic performance, thermal comfort, building structures and construction materials and techniques.

*assessment:* assignments and projects

**6774 Twentieth Century Architecture and Landscapes II**

4 points semester 1

Up to 2 hours lectures, 2 hours of tutorials per week

*assumed knowledge:* 8169 Image/Text/ Architecture I; 7006 Construction I

*restriction:* 3596 The Design of Houses II.

A detailed exploration of compositional and theoretical aspects of 20th Century architectural and landscape design. This subject introduces students to a vocabulary for articulating spatial qualities in selected examples of 20th Century architectural and landscape design. It seeks to enhance students' appreciation of the possibilities of appropriating published writings and projects to nurture their own outlooks and abilities. Practical work includes exercises in three-dimensional composition and in writing short analytical texts.

*assessment:* assignments

**Level III**

**8079 Arts and Cultures of Asia III**

See entry in BA in Faculty of Arts for syllabus details

**3468 Building Design Studio III**

6 points semester 2

Up to 4 hours lectures/seminars studios per week

*prerequisites:* 8400 Design and Environments II

*assumed knowledge:* 4371 Issues in Urban Sustainability III

*restriction:* 8650 Landscape Design Studio III, 2067 Urban Design Studio III

In this subject students will apply their skills in formal composition and knowledge of precedent to the design of small buildings. Emphasis will be placed on the use of materials, structure and construction, responses to the local environments, and life-cycle costings.

*assessment:* assignments and projects

**7891 Chinese Architecture and Landscapes III**

6 points semester 2

Up to 2 lectures, 3 tutorials a week

quota will apply

*restriction:* prior to 1996: 3700 Asian Architecture I or 5094 History and Theories of Architecture IIC or 5094 Asian Architecture II or 8149 Asian Architecture III or 4842 Chinese Architecture and Landscapes II

See 4842 Chinese Architecture and Landscapes II for syllabus details.

*assessment:* assignments

**4799 Colonial and Contemporary Issues in South Asian Architecture III**

6 points not offered in 1999

Up to 2 lectures, 3 tutorials a week

quota will apply

*restriction:* 5094 Asian Architecture and Landscapes II (1996 only) or 8149 Asian Architecture and Landscapes III (1996 only) or 4670 Colonial and Contemporary Issues in South Asian Architecture II

See 4670 Colonial and Contemporary Issues in South Asian Architecture II for syllabus details.

*assessment:* 2 tutorial assignments 40%; 5000-word final paper 60%

**2258 Computer-Aided Design IIIA**

6 points semester 2, even years only

Up to 5 hours per week

quota will apply

*prerequisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 2258 Computer Methods in Architecture IIIA or 8804 Computer-Aided Design IIA

See 8804 Computer-Aided Design IIA for syllabus details.

*assessment:* assignments

**4903 Computer-Aided Design IIIB**

6 points semester 2, odd years only

Up to 5 hours a week

quota will apply

*prerequisite:* 9091 Computer-Aided Design I or 1530 Computer-Aided Design II

*restriction:* 4903 Computer Methods in Architecture IIIB or 3602 Computer-Aided Design IIB

See 3602 Computer-Aided Design IIB for syllabus details.

*assessment:* assignments

**1287 Conservation in the Built Environment III**

6 points check availability with Dept

Up to 5 hours per week

quota will apply

*assumed knowledge:* 4168 Built Environments I

*restriction:* 4125 Conservation in the Built Environment II

See 4125 Conservation in the Built Environment II for syllabus details.

*assessment:* assignments

**3547 Critiques, Theories and Architectural History III**

6 points semester 1

Up to 2 lectures, 3 seminar hours a week

*restriction:* 6528 History and Theories of Architecture III or 3547 History and Theories of Architecture IIIB

A topic will be offered of a specialised nature concerning architectural history. Drawing on the works of prominent writers in modern cultural studies such as Walter Benjamin and Michel Foucault, this subject will

focus on developing techniques of historical study and for examining various historical methodologies.

*assessment:* assignments 100%

### **8660 Islamic Architecture and Gardens III**

6 points semester 2, odd years only

Up to 2 lectures, 3 hours of tutorials a week

quota will apply

*restriction:* 2472 Islamic Architecture and Gardens II

See 2472 Islamic Architecture and Gardens II for syllabus details.

*assessment:* assignments

### **6886 Issues in Landscape Sustainability III**

6 points semester 1

Up to 6 hours of lectures/seminars/studios per week

quota will apply

*prerequisite:* 8400 Design and Environments II

*restriction:* 4321 Energy, Environment and Buildings III, 2719 Design, Ideologies and Institutions III, 4371 Issues in Urban Sustainability III

This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the resource, cultural, social, political, economic, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of landscapes in 'sustainable' urban environments, and will explore opportunities and constraints affecting the development of such environments.

*assessment:* assignments and projects

### **4371 Issues in Urban Sustainability III**

6 points semester 1

Up to 6 hours lectures/seminars/studios per week

quota will apply

*prerequisite:* 8400 Design and Environments II

*restriction:* 4321 Energy, Environment and Buildings III, 2719 Design, Ideologies and Institutions III, 6886 Issues in Landscape Sustainability III

This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the resource, cultural, social, political, economic, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of buildings in 'sustainable' urban environments, and will explore opportunities and constraints affecting the development of such environments.

*assessment:* assignments and projects

### **8650 Landscape Design Studio III**

6 points semester 2

Up to 6 hours of lectures/seminars/studios per week

quota will apply

*prerequisite:* 8400 Design and Environments II

*assumed knowledge:* 6886 Issues in Landscape Sustainability III

*restriction:* 3468 Building Design Studio III, 2067 Urban Design Studio III

In this subject students will apply their skills in formal composition and knowledge of precedent to the design of a small to medium sized park, allotment or place. Emphasis will be placed on design, use of materials and plants, any installations and their construction, the design's responses to the local environment, and life-cycle costings.

*assessment:* assignments and projects

### **9218 Plants and Design III**

6 points semester 2

Up to 6 hours of lectures/ seminars/studios per week; occasional field study trips

quota will apply

*restriction:* 8904 Plants and Design II

See 8904 Plants and Design II for syllabus details

### **2784 Special Topic in Design Studies IIIA**

6 points semester 1

Up to 5 hours a week

quota will apply

See 8221 Special Topic in Design Studies IIA for syllabus details

### **8842 Special Topic in Design Studies IIIB**

6 points semester 2

Up to 5 hours a week

quota will apply

See 3266 Special Topic in Design Studies IIB for syllabus details

**7273 Special Topic in Design Studies IIIC**

6 points semester 1, 2 or Summer

Up to 5 hours a week

quota will apply

See 1425 Special Topic in Design Studies IIC for syllabus details

**2067 Urban Design Studio III**

6 points semester 2

Up to 6 hours of lectures/seminars/studios per week

quota will apply

*prerequisite:* 8400 Design and Environments II

*assumed knowledge:* 4371 Issues in Urban Sustainability III

*restriction:* 3468 Building Design Studio III, 8650 Landscape Design Studio III

In this subject students will apply their skills in formal composition and knowledge of precedent to the design of urban spaces.

*assessment:* assignments and projects

**Level IV**

**2493 Honours Design Studies**

24 points full year

Discussions with supervisor, occasional seminars, laboratory sessions as appropriate

*assumed knowledge:* consult the Head of the Department of Architecture

Students will be required to undertake supervised research in one or two advanced topics, thereby developing a thorough understanding of appropriate research techniques. The outcome of this research will be submitted in the form of a substantial essay or research report including a survey of the literature relevant to the topic(s) chosen. The range of topics to be offered in any year will depend on staff availability. Topics which can be expected to be offered from time to time include:

- Architectural and Landscape Architectural History
- Australian Architectural and Landscape Architectural History
- Australian Urban Design History and Practice
- Computer-Aided Design
- Computer Applications in Architecture, Landscape Architecture or Urban Design
- Conservation in the Built Environment
- Criticism and Architecture and Landscape Architecture

Cross-Cultural Architectural and Landscape Architectural Topics

Dryland Landscape Design

Ergonomics

Heritage Conservation and Cultural Landscapes

Housing

Islamic Architecture and Garden Design

Plants in Design

Rainfall and Buildings

Solar Access

South East Asian Architecture and Landscape Architecture

Theories in Modern Architecture and Landscape Architecture

Thermal Design of Buildings

Tropical Architecture and Landscape Architecture

Urban Design Histories and Theories

Urban Design in Islamic or South East Asian Places

Urban Ecology

Wind and Buildings

Subject to the approval of the Head of the Department of Architecture and with the agreement of the other Department concerned, a subject equivalent to 12 points at Level IV taught in another department may be taken as part of this subject.

*assessment:* progress 30%, final presentation 70%

## Bachelor of Architecture (New)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: The name Bachelor of Architecture (New) is used for convenience to differentiate it from the 3-year Bachelor of Architecture course. The nomenclature on the Testamur for graduates of the B.Arch.(New) course will be 'Bachelor of Architecture'.

### Specific Course Rules

#### Aims and objectives

The Bachelor of Architecture (New) [B.Arch.(New)], open only to graduates, is a second degree in the practice of architecture. Studio-based, it is project-oriented and concerned with the technical and practical matters of practice within a philosophical and theoretical context of professional ethics, aesthetics and style, performance specification and management, and the many other issues that concern practitioners. Entrants to the degree are graduates who have demonstrated abilities to link critical thought and creative action. Graduates of the degree should have:

- acquired knowledge and skills sufficient for early stages of directed activity in an existing architectural practice
- developed intellectual and creative approaches and adaptability to form a basis for continued learning and development throughout professional life

Entrants to the degree come from two main groups:

- Graduates of the B.Des.St. (with an Architectural Studies major) of the University of Adelaide, or an equivalent degree
- Other graduates who have demonstrated capabilities to enter the degree, generally through qualifying studies such as the Graduate Diploma in Design Studies

#### Educational objectives

The curriculum and teaching of the degree will have both substantive and instrumental objectives. Substantive objectives pertain to knowledge of the nature of architectural practice. Instrumental objectives pertain to skills and techniques relevant to operating as an architect.

#### Substantive objectives

The profession of architecture

Ethics and the environmental, social and legal responsibilities of the profession of architecture.

Architectural services

The recognition of situations where an architect can contribute, the formulation of appropriate strategies, and appropriate pre-design, design, project management and post construction services.

Processes in developing designs, including the development of a brief, and the outline, assessment, detailed design and costing of proposals in conformity with codes and other requirements.

The organisation, management and documentation associated with building construction and the administration of building contracts.

The marketing of architectural services.

The technology of architecture

Building planning, construction, structure and services as they relate to new buildings and alterations to existing buildings.

The architect in relation to other professions, organisations and the building industry

The relationship of architects to builders, structural and building services engineers, landscape architects, interior designers, urban designers, planners, and others involved in the creation of the built environment.

The relationship of the profession of architecture to statutory authorities and to the building industry.

#### Instrumental objectives

Designing

The practice of architectural design, emphasising the pervasion of design from planning to detailing and the interrelationship of aesthetic, economic, environmental, legal, societal and individual reactions, and technical factors, and the nature of design as a group activity.

Surveying

Land and building surveying.

Communicating

The communication and documentation of designs as a part of the individual and group design process and for clients, construction, public presentation and statutory authorities.

The preparation of professional reports.

Managing

The management and operation of an architectural practice and the activities of an architectural practice.

## 1 General

- 1.1 There shall be an Ordinary and an Honours degree of Bachelor of Architecture (New). A candidate may obtain either the Ordinary degree or the Honours degree but not both.
- 1.2 A candidate for admission to the course of study for the degree of Bachelor of Architecture (New) must have obtained:
  - (a) the Ordinary and/or Honours degree of Bachelor of Design Studies of the University of Adelaide subject to successful completion of subjects comprising the Architectural Studies major; or
  - (b) the Graduate Diploma in Design Studies of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose; or
  - (c) the Ordinary and/or Honours degree of Bachelor of Landscape Architecture of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose.
- 1.3 The Faculty may in special cases and subject to such conditions (if any) as the Head of Department may see fit to impose in each case, accept as a candidate for the Bachelor of Architecture (New) an applicant who does not hold the qualifications specified in 1.2 above but who has given evidence satisfactory to the Head of Department of fitness to undertake work for the Bachelor of Architecture (New).
- 1.4 A candidate accepted under 1.2 and 1.3 above may be required to satisfactorily complete such preliminary work or qualifying studies as the Head of Department may determine.

## 2 Status, exemption and credit transfer

- 2.1 A candidate who has passed postgraduate level subjects in the Faculty or in other faculties of the University or in other educational institutions, may on written application to the Dean be granted such exemption from these Specific Course Rules as the Faculty may determine, save that:
  - (a) no more than 24 points of the course may be undertaken through approved exchange programs and
  - (b) a candidate shall always be required to satisfy the examiners at the University of Adelaide in 9858 Architecture Studio IB, 1044 Architecture Studio IC, 6951 Architecture Studio II and 8794 Architecture Practice II.

A candidate who undertakes the equivalent of 4610 Architecture Project II as part of an official exchange program shall be required to undertake a satisfactory final presentation of their work, in the Department of Architecture, or at the host institution if appropriate, to a review panel appointed by the Head of Department before the granting of status can be approved.

## 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## 4 Duration of course

- 4.1 The course of study for the degree shall extend over two years of full-time study or the equivalent. Students shall pass subjects to the value of at least 24 points at each of the two levels. The point values of the subjects are contained in Specific Course Rule 6.1.
- 4.2 A candidate may interrupt the course for such periods and on such conditions as may in each case be determined by the Faculty.
- 4.3 Students wishing to interrupt their studies in accordance with 4.2 above must apply through the Faculty Registrar for permission and obtain beforehand the approval of the Dean on behalf of the Faculty for leave of absence for a defined period.
- 4.4 A student who leaves the course without approval or who extends a leave of absence beyond the time period approved under 4.2 above shall be deemed to have withdrawn his or her candidature for the degree but may reapply for admission to the course in accordance with the procedures in operation at the time.
- 4.5 Students who have interrupted their studies in the prescribed subjects may be required to resume at such a point in the course and/or to undertake such additional or special program of study as the Dean of the Faculty deems appropriate.

## 5 Qualifying studies

- 5.1 A candidate selected under 1.2 or 1.3 for admission to the Bachelor of Architecture (New) course may be required to satisfactorily complete such qualifying studies as determined by the Faculty after consideration of advice from the Head of Department.
- 5.2 Candidates undertaking qualifying studies must successfully complete those studies before they may undertake subjects of the Bachelor of Architecture (New).

5.3 On the recommendation of the Head of Department, a supplementary examination may be offered to a candidate undertaking qualifying studies.

5.4 A candidate who fails all or part of the qualifying studies may repeat them in another year only with the permission of the Faculty after it has considered advice from the Head of Department.

## 6 Courses of study/Subjects of study

6.1 To qualify for the Ordinary degree of Bachelor of Architecture (New) a candidate shall pass the following subjects to the value of at least 48 points:

### Level I

8004 Architecture Studio IA	6
9858 Architecture Studio IB	6
1044 Architecture Studio IC	6
1693 Architecture Studio ID	6

### Level II

6951 Architecture Studio II	8
8794 Architecture Practice II	4
4610 Architecture Project II	12

6.2 A candidate may not enrol in Level II subjects unless he or she has passed at least three of 8004 Architecture Studio IA, 9858 Architecture Studio IB, 1044 Architecture Studio IC and 1693 Architecture Studio ID.

6.3 A candidate who wishes to proceed to the Honours degree of Bachelor of Architecture (New) must obtain the approval of the Head of Department, normally by December 15 of the year preceding enrolment.

6.4 A document setting out guidelines approved by the Faculty which contains requirements for admission and the criteria for the award of the Honours degree is available from the Faculty Registrar.

6.5 A candidate for the Honours degree of Bachelor of Architecture (New) must, in addition to completing the full course prescribed for the Ordinary degree, also pass an additional subject 1972 Advanced Studies in Architecture II as well as achieving a high classification of pass in the Level II subjects for the Ordinary degree.

6.6 A candidate who fails to obtain Honours shall be awarded an Ordinary degree of Bachelor of Architecture (New) provided all requirements for the Ordinary degree are satisfactorily completed.

## 7 Review of academic progress

7.1 If in the opinion of the Faculty a candidate for the Bachelor of Architecture (New) is not making satisfactory progress, the Faculty may,

with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## 8 Assessment and examinations

8.1 There shall normally be four classifications of pass in the final assessment of any subject for the Bachelors degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the relevant Specific Course Rules will not be classified.

8.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

8.3 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.

8.4 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

8.5 There shall be three classifications for the Honours degree as follows: First Class, Second Class and Third Class. The Second Class classification shall be divided into two divisions as follows: Division A and Division B. A candidate who fails to obtain Honours shall be awarded an Ordinary degree provided all requirements for the Ordinary degree are satisfactorily completed.

Note not forming part of the Specific Course Rules:

Previous studies in the Bachelor of Architecture under former Specific Course Rules and Regulations and Schedules.

Students who commenced their course of study towards the Bachelor of Architecture under previous Specific Course Rules in 1995 or 1996, or Regulations and Schedules in 1994 or earlier, are subject to the following provision:

- Students who commenced their studies towards the Bachelor of Architecture in previous years will normally complete their course of study under the provisions of the Specific Course Rules as published in Volume II of the University Calendar in 1996.

## Syllabuses

### Level I

**Note:** During the first year of the course there will be a field trip of approximately 1 week to visit projects relevant to the following Architecture Studio subjects.

#### 8004 Architecture Studio IA

6 points semester 1 or 2

Up to 18 hours of lectures/ tutorials/ workshops; contact hours vary from week to week

This subject aims to develop design skills in an holistic sense bringing together regulatory, technical, human (including social and cultural) and environmental factors. The material will be developed through integrated projects. The studio projects will be topics not treated in other Level I subjects. Lectures given in the subject will complement the design process addressing the topics outlined in other Level I subjects.

*assessment:* assignments - may include written, verbal, and graphical (2 and 3 dimensional) communication. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component

#### 9858 Architecture Studio IB

6 points semester 1 or 2

Up to 18 hours of lectures/ tutorials/ workshops; contact hours vary from week to week.

A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture Studio IB will typically be focused on the design of a dwelling (or small group of dwellings) on a real site, with a particular owner-occupier as client. Students will be required to develop a brief from the client's instructions. Theory and practice regarding a range of aspects of low-rise domestic construction (including site preparation, footings, light timber framing and masonry construction) will be applied.

Students will be expected to explore a design 'parti' and its sources and precedents, to explain design intentions and communicate the architectural intentions of the building design, and to demonstrate that they understand its potential construction and performance.

There will be an emphasis on the lighting and thermal performance of the building and associated energy use, in the context of the client's requirements.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* assignments - may include written, verbal, and graphical (2 and 3 dimensional) communication. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

#### 1044 Architecture Studio IC

6 points semester 1 or 2

Up to 18 hours of lectures/tutorials/ workshops; contact hours vary from week to week.

A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture Studio IC will typically be focused on the design of a building alteration and refurbishment, requiring facilities planning, the survey and measuring of an existing building, and the preparation of measured drawings and dilapidation reports. It will also address issues arising in building conservation and the insertion of new buildings into heritage areas. There will be emphasis on structural assessment, materials characteristics and selection, plumbing and electrical services, and lighting.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* assignments - may include written, verbal, and graphical (2 and 3 dimensional) communication. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

#### 1693 Architecture Studio ID

6 points semester 1 or 2

Up to 18 hours of lectures/ tutorials/ workshops; contact hours vary from week to week.

A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture Studio ID will typically be focused on the design of a school, child-care centre, nursing home or similar low-rise building where the needs of a particular group of building users must be understood and addressed. The problem will involve site planning and landscape design issues. Theory regarding the

design, construction and structure of low-rise concrete (precast and/or in situ) buildings will be studied and applied. There will be emphasis on the acoustic performance of the building and on site infrastructure.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* assignments - these may include written, verbal, and graphical (2 and 3 dimensional) communication. Assessment will be in two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

\*Component A: realisation and communication of architectural ideas in three dimensions in relation to a design situation. Component B: technical description and justification of architectural design

## Level II

### 6951 Architecture Studio II

8 points semester 1

Up to 18 hours of lectures/tutorials/ workshops; contact hours vary from week to week.

*prerequisite:* see Bachelor of Architecture (New), Specific Course Rule 6.2

A project-based learning program in which students will develop their abilities to define the problem, bringing together the regulatory, technical, human (including social and cultural) and environmental factors studied in Level I Architecture Studios, and other facets of the theory and practice of design in architecture.

Architecture Studio II will typically be focused on the design of a mixed-use commercial multi-storey building located in a central business district and raising significant urban design issues. The project will be taken from early (facilities planning) to late (documentation) stages and beyond to post-occupancy evaluation, and will mirror in an educational setting many of the processes carried out in an architectural office. Other, minor, projects will typically involve the schematic design of a sports hall, warehouse, or similar large-span building and a suburban or rural site. Topics which will be emphasised include urban design; design in relation to fire safety and regulations; mechanical services (including heating, ventilation and air conditioning) electrical services; water supply and drainage; excavation and footings; materials and finishes; repetition of building material and industrialised components; joinery construction.

Lectures given in the subject will complement the design process addressing the topics outlined above.

*assessment:* projects

### 8794 Architecture Practice II

4 points semester 1

Up to 6 hours of lectures a week

Topics include organisational theory; principles of law; the general organisation of architectural practice including the management of an office's human, physical and financial resources, the relationship between architects and their clients; consultants and contractors; contract administration; specifications; the legal qualifications of an architect; professional organisations; ethics; risk management and professional liability; planning and building law and regulations; problems facing the architect today; estimating and cost control; bills of quantities; the role of the quantity surveyor; project management; the range of services offered by architects. A number of visits to architectural offices will be organised.

A student is expected to be in possession of a current copy of the Building Code of Australia and its associated commentary, as a requirement of this subject.

*assessment:* assignments

### 4610 Architecture Project II

12 points semester 2

Up to 20 hours a week studio work, with specialist lectures irregularly spaced

*prerequisites:* see Bachelor of Architecture (New), Specific Course Rule 6.2

*assumed knowledge:* 6951 Architecture Studio II

A single project, of a student's own choice, which will be of moderate complexity. Responses should demonstrate all phases of architectural designing; sketch plans, technical development including one specialised topic, and a final presentation which should show a thorough integration of all major aspects of the course.

*assessment:* final project

### 1972 Advanced Studies in Architecture II

3 points semester 2

2 hour tutorial/seminar per week

Students wishing to take 1972 Advanced Studies in Architecture II on a part time basis should consult the Faculty Registrar.

*prerequisite:* admission will be selective, based on prior results. Selection guidelines available in the Department of Architecture.

Students will be required to undertake supervised research into a particular topic, leading to the presentation of a seminar paper and submission of a final essay or report of the order of 4000 words.

*Architecture and Urban Design - B.Arch.(New)*

Topics offered for this subject will depend upon staff availability. Examples of topics which can be expected from time to time are:

- Architectural History
- Architectural Theories in Modern Architecture
- Australian Architectural History
- Building Materials and Performance
- Computer-Aided Design
- Computer Applications in Architecture
- Criticism and Architecture
- Conservation in the Built Environment
- Daylight Studies
- Energy in Buildings
- Housing
- Solar Access
- Urban Design

*assessment:* final report

## Bachelor of Landscape Architecture

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### Aims and objectives

Graduates enrolled in the degree of Bachelor of Landscape Architecture, the degree of Master of Landscape Architecture, the degree of Master of Design Studies (Landscape), the Graduate Diploma in Design Studies (Landscape) and Graduate Certificate in Design Studies (Landscape) collectively comprise the Landscape Architecture Program.

The postgraduate Bachelor of Landscape Architecture (B.L.Arch.) is a second degree intended for graduates wishing to practise or participate in the discipline of landscape architecture. Studio-based, it is project-oriented concerned with the technical and practical matters of landscape architecture research and practice within a philosophical and theoretical context of professional ethics, aesthetics and style, performance specification and management, and the many other issues that concern practitioners. Entrants to the degree are graduates who have demonstrated abilities to link critical thought and creative action.

The *Mission* of the Landscape Architecture Program is to be at the forefront of Australian landscape architecture practice that successfully integrates nature and culture together as key constructs for designs and strategies that are innovative, sustainable and culturally attuned.

*Program Objectives* to achieve this *Mission* are to:

- *establish an incremental suite of projects and studio foci that reinforce the Mission*
- *interlink with and cooperatively involve the participation of the profession and allied disciplines to advance landscape architecture knowledge*
- *foster reflection-in-action and lifelong learning strategies*
- *establish a community profile for the discipline through projects, research, exhibitions, conferences, publications, and community participation*
- *establish a strong and co-operative educational profile with allied disciplines within the University of Adelaide environment.*

Graduates of the Bachelor of Landscape Architecture degree should have:

- acquired knowledge and skills sufficient for early stages of directed activity in an existing landscape architectural practice
- developed intellectual and creative approaches and adaptability to form a basis for continued learning and development throughout professional life.

Entrants to the Bachelor of Landscape Architecture degree come from two main groups:

- Graduates of the B.Des.St. (with a Landscape Studies major) or Grad.Dip.Des.St. (Landscape) of the University of Adelaide, or an equivalent degree
- Other graduates who have demonstrated capabilities to enter the degree, generally through completing some qualifying studies.

#### Educational objectives

The curriculum and teaching of the Bachelor of Landscape Architecture degree will have both substantive and instrumental objectives. Substantive objectives pertain to knowledge of the nature of landscape architectural practice. Instrumental objectives pertain to skills and techniques relevant to operating as a landscape architect.

#### Substantive objectives

The profession of landscape architecture  
Ethics and the environmental, social and legal responsibilities of the profession of landscape architecture.

#### Landscape architectural services

The recognition of situations where a landscape architect can contribute, the formulation of appropriate strategies, and appropriate pre-design, design, project management and post construction services.

Processes in developing designs, including the development of a brief, and the outline, assessment, detailed design and costing of proposals in conformity with codes and other requirements.

The organisation, management and documentation associated with construction and the administration of contracts.

The marketing of landscape architectural services.

The technology of landscape architecture.

Site planning, construction, vegetation and habitat provision, water systems and hydrology, structures and services as they relate to new buildings, alterations, and site planning and design interventions.

The landscape architect in relation to other professions, organisations and the building industry

The relationship of landscape architects to builders, structural and building services engineers, architects, interior designers, urban designers, planners, and others included in the creation of the built environment and human-dominated and shaped landscapes.

The relationship of the profession of landscape architecture to statutory authorities and to the design industry.

## **Instrumental objectives**

### **Designing**

The practice of landscape architectural design, emphasising the pervasion of design from planning to detailing and the interrelationship of aesthetic, economic, environmental, legal, societal and individual reactions, and technical factors, and the nature of design as a group activity.

### **Site Planning**

The practice of comprehending and taking advantage of variables relevant to site planning including flora, fauna, soils, water systems, energy systems, building materials, human activities and desires, heritage conservation and the poetics of space, site and structure assembly and arrangement, etc.

### **Communication**

The communication and documentation of designs as a part of the individual and group processes and for clients, construction, public presentation and statutory authorities.

The preparation of professional reports.

### **Managing**

The management and operation of a landscape architectural practice and the activities of a landscape architectural practice.

## **1 General**

**1.1** A candidate for admission to the course of study for the degree of Bachelor of Landscape Architecture must have obtained:

- (a) the Ordinary and/or Honours degree of Bachelor of Design Studies of the University of Adelaide subject to successful completion of subjects comprising the Landscape Studies major *or*

- (b) the Graduate Diploma in Design Studies (Landscape) of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose *or*

- (c) the Ordinary and/or Honours degree of Bachelor of Architecture of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose *or*

- (d) the Ordinary and/or Honours degree of Bachelor of Landscape Architecture or Bachelor of Architecture or an equivalent award from another educational institution accepted by the University for the purpose.

**1.2** Subject to the approval of the Faculty, the Head of Department may in special cases and subject to such conditions (if any) as the Head of Department may see fit to impose in each case, accept as a candidate for the Bachelor of Landscape Architecture an applicant who does not hold the qualifications specified in 1.1 above but who has given evidence satisfactory to the Head of Department of fitness to undertake work for the Bachelor of Landscape Architecture.

**1.3** A candidate accepted under 1.1 and 1.2 above may be required to satisfactorily complete such preliminary work or qualifying studies as the Head of Department may determine.

## **2 Status, exemption and credit transfer**

**2.1** A candidate who has passed postgraduate level subjects in the Faculty or in other faculties of the University or in other educational institutions, or Level IV subjects in a Bachelor of Landscape Architecture course of another educational institution, may on written application to the Dean be granted such exemption from these Specific Course Rules as the Faculty may determine, save that a candidate shall always be required to satisfy the examiners in all subjects of the final year of the course.

## **3 Approval of course of study at enrolment**

**3.1** Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## **4 Duration of course**

**4.1** The course of study for the degree shall extend over two years of full-time study or the equivalent. Students shall pass subjects to the value of at least 24 points at each of the two levels. The point values of the subjects are contained in Specific Course Rule 6.1.

- 4.2 A candidate may interrupt the course for such periods and on such conditions as may in each case be determined by the Faculty.
- 4.3 Students wishing to interrupt their studies in accordance with 4.2 above must apply through the Faculty Registrar for permission and obtain beforehand the approval of the Dean on behalf of the Faculty for leave of absence for a defined period.
- 4.4 A student who leaves the course without approval or who extends a leave of absence beyond the time period approved under 4.2 above shall be deemed to have withdrawn his or her candidature for the degree but may reapply for admission to the course in accordance with the procedures in operation at the time.
- 4.5 Students who have interrupted their studies in the prescribed subjects may be required to resume at such a point in the course and/or to undertake such additional or special program of study as the Dean of the Faculty deems appropriate.

## 5 Qualifying studies

- 5.1 A candidate may be selected for admission to the Bachelor of Landscape Architecture course under 1.1 or 1.2 subject to satisfactory completion of such qualifying studies as determined by the Faculty after consideration of advice from the Head of Department.
- 5.2 Candidates undertaking qualifying studies must successfully complete those studies before they may undertake subjects of the Bachelor of Landscape Architecture.
- 5.3 On the recommendation of the Head of Department, a supplementary examination may be offered to a candidate undertaking qualifying studies.
- 5.4 A candidate who fails all or part of the qualifying studies may repeat them in another year only with the permission of the Faculty after it has considered advice from the Head of Department.

## 6 Courses of study/subjects of study

- 6.1 To qualify for the Ordinary degree of Bachelor of Landscape Architecture a candidate shall pass the following subjects to the value of at least 48 points:

### Level I

5688 Landscape Architecture Studio IA	6
6763 Landscape Architecture Studio IB	6
8024 Landscape Architecture Studio IC	6
1624 Landscape Architecture Studio ID	6

### Level II

- |   |    |
|---|----|
| 9261 Landscape Architecture Studio II   | 6  |
| 2507 Landscape Architecture Seminar II  | 3  |
| 6817 Landscape Architecture Practice II | 3  |
| 7625 Landscape Architecture Project II  | 12 |
- 6.2 A candidate who wishes to proceed to the Honours degree of Bachelor of Landscape Architecture must obtain the approval of the Head of Department, normally by December 15 of the year preceding enrolment.
- 6.3 A document setting out guidelines approved by the Faculty which contains requirements for admission and the criteria for the award of the Honours degrees is available from the Faculty Registrar.
- 6.4 A candidate for the Honours degree of Bachelor of Landscape Architecture in addition to completing the full course prescribed for the Ordinary degree shall also pass an additional subject 9186 Advanced Studies in Landscape Architecture II.
- 6.5 A candidate who fails to obtain Honours shall be awarded an Ordinary degree of Bachelor of Landscape Architecture provided all requirements for the Ordinary degree are satisfactorily completed.

## 7 Review of academic progress

- 7.1 If in the opinion of the Faculty a candidate for the Bachelor of Landscape Architecture is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the degree.

## 8 Assessment and examinations

- 8.1 There shall normally be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the relevant Specific Course Rules will not be classified.
- 8.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 8.3 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and

examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.

- 8.4** A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

## Syllabuses

### Level I

#### 5688 Landscape Architecture Studio IA

6 points semester 1 or 2

16-18 hours of lectures/tutorials/ workshops/field trips;  
contact hours vary from week to week

*assumed knowledge:* Design at undergraduate degree level

This subject will typically address a small to medium sized landscape design and planning topic in a rural setting possessing high aesthetic and ecological qualities and experiencing human development pressures. The subject will explore the role and opportunities for landscape design and planning interventions and strategies in a precinct or region of high scenic and biological values and human pressures caused either by mining, recreation, transportation, commercial, tourist and or pastoral/agricultural activities.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication

#### 6763 Landscape Architecture Studio IB

6 points semester 1 or 2

16-18 hours of lectures/tutorials/ workshops/field trips;  
contact hours vary from week to week

*assumed knowledge:* Design at undergraduate degree level

This subject will typically address a medium to large sized landscape design and planning topic in a rural-urban fringe setting possessing high aesthetic and ecological qualities and experiencing human development pressures. The subject will explore the role and opportunity for landscape design in devising strategic frameworks that conserve landscape qualities and ensure a sensitive stewardship of its resources while accommodating appropriate levels of human occupancy, resources harvesting and developments.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape

design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects 100% - may include written, verbal, and graphic (2 and 3 dimensional) communication

#### 8024 Landscape Architecture Studio IC

6 points semester 1 or 2

16-18 hours of lectures/tutorials/ workshops/field trips; contact hours vary from week to week

*assumed knowledge:* Design at undergraduate degree level.

This subject will typically address a small to medium sized landscape design and planning topic in an urban setting possessing strong cultural traditions and patterns. The subject will explore the role and contribution of landscape design in our cultural environments, and the nexus between culture and nature in an urban context.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects- may include written, verbal, and graphic (2 and 3 dimensional) communication

#### 1624 Landscape Architecture Studio ID

6 points semester 1 or 2

16-18 hours of lectures/tutorials/ workshops/field trip;  
contact hours vary from week to week

*assumed knowledge:* Design at undergraduate degree level.

This subject will typically address a medium to large sized landscape design and planning topic in a rural setting possessing particular cultural constraints, relationships and nuances to landscapes. The subject will explore the relationship of culture, and cultures, to landscapes; the manner in which a culture and cultural group has established and continues to influence a set of physiological relationships and physical patterns in the environment and landscape within which it resides.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information

technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication

## Level II

### 9261 Landscape Architecture Studio II

6 points semester 1 or 2  
16-18 hours of lectures/tutorials/ workshops/field trips;  
contact hours vary from week to week.

*prerequisites:* three of the following: 5688 Landscape Architecture Studio IA, 6763 Landscape Architecture Studio IB, 8024 Landscape Architecture Studio IC and 1624 Landscape Architecture Studio ID

*assumed knowledge:* Design at undergraduate degree level.

This subject will typically address a medium to large sized landscape design and planning topic in a rural and or urban setting that will be dependent upon the use and application of information technologies and geographic information systems. The subject will explore the position of both nature and culture using creative information technology.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication

### 2507 Landscape Architecture Seminar II

3 points semester 1 or 2  
2-3 hours of lectures/tutorials/ workshops/field trips;  
contact hours vary from week to week

*assumed knowledge:* Design at undergraduate degree level.

This subject will address contemporary issues of landscape architecture design, planning and practice. The subject will explore the role of landscape architecture in the design and planning disciplines and traditions; review and critique contemporary dialogues, designs, theories and philosophies in landscape architecture; and, consider and debate

potential future directions, contributions and technologies for the landscape architecture profession.

*assessment:* projects and seminar papers

### 6817 Landscape Architecture Practice II

3 points semester 1 or 2  
2-3 hours of lectures/tutorials/ workshops/field trips;  
contact hours vary from week to week

*assumed knowledge:* Design at undergraduate degree level.

This subject will address the frameworks for and ethical structures of landscape architecture professional practice. The subject will explore professional practice ethics and traditions; organisational and management practices including topics of professional liability, law, indemnity, professional registration, contract administration, project management, relationships with allied professionals and clients, and contemporary professional and practice expectations in Australia, and overseas if appropriate.

*assessment:* work diaries, seminar papers, projects, exams

### 7625 Landscape Architecture Project II

12 points semester 1 or 2  
16-18 hours of lectures/tutorials/ workshops/field trips;  
contact hours vary from week to week.

*prerequisites:* 5688 Landscape Architecture Studio IA, 6763 Landscape Architecture Studio IB, 8024 Landscape Architecture Studio IC, 1624 Landscape Architecture Studio ID, and 9261 Landscape Architecture Studio II

*assumed knowledge:* Design at undergraduate degree level.

This subject comprises an individual culminating design, planning and/or research project that principally addresses either nature and/or culture in urban and/or rural settings and which permits the exposition of the major aspects of the course and a student's particular interests.

The project will be of a moderate complexity, and often drawn from a limited selection or from an identified region. Responses should demonstrate competency in most phases of landscape architecture thought and practice, including a final presentation which should display a thorough integration of all major aspects of the Program and its Mission Statement and Program Objectives.

*assessment:* final project

**9186 Advanced Studies in Landscape  
Architecture II**

6 points semester 1, 2 or summer semester

2 hour tutorial/seminar per week

*prerequisites:* 5688 Landscape Architecture Studio IA, 6763 Architecture Studio IB, 8024 Landscape Architecture Studio IC and 1624 Landscape Architecture Studio ID

*restriction:* enrolment subject to application to the Head of Department and contingent upon prior results.

*assumed knowledge:* Design at undergraduate degree level.

Students will be required to undertake supervised research and/or design exploration into a particular topic, leading to the presentation of a seminar paper and/or exhibition, and submission of a final essay or report of between 3000 to 5000 words.

Topics offered for this subject will depend upon staff availability. Examples of topics which can be expected from time to time include: Appropriate Technology and Energy Topics, Computer-Aided Design, Criticism and Landscape Architecture, Cultural Design Topics, Dryland Management, Ecological Restoration, Environmental Planning, Environmental Psychology, Ethno-Ecological Design Topics, Heritage Conservation, Landscape Design History, Landscape Architectural Theory, Landscape Planning, Rural Land Design Topics, Sustainable Design Applications, Urban Design, Urban Ecology, Urban Stormwater Management.

*assessment:* presentation, seminar paper, exhibition, and/or final essay or report

## Graduate Certificate in Architecture (Electronic Media)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Part of this course will be available in the external mode.

Note: postgraduate tuition fees apply to this course.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Architecture (Electronic Media) shall have qualified for the degree of Bachelor of Architecture of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University
- 1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or the equivalent of part-time study.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

- 4.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points, as follows:

code	subject title	points
4852	Architectural Design with Electronic Media A	6
9312	Architectural Design with Electronic Media B	6

- 4.2 No candidate may take more than one of the subjects of the Graduate Certificate through distance learning.
- 4.3 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the

same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

- 5.1 A candidate will not be granted status for any subject which he or she has completed for another award.
- 5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

- 6.1 There shall be four classifications of pass in the subjects for the Graduate Certificate. Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.  
(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

#### 7 Articulation with other awards

A candidate for the Graduate Diploma in Architecture (Electronic Media) who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

## Syllabuses

---

### **4852 Architectural Design with Electronic Media A**

6 points semester 1 or 2

Contact hours vary -periods of intensive group contact and periods of less frequent individual tutorials

*assumed knowledge:* applicants will be assumed to have experience and skills in using a 3D CAD tool

Students will carry out a series of four small scale architectural design projects designed to use and develop skills and understanding in the 3D representation of design ideas with computer media, the visualisation and animation of design proposals at various levels of abstraction, and the presentation of work on the World Wide Web for an international audience. The projects will be developed to suit individual student needs.

This subject may be taken in Adelaide using the Department's resources. It may also be taken through distance learning using the World Wide Web and email as the medium for communication. In this latter case, students must have access to the necessary computer hardware, software and network facilities.

*assessment:* projects

### **9312 Architectural Design with Electronic Media B**

6 points semester 1 or 2

Contact hours vary -periods of intensive group contact and periods of less frequent individual tutorials<sup>2</sup>

*assumed knowledge:* applicants will be assumed to have experience and skills in using a 3D CAD tool

Students will carry out a significant architectural design project designed to use and develop skills and understanding in the 3D representation of design ideas with computer media, the visualisation and animation of design proposals at various levels of abstraction, and the presentation of work on the World Wide Web for an international audience. The projects will be developed to suit individual student needs.

This subject may be taken in Adelaide using the Department's resources. It may also be taken through distance learning using the World Wide Web and email as the medium for communication. In this latter case, students must have access to the necessary computer hardware, software and network facilities.

The projects will be topics not covered in 4852 Architectural Design with Electronic Media A.

*assessment:* projects

## Graduate Certificate in Urban Design

This course is offered jointly by The University of Adelaide and the University of South Australia.

Applications for admission shall be directly to the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: Postgraduate tuition fees apply to this course.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Urban Design shall have qualified for a degree of the University incorporating major studies in one or more of the following disciplines: planning, design studies, property, landscape architecture, architecture, real estate, environmental engineering or an allied discipline; or for a degree of another institution accepted for the purpose by the University
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty Office of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or the equivalent of part-time study, provided that the course is completed within three years of initial enrolment.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

- 4.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points, including the core subjects 1843 Elements of Urban Design IVA and 9644 Elements of Urban Design IVB and two other core subjects.

#### 4.1.1 Core subjects

*Note not forming part of the Specific Course Rules:* Equivalent subject values are - 3 points at the University of Adelaide = 4.5 points at the University of South Australia; 6 points at the University of Adelaide = 9 points at the University of South Australia

- (a) All candidates shall satisfactorily complete the following subjects offered by the University of Adelaide:

1843 Elements of Urban Design IVA 3

9644 Elements of Urban Design IVB 3

- (b) In addition, all candidates shall satisfactorily complete at least two of the following subjects which are offered at either the University of Adelaide or the University of South Australia. Students taking subjects at both the University of Adelaide and University of South Australia must comply with the enrolment procedures of both institutions

##### semester 1

*The University of Adelaide*

8460 Urban Processes and Policy IV 3

*University of South Australia*

Sustainable Urban Design Issues IV 4.5

##### semester 2

*University of South Australia*

Urban Management and Law IV 4.5

Urban Development and  
Implementation IV 4.5

- 4.2 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

## **5 Status, exemption and credit transfer**

- 5.1** A candidate will not be granted status for any subject which he or she has completed for another award.
- 5.2** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

- 6.1** There shall be four classifications of pass in the subjects for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2** (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

## **7 Articulation with other awards**

A candidate for the Graduate Diploma in Urban Design who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate

## Syllabuses

Note: equivalent subject values are - 3 points at The University of Adelaide = 4.5 points at the University of South Australia; 6 points at The University of Adelaide = 9 points at the University of South Australia.

### The University of Adelaide subjects

#### Core subjects

#### 1843 Elements of Urban Design IV A

3 points semester 1

Up to 16 hours of lectures/seminars/ tutorials/studios per week; hours vary from week to week

*corequisites:* 9644 Elements of Urban Design IVB

*restrictions:* 8024 Landscape Architecture Studio IC

This subject is concerned with the morphological underpinnings of cities and urban landscapes together with the historical traditions and theories behind urban and landscape design. The subject will typically review these topics using a medium sized landscape design and planning topic, in an urban setting, possessing urban design, cultural and physical issues. The subject will explore the role of design in urban settings, historical and theoretical exemplars and constructs relevant to urban design, and review the morphological patterns and traditions in city landscape design and formation.

The subject will also explore the role and contribution of urban and landscape design in our cultural environments.

A project-based learning program integrating design and the avenues of urban and landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of urban and landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects; these may include written, verbal and graphic (2 and 3 dimensional) communication.

#### 9644 Elements of Urban Design IV B

3 points semester 1

Up to 16 hours of lectures/seminars/ tutorials/studios per week; hours vary from week to week.

*corequisites:* 1843 Elements of Urban Design IVA

*restrictions:* 8024 Landscape Architecture Studio IC

This subject is concerned with the morphological underpinnings of cities and urban landscapes together with the historical traditions and theories behind urban and landscape design. The subject will typically review these topics using a medium sized landscape

design and planning topic, in an urban setting, possessing urban design, cultural and physical issues. The subject will explore the role of design in urban settings, historical and theoretical exemplars and constructs relevant to urban design, and review the morphological patterns and traditions in city landscape design and formation.

The subject will also explore the role and contribution of urban and landscape design in our cultural environments.

A project-based learning program integrating design and the avenues of urban and landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of urban and landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

The topics in Elements of Urban Design IVB are those not covered in Elements of Urban Design IVA.

*assessment:* assignments and projects; these may include written, verbal and graphic (2 and 3 dimensional) communication.

#### 8460 Urban Processes and Policy IV

3 points semester 1

Up to 6 hours of lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject is concerned with the nature and recent history of urban development, and with the economics, social and political processes which give rise to spatial patterns and built form. Economic and demographic aspects associated with urban development; the role, influence and design implications of infrastructure provision; the impact of information technology on current and future urban form; economic and equity issues behind sustainable development premises; and the political economy of urban design. The subject will typically review these topics using a series of case studies. (Likely topics include current debates about inequitable cities; the impact of globalisation, new information and transport policy on urban form; changing patterns of retail and commercial activity; compact cities vs. the perils of urban consolidation; etc.)

*assessment:* assignments

## University of South Australia subjects

The following subjects are offered by the University of South Australia as part of the Graduate Certificate programme. Graduate Certificate students enrolled at The University of Adelaide wishing to take any of these subjects (within the limits indicated in the Specific Course Rules) will be granted appropriate credit towards their Adelaide award.

Students taking any of the subjects must comply with the enrolment procedures of the University of South Australia. Details of those procedures are available from that University.

### Core subjects

#### Sustainable Urban Design Issues IV

4.5 points semester 1

Up to 6 hours of lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject is concerned with sustainable urban design process and principles. The subject will explore sustainable urban design ideas having regard to, natural and human resources, cultural attitudes to social, economic and environmental issues, public and private transport and access, conflict negotiation and innovative infrastructure considerations (including groundwater and stormwater management, electricity, solar power, etc). The subject will also consider evaluation techniques and the theoretical and practical implications of the design of sustainable communities.

*assessment:* assignments and projects

#### Urban Management and Law IV

4.5 points semester 2

Up to 6 hours of lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject is concerned with approaches to promoting and regulating urban development and design through plans, policies, laws, regulations and other instruments. It will typically include: changing notions of urban management - comprehensive plans, urban management, strategic planning, better cities, urban governance, public-private city partnerships; the changing roles of federal, state and local governments in urban management and planning; current and proposed legal and administrative arrangements for planning and development assessment in South Australia, including arrangements for addressing projects of major economic, environmental or social significance; responsibility for the public realm; appeal processes and requirements for community involvement. (There will be a broad focus on changing ideas of planning and urban management, but illustrated by local examples - the rise and fall (?) of strategic planning, SA experience with integrated

urban management at local level, the current debates about urban governance and the Adelaide 21 project, etc; plus Development Act changes, experience with urban design 'Panels' and the notion of 'design control', etc.)

*assessment:* assignments and projects

#### Urban Development and Implementation IV

4.5 points semester 2

Up to 6 hours of lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject will focus on the processes through which urban development occurs and through which urban development and urban design projects are implemented. The subject examines economic approaches to project appraisal, including cost-benefit analysis and discounted cash-flow analysis. There is also a focus on the politics of implementation and the roles and influence of elected governments and community interest groups in shaping and implementing urban development projects. There will be a strong emphasis on case studies of commercial and residential development projects at various scales, including major city centre redevelopment projects, joint ventures and partnerships and the role of the urban designer in implementation. (This is a key subject integrating other core subjects, plus providing a close link to Urban Management and Law IV. There is a strong case study emphasis, in particular international and interstate, with a detailed focus on Adelaide/SA projects: East End Redevelopment, Rosewood, The Parks, Port Adelaide, etc.)

*assessment:* assignments and projects

## Graduate Certificate in Design Studies

## Graduate Certificate in Design Studies (Landscape)

## Graduate Diploma in Design Studies

## Graduate Diploma in Design Studies (Landscape)

Applications for admission to the course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: Postgraduate tuition fees apply to this course

### Specific Course Rules

#### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the Graduate Certificate in Design Studies or the Graduate Certificate in Design Studies (Landscape) must have obtained:

- (a) the Ordinary or Honours degree of Bachelor of Design Studies of the University of Adelaide; or
- (b) an Ordinary or Honours degree of the University of Adelaide or an equivalent award from another educational institution accepted by the University for that purpose, subject to the approval of the Head of the Department of Architecture.

**1.2** An applicant for admission to the course of study for the Graduate Diploma in Design Studies must have obtained:

- (a) the Graduate Certificate in Design Studies of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose *or*
- (b) the Ordinary or Honours degree of Bachelor of Design Studies of the University of Adelaide *or*
- (c) an Ordinary or Honours degree of the University of Adelaide or an equivalent award from another educational institution accepted by the University for that purpose, subject to the approval of the Head of the Department of Architecture.

**1.3** An applicant for admission to the course of study for the Graduate Diploma in Design Studies (Landscape) must have obtained:

- (a) the Graduate Certificate in Design Studies (Landscape) of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose *or*
- (b) the Ordinary or Honours degree of Bachelor of Design Studies of the University of Adelaide *or*
- (c) an Ordinary or Honours degree of the University of Adelaide or an equivalent award from another educational institution accepted by the University for that purpose, subject to the approval of the Head of the Department of Architecture.

**1.4** The Faculty may in special cases and subject to such conditions (if any) as the Head of the Department of Architecture may see fit to impose in each case, accept as a candidate for the Graduate Certificate in Design Studies or Graduate Certificate in Design Studies (Landscape), or Graduate Diploma in Design Studies or Graduate Diploma in Design Studies (Landscape), an applicant who does not hold the qualifications specified in 1.1, 1.2 or 1.3 above but who has given evidence satisfactory to the Head of the Department of Architecture of fitness to undertake work for the Graduate Certificate in Design Studies or Graduate Certificate in Design Studies (Landscape) or Graduate Diploma in Design Studies or Graduate Diploma in Design Studies (Landscape).

**2 Status, exemption and credit transfer**

- 2.1 A candidate who has passed postgraduate level subjects in the Faculty or in other faculties of the University or in other educational institutions may on written application to the Faculty Registrar be granted such exemption from Specific Course Rules 5.3 and 5.4 as the Faculty may determine.
- 2.2 Candidates who have previously completed the requirements of the Graduate Certificate in Design Studies shall receive full status towards the Graduate Diploma in Design Studies for studies undertaken in the Graduate Certificate.
- 2.3 Candidates who have previously completed the requirements of the Graduate Certificate in Design Studies (Landscape) shall receive full status towards the Graduate Diploma in Design Studies (Landscape) for studies undertaken in the Graduate Certificate.
- 2.4 No candidate may be granted more than 12 points of status towards the Graduate Diploma in Design Studies or the Graduate Diploma in Design Studies (Landscape).

**3 Approval of course of study at enrolment**

- 3.1 Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

**4 Duration of course**

- 4.1 Except with the permission of the Faculty, the course for the Graduate Certificate in Design Studies or the Graduate Certificate in Design Studies (Landscape) shall be completed in not less than one semester and not more than one year of full-time study and in not less than one year and not more than two years of part-time study.
- 4.2 Except with the permission of the Faculty, the course for the Graduate Diploma in Design Studies or the Graduate Diploma in Design Studies (Landscape) shall be completed in not less than two semesters and not more than three semesters of full-time study and in not less than one year and not more than two years of part-time study.

**5 Course of study/Subjects of study**

- 5.1 To qualify for the Graduate Certificate in Design Studies a candidate shall pass any combination of the subjects listed in Rule 5.3 to the value of at least 12 points.
- 5.2 To qualify for the Graduate Certificate in Design Studies (Landscape) a candidate shall pass any combination of the subjects listed in Rule 5.4 to the value of at least 12 points.

- 5.3 To qualify for the Graduate Diploma in Design Studies a candidate shall pass the following subjects to the value of at least 24 points:

2026 Building Design Studio IV	6
6284 Design and Environments IV	6
9452 Design Communications IV	3
8490 Issues in Urban Sustainability IV	3
1461 Special Topic (Design) IVA*	6
5694 Special Topic (Design) IVB*	6
9805 Technology and the Built Environment IV	3
9554 Twentieth Century Architecture and Landscapes IV	3

- 5.4 To qualify for the Graduate Diploma in Design Studies (Landscape) a candidate shall pass the following subjects to the value of at least 24 points:

6284 Design and Environments IV	6
9452 Design Communications IV	3
6233 Issues in Landscape Sustainability IV	3
7819 Landscape Design Studio IV	6
7213 Special Topic (Landscape) IVA*	6
6567 Special Topic (Landscape) IVB*	6
9805 Technology and the Built Environment IV	3
9554 Twentieth Century Architecture and Landscapes IV	3

\*Students should consult the Department of Architecture about availability of subjects.

- 5.5 Subject substitutions will normally be selected from a list available from the Faculty Registrar; in unusual cases the Head of the Department of Architecture may approve different studies upon application by a candidate. In considering an application for a subject substitution the Head of the Department of Architecture shall have regard to the candidate's previous academic and practical experience.

**6 Review of academic progress**

- 6.1 If in the opinion of the Faculty a candidate for the Graduate Certificate or Graduate Diploma is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Graduate Certificate or Graduate Diploma awards.

## **7 Assessment and examinations**

- 7.1** There shall normally be four classifications of pass in the final assessment of any subject for the Graduate Certificate and Graduate Diploma awards, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification is in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the Specific Course Rules will not be classified.
- 7.2** A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 7.3** In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 7.4** A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

## **8 Articulation with other awards**

- 8.1** A candidate who holds a Graduate Certificate in Design Studies of the University of Adelaide shall surrender it before being admitted to the Graduate Diploma in Design Studies.
- 8.2** A candidate who holds a Graduate Certificate in Design Studies (Landscape) of the University of Adelaide shall surrender it before being admitted to the Graduate Diploma in Design Studies (Landscape).

## Syllabuses

### Graduate Certificate in Design Studies

### Graduate Diploma in Design Studies

### Graduate Certificate in Design Studies (Landscape)

### Graduate Diploma in Design Studies (Landscape)

#### 2026 Building Design Studio IV

6 points semester 2

Up to 6 hours lectures/seminars/studios per week

quota: will apply

*assumed knowledge:* 8490 Issues in Urban Sustainability IV or 6233 Issues in Landscape Sustainability IV

*restriction:* 3468 Building Design Studio III

In this subject students will apply their skills in formal composition and knowledge of precedent to the design of small building on a rural site. Emphasis will be placed on the use of materials, the building's structure and construction, its responses to the local environment, and its life-cycle costings.

*assessment:* assignments and projects

#### 6284 Design and Environments IV

6 points semester 2

Up to 3 hours of tutorials/ seminars/studios per week

quota will apply

The intersection of theory and practice in architecture and landscape architecture, developed in the context of student design projects. The subject will examine the range of theoretical and ideological discourses which influence approaches to 'place-making' in the urban environment.

The projects will offer a context in which students will explore cultural, historical, social and ethnographic issues, while developing a vocabulary of approaches, morphologies and typologies. Students will develop representational skills in various media.

*assessment:* assignments and projects

#### 9452 Design Communications IV

3 points semester 1

Up to 3 hours lectures and/or 2 hours tutorials per week

quota will apply

The representation and communication of design in writing, drawing and modelling including computer techniques.

*assessment:* assignments

#### 6233 Issues in Landscape Sustainability IV

3 points semester 1 or 2

Up to 4 hours lectures/seminars/studios per week

quota will apply

*restriction:* 8490 Issues in Urban Sustainability IV

This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the cultural, social, political, economic, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of landscapes in 'sustainable' urban environments, and will explore opportunities and constraints affecting the development of such environments.

*assessment:* assignments and projects

#### 8490 Issues in Urban Sustainability IV

3 points semester 1 or 2

Up to 4 hours of lectures/ seminars/ studios a week; hours vary from week to week

quota will apply

*restriction:* 6233 Issues in Landscape Sustainability IV

This subject will centre upon 'place-making' in urban environments. It will focus on the diversity of philosophical positions which inform current approaches to urban ecology understood in its widest sense, including not only the 'environmental', but the cultural, social, political, economics, institutional and professional realms.

The project-based learning program will offer a context in which students will develop knowledge and skills required in the creation of buildings in 'sustainable' urban environments, and explore opportunities and constraints affecting the development of such environments.

*assessment:* assignments and projects

#### 7819 Landscape Design Studio IV

6 points semester 2

Up to 6 hours of lectures/seminars/studios per week

quota will apply

*assumed knowledge:* 8490 Issues in Urban Sustainability IV or 6233 Issues in Landscape Sustainability IV

*restriction:* 8650 Landscape Design Studio III

In this subject students will apply their skills in formal composition and knowledge of precedent to the design of a small to medium sized park, allotment or place. Emphasis will be placed on design, use of materials and plants, any installations and their construction, the design's responses to the local environment, and life-cycle costings.

*assessment:* assignments and projects

**1461 Special Topic (Design) IVA**

6 points semester 1

Up to 5 hours of lectures/seminars/ studios per week; field study trips

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects

**5694 Special Topic (Design) IVB**

6 points semester 2

Up to 5 hours of lectures/seminars/ studios per week; field study trips

consult Department of Architecture

Details will be provided by the Department of Architecture when specialist teaching is available.

**7213 Special Topic (Landscape) IVA**

6 points semester 1

Up to 5 hours of lectures/seminars /studios per week; field study trips

quota will apply

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects

**6567 Special Topic (Landscape) IVB**

6 points semester 2

Up to 5 hours lectures/ seminars/studios per week; field study trips.

quota will apply

Details will be provided by the Department of Architecture when specialist teaching is available.

*assessment:* assignments and projects

**9805 Technology and the Built Environment IV**

3 points semester 1

Up to 2 hours lectures, 2 hours tutorials per week

*restriction:* 9805 Science and the Built Environment IV quota will apply

Taking a project-based approach the subject will examine the application of science to the design and construction of built environments. Key topics will include design in relation to acoustic performance, thermal comfort, building structures and construction materials and techniques.

*assessment:* assignments and projects

**9554 Twentieth Century Architecture and Landscapes IV**

3 points semester 1

Up to 2 hours lectures, 2 hours tutorials per week

quota will apply

A detailed exploration of compositional and theoretical aspects of 20th Century architectural and landscape design. This subject introduces students to a vocabulary of articulating spatial qualities in selected examples of 20th Century architectural and landscape design. It seeks to enhance students' appreciation of the possibilities of appropriating published writing and projects to nurture their own outlooks and abilities. Practical work includes exercises in three-dimensional composition and in writing short analytical texts.

*assessment:* assignments

## Graduate Diploma in Architecture (Electronic Media)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Part of this course will be available in the external mode.

Note: postgraduate tuition fees apply to this course.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Architecture (Electronic Media) shall have qualified for the degree of Bachelor of Architecture of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University; or hold or be eligible to hold the Graduate Certificate in Architecture (Electronic Media) of the University
- 1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete 24 points of study in one year of full-time study or the equivalent of part-time study provided that the subject 2868 Architectural Design with Electronic Design Media C is completed over a summer semester.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

- 4.1 To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

4852 Architectural Design with Electronic Media A	6
9312 Architectural Design with Electronic Media B	6
2868 Architectural Design with Electronic Media C	12

- 4.2 A candidate may take only one of 4852 Architectural Design with Electronic Media A or 9312 Architectural Design with Electronic Media B through distance learning

- 4.3 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

- 5.1 No candidate will be granted status for 9312 Architectural Design with Electronic Media B
- 5.2 No candidate shall be granted status for subjects with a total value of more than 6 points
- 5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

- 6.1 There shall be four classifications of pass in the subjects for the Graduate Diploma. Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned  
(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

**7 Articulation with other awards**

- 7.1** A candidate who has been admitted to the Graduate Certificate in Architecture (Electronic Media) and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate must surrender the Graduate Certificate before being admitted to the Graduate Diploma.

## Syllabuses

### 4852 Architectural Design with Electronic Media A

6 points semester 1 or 2

Contact hours vary - periods of intensive group contact and periods of less frequent individual tutorials

*assumed knowledge:* applicants will be assumed to have experience and skills in using a 3D CAD tool

Students will carry out a series of four small scale architectural design projects designed to use and develop skills and understanding in the 3D representation of design ideas with computer media, the visualisation and animation of design proposals at various levels of abstraction, and the presentation of work on the World Wide Web for an international audience. The projects will be developed to suit individual student needs.

This subject may be taken in Adelaide using the Department's resources. It may also be taken through distance learning using the World Wide Web and email as the medium for communication. In this latter case, students must have access to the necessary computer hardware, software and network facilities.

*assessment:* projects

### 9312 Architectural Design with Electronic Media B

6 points semester 1 or 2

Contact hours vary - periods of intensive group contact and periods of less frequent individual tutorials

*assumed knowledge:* applicants will be assumed to have experience and skills in using a 3D CAD tool

Students will carry out a significant architectural design project designed to use and develop skills and understanding in the 3D representation of design ideas with computer media, the visualisation and animation of design proposals at various levels of abstraction, and the presentation of work on the World Wide Web for an international audience. The projects will be developed to suit individual student needs.

This subject may be taken in Adelaide using the Department's resources. It may also be taken through distance learning using the World Wide Web and email as the medium for communication. In this latter case, students must have access to the necessary computer hardware, software and network facilities.

The projects will be topics not covered in 4852 Architectural Design with Electronic Media A.

*assessment:* projects

### 2868 Architectural Design with Electronic Media C

12 points summer semester

Contact hours vary - periods of intensive group contact and periods of less frequent individual tutorials

*assumed knowledge:* applicants will be assumed to have experience and skills in using a 3D CAD tool

Students will carry out a series of two or three design projects under the guidance of both academic staff and practising architects with a high standing in architectural design. The projects and students will be located in Australia, including a period at the University of Adelaide but also normally including periods in Sydney or elsewhere. The emphasis is on high level design skills, students being assumed to have already developed the technical skills in the use of electronic media. A typical series of projects would be: an Australian house, with practising Architecture tutor, site and students all in Sydney; an Adelaide urban building, based in Adelaide and using the Adelaide 3D computer model; an eco-tourism resort, with students, staff and computing equipment in a remote location.

*assessment:* projects

## Graduate Diploma in Urban Design

This course is offered jointly by the University of Adelaide and the University of South Australia.

Applications for admission shall be directly to the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: Postgraduate tuition fees apply to this course.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Urban Design shall have qualified for:
- (a) a degree of the University incorporating major studies in one or more of the following disciplines: planning, design studies, property, landscape architecture, architecture, real estate, environmental engineering or an allied discipline; or for a degree of another institution accepted for the purpose by the University; *or*
  - (b) the Graduate Certificate in Urban Design
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty Office of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete two semesters of full-time study or the equivalent of part-time study, provided that the course is completed within three years of initial enrolment.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

- 4.1 To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, including the core subjects 1843 Elements of Urban Design IVA and 9644 Elements of Urban Design IVB; at

least two other core subjects; and elective subjects to the equivalent value of at least 6 points, provided that subjects to the value of at least 12 points are taken at the University of Adelaide.

#### 4.1.1 Core subjects

Note not forming part of the Specific Course Rules: Equivalent subject values are - 3 points at the University of Adelaide = 4.5 points at the University of South Australia; 6 points at the University of Adelaide = 9 points at the University of South Australia

- (a) All candidates shall satisfactorily complete the following subjects offered by the University of Adelaide:
  - 1843 Elements of Urban Design IVA 3
  - 9644 Elements of Urban Design IVB 3
- (b) In addition, all candidates shall satisfactorily complete at least two of the following subjects which are offered at either the University of Adelaide or the University of South Australia. Students taking subjects at both the University of Adelaide and University of South Australia must comply with the enrolment procedures of both institutions

#### semester 1

*The University of Adelaide*

8460 Urban Processes and Policy IV 3

*University of South Australia*

Sustainable Urban Design Issues IV 4.5

#### semester 2

*University of South Australia*

Urban Management and Law IV 4.5

Urban Development and Implementation IV 4.5

#### 4.1.2 Elective subjects

Note not forming part of the Specific Course Rules: Equivalent subject values are - 3 points at the University of Adelaide = 4.5 points at the University of South Australia; 6 points at the University of Adelaide = 9 points at the University of South Australia

Candidates shall satisfactorily complete at least the equivalent of 6 points of elective subjects from the following subjects which are offered at either the University of Adelaide or the University of South Australia, or from Level IV subjects chosen in consultation with the Course Coordinator. Students taking subjects at both the University of Adelaide and University of South Australia must comply with the enrolment procedures of both institutions.

##### *The University of Adelaide*

Choice of elective subjects from the Master of Landscape Architecture course, or subjects offered by the Department of Geography, as follows:

5688	Landscape Architecture Studio IA	6
6763	Landscape Architecture Studio IB	6
1624	Landscape Architecture Studio ID	6
2507	Landscape Architecture Seminar II	3
9330	Introduction to G.I.S. IV	3
1358	Introduction to G.I.S. Projects IV	3

##### *University of South Australia*

Choice of elective subjects from the Master of Urban Planning course as follows:

Contemporary Social Issues

Transport and Planning

Comparative Planning 1

Gender and Planning

- 4.2 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

### 5 Status, exemption and credit transfer

- 5.1 A candidate will not be granted status for any subject which he or she has completed for another award
- 5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

### 6 Assessment and examinations

- 6.1 There shall be four classifications of pass in the subjects for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

### 7 Articulation with other awards

- 7.1 A candidate who has been admitted to the Graduate Certificate in Urban Design and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate must surrender the Graduate Certificate before being admitted to the Graduate Diploma.
- 7.2 A candidate for the Graduate Diploma in Urban Design who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

## Syllabuses

Note: equivalent subject values are: 3 points at The University of Adelaide = 4.5 points at the University of South Australia; 6 points at The University of Adelaide = 9 points at the University of South Australia.

### The University of Adelaide subjects core subjects

#### 1843 Elements of Urban Design IV A

3 points semester 1

Up to 16 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week.

*corequisites:* 9644 Elements of Urban Design IVB

*restrictions:* 8024 Landscape Architecture Studio IC

This subject is concerned with the morphological underpinnings of cities and urban landscapes together with the historical traditions and theories behind urban and landscape design. The subject will typically review these topics using a medium sized landscape design and planning topic, in an urban setting, possessing urban design, cultural and physical issues. The subject will explore the role of design in urban settings, historical and theoretical exemplars and constructs relevant to urban design, and review the morphological patterns and traditions in city landscape design and formation.

The subject will also explore the role and contribution of urban and landscape design in our cultural environments.

A project-based learning program integrating design and the avenues of urban and landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of urban and landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and project - may include written, verbal and graphic (2 and 3 dimensional) communication

#### 9644 Elements of Urban Design IV B

3 points semester 1

Up to 16 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week.

*corequisites:* 1843 Elements of Urban Design IVA

*restrictions:* 8024 Landscape Architecture Studio IC

This subject is concerned with the morphological underpinnings of cities and urban landscapes together with the historical traditions and theories behind urban and landscape design. The subject will typically review these topics using a medium sized landscape

design and planning topic, in an urban setting, possessing urban design, cultural and physical issues. The subject will explore the role of design in urban settings, historical and theoretical exemplars and constructs relevant to urban design, and review the morphological patterns and traditions in city landscape design and formation.

The subject will also explore the role and contribution of urban and landscape design in our cultural environments.

A project-based learning program integrating design and the avenues of urban and landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of urban and landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

The topics in Elements of Urban Design IVB are those not covered in Elements of Urban Design IVA..

*assessment:* assignments and projects - may include written, verbal and graphic (2 and 3 dimensional) communication.

#### 8460 Urban Processes and Policy IV

3 points semester 1

Up to 6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject is concerned with the nature and recent history of urban development, and with the economics, social and political processes which give rise to spatial patterns and built form. Economic and demographic aspects associated with urban development; the role, influence and design implications of infrastructure provision; the impact of information technology on current and future urban form; economic and equity issues behind sustainable development premises; and the political economy of urban design. The subject will typically review these topics using a series of case studies. (Likely topics include current debates about inequitable cities; the impact of globalisation, new information and transport policy on urban form; changing patterns of retail and commercial activity; compact cities vs. the perils of urban consolidation; etc.)

*assessment:* assignments

### **elective subjects**

Choice of elective subjects from the Master of Landscape Architecture course or the Department of Geography, from the list outlined in Specific Course Rule 4.1.3

### **University of South Australia subjects**

The following subjects are offered by the University of South Australia as part of the Graduate Diploma program. Graduate Diploma students enrolled at The University of Adelaide wishing to take any of these subjects (within the limits indicated in the Specific Course Rules) will be granted appropriate credit towards their Adelaide award.

Students taking any of the subjects must comply with the enrolment procedures of the University of South Australia. Details of those procedures are available from that University.

### **core subjects**

#### **Sustainable Urban Design Issues IV**

4.5 points semester 1

Up to 6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject is concerned with sustainable urban design process and principles. The subject will explore sustainable urban design ideas having regard to, natural and human resources, cultural attitudes to social, economic and environmental issues, public and private transport and access, conflict negotiation and innovative infrastructure considerations (including groundwater and stormwater management, electricity, solar power, etc). The subject will also consider evaluation techniques and the theoretical and practical implications of the design of sustainable communities.

*assessment:* assignments and projects

#### **Urban Management and Law IV**

4.5 points semester 2

Up to 6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject is concerned with approaches to promoting and regulating urban development and design through plans, policies, laws, regulations and other instruments. This subject will typically include: **changing notions of urban management** - comprehensive plans, urban management, strategic planning, better cities, urban governance, public-private city partnerships; the changing roles of federal, state and local governments in urban management and planning; current and proposed legal and administrative arrangements for planning and development assessment in South Australia, including

arrangements for addressing projects of major economic, environmental or social significance; responsibility for the public realm; appeal processes and requirements for community involvement. (There will be a broad focus on changing ideas of planning and urban management, but illustrated by local examples - the rise and fall (?) of strategic planning, SA experience with integrated urban management at local level, the current debates about urban governance and the Adelaide 21 project, etc; plus Development Act changes, experience with urban design 'Panels' and the notion of 'design control', etc.)

*assessment:* assignments and projects

#### **Urban Development and Implementation IV**

4.5 points semester 2

Up to 6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week.

This subject will focus on the processes through which urban development occurs and through which urban development and urban design projects are implemented. The subject examines economic approaches to project appraisal, including cost-benefit analysis and discounted cash-flow analysis. There is also a focus on the politics of implementation and the roles and influence of elected governments and community interest groups in shaping and implementing urban development projects. There will be a strong emphasis on case studies of commercial and residential development projects at various scales, including major city centre redevelopment projects, joint ventures and partnerships and the role of the urban designer in implementation. (This is a key subject integrating other core subjects, plus providing a close link to Urban Management and Law. There will be a strong case study emphasis, in particular international and interstate, with a detailed focus on Adelaide/SA projects - East End Redevelopment, Rosewood, The Parks, Port Adelaide, etc.)

*assessment:* assignments and projects

### **elective subjects**

Choice of elective subjects from the Master of Urban Planning, from the list outlined in Specific Course Rule 4.1.3.

Details about the elective subjects to be offered by the University of South Australia, including information on their content, assessment and reading lists, are available in the Calendar of the University of South Australia, Vol. II.

## Master of Architecture (Coursework)

Applications for admission to the course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: Postgraduate tuition fees apply to this course

### Specific Course Rules

#### Aims and objectives

Graduates enrolled in the degree of Bachelor of Architecture (New), the degree of Master of Architecture (Coursework), the degree of Master of Design Studies, the degree of Master of Architecture (by research), the award of Graduate Diploma in Design Studies and the award of Graduate Certificate in Design Studies collectively comprise the Architecture Program.

The postgraduate Master of Architecture (Coursework) [M.Arch.(Coursework)] is intended for graduates wishing to practice or participate in the discipline of architecture. Studio-based, it is project-oriented and concerned with the technical and practical matters of practice within a philosophical and theoretical context of professional ethics, aesthetics and style, performance specification and management, and the many other issues that concern practitioners. Entrants to the degree are graduates who have demonstrated abilities to link critical thought and creative action. Graduates of the degree should have:

- acquired knowledge and skills sufficient for early stages of directed activity in an existing architectural practice
- developed intellectual and creative approaches and adaptability to form a basis for continued learning and development throughout professional life

#### Educational objectives

The curriculum and teaching of the degree will have both substantive and instrumental objectives. Substantive objectives pertain to knowledge of the nature of architectural practice. Instrumental objectives pertain to skills and techniques relevant to operating as an architect.

#### Substantive objectives

The profession of architecture

Ethics and the environmental, social and legal responsibilities of the profession of architecture.

#### Architectural services

The recognition of situations where an architect can contribute, the formulation of appropriate strategies, and appropriate pre-design, design, project management and post construction services.

Processes in developing designs, including the development of a brief, and the outline, assessment, detailed design and costing of proposals in conformity with codes and other requirements. The organisation, management and documentation associated with building construction and the administration of building contracts.

The marketing of architectural services.

The technology of architecture.

Building planning, construction, structure and services as they relate to new buildings and alterations to existing buildings.

The architect in relation to other professions, organisations and the building industry

The relationship of architects to builders, structural and building services engineers, landscape architects, interior designers, urban designers, planners, and others involved in the creation of the built environment.

The relationship of the profession of architecture to statutory authorities and to the building industry.

#### Instrumental objectives

##### Designing

The practice of architectural design, emphasising the pervasion of design from planning to detailing and the interrelationship of aesthetic, economic, environmental, legal, societal and individual reactions, and technical factors, and the nature of design as a group activity.

##### Surveying

Land and building surveying.

## Communicating

The communication and documentation of designs as a part of the individual and group design process and for clients, construction, public presentation and statutory authorities.

The preparation of professional reports.

## Managing

The management and operation of an architectural practice and the activities of an architectural practice.

## 1 Admission requirements

- 1.1** A candidate for admission to the course of study for the Master of Architecture (Coursework) must have obtained or completed the requirements for:
- the Honours degree of Bachelor of Design Studies of the University of Adelaide subject to successful completion of subjects comprising the Architectural Studies major *or*
  - the Honours degree of Bachelor of Architecture or Honours degree of Bachelor of Landscape Architecture of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose *or*
  - the Ordinary degree of Bachelor of Architecture of the University of Adelaide and at least two years' appropriate professional experience *or*
  - the Ordinary degree of Bachelor of Architecture (New) of the University of Adelaide with credit average result or better *or*
  - a five year degree in Architecture or Landscape Architecture from another educational institution accepted by the University for the purpose and at least two years' appropriate professional experience *or*
  - the Graduate Diploma in Design Studies of the University of Adelaide with credit average result or better, or an equivalent award from another educational institution accepted by the University for the purpose.
- 1.2** Subject to the approval of Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualifications specified in 1.1 above but who has given

evidence satisfactory to the Faculty of fitness to undertake work for the degree.

## 2 Status, exemption and credit transfer

- 2.1** A candidate who has passed postgraduate level subjects in the Faculty or in other faculties of the University or in other educational institutions, may on written application to the Dean be granted such exemption from these Specific Course Rules as the Faculty may determine.
- 2.2** No student may be granted more than 36 points of status towards the Master's degree. Status will not be granted for the subject 3489 Architecture Masters Dissertation.

## 3 Approval of course of study at enrolment

- 3.1** Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

## 4 Duration of course

- 4.1** The course of study for the degree shall extend over five semesters of full-time study or the equivalent. Students shall pass subjects to the value of at least 60 points. The point values of the subjects are contained in Specific Course Rule 5.1.

## 5 Course of study/Subjects of study

- 5.1** To qualify for the degree of Master of Architecture (Coursework) a candidate shall pass the following subjects to the value of at least 60 points:

8004 Architecture Studio IA	6
9858 Architecture Studio IB	6
1044 Architecture Studio IC	6
1693 Architecture Studio ID	6
6951 Architecture Studio II	8
8794 Architecture Practice II	4
6264 Architecture Masters Project	12
3489 Architecture Masters Dissertation	12

## 6 Review of academic progress

- 6.1** If in the opinion of the Faculty a candidate for the Master of Architecture (Coursework) is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Masters degrees.

## **7 Assessment and examinations**

- 7.1 There shall normally be four classifications of pass in the final assessment of any subject for the Masters (Coursework) degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the relevant Specific Course Rules will not be classified.
- 7.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- 7.3 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.
- 7.4 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.
- 7.5 The Faculty shall appoint at least two examiners of the Dissertation, at least one of whom shall be external to the Department of Architecture.

## **8 Articulation with other awards**

- 8.1 Notwithstanding the above Rules a candidate who has been enrolled for the Master of Architecture (Coursework) and who has completed the work prescribed herein for the Ordinary or Honours degree of Bachelor of Architecture of the University of Adelaide and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the appropriate degree of Bachelor of Architecture.

## Syllabuses

### Level I

Note: During the first year of the course there will be a field trip of approximately 1 week to visit projects relevant to the following Architecture Studio subjects.

#### 8004 Architecture Studio IA

6 points semester 1 or 2

Up to 18 hours lectures/tutorials/ workshops; hours vary from week to week

This subject aims to develop design skills in an holistic sense bringing together regulatory, technical, human (including social and cultural) and environmental factors. The material will be developed through integrated projects. The studio projects will be topics not treated in other Level I subjects. Lectures given in the subject will complement the design process addressing the topics outlined in other Level I subjects.

*assessment:* written, verbal, and graphical (2 and 3 dimensional) communication of two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

#### 9858 Architecture Studio IB

6 points semester 1 or 2

Up to 18 hours lectures/tutorials/ workshops; hours vary from week to week

A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture Studio IB will typically be focused on the design of a dwelling (or small group of dwellings) on a real site, with a particular owner-occupier as client. Students will be required to develop a brief from the client's instructions. Theory and practice regarding a range of aspects of low-rise domestic construction (including site preparation, footings, light timber framing and masonry construction) will be applied.

Students will be expected to explore a design 'parti' and its sources and precedents, to explain design intentions and communicate the architectural intentions of the building design, and to demonstrate that they understand its potential construction and performance.

There will be an emphasis on the lighting and thermal performance of the building and associated energy use, in the context of the client's requirements.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* written, verbal, and graphical (2 and 3 dimensional) communication of two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

#### 1044 Architecture Studio IC

6 points semester 1 or 2

Up to 18 hours lectures/tutorials/ workshops; hours vary from week to week

A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture Studio IC will typically be focused on the design of a building alteration and refurbishment, requiring facilities planning, the survey and measuring of an existing building, and the preparation of measured drawings and dilapidation reports. It will also address issues arising in building conservation and the insertion of new buildings into heritage areas. There will be emphasis on structural assessment, materials characteristics and selection, plumbing and electrical services, and lighting.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* written, verbal, and graphical (2 and 3 dimensional) communication of two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

#### 1693 Architecture Studio ID

6 points semester 1 or 2

Up to 18 hours lectures/tutorials/ workshops; hours vary from week to week

A project-based learning program integrating design and the technology and practices of construction, structures, materials and building services, within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological factors.

Architecture Studio ID will typically be focused on the design of a school, child-care centre, nursing home or similar low-rise building where the needs of a particular group of building users must be understood and addressed. The problem will involve site planning and landscape design issues. Theory regarding the design, construction and structure of low-rise concrete (precast and/or in situ) buildings will be studied and applied. There will be emphasis on the acoustic performance of the building and on site infrastructure.

Students will be required to undertake and document a survey of the site, and develop a brief from the client's instructions, and other contextual information.

Lectures given in the subject will complement the design process, addressing the topics outlined above.

*assessment:* written, verbal, and graphical (2 and 3 dimensional) communication of two equally weighted components\*; to pass the subject a mark of at least 50% must be obtained for each component.

\*components: Component A will include the realisation and communication of architectural ideas in three dimensions in relation to a design situation. Component B will include the technical description and justification of architectural design

## Level II

### 6951 Architecture Studio II

8 points semester 1

Up to 18 hours lectures/tutorials/ workshops; hours vary from week to week

*prerequisite:* see Bachelor of Architecture (New), Specific Course Rule 6.2

A project-based learning program in which students will develop their abilities to define the problem, bringing together the regulatory, technical, human (including social and cultural) and environmental factors studied in Level I Architecture Studios, and other facets of the theory and practice of design in architecture.

Architecture Studio II will typically be focused on the design of a mixed-use commercial multi-storey building located in a central business district and raising significant urban design issues. The project will be taken from early (facilities planning) to late (documentation) stages and beyond to post-occupancy evaluation, and will mirror in an educational setting many of the processes carried out in an architectural office. Other, minor, projects will typically involve the schematic design of a sports hall, warehouse, or similar large-span building and a suburban or rural site. Topics which will be emphasised include urban design; design in relation to fire safety and regulations; mechanical services (including heating, ventilation and air conditioning) electrical services; water supply and drainage; excavation and footings; materials and finishes; repetition of building material and industrialised components; joinery construction.

Lectures given in the subject will complement the design process addressing the topics outlined above.

*assessment:* projects

### 8794 Architecture Practice II

4 points semester 1

Up to 6 hours of lectures a week

Topics include organisational theory; principles of law; the general organisation of architectural practice including the management of an office's human, physical and financial resources, the relationship between architects and their clients; consultants and contractors; contract administration; specifications; the legal qualifications of an architect; professional organisations; ethics; risk management and professional liability; planning and building law and regulations; problems facing the architect today; estimating and cost control; bills of quantities; the role of the quantity surveyor; project management; the range of services offered by architects. A number of visits to architectural offices will be organised.

A student is expected to be in possession of a current copy of the Building Code of Australia and its associated commentary, as a requirement of this subject.

*assessment:* assignments

### 6264 Architecture Masters Project II

12 points semester 1 or 2

Up to 20 hours a week studio work, with specialist lectures irregularly spaced

*prerequisites:* 8004 Architecture Studio IA, 9858 Architecture Studio IB, 1044 Architecture Studio IC, 1693 Architecture Studio ID and 6951 Architecture Studio II

The project will be of moderate to high complexity, drawn from a limited selection. Responses should demonstrate all phases of architectural designing; sketch plans, technical development including one specialised topic, and a final presentation which should show a thorough integration of all major aspects of the course.

*assessment:* final project

### 3489 Architecture Masters Dissertation III

12 points semester 1, or 2 or summer semester

2 hour tutorial/seminar weekly.

*prerequisites:* 6264 Architecture Masters Project II

*restriction:* enrolment subject to application to the Head of Department and contingent upon prior results.

*assumed knowledge:* Design at postgraduate degree level.

This subject comprises an individual design, planning and/or research project which permits the exposition of the major aspects of the course and a student's

particular interests. Students will be required to undertake supervised research and/or design exploration into a particular topic, leading to the presentation of a seminar paper and/or exhibition, and submission of a final essay or report of between 6000 to 12000 words and containing facsimile copies of all associated project work.

The project will be of a high complexity, and often drawn from a limited selection and address a specific topic in architecture. Responses should demonstrate an advanced level of knowledge and ability in one or more aspects of architectural thought and practice, including evidence of the student's ability to collect and evaluate information, construct, test and defend arguments or hypotheses, and critically examine theories in the area of inquiry. The final presentation or exhibition of the project should display a thorough integration of all major aspects of the Program and its Mission Statement and Program Objectives.

*assessment:* seminar paper and/or exhibition, and final essay or report articulating and supporting the project

# Master of Landscape Architecture

Applications for admission to the course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: Postgraduate tuition fees apply to this course

## Specific Course Rules

### Aims and objectives

The degree of Bachelor of Landscape Architecture, the degree of Master of Landscape Architecture, the degree of Master of Design Studies (Landscape), the award of Graduate Diploma in Design Studies (Landscape) and the award of Graduate Certificate in Design Studies (Landscape) collectively comprise the Landscape Architecture Program.

The postgraduate Master of Landscape Architecture (M.L.Arch.) is intended for graduates wishing to practise or participate in the discipline of landscape architecture. Studio-based, it is project-oriented and concerned with the technical and practical matters of landscape architecture research and practice within a philosophical and theoretical context of professional ethics, aesthetics and style, performance specification and management, and the many other issues that concern practitioners. Entrants to the degree are graduates who have demonstrated abilities to link critical thought and creative action.

The Mission of the Landscape Architecture Program is to be at the forefront of Australian landscape architecture practice that successfully integrates nature and culture together as key constructs for designs and strategies that are innovative, sustainable and culturally attuned.

Program Objectives to achieve this Mission are to:

- establish an incremental suite of projects and studio foci that reinforce the Mission
- interlink with and co-operatively involve the participation of the profession and allied disciplines to advance landscape architecture knowledge
- foster reflection-in-action and lifelong learning strategies
- establish a community profile for the discipline through projects, research, exhibitions, conferences, publications, and community participation
- establish a strong and co-operative educational profile with allied disciplines within the University of Adelaide environment.

Graduates of the Master of Landscape Architecture degree should have:

- acquired knowledge and skills sufficient for early stages of directed activity in an existing landscape architectural practice
- developed intellectual and creative approaches and adaptability to form a basis for continued learning and development throughout professional life.

### Educational objectives

The curriculum and teaching of the Master of Landscape Architecture degree will have both substantive and instrumental objectives. Substantive objectives pertain to knowledge of the nature of landscape architectural practice. Instrumental objectives pertain to skills and techniques relevant to operating as a landscape architect.

### Substantive objectives

An introduction to the profession of landscape architecture

The appreciation of ethics and the environmental, social and legal responsibilities of the profession of landscape architecture.

Landscape architectural services

The recognition of situations where a landscape architect can contribute, the formulation of appropriate strategies, and appropriate pre-design, design, project management and post construction services.

Processes in developing designs, including the development of a brief, and the outline, assessment, detailed design and costing of proposals in conformity with codes and other requirements.

The organisation, management and documentation associated with construction and the administration of contracts.

The marketing of landscape architectural services.

The technology of landscape architecture.

Site planning, construction, vegetation and habitat provision, water systems and hydrology, structures and services as they relate to new buildings, alterations, and site planning and design interventions.

The landscape architect in relation to other professions, organisations and the building industry

The relationship of landscape architects to builders, structural and building services engineers, architects, interior designers, urban designers, planners, and others included in the creation of the built environment and human-dominated and shaped landscapes.

The relationship of the profession of landscape architecture to statutory authorities and to the design industry.

## Instrumental objectives

### Designing

The practice of landscape architectural design, emphasising the pervasion of design from planning to detailing and the interrelationship of aesthetic, economic, environmental, legal, societal and individual reactions, and technical factors, and the nature of design as a group activity.

### Site Planning

The practice of comprehending and taking advantage of variables relevant to site planning including flora, fauna, soils, water systems, energy systems, building materials, human activities and desires, heritage conservation and the poetics of space, site and structure assembly and arrangement, etc.

### Communication

The communication and documentation of designs as a part of the individual and group processes and for clients, construction, public presentation and statutory authorities.

The preparation of professional reports.

### Managing

The management and operation of a landscape architectural practice and the activities of a landscape architectural practice.

## 1 Admission requirements

1.1 A candidate for admission to the course of study for the Master of Landscape Architecture must have obtained or completed the requirements for:

- (a) the Honours degree of Bachelor of Design Studies of the University of Adelaide subject to successful completion of subjects comprising the Landscape Studies major *or*

- (b) the Honours degree of Bachelor of Architecture or Honours degree of Bachelor of Landscape Architecture of the University of Adelaide or an equivalent award from another educational institution accepted by the University for the purpose *or*
- (c) the Ordinary degree of Bachelor of Architecture of the University of Adelaide and at least two years' appropriate professional experience *or*
- (d) the Ordinary degree of Bachelor of Landscape Architecture of the University of Adelaide with credit average result or better *or*
- (e) a five year degree in Architecture of Landscape Architecture from another educational institution accepted by the University for the purpose *or*
- (f) the Graduate Diploma in Design Studies (Landscape) of the University of Adelaide with credit average result or better, or an equivalent award from another educational institution accepted by the University for the purpose.

1.2 Subject to the approval of Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualifications specified in 1.1 above but who has given evidence satisfactory to the Faculty of fitness to undertake work for the degree.

## 2 Status, exemption and credit transfer

2.1 A candidate who has passed postgraduate level subjects in the Faculty or in other faculties of the University or in other educational institutions, may on written application to the Dean be granted such exemption from these Specific Course Rules as the Faculty may determine.

2.2 No student may be granted more than 48 points of status towards the Master's degree. Status will not be granted for the subject 2200 Landscape Architecture Masters Dissertation.

2.3 A candidate who has qualified for the degree of Bachelor of Landscape Architecture of the University of Adelaide shall be granted status for subjects passed, except that only those candidates who have achieved a Pass with Credit or better in 7625 Landscape Architecture Project II will be granted status in 3497 Landscape Architecture Masters Project.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Dean of the Faculty (or nominee) at enrolment each year.

### 4 Duration of course

- 4.1 The course of study for the degree shall extend over five semesters of full-time study or the equivalent. Students shall pass subjects to the value of at least 60 points. The point values of the subjects are contained in Specific Course Rule 5.1.

### 5 Course of study/Subjects of study

- 5.1 To qualify for the degree of Master of Landscape Architecture a candidate shall pass the following subjects to the value of at least 60 points:

5688	Landscape Architecture Studio IA	6
6763	Landscape Architecture Studio IB	6
8024	Landscape Architecture Studio IC	6
1624	Landscape Architecture Studio ID	6
9261	Landscape Architecture Studio II	6
2507	Landscape Architecture Seminar II	3
6817	Landscape Architecture Practice II	3
3497	Landscape Architecture Masters Project	12
2200	Landscape Architecture Masters Dissertation	12

### 6 Review of academic progress

- 6.1 If in the opinion of the Faculty a candidate for the Master of Landscape Architecture is not making satisfactory progress, the Faculty may, with the consent of the Council, terminate the candidature and the candidate shall cease to be enrolled for the Masters degrees.

### 7 Assessment and examinations

- 7.1 There shall normally be four classifications of pass in the final assessment of any subject for the Masters degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. If the Pass classification be in two divisions a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to further studies in that subject or to other subjects. Results in certain subjects as specified in the relevant Specific Course Rules will not be classified.

- 7.2 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

- 7.3 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the subject of the way in which work will be taken into account and of its relative importance in the final result.

- 7.4 A candidate who fails a subject or who obtains a lower division pass and who desires to take that subject again shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned.

- 7.5 The Faculty shall appoint at least two examiners of the Dissertation, at least one of whom shall be external to the Department of Architecture.

### 8 Articulation with other awards

- 8.1 Students who have conferred upon them the Ordinary or Honours degree of Bachelor of Landscape Architecture of the University of Adelaide who subsequently successfully complete the requirements of the Master of Landscape Architecture must surrender the Bachelor's degree before being admitted to the Master's degree. A candidate may obtain either the Master's degree or the Bachelor's degree but not both.

- 8.2 Notwithstanding the above Rules a candidate who has been enrolled for the Master's degree of Landscape Architecture and who has completed the work prescribed herein for the Ordinary or Honours degree of Bachelor of Landscape Architecture of the University of Adelaide and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the appropriate degree of Bachelor of Landscape Architecture.

## Syllabuses

Note: Students in Design Studios will be expected to explore a design 'parti' or approach and its sources and precedents, to explain design and planning intentions and to communicate the design and/or plan. Scope of classes will cover design theory, social, cultural and natural resource analysis, data collection and synthesis, conceptual and site planning and design, design development, and methods of inquiry to varying degrees depending on the area and topic of study. Lectures and workshops in the subject will complement the design, planning and investigation processes, addressing the topics outlined above. In groups and/or individually students will typically work on project topics which benefit the community and/or heighten the profile of landscape architecture and public awareness of critical landscape issues.

### 5688 Landscape Architecture Studio IA

6 points semester 1 or 2

*assumed knowledge:* Design at the undergraduate level

16-18 hours average lectures/ tutorials/ workshops/ field trips; hours vary from week to week

This subject will typically address a small to medium sized landscape design and planning topic in a rural setting possessing high aesthetic and ecological qualities and experiencing human development pressures. The subject will explore the role and opportunities for landscape design and planning interventions and strategies in a precinct or region of high scenic and biological values and human pressures caused either by mining, recreation, transportation, commercial, tourist and or pastoral/agricultural activities.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication

### 6763 Landscape Architecture Studio IB

6 points semester 1 or 2

16-18 hours average lectures/ tutorials/ workshops/ field trips; hours vary from week to week

*assumed knowledge:* Design at the undergraduate level

This subject will typically address a medium to large sized landscape design and planning topic in a rural-urban fringe setting possessing high aesthetic and ecological qualities and experiencing human development pressures. The subject will explore the

role and opportunity for landscape design in devising strategic frameworks that conserve landscape qualities and ensure a sensitive stewardship of its resources while accommodating appropriate levels of human occupancy, resources harvesting and developments.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### 8024 Landscape Architecture Studio IC

6 points semester 1 or 2

16-18 hours average lectures/ tutorials/ workshops/ field trips; hours vary from week to week

*assumed knowledge:* Design at the undergraduate level

This subject will typically address a small to medium sized landscape design and planning topic in an urban setting possessing strong cultural traditions and patterns. The subject will explore the role and contribution of landscape design in our cultural environments, and the nexus between culture and nature in an urban context.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### 1624 Landscape Architecture Studio ID

6 points semester 1 or 2

16-18 hours average lectures/ tutorials/ workshops/ field trips; hours vary from week to week

*assumed knowledge:* Design at the undergraduate level

This subject will typically address a medium to large sized landscape design and planning topic in a rural setting possessing particular cultural constraints,

relationships and nuances to landscapes. The subject will explore the relationship of culture, and cultures, to landscapes; the manner in which a culture and cultural group has established and continues to influence a set of physiological relationships and physical patterns in the environment and landscape within which it resides.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### 9261 Landscape Architecture Studio II

3 points semester 1 or 2

16-18 hours average lectures/ tutorials/ workshops/ field trips; hours vary from week to week

*prerequisites:* three of the following subjects: 5688 Landscape Architecture Studio IA, 6763 Landscape Architecture Studio IB, 8024 Landscape Architecture Studio IC or 1624 Landscape Architecture Studio ID.

*assumed knowledge:* Design at the undergraduate level

This subject will typically address a medium to large sized landscape design and planning topic in a rural and or urban setting that will be dependent upon the use and application of information technologies and geographic information systems. The subject will explore the position of both nature and culture using creative information technology.

A project-based learning program integrating design and the avenues of landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal, and graphic (2 and 3 dimensional) communication, as outlined in the subject guide which will be available early in the subject/project.

### 2507 Landscape Architecture Seminar II

3 points semester 1 or 2

2-3 hours average of lectures/tutorials/workshops/ field trips; hours vary from week to week

*assumed knowledge:* Design at the undergraduate level

This subject will address contemporary issues of landscape architecture design, planning and practice. The subject will explore the role of landscape architecture in the design and planning disciplines and traditions; review and critique contemporary dialogues, designs, theories and philosophies in landscape architecture; and, consider and debate potential future directions, contributions and technologies for the landscape architecture profession.

*assessment:* projects and seminar papers

### 6817 Landscape Architecture Practice II

3 points semester 1 or 2

*assumed knowledge:* Design at the undergraduate level

2-3 hours average lectures/ tutorials/ workshops/ field trips; hours vary from week to week

This subject will address the frameworks for and ethical structures of landscape architecture professional practice. The subject will explore professional practice ethics and traditions; organisational and management practices including topics of professional liability, law, indemnity, professional registration, contract administration, project management, relationships with allied professionals and clients, and contemporary professional and practice expectations in Australia, and overseas if appropriate.

*assessment:* work diaries, seminar papers, projects, examinations

### 3497 Landscape Architecture Masters Project

12 points semester 1, 2 or summer semester

16-18 hours average lectures/ tutorials/ workshops/ field trips; hours vary from week to week

*prerequisites:* 5688 Landscape Architecture Studio IA, 6763 Landscape Architecture Studio IB, 8024 Landscape Architecture Studio IC, 1624 Landscape Architecture Studio ID, and 9261 Landscape Architecture Studio II

*assumed knowledge:* Design at the undergraduate level

This subject entails an exploration of an aspect or theme in landscape architecture through design and/or planning studies. The content may embrace aspects of nature and/or culture in urban and/or rural settings but is specifically intended to focus attention upon the theory and practical exploration of landscape design.

The project will be of moderate to high complexity, and often drawn from a limited selection. Tuition will entail both individual and group seminar and studio classes resulting in an individual exposition. Responses should demonstrate an advanced level of knowledge and ability in one or more aspects of landscape architecture thought and practice, including evidence of the student's ability to collect and evaluate information, construct, test and defend arguments or hypotheses, and critically examine landscape design. The final presentation or exhibition of the project should display a thorough integration of all major aspects of the Program and its Mission Statement and Program Objectives.

*assessment:* final project

## **2200 Landscape Architecture Masters Dissertation**

12 points semester 1, 2 or summer semester

2 hour tutorial/seminar per week

*prerequisites:* 3497 Landscape Architecture Masters Project

*restriction:* enrolment subject to application to the Head of Department and contingent upon prior results.

*assumed knowledge:* Design at the undergraduate level

This subject comprises an individual design, planning and/or research project that principally addresses either nature and/or culture in urban and/or rural settings and which permits the exposition of the major aspects of the course and a student's particular interests. Students will be required to undertake supervised research and/or design exploration into a particular topic, leading to the presentation of a seminar paper and/or exhibition, and submission of a final essay or report of between 6000 to 12000 words and containing copies of all associated project work.

The project will be of a high complexity, and often drawn from a limited selection or from an identified region or address a specific topic in landscape architecture. Responses should demonstrate an advanced level of knowledge and ability in one or more aspects of landscape architecture thought and practice, including evidence of the student's ability to collect and evaluate information, construct, test and defend arguments or hypotheses, and critically examine theories in the area of inquiry. The final presentation or exhibition of the project should display a thorough integration of all major aspects of the Program and its Mission Statement and Program Objectives.

*assessment:* internal and external: seminar paper and/or exhibition; final essay or report articulating and supporting the project

## Master of Urban Design (Coursework)

This course is offered jointly by The University of Adelaide and the University of South Australia.

Applications for admission shall be directly to the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: Postgraduate tuition fees apply to this course.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Master of Urban Design (Coursework) shall have qualified for:

- a) an Honours degree of the University incorporating major studies in one or more of the following disciplines: planning, design studies, property, landscape architecture, architecture, real estate, environmental engineering or an allied discipline; or for a degree of another institution accepted for the purpose by the University *or*
- (b) the Graduate Diploma in Urban Design

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above, but who has presented evidence satisfactory to the Faculty Office of fitness to undertake work for the degree.

#### 2 Duration of course

To qualify for the Master's degree, a candidate shall satisfactorily complete three semesters of full-time study or the equivalent of part-time study, provided that the course is completed within three years of initial enrolment.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

4.1 To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, including the core subjects 1843 Elements of Urban Design IVA and 9644 Elements of Urban Design IVB; at least two

other core subjects; elective subjects to the equivalent value of at least 6 points; and the Master's project 2801 Urban Design Masters Project, provided that subjects to the value of at least 18 points are taken at the University of Adelaide.

#### 4.1.1 core subjects

Note not forming part of the Specific Course Rules: Equivalent subject values are - 3 points at the University of Adelaide = 4.5 points at the University of South Australia; 6 points at the University of Adelaide = 9 points at the University of South Australia

(a) All candidates shall satisfactorily complete the following subjects offered by the University of Adelaide:

1843	Elements of Urban Design IVA	3
9644	Elements of Urban Design IVB	3

(b) In addition, all candidates shall satisfactorily complete at least two of the following subjects which are offered at either the University of Adelaide or the University of South Australia. Students taking subjects at both the University of Adelaide and University of South Australia must comply with the enrolment procedures of both institutions.

##### semester 1

*The University of Adelaide*

8460	Urban Processes and Policy IV	3
------	-------------------------------	---

*University of South Australia*

Sustainable Urban Design Issues IV	4.5
------------------------------------	-----

##### semester 2

*University of South Australia*

Urban Management and Law IV	4.5
-----------------------------	-----

Urban Development and Implementation IV	4.5
---	-----

#### 4.1.2 Elective subjects

Note not forming part of the Specific Course Rules: Equivalent subject values are - 3 points at the University of Adelaide = 4.5 points at the University of South Australia; 6 points at the University of Adelaide = 9 points at the University of South Australia

Candidates shall satisfactorily complete at least the equivalent of 6 points of elective subjects from the following subjects which are offered at either the University of Adelaide or the University of South Australia, or from Level IV subjects chosen in consultation with the Course Coordinator. Students taking subjects at both the University of Adelaide and University of South Australia must comply with the enrolment procedures of both institutions.

##### *The University of Adelaide*

Choice of elective subjects from the Master of Landscape Architecture course, or subjects offered by the Department of Geography, as follows:

5688 Landscape Architecture Studio IA	6
6763 Landscape Architecture Studio IB	6
1624 Landscape Architecture Studio ID	6
2507 Landscape Architecture Seminar II	3
9330 Introduction to G.I.S. IV	3
1358 Introduction to G.I.S. Projects IV	3

##### *University of South Australia*

Choice of elective subjects from the Master of Urban Planning course as follows:

Contemporary Social Issues  
 Transport and Planning  
 Comparative Planning 1  
 Gender and Planning

#### 4.1.3 Master's Project

Students may undertake the following subject at either the University of Adelaide or University of South Australia:

2801 Urban Design Masters Project Sem.3

### 5 Status, exemption and credit transfer

5.1 Except with the special permission of the Head of the Department of Architecture, no candidate will be granted status for any of the compulsory or core subjects of the degree except candidates who have qualified for the Graduate Diploma in Design Studies

5.2 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award

5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

### 6 Assessment and examinations

6.1 There shall be four classifications of pass in the subjects for the Master's degree: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

### 7 Articulation with other awards

7.1 A candidate who has been admitted to the Graduate Diploma in Urban Design and who has been granted status toward the Master's degree for subjects presented for the Graduate Diploma must surrender the Graduate Diploma before being admitted to the Master's degree.

7.2 A candidate for the Master of Urban Design (Coursework) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements for the Master's degree may be admitted to the Graduate Diploma.

## Syllabuses

Note: equivalent subject values are: 3 points at The University of Adelaide = 4.5 points at the University of South Australia; 6 points at The University of Adelaide = 9 points at the University of South Australia.

### University of Adelaide subjects

#### core subjects

#### 1843 Elements of Urban Design IV A

3 points semester 1

16 hours lectures/seminars/ tutorials/studios per week;  
hours vary from week to week

*corequisites:* 9644 Elements of Urban Design IVB

*restrictions:* 8024 Landscape Architecture Studio IC

This subject is concerned with the morphological underpinnings of cities and urban landscapes together with the historical traditions and theories behind urban and landscape design. The subject will typically review these topics using a medium sized landscape design and planning topic, in an urban setting, possessing urban design, cultural and physical issues. The subject will explore the role of design in urban settings, historical and theoretical exemplars and constructs relevant to urban design, and review the morphological patterns and traditions in city landscape design and formation.

The subject will also explore the role and contribution of urban and landscape design in our cultural environments.

A project-based learning program integrating design and the avenues of urban and landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of urban and landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

*assessment:* assignments and projects - may include written, verbal and graphic (2 and 3 dimensional) communication

#### 9644 Elements of Urban Design IV B

3 points semester 1

16 hours lectures/seminars/ tutorials/studios per week;  
hours vary from week to week

*corequisites:* 1843 Elements of Urban Design IVA

*restrictions:* 8024 Landscape Architecture Studio IC

This subject is concerned with the morphological underpinnings of cities and urban landscapes together with the historical traditions and theories behind urban and landscape design. The subject will typically review these topics using a medium sized landscape

design and planning topic, in an urban setting, possessing urban design, cultural and physical issues. The subject will explore the role of design in urban settings, historical and theoretical exemplars and constructs relevant to urban design, and review the morphological patterns and traditions in city landscape design and formation.

The subject will also explore the role and contribution of urban and landscape design in our cultural environments.

A project-based learning program integrating design and the avenues of urban and landscape inquiry and expression (structures, materials, plants, languages, information technologies, etc.) and the practices of urban and landscape design, planning and management within a theoretical and historical context; taking account of human (physiological, social and cultural) and ecological (faunal, floral, soil, water, etc.) factors.

The topics in Elements of Urban Design IVB are those not covered in Elements of Urban Design IVA.

*assessment:* assignments and projects - may include written, verbal and graphic (2 and 3 dimensional) communication.

#### 8460 Urban Processes and Policy IV

3 points semester 1

Up to 6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week

This subject is concerned with the nature and recent history of urban development, and with the economics, social and political processes which give rise to spatial patterns and built form. Economic and demographic aspects associated with urban development; the role, influence and design implications of infrastructure provision; the impact of information technology on current and future urban form; economic and equity issues behind sustainable development premises; and the political economy of urban design. The subject will typically review these topics using a series of case studies. (Likely topics include current debates about inequitable cities; the impact of globalisation, new information and transport policy on urban form; changing patterns of retail and commercial activity; compact cities vs. the perils of urban consolidation; etc.)

*assessment:* assignments

#### elective subjects

Choice of elective subjects from the Master of Landscape Architecture course or the Department of Geography, from the list outlined in Specific Course Rule 4.1.3

## University of South Australia subjects

The following subjects are offered by the University of South Australia as part of the Masters programme. Masters students enrolled at The University of Adelaide wishing to take any of these subjects (within the limits indicated in the Specific Course Rules) will be granted appropriate credit towards their Adelaide award.

Students taking any of the subjects must comply with the enrolment procedures of the University of South Australia. Details of those procedures are available from that University

### core subjects

#### Sustainable Urban Design Issues IV

4.5 points semester 1

Up to 6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week

This subject is concerned with sustainable urban design process and principles. The subject will explore sustainable urban design ideas having regard to, natural and human resources, cultural attitudes to social, economic and environmental issues, public and private transport and access, conflict negotiation and innovative infrastructure considerations (including groundwater and stormwater management, electricity, solar power, etc). The subject will also consider evaluation techniques and the theoretical and practical implications of the design of sustainable communities.

*assessment:* assignments and projects

#### Urban Management and Law IV

4.5 points semester 2

Up to 6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week

This subject is concerned with approaches to promoting and regulating urban development and design through plans, policies, laws, regulations and other instruments. This subject will typically include: changing notions of urban management - comprehensive plans, urban management, strategic planning, better cities, urban governance, public-private city partnerships; the changing roles of federal, state and local governments in urban management and planning; current and proposed legal and administrative arrangements for planning and development assessment in South Australia, including arrangements for addressing projects of major economics, environmental or social significance; responsibility for the public realm; appeal processes and requirements for community involvement. (There will be a broad focus on changing ideas of planning and urban management, but illustrated by local

examples - the rise and fall (?) of strategic planning, SA experience with integrated urban management at local level, the current debates about urban governance and the Adelaide 21 project, etc; plus Development Act changes, experience with urban design 'Panels' and the notion of 'design control', etc.)

*assessment:* assignments and projects

#### Urban Development and Implementation IV

4.5 points semester 2

6 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week

This subject will focus on the processes through which urban development occurs and through which urban development and urban design projects are implemented. It examines economic approaches to project appraisal, including cost-benefit analysis and discounted cash-flow analysis. There is also a focus on the politics of implementation and the roles and influence of elected governments and community interest groups in shaping and implementing urban development projects. There will be a strong emphasis on case studies of commercial and residential development projects at various scales, including major city centre redevelopment projects, joint ventures and partnerships and the role of the urban designer in implementation. (This is a key subject integrating other core subjects, plus providing a close link to Urban Management and Law. There will be a strong case study emphasis, in particular international and interstate, with a detailed focus on Adelaide/SA projects - East End Redevelopment, Rosewood, The Parks, Port Adelaide, etc.)

*assessment:* assignments and projects

### elective subjects

Choice of elective subjects from the Master of Urban Planning, from the list outlined in Specific Course Rule 4.1.3.

Details about the elective subjects to be offered by the University of South Australia, including information on their content, assessment and reading lists, are available in the Calendar of the University of South Australia, Vol. II.

**Subjects offered by the University of  
Adelaide and University of South  
Australia**

**Master's subject**

**2801 Urban Design Masters Project**

18 points semester 1, 2 or summer semester

Up to 4 hours lectures/seminars/ tutorials/studios per week; hours vary from week to week.

*prerequisites:* all required subjects in the Graduate Diploma in Urban Design

*restrictions:* 7625 Landscape Architecture Project II

This subject comprises an individual or group culminating design, planning and/or research project that principally addresses the topic of urban design and which permits the exposition of the major aspects of the course and a student's particular interests. The project will be of moderate complexity, and often drawn from a limited selection or from an identified region.

*assessment:* assignments

**Master of Architecture**

**Master of Building Science**

**Master of Design Studies**

**Master of Design Studies (Landscape)**

**Master of Landscape Architecture by Research**

**Master of Urban Design**

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Qualification requirements

#### 1.1 Master of Architecture

To qualify for the degree a candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study on an aspect or aspects of architectural design, building practice and/or the architectural profession. The field of study shall be approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.2 Master of Building Science

To qualify for the degree the candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study relating to the built environment in general or architecture in particular. The field of study shall be concerned with scientific and/or technical aspects of the built environment, and shall be approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.3 Master of Design Studies

To qualify for the degree the candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study relating to the built environment in general and/or design or architecture in particular. The field of study shall be concerned with a cultural, historical, philosophical and/or theoretical aspect or aspects of the built environment, and shall be approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.4 Master of Design Studies (Landscape)

To qualify for the degree the candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study on an aspect or aspects relevant to the discipline of landscape architecture which has been approved in advance by the Faculty and prepared upon the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.5 Master of Landscape Architecture by Research

To qualify for the degree a candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study on an aspect or aspects of landscape design, landscape practice and/or the landscape architecture profession. The field of study shall be approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

#### 1.6 Master of Urban Design

To qualify for the degree a candidate shall prepare a thesis, embodying the results of original research or investigation made into a field of study which has been approved in advance by the Faculty and prepared under the guidance of and in regular consultation with a supervisor or supervisors appointed by the Faculty.

### 2 Admission requirements

#### Master of Architecture

- 2.1 The Faculty of Architecture and Urban Design may accept as a candidate for the degree of Master of Architecture any person who:

- (a) has become entitled to receive the Honours degree of Bachelor of Architecture of the University of Adelaide *or*
- (b) has obtained in another university or tertiary institution qualifications which in the opinion of the Faculty of Architecture and Urban Design are at least equivalent to those of the Honours degree of Bachelor of Architecture.

**2.2** Subject to the approval of the Board of Graduate Studies acting with the authority wittingly devolved to it by Council the Faculty may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in Specific Course Rule 2.1 if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.

- 2.3** (a) Subject to the approval of the Council, the Faculty may accept as a probationary candidate for the degree an applicant with an unusual background or whose academic record does not clearly indicate fitness to undertake the degree. The Faculty may impose special conditions on a probationary candidature.
- (b) The performance of each probationary candidate shall be reviewed by the Faculty after such period as the Faculty prescribes or allows (not exceeding twelve months) and, subject to the approval of the Council, the candidature shall be either confirmed or terminated.

#### **Master of Building Science and Master of Design Studies**

**2.4** The Faculty of Architecture and Urban Design may accept as a candidate for the degrees of Master of Building Science or Master of Design Studies any person who:

- (a) has become entitled to receive the Honours degree of Bachelor of Architectural Studies or the Honours degree of Bachelor of Design Studies or the Honours degree of Bachelor of Architecture of the University of Adelaide *or*
- (b) has obtained in another university or tertiary institution qualifications which, in the opinion of the Faculty of Architecture and Urban Design, are at least equivalent to those of the Honours degree of Bachelor of Architectural Studies or Honours degree of Bachelor of Design Studies.

**2.5** Subject to the approval of the Board of Graduate Studies acting with the authority wittingly devolved to it by Council the Faculty may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in Specific Course Rule 2.4 if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.

- 2.6** (a) Subject to the approval of the Council, Faculty may accept as a probationary candidate for the degree an applicant with an unusual background or whose academic record does not clearly indicate fitness to undertake the degree. The Faculty may impose special conditions on a probationary candidature.
- (b) The performance of each probationary candidate shall be reviewed by the Faculty after such period as the Faculty prescribes or allows (not exceeding twelve months) and, subject to the approval of the Council, the candidature shall be either confirmed or terminated.

#### **Master of Design Studies (Landscape) and Master of Urban Design**

**2.7** The Faculty of Architecture and Urban Design may accept as a candidate for the degrees of Master of Design Studies (Landscape) or Master of Urban Design any person who has become entitled to receive an Honours degree of the University of Adelaide or other qualifications accepted by the University as equivalent to an Honours degree.

**2.8** Subject to the approval of the Board of Graduate Studies acting with the authority wittingly devolved to it by Council the Faculty may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in Specific Course Rule 2.7 if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.

- 2.9** (a) Subject to the approval of the Council, the Faculty may accept as a probationary candidate for the degree an applicant with an unusual background or whose academic record does not clearly indicate fitness to undertake the degree. The Faculty may impose special conditions on a probationary candidature.
- (b) The performance of each probationary candidate shall be reviewed by the Faculty

after such period as the Faculty prescribes or allows (not exceeding twelve months) and, subject to the approval of the Council, the candidature shall be either confirmed or terminated.

### **Master of Landscape Architecture by Research**

**2.10** The Faculty of Architecture and Urban Design may accept as a candidate for the degree of Master of Landscape Architecture by Research any person who:

- (a) has become entitled to receive the Honours degree of Bachelor of Landscape Architecture of the University of Adelaide *or*
- (b) has obtained in another university or tertiary institution qualifications which in the opinion of the Faculty of Architecture and Urban Design are at least equivalent to those of the Honours degree of Bachelor of Landscape Architecture

**2.11** Subject to the approval of the Board of Graduate Studies acting with the authority wittingly devolved to it by Council the Faculty may in special cases and subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not meet the requirements specified in Specific Course Rule 2.1 if it is satisfied that he or she is likely to be able satisfactorily to undertake work for the degree.

- 2.12**
- (a) Subject to the approval of the Council, the Faculty may accept as a probationary candidate for the degree an applicant with an unusual background or whose academic record does not clearly indicate fitness to undertake the degree. The Faculty may impose special conditions on a probationary candidature.
  - (b) The performance of each probationary candidate shall be reviewed by the Faculty after such period as the Faculty prescribes or allows (not exceeding twelve months) and, subject to the approval of the Council, the candidature shall be either confirmed or terminated.

## **3 General**

**3.1** The Head of the Department of Architecture shall advise the Faculty whether suitable facilities and staff are available to assist and supervise the research of the applicant before the candidature and proposed topic of research are approved by the Faculty.

**3.2** In cases where the proposed research calls for skills or qualifications not yet possessed by the candidate, the Faculty may on the recommendation of the Head of the Department of Architecture require the candidate to spend a period of time, the length of which shall be prescribed by the Faculty on the recommendation of the Head of the Department, either on supervised study or on research under a supervisor or supervisors appointed by the Faculty, and/or to undertake and pass at an acceptable standard examinations in courses related to the research topic.

**3.3** There shall in each case be adequate and regular contact between the candidate and internal supervisor(s). The candidate may, with prior permission of Faculty and subject to such conditions as may be determined in each case, conduct research in an organisation other than the University provided

- (a) that such research is closely related to the thesis
- (b) that the supervisor has access to all the candidate's external research work *and*
- (c) that the publication of results will not thereby be prejudiced. Any candidate given such permission shall be available for seminars and other discussions as required by the supervisor(s) or the Head of the Department of Architecture.

**3.4** (a) Unless the Faculty approves in advance an extension of time in a particular case, the thesis shall be submitted:

- (i) in the case of a full-time candidate, not earlier than one year and not later than three years from the date at which the candidature was accepted by the Faculty *or*
- (ii) in the case of a part-time candidate, not earlier than two years and not later than five years from the date at which the candidature was accepted by the Faculty.

(b) Three months before the intended date of submission the candidate shall notify the Faculty in writing of the candidate's intention to submit the thesis, and shall at the same time submit the proposed title and a one-page summary of the thesis.

**3.5** The candidate shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to candidates from time to time. Refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

3.6 (a) The Faculty shall appoint at least two examiners of the thesis of whom at least one shall be external. The examiners may recommend to the Faculty that the thesis:

- (i) be accepted *or*
- (ii) be accepted subject to minor corrections *or*
- (iii) be awarded subject to the amendments specified being made to the thesis *or*
- (iv) be returned to the candidate for revision and resubmission (within such period of time as the Faculty may allow) *or*
- (v) be rejected.

(b) The examiners of a thesis resubmitted following recommendation (iv) may recommend only (i), (ii) or (v).

3.7 (a) If in the opinion of the Faculty a candidate for the degree is not making satisfactory progress, the Faculty may, with the consent of the Council, withdraw its approval of the candidature and the candidate shall cease to be enrolled for the degree

(b) Before making a recommendation for termination of candidature to the Council the Faculty shall notify the candidate of its intention so to do and shall permit the candidate to offer within one month written explanation for the lack of satisfactory progress. If notwithstanding any submission made by the candidate, the Faculty decides to recommend termination of the candidature, the candidate shall be informed accordingly and shall have the right to appeal within one month to the Council, and any such appeal shall be considered by the Council at the same time as it considers the Faculty's recommendation.

3.8 A candidate for the degree of Doctor of Philosophy whose work is considered by the Faculty, after report by the examiners appointed to make recommendations on it, to be not of sufficient merit to qualify for that degree but of sufficient merit to qualify for the degree of Master of Architecture, the degree of Master of Building Science, the degree of Master of Design Studies, the degree of Master of Design Studies (Landscape), the degree of Master of Landscape Architecture by Research or the degree of Master of Urban Design may be admitted to the degree of Master of Architecture, the degree of Master of Building Science, the

degree of Master of Design Studies, the degree of Master of Design Studies (Landscape), the degree of Master of Landscape Architecture by Research or the degree of Master of Urban Design provided that the candidate is otherwise qualified to become a candidate for the degree.

3.9 When the Faculty is satisfied that a candidate has complied with the requirements and conditions of the Specific Course Rules and that the thesis is acceptable, the Faculty shall recommend to the Council that the candidate be admitted to the degree of Master of Architecture, the degree of Master of Building Science, the degree of Master of Design Studies, the degree of Master of Design Studies (Landscape), the degree of Master of Landscape Architecture by Research or the degree of Master of Urban Design, as appropriate.

## Faculty of Arts

### Regulations

#### Of Awards in the Faculty of Arts

- 1 In the Faculty of Arts there shall be the following awards:

Diploma in Labour Studies  
Diploma in Liberal Studies  
Diploma in Languages  
Ordinary degree of Bachelor of Arts  
Ordinary degree of Bachelor of Arts (Jurisprudence)  
Ordinary degree of Bachelor of Arts (Asian Studies)  
Ordinary degree of Bachelor of Arts (Australian Studies)  
Ordinary degree of Bachelor of Arts (Cultural Studies)  
Ordinary degree of Bachelor of Arts (European Studies)  
Ordinary degree of Bachelor of Arts (Gender Studies)  
Ordinary degree of Bachelor of Arts (International Studies)  
Ordinary degree of Bachelor of Arts (Labour Studies)  
Ordinary degree of Bachelor of Environmental Studies  
Ordinary degree of Bachelor of Labour Studies  
Ordinary degree of Bachelor of Social Sciences  
Honours degree of Bachelor of Arts  
Honours degree of Bachelor of Arts (Asian Studies)  
Honours degree of Bachelor of Arts (Australian Studies)  
Honours degree of Bachelor of Arts (Cultural Studies)  
Honours degree of Bachelor of Arts (European Studies)  
Honours degree of Bachelor of Arts (International Studies)  
Honours degree of Bachelor of Environmental Studies  
Honours degree of Bachelor of Labour Studies

Honours degree of Bachelor of Social Sciences  
Graduate Certificate in Applied Demography  
Graduate Certificate in Australian Studies  
Graduate Certificate in Cognitive Studies  
Graduate Certificate in Creative Writing  
Graduate Certificate in Educational Administration  
Graduate Certificate in Educational Studies  
Graduate Certificate in Environmental Policy, Planning and Management  
Graduate Certificate in Environmental Studies  
Graduate Certificate in Historical Studies

 Master of Arts (Creative Writing)  
 Master of Arts (Geographic Information Systems and Remote Sensing)  
 Master of Arts (International Studies)  
 Master of Arts (Labour Studies)  
 Master of Arts (Philosophy)  
 Master of Arts (Population and Human Resources)  
 Master of Arts (Public Affairs)\*  
 Master of Arts (Women's Studies)  
 Master of Cognitive Science  
 Master of Education  
 Master of Educational Administration  
 Master of Educational Studies  
 Master of Environmental Studies  
 Master of Logic  
 Master of Social Sciences\*  
 Master of Spatial Information Science

notes not forming part of the Regulations

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Convenor of the Academic Board.
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Letters (D. Litt.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

Regulations amended 23 February 1995; 8 February 1996, 20 February 1997, 19 March 1998.

\* Awaiting approval and confirmation.

## Diploma in Languages

The Faculty of Arts has developed this course to enable students who are enrolled in any undergraduate degree of the University to undertake a three-year language sequence concurrently and graduate with both a Bachelor's degree and the Diploma in Languages.

Application for admission to this course shall be made directly to the Faculty of Arts by the end of the second week in February of each year. Entry to this course may not be deferred.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Diploma in Languages shall have:
- (a) accepted a place in a course for a degree of Bachelor in the University *and*
  - (b) obtained the consent of the relevant faculty to study the two awards concurrently.

#### 2 Status, exemption and credit transfer

Except by special permission of the Faculty of Arts:

- 2.1 no student may gain status for any part of the language sequence of the Diploma in Languages
- 2.2 no student may be granted status at level III toward the Diploma
- 2.3 no status will be awarded in the Diploma in Languages for subjects presented for another award.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.
- 3.2 Where the student's Ordinary Bachelor degree is in another Faculty, both Faculties shall approve the course of study.

#### 4 Duration of course

- 4.1 4.1 The duration of the Diploma itself shall be a minimum of three years of study, but shall be taken concurrently with full- or part-time study in another undergraduate award.

#### 5 Qualification requirements

- 5.1 To qualify for the Diploma in Languages a student shall complete a three year sequence (as defined in Rule 6 below) *and* satisfy the requirements of an undergraduate degree of the university.
- 5.2 A student may not have the Diploma in Languages conferred until he or she has satisfied the requirements for the approved undergraduate course.

#### 6 Course of study/Subjects of study

- 6.1 All students shall complete a three year language sequence to a total value of 26 points. The sequence shall consist of:
- 6 points at level I
  - 8 points at level II
  - 12 points at level III
- in a single language
- 6.2 In certain circumstances this sequence may be varied to consist of:
- 8 points at level II
  - 12 points at level III
  - 6 points of advanced language studies
- 6.3 The languages available are:
- |               |         |
|---------------|---------|
| Ancient Greek | Chinese |
| French        | German  |
| Indonesian    | Italian |
| Japanese      | Latin   |
| Modern Greek  | Spanish |
| Vietnamese    |         |
- 6.4 With the permission of the Faculty of Arts, a student may substitute a period of study in an approved overseas tertiary institution as an exchange student in lieu of part of the requirements of the Diploma in Languages, up to a limit of 12 points.

#### 7 Review of academic progress

- 7.1 A student who fails a subject and wishes to enrol for that subject again shall attend lectures and satisfactorily do such written and practical work as the department may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission of the Faculty of Arts under such conditions as it may prescribe.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

**8.1** Subjects for the Diploma in Languages shall have four classifications of pass as follows:

Pass with High Distinction;

Pass with Distinction;

Pass with Credit; and

Pass.

The classification of Pass may be in two divisions: Division I and Division II.

- Bachelor of Arts**
- Bachelor of Arts (Asian Studies)**
- Bachelor of Arts (Australian Studies)**
- Bachelor of Arts (Cultural Studies)**
- Bachelor of Arts (European Studies)**
- Bachelor of Arts (Gender Studies)**
- Bachelor of Arts (International Studies)**
- Bachelor of Arts (Labour Studies)**

**Note:** Previous studies in the Bachelor of Arts under former Specific Course Rules and Regulations and Schedules

Students who commenced their course of study towards the Bachelor of Arts under previous Specific Course Rules in 1995 or Regulations and Schedules in 1994 or earlier are subject to the following provisions:

Students who commenced their studies towards the Bachelor of Arts in previous years will normally complete their course of study under the provisions of the Specific Course Rules as published in 1995.

On application to the Faculty, continuing students will be permitted to complete their studies under the current Specific Course Rules *as they pertain to the Bachelor of Arts award only (Rule 7.1)*, with such modifications as the Faculty may deem necessary to ensure that subjects validly passed under previous Specific Course Rules or Regulations and Schedules may be counted under the current Rules.

The above awards have been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

1.1 On satisfying the admission requirements for entry to undergraduate studies in the Faculty of Arts, students will enrol in a course of study in the Humanities and Social Sciences to allow them to qualify for one of the following degrees:

Ordinary degree of Bachelor of Arts

Ordinary degree of Bachelor of Arts (Asian Studies)

Ordinary degree of Bachelor of Arts (Australian Studies)

Ordinary degree of Bachelor of Arts (Cultural Studies)

Ordinary degree of Bachelor of Arts (European Studies)

Ordinary degree of Bachelor of Arts (Gender Studies)

Ordinary degree of Bachelor of Arts (International Studies)

Ordinary degree of Bachelor of Arts (Labour Studies)

Ordinary degree of Bachelor of Environmental Studies

Ordinary degree of Bachelor of Social Sciences

Graduates who have qualified for one of the above degrees and who wish to obtain a subsequent but different degree must apply for entry to a new course of study leading to the subsequent degree and, if successful, will be subject to the rules applying to Status, Exemption and Credit Transfer outlined in Rule 4, below, or those outlined in the Specific Course Rules for the Bachelor of Social Sciences or the Bachelor of Environmental Studies.

1.2 The course of study for the Ordinary degree shall extend over three full-time academic years or the part-time equivalent.

### 2 Admission requirements

The admission requirements for this course of study are those outlined in the Rules made by Council pursuant to Chapter IX of the University Statutes - Of Admission and Enrolment.

### 3 Assessment and examinations

There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

In some subjects a pass may be recorded in two divisions. For such subjects a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission to other subjects.

There shall also be a classification of Conceded Pass. A student may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been obtained, as specified in 7.7.1 of these specific course rules.

### 4 Status, exemption and credit transfer

Exemption from the requirements of an undergraduate degree in the Faculty of Arts in lieu of studies towards combined degree programs including the Bachelor of Arts/Bachelor of Laws and the Bachelor of Arts/Bachelor of Economics is covered under the provisions of Rule 5, status granted in combined degree programs, below.

#### 4.1 Status for Bachelor degree level studies

##### 4.1.1 Status on Account of Previous Studies in any Academic Discipline

Candidates who have previously passed subjects in Bachelor degree awards or equivalent in the University of Adelaide or another recognised university in any academic discipline who wish to count towards their degree such subjects may, on written application to the Faculty, be granted such status as the Faculty shall determine subject to the following conditions:

- 4.1.1.1 Students may present for the degree such subjects to a maximum aggregate points value of 12 points at Level I in lieu of the requirements of clause 7.1.1 (b) (or equivalent for the named degrees), and 8 points at Level II in lieu of 7.1.1 (e) (or equivalent for the named degrees)

##### 4.1.2 Status on Account of Studies in the Humanities and Social Sciences

Candidates who have previously passed subjects offered in Bachelor degree awards or equivalent in the University of Adelaide or other recognised university in the Humanities and Social Sciences who wish to count towards their degree such subjects may, on written application to the Faculty Registrar, be granted status towards such specific degree requirements as the Faculty shall determine subject to the following conditions:

#### 4.1.2.1 Status on account of completed degrees

- 4.1.2.1.1 Except with the permission of the Faculty, students may present for the degree such subjects to a maximum aggregate points value of 24 points at Level I *or*
- 4.1.2.1.2 Such subjects to a maximum aggregate points value of 18 points at Level I and 8 points at Level II.

#### 4.1.2.2 Status on account of incomplete degree studies.

For subjects passed in a course of study not yet completed other than those undertaken in an undergraduate award in the Faculty of Arts at the University of Adelaide pursuant to these Specific Course Rules:

- 4.1.2.2.1 Except with the permission of the Faculty, students may present for the degree such subjects to the maximum aggregate points outlined in 4.1.2.1, above; and in addition
- 4.1.2.2.2 Such subjects in fields of study recognised as Humanities and/or Social Sciences by the Faculty of Arts, determined on a subject-by-subject basis, to an additional value of 6 points at Level I (if required) and 8 points at Level II.

#### 4.2 Status for the Diploma of Associate of the University of Adelaide

Candidates who have qualified for a Diploma of Associate of the University of Adelaide (AUA) may be granted such status in an undergraduate Faculty of Arts course as the Faculty shall in each case determine; provided that if status for the degree be granted for more than 18 points presented for the diploma, the student shall surrender the diploma before being admitted to the degree.

#### 4.3 Status for the Associate Diploma/ Diploma in Liberal Studies of the University of Adelaide

Candidates who have qualified for the Associate Diploma/Diploma in Liberal Studies may be granted up to 48 points of status in the course for the degree of Bachelor of Arts provided that if status of more than 24 points is granted, the student shall surrender the Associate Diploma/Diploma before being admitted to the degree.

#### 4.4 Status for prior Technical and Further Education (TAFE) studies

Candidates who hold a completed Associate Diploma/Diploma from an Institute of Technical and Further Education (TAFE) may, on application to the Faculty, be granted up to a maximum 6 points at Level I on account of the final year of study in the Associate Diploma/Diploma.

#### 4.5 Status for prior non-Award studies

Subject to Faculty approval, students who have completed Non-Award subjects from any recognised higher education institution may apply for status on account of such subjects towards their degree, and, if successful, will be subject to the same limits and conditions outlined in 4.1, above.

### 5 Status granted in combined degree programs

- 5.1 A student of the Faculty of Arts who gains entry to another undergraduate degree program in the University (with the exception of the Bachelor of Laws and the Bachelor of Economics) and who studies that degree concurrently with studies in Arts in order to complete a double degree program will have the following status granted in lieu of the successful completion of their other degree:

12 points at Level I *and*

8 points at Level II (not forming part of the major sequence)

- 5.2 A student of the Faculty of Arts who gains entry to Law at the University and who undertakes Law Studies concurrently with studies in the BA in order to complete a double degree program will be granted status in the:

Bachelor of Arts

Bachelor of Arts (Australian Studies)

Bachelor of Arts (Asian Studies)

Bachelor of Arts (Cultural Studies)

Bachelor of Arts (European Studies)

Bachelor of Arts (Gender Studies)

Bachelor of Arts (International Studies)

Bachelor of Arts (Labour Studies)

up to and including the following limits on account of their Law Studies:

on completion of the Level I compulsory subjects 9402 Legal Skills I and 5272 Contract:

8 points at Level II (not forming part of the major sequence) *and*

for the **Bachelor of Arts only** - on completion of 12 points of other compulsory subjects listed in the Specific Course Rules of the Bachelor of Laws:

12 points at Level III (not forming part of the major sequence)

or for the **other named degrees** - on completion of other compulsory subjects listed in the Specific Course Rules of the Bachelor of Laws:

6 points at Level III (not forming part of the major sequence)

- 5.3 A student in the Faculty of Arts who has gained entry to the Bachelor of Economics, and who undertakes studies concurrently for both awards, may present approved subjects to a minimum total value of 48 points at levels I and II which satisfy the requirements for both awards. Such candidates must then present for each of the Bachelor of Arts and Bachelor of Economics subjects to the value of 24 points at level III not presented for any other award. Such candidates will satisfy the requirements for the two degrees with a minimum total of 96 points (or 4 years) of study.

- 5.4 Candidates who gain exemption from part of the requirements of their undergraduate degree under this rule are eligible to apply for status on account of the studies taken into consideration under the provisions of Rule 4, only up to a maximum outlined in 4.1.2.1.

### 6 Approval of course of study

- 6.1 Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 7 Qualification requirements

#### 7.1 Bachelor of Arts

- 7.1.1 To qualify for the Ordinary degree of Bachelor of Arts a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

##### Level I

- (a) Level I subjects to the value of 12 points chosen from those listed in Rule 8.1 Arts Subjects
- (b) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects, 8.2 Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects and 8.4 Science Subjects, and other subjects offered in the University at Level I available to them

##### Level II

- (c) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, being the Level II component of a major sequence, see (h) below
- (d) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, below
- (e) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, 8.6 Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8 Science Subjects, or other subjects offered in the University at Level II available to them

**Level III**

- (f) Level III subjects to the value of 12 points chosen from those listed in 8.9 Arts Subjects and 8.10 Mathematical or Computer Sciences Subjects, being the Level III component of a major sequence (see (h), below)
- (g) Level III subjects to the value of 12 points chosen from those listed in 8.9 Arts Subjects

**Level II and III - major sequence**

- (h) i As part of the requirements of (c) and (f) above, 8 points of subjects presented at Level II and 12 points of subjects presented at Level III must form a major sequence and be chosen from one of the following disciplines recognised by the Faculty of Arts:

Ancient Greek  
 Anthropology  
 Chinese  
 Classics  
 Economics  
 English  
 Environmental Studies  
 European Studies  
 French Studies  
 Geography  
 German Studies  
 History  
 Indonesian  
 Italian  
 Japanese  
 Latin  
 Linguistics  
 Mathematical Sciences  
 Modern Greek  
 Music Studies  
 Philosophy  
 Politics  
 Psychology - a major sequence must include the subject 3170 Psychological Research Methodology III  
 Spanish  
 Vietnamese  
 Women's Studies

- ii In interdisciplinary areas in the Faculty of Arts, the relevant 'core topic' worth 4 points at level II must be completed in addition to the 8 points at Level II and 12 points at level III to satisfy the

requirements of a major. These areas are as follows:

Asian Studies (non language)  
 1827 Asian Studies II (core topic)  
 Australian Studies  
 3262 Australian Studies II (core topic)  
 Cultural Studies  
 8675 Cultural Studies II (core topic)  
 Gender Studies  
 4173 Sexing the Disciplines II  
 (Gender Studies core topic)  
 International Studies  
 5455 International Studies II (core topic)  
 Labour Studies  
 9625 Labour Studies II (core topic)  
 Information on subjects designated as appropriate to an interdisciplinary area of study is available from the Faculty of Arts office;

- iii In most disciplines eligibility to apply for Honours in a particular discipline is subject to completion of a major sequence within the undergraduate degree to a standard acceptable to the department concerned. Students should contact the relevant department for advice on appropriate subject choices for eligibility for Honours
- iv Honours in disciplines in other faculties, eg Economics, Mathematical and Computer Sciences and Music Studies also may have requirements which vary from those of a standard major sequence. Students should consult the relevant department for more information.

**7.2 Bachelor of Arts (Asian Studies)**

- 7.2.1 To qualify for the Ordinary degree of Bachelor of Arts (Asian Studies) a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

**Level I**

- (a) Level I subjects to the value of 6 points chosen from those listed in 8.1 Arts Subjects
- (b) Level I subject in an Asian language chosen from Chinese, Indonesian, Japanese or Vietnamese to the value of 6 points
- (c) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects, 8.2 Design Studies Subjects,

8.3 Mathematical and Computer Sciences Subjects, 8.4, Science Subjects and other subjects offered in the University at Level I available to them

**Level II**

- (d) Level II Asian Studies subjects to the value of 4 points
- (e) Level II subject in an Asian language chosen from Chinese, Indonesian, Japanese or Vietnamese to the value of 8 points
- (f) the compulsory subject 1827 Asian Studies II (core topic) (4 points)
- (g) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, 8.6 Design Studies Subjects, 8.7 Mathematical and Computer Science Subjects, 8.8 Science Subjects and other subjects offered in the University at Level II available to them

**Level III**

- (h) Level III Asian Studies subjects to the value of 6 points
- (i) Level III subject in an Asian language chosen from Chinese, Indonesian, Japanese or Vietnamese to the value of 12 points
- (j) Level III subjects listed in clauses 8.9 Arts subjects, to the value of 6 points

**7.3 Bachelor of Arts (Australian Studies)**

7.3.1 To qualify for the Ordinary degree of Bachelor of Arts (Australian Studies) a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

**Level I**

- (a) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects
- (b) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects, 8.2 Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects, 8.4 Science Subjects and other subjects offered in the University at Level I available to them

**Level II**

- (c) Level II Australian Studies subjects to the value of 12 points
- (d) the compulsory subject 3262 Australian Studies II (core topic) (4 points)
- (e) Level II subjects to the value of 8 points chosen from those listed in 8., Arts Subjects, 8.6 Design Studies Subjects, 8.7

Mathematical and Computer Sciences Subjects and 8.8 Science Subjects, and other subjects offered in the University at Level II available to them

**Level III**

- (f) Level III Australian Studies subjects to the value of 18 points
- (g) Level III subjects listed in clause 8.9 Arts subjects, to the value of 6 points.

**7.4 Bachelor of Arts (Cultural Studies)**

7.4.1 To qualify for the Ordinary degree of Bachelor of Arts (Cultural Studies) a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

**Level I**

- (a) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects
- (b) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects, 8.2 Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects, 8.4 Science Subjects and other subjects offered in the University at Level I available to them

**Level II**

- (c) Level II Cultural Studies subjects to the value of 12 points
- (d) the compulsory subject 8675 Cultural Studies II (core topic) (4 points)
- (e) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, 8.6 Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8 Science Subjects, and other subjects offered in the University at Level II available to them

**Level III**

- (f) Level III Cultural Studies subjects to the value of 18 points
- (g) Level III subjects listed in clause 8.9 Arts subjects, to the value of 6 points.

**7.5 Bachelor of Arts (European Studies)**

7.5.1 To qualify for the Ordinary degree of Bachelor of Arts (European Studies) a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

**Level I**

- (a) Level I subjects to the value of 6 points chosen from those listed in 8.1, Arts Subjects

- (b) Level I subject in a European language other than English chosen from Ancient Greek, French, German, Italian, Latin, Modern Greek, or Spanish to the value of 6 points
- (c) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects, 8.2, Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects, 8.4, Science Subjects, and other subjects offered in the University at Level I available to them

#### Level II

- (d) Level II European Studies subjects to the value of 8 points
- (e) Level II subject in a European language other than English chosen from Ancient Greek, French, German, Italian, Latin, Modern Greek, or Spanish to the value of 8 points
- (f) Level II subjects to the value of 8 points chosen from those listed in 8., Arts Subjects, 8.6 Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8 Science Subjects, and other subjects offered in the University at Level II available to them

#### Level III

- (g) Level III European Studies subjects to the value of 6 points
- (h) Level III subject in a European language other than English chosen from Ancient Greek, French, German, Italian, Latin, Modern Greek, or Spanish to the value of 12 points
- (i) Level III subjects listed in clause 8.9 Arts subjects, to the value of 6 points

### 7.6 Bachelor of Arts (Gender Studies)

7.6.1 To qualify for the Ordinary degree of Bachelor of Arts (Gender Studies) a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

#### Level I

- (a) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects
- (b) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts subjects, 8.2 Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects, 8.4 Science Subjects and other subjects offered in the University at Level I available to them

#### Level II

- (c) Level II Gender Studies subjects to the value of 12 points
- (d) the compulsory subject 4173 Sexing the Disciplines II (Gender Studies core topic)(4 points)
- (e) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, 8.6 Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects, 8.8 Science Subjects, and other subjects offered in the University at Level II available to them

#### Level III

- (f) Level III Gender Studies subjects to the value of 18 points
- (g) Level III subjects listed in clause 8.9 Arts subjects, to the value of not less than 6 points.

### 7.7 Bachelor of Arts (International Studies)

7.7.1 To qualify for the Ordinary degree of Bachelor of Arts (International Studies) a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

#### Level I

- (a) Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects
- (b) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects, 8.2 Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects, 8.4 Science Subjects and other subjects offered in the University at Level I available to them

#### Level II

- (c) Level II International Studies subjects to the value of 12 points
- (d) the compulsory subject 5455 International Studies II (core topic) (4 points)
- (e) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, 8.6 Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8 Science Subjects, and other subjects offered in the University at Level II available to them

#### Level III

- (f) Level III International Studies subjects to the value of 18 points
- (g) Level III subjects listed in clause 8.9 Arts subjects, to the value of 6 points.

## 7.8 Bachelor of Arts (Labour Studies)

7.8.1 To qualify for the Ordinary degree of Bachelor of Arts (Labour Studies) a candidate shall present passes in subjects to the value of 72 points which satisfy the following *requirements*:

### Level I

- (a) Level I subjects to the value of 12 points chosen from those listed in 8.1, Arts Subjects
- (b) Level I subjects to the value of 12 points chosen from those listed in 8.1 Arts Subjects, 8.2 Design Studies Subjects, 8.3 Mathematical and Computer Sciences Subjects, 8.4 Science Subjects and other subjects offered in the University at Level I available to them

### Level II

- (c) Level II Labour Studies subjects to the value of 12 points
- (d) the compulsory subject 9625 Labour Studies II (core topic) (4 points)
- (e) Level II subjects to the value of 8 points chosen from those listed in 8.5 Arts Subjects, 8.6 Design Studies Subjects, 8.7 Mathematical and Computer Sciences Subjects and 8.8 Science Subjects, and other subjects offered in the University at Level II available to them

### Level III

- (f) Level III Labour Studies subjects to the value of 18 points
- (g) Level III subjects listed in clause 8.9 Arts subjects, to the value of 6 points.

## 7.9 All Degrees

7.9.1 A Candidate may present for the degree conceded passes in Level I and Level II subjects provided that the points value of any individual subject for which a conceded pass is presented does not exceed 3 points, and the aggregate points value does not exceed 6 points

7.9.2 A candidate may not present for the degree subjects in the same discipline which exceed the following limits:

7.9.2.1 at Level I: subjects to the value of 12 points - note that students must complete studies in a minimum of three disciplines at level I with a minimum of 6 points in at least one discipline

7.9.2.2 at Level II: subjects to the value of 16 points - for the purpose of this clause, 'disciplines' shall be equivalent to the areas of study outlined in 7.1.1, (h), above.

7.9.3 A candidate will not be permitted to present for the degree any subject together with any other subject which, in the opinion of the Faculty contains a substantial amount of the same material

7.9.4 A candidate will not be permitted to count a subject twice for the degree, nor, in the case of subjects available at two levels, any subject taken at both levels

7.9.5 Except by permission of the Faculty a candidate shall not proceed to a subject for which the student has not completed the prerequisite subjects prescribed in the syllabuses

7.9.6 Candidates wishing to enrol in any subject which is determined by the Faculty to be surplus to the requirements of their degree as outlined in Rule 7 must do so on a Non-Award basis as outlined in General Course Rule 1.4.13

7.9.7 In all cases, a candidate may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II

7.9.8 All candidates shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.

## 8 Courses of study/Subjects of study

notes: unless otherwise indicated in the Syllabuses, subjects will not normally be available to students with exemption from lectures

**8.10 Mathematical And Computer Science subjects**

All full-year and semester subjects listed under Specific Course Rule 4.3 of the B.Sc. degree in the Faculty of Mathematical and Computer Sciences and taught in that Faculty.

**9 Cross-institutional study**

**9.1** With prior approval of the Faculty, students may study subjects offered by other universities not offered by the Faculty of Arts as Cross-Institutional students, subject to the following provisions:

9.1.1 Enrolment in such subjects must be approved in advance by the Faculty

9.1.2 Students will be given permission to count cross-institutional subjects towards such requirements of their degree as the Faculty may determine

9.1.3 Except by special permission of the Faculty, the following limits shall apply:

9.1.3.1 at Level I  
12 points for cross-institutional studies in any discipline in lieu of the requirements of clause 7.1.1 (b) or equivalent for the named degrees

9.1.3.2 at Level II  
8 points for cross-institutional studies in any discipline in lieu of the requirements of clause 7.1.1 (e) or equivalent for the named degrees

9.1.3.3 at Level III  
12 points for cross-institutional studies in the Humanities and Social Sciences.

9.1.4 Flinders University Language Outreach subjects and international exchange subjects approved by the Faculty shall be exempt from the provisions of this rule

9.1.5 Students undertaking cross-institutional studies must abide by any rules and regulations the host institution shall prescribe

9.1.6 On completion of any cross-institutional subject, the student shall be responsible for ensuring that an official transcript or result notice is forwarded to the Faculty.

**10 International exchanges**

With prior approval of the Faculty, students may count studies completed while on International Exchange programs formalised through the University's Office of International Programs towards their undergraduate degree subject to the following provisions:

**10.1** Except by special permission of the Faculty, the following limits shall apply:

at Levels II and III combined candidates shall be able to count a maximum of 24 points in total for studies completed while on International Exchange in lieu of the requirements of clause 7.1.1 (subclauses c-h) or the equivalent for the named degrees.

**10.2** On the approval by the Faculty of Arts of an approved program of study at the host university, candidates will be permitted to enrol in one or more of the following subjects to the total value of 24 points:

9004	International Exchange 1 (Arts)	12
3091	International Exchange 2 (Arts)	12
2774	International Exchange Full (Arts)	24

prior to the International Exchange commencing.

The Faculty shall record on the student's file which requirements of the degree (including level) will be fulfilled by the student successfully completing the approved program of study.

**10.3** On completion of the International Exchange, the student shall be responsible for ensuring that an official transcript or result notice for the studies undertaken is forwarded to the Faculty Office. A result of NFE (No Formal Examination) shall be recorded and status granted on account of subjects passed.

**10.4** Candidates shall seek Faculty approval for alterations to the program of study while on exchange necessitated by alterations to subject availability at the host institution.

**10.5** Where candidates undertake a program of study at the host institution not approved by the Faculty, or study a subject or subjects which constitutes a change to the program of study not approved by the Faculty, the Faculty shall reserve the right to determine that proportion of the requirements of the students degree which have been fulfilled by undertaking such studies on the student's return.

## **11 Unacceptable combinations of subjects**

Where a subject has listed a subject or set of subjects as a Restriction, that subject cannot be presented for the degree in addition to any subject listed as a Restriction.

## **12 Repeating subjects**

**12.1** A candidate who fails to pass in a subject and who desires to take the subject again shall again attend lectures and do practical work in the subject to the satisfaction of the Department, unless exempted therefrom by the Faculty of Arts.

**12.2** A candidate who has twice failed to pass the examination in any subject or division of a subject may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as the Faculty may prescribe.

## **13 Attendance requirement**

**13.1** A candidate shall not be eligible to present for assessment, by examination or otherwise, unless the student has regularly attended the prescribed classes and has done written and laboratory or other practical work, where required, to the satisfaction of the Department concerned.

**13.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

# Bachelor of Environmental Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 General

**1.1** On satisfying the admission requirements for entry to undergraduate studies in the Faculty of Arts, students will enrol in either the Bachelor of Arts, the Bachelor of Environmental Studies or the Bachelor of Social Sciences. On completing the degree requirements outlined below, this course of study will allow them to qualify for the Ordinary degree of Bachelor of Environmental Studies.

**1.2** Graduates who have qualified for the Bachelor of Environmental Studies and who wish to obtain a subsequent but different undergraduate degree in the Faculty of Arts must apply for entry to a new course of study leading to the subsequent degree and, if successful, will be subject to the rules applying to Status, Exemption and Credit Transfer outlined the Specific Course Rules for the Bachelor of Arts or the Bachelor of Social Sciences.

### 2 Duration of the Course

**2.1** The course of study for the Ordinary degree shall extend over three years of full-time study or the part-time equivalent.

### 3 Assessment and examinations

There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

In some subjects a pass may be recorded in two divisions. For such subjects a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission either to further courses in that subject or to other subjects.

There shall also be a classification of Conceded Pass. A student may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been obtained, as specified in the relevant schedule made under these regulations.

### 4 Status, exemption and credit transfer

Exemption from the requirements of the Bachelor of Environmental Studies in lieu of studies towards combined degree programs is covered under the provisions of Rule 5, 'Studies

conceded in lieu of combined degree programs', below.

### 4.1 Status for Bachelor degree level studies

**4.1.1** Except by the special permission of the Award Committee for the Bachelor of Environmental Studies, no candidate may gain status for the subjects:

4361 Environmental Studies I: Core Concepts

3281 Environmental Studies I: Core Contexts

6418 Environmental Studies II: Core Concepts

2082 Environmental Studies II: Core Contexts

**4.1.2** Status on Account of Previous Studies in any Academic Discipline

**4.1.2.1** Persons who have previously passed subjects in Bachelor degree courses or equivalent in the University of Adelaide or other recognised university in any academic discipline who wish to count such subjects towards their degree may on written application to the Faculty be granted such status as the Faculty shall determine subject to the following conditions:

**4.1.2.1.1** Candidates may present for the degree such subjects to a maximum aggregate points value of 12 at Level I in lieu of the requirements of clause 7.1 (b), and 4 points at Level II in lieu of 7.1 (f);

**4.1.2.2** **Status on account of studies in the Social Sciences**

Persons who have previously passed subjects offered in Bachelor degree courses or equivalent in the University of Adelaide or other recognised university in Social Sciences who wish to count towards their degree such subjects may, on written application to the Faculty Registrar, be granted status towards such specific degree requirements as the Faculty shall determine subject to the following conditions:

**4.1.2.2.1** **Status on account of completed degrees**

Except with the permission of the Faculty, candidates may present for the degree such subjects to a maximum aggregate

points value of 18 points at Level I in lieu of the requirements of clauses 7.1 (b) and (c) and 8 points at Level II in lieu of the requirements of either clause 7.1 (f) or (g);

**4.1.2.2.2 Status on account of incomplete degree studies**

4.1.2.2.2.1 Except with the permission of the Faculty, candidates may present for the degree such subjects to the maximum aggregate points outlined in 4.1.2.1.1, above; and in addition

4.1.2.2.2.2 Such subjects in fields of study recognised as major sequences in the Sciences and/or Social Sciences determined on a subject-by-subject basis, to an additional value of 6 points at Level I and 8 points at Level II.

**4.2 Status for the Diploma of Associate of the University of Adelaide**

Candidates who have qualified for a Diploma of Associate of the University of Adelaide (AUA) may be granted such status in an undergraduate Faculty of Arts course as the Faculty shall in each case determine; provided that if status for the degree be granted for more than 18 points presented for the diploma, the student shall surrender the diploma before being admitted to the degree.

**4.3 Status for the Associate Diploma/ Diploma in Liberal Studies of the University of Adelaide**

Subject to Rule 4.1.1, above, candidates who have qualified for the Associate Diploma/Diploma in Liberal Studies may be granted status on a subject-by-subject basis in the Bachelor of Environmental Studies provided that if status of more than 26 points is granted the student shall surrender the Associate Diploma/Diploma before being admitted to the degree.

**4.4 Status for prior Technical and Further Education) TAFE studies**

Candidates who have qualified for an Associate Diploma from an Institute of Technical and Further Education (TAFE) may, on application to the Faculty, be granted up to a maximum 6 points at Level I in lieu of the requirements of clause 7.1 (b) (or equivalent for the named degrees) on account of the final year of study in the Associate Diploma.

**4.5 Status for prior non-Award studies**

Subject to Faculty approval, candidates who have completed Non-Award subjects from any recognised higher education institution may

apply for status on account of such subjects towards their degree, and, if successful, will be subject to the same limits and conditions outlined in 4.1, above.

**5 Studies conceded in lieu of combined degree programs**

**5.1** A candidate of the Faculty of Arts who gains entry to another undergraduate degree program in the University and who studies that degree concurrently with the Bachelor of Environmental Studies in order to complete a combined degree program will have the following status granted on account of studies in the other degree:

12 points at Level I *and*

4 points at Level II (not forming part of either major sequence)

**5.2** A candidate of the Faculty of Arts who gains entry to a Bachelor of Science or a Bachelor of Environmental Science may have the following status granted on account of studies in the other degree:

12 points at Level I *and*

up to 12 points at Level II (forming part of one of the two major sequences)

**5.3** A student of the Faculty of Arts who is able to gains entry to Law Studies, and who undertakes Law Studies concurrently in order to complete a double degree program, will be granted status in the Bachelor of Environmental Studies up to and including the following limits on account of their Law Studies:

on completion of the Level I compulsory subjects 9402 Legal Skills I and 5272 Contract

8 points at Level II, which may form part of the second major sequence (see Rule 7.1(k) below)

on completion of 12 points of other compulsory subjects listed in the Specific Course Rules of the Bachelor of Laws

12 points at Level III, which may form part of the second major sequence (see Rule 7.1(k) below)

**6 Approval of course of study at enrolment**

Each student's course of study shall be approved by the Faculty at enrolment each year.

**7 Qualification requirements**

**7.1** To qualify for the Ordinary degree of Bachelor of Environmental Studies a candidate shall present subjects to the value of 72 points which satisfy the following requirements:

**Level I**

- (a) Level I subjects to the value of 12 points chosen from those areas of study listed in Rule 7.1 in the Specific Course Rules for the degree of Bachelor of Social Sciences.
- (b) Level I subjects to the value of 12 points chosen from those listed in Rules 8.1, Arts subjects, 8.2, Design Studies subjects, 8.3 Mathematical and Computer Sciences subjects, 8.4 Science subjects, in the Specific Course Rules for the degree of Bachelor of Arts, and other subjects offered in the University at Level I available to them.

**Level I/ II**

- (c) 4361 Environmental Studies I:  
Core Concepts 3
- or*
- 6418 Environmental Studies II:  
Core Concepts 4
- and*
- 3281 Environmental Studies II:  
Core Contexts 3
- or*
- 2082 Environmental Studies II:  
Core Contexts 4

**Level II**

- (d) Level II Environmental Studies and/or Environmental Social Science subjects to the value of 12 points, chosen from at least two different disciplines or areas of study not offered as part of the second major sequence

Level II Environmental Social Science electives:

*Anthropology*

- 3974 Aboriginal Land Tenure and Sacred Sites in Australia II 4

*Asian Studies*

- 7402 Japanese Society: Development and the Environment II 4

*Geography*

- 5603 Aquatic and Biotic Environments II 4

- 5581 Geographical Analysis of Population II 4

- 5262 Landscape and Soil Resources II 4

*History*

- 4695 South Australian Aboriginal History II 4

- 1281 Heritage and History in Contemporary Australia II 4

*Linguistics*

- 7176 Kaurna Language and Language Ecology II 4

*Politics*

- 1886 Political Economy of the Global Village II 4

- 4646 Poverty and Hope: Third World Political Economy II 8

- (e) Level II subjects to the value of 8 points chosen from those areas of study listed in Rule 7.1 in the Specific Course Rules for the Bachelor of Social Sciences, or Rule 7 of the Specific Course Rules for the Bachelor of Science, or approved subjects in Public Health, Environmental Design or Environmental Engineering (See 7.1 (j) below), being the Level II component of a second major sequence.

- (f) One Level II subject to the value of 4 points chosen from those listed in Rules 8.5, Arts subjects, 8.6 Design Studies subjects, 8.7 Mathematical and Computer Sciences subjects, 8.8 Science subjects, in the Specific Course Rules for the Bachelor of Arts, and other subjects offered in the University at Level II available to them.

**Level III**

- (g) One Level III Environmental Studies elective and one Level III Environmental Social Science elective (chosen from a discipline or area of study not offered as the second major sequence) or two Level III Environmental Social Science electives.

Level III Environmental Studies electives:

- 7195 Environmental Hazards III 6

- 7731 Environmental Politics III 6

- 8905 Environmental Reconstruction and Rehabilitation III 6

- 4088 Environmental Systems Management III 6

- 5886 History and Philosophy of Environmentalism III 6

Level III Environmental Social Science electives:

*Anthropology*

- 4834 Aboriginal Land Tenure and Sacred Sites in Australia III 6

- 3628 Indigenous Identities and the State III 6

*Asian Studies*

8455 Japanese Society III:  
Development and the  
Environment 6

*Economics*

8940 Environmental  
Economics ES III 4

6065 Introduction to Environmental  
Economics 2

*Geography*

6159 Cities and Housing III 6

1514 Environment and Development  
in South East Asia III 6

6177 Environmental Change III 6

1453 Rural Social Geography III 6

*History*

4200 Heritage and History in  
Contemporary Australia III 6

6253 South Australian  
Aboriginal History III 6

*Linguistics*

7681 Kaurua Language and  
Language Ecology III 6

5222 Language and Environment III 6

*Politics*

2979 Political Economy of the  
Global Village III 6

4192 Poverty and Hope: Third World  
Political Economy III 12

*Women's Studies*

5150 Gender, Environment,  
Development III 6

- (h) Level III subjects to the value of 12 points chosen from those areas of study listed in Rule 7.1 in the Specific Course Rules for the Bachelor of Social Sciences, or Rule 7 of the Specific Course Rules for the Bachelor of Science, or approved subjects in Public Health, Environmental Design or Environmental Engineering (See 7.1 (j) below), being the Level III component of a second major sequence.

**Major Sequences**

- (i) As part of the requirements of the degree students must complete a second major sequence (in addition to the major sequence in Environmental Studies). A major sequence is defined as 8 points at level II and 12 points at Level III in a particular discipline or area of study. In most cases, there is a requirement of 6 points at Level I as well.

This second major sequence may be in Social Sciences (listed below), or in Science (see Specific Course Rules for the Bachelor of Science).

The following disciplines and areas of study are recognised as Social Sciences by the Faculty of Arts:

- Anthropology
- Asian Studies (non-language)
- Cultural Studies
- Economics
- Geography
- History
- International Studies
- Labour Studies
- Linguistics
- Philosophy
- Politics
- Psychology\*
- Women's Studies

\* a major sequence must include the subject 3170 Psychological Research Methodology III

- (j) Students enrolled for the degree of Bachelor of Environmental Studies also may complete a second major sequence in Public Health from the Department of Public Health, or in Environmental Design from the Faculty of Architecture, or in Environmental Engineering.

A major sequence in Public Health is constituted as follows:

7183	Public Health I	6
5050	Public Health II	8
9674	Public Health III	12

A major sequence in Environmental Design is constituted as follows:

4168	Built Environments I	3
2006	Australian Architecture and Landscapes I	3
8904	Plants and Design II	4
8400	Design and Environments II	4
4371	Issues in Urban Sustainability III	6
2067	Urban Design Studio III	6

A major sequence in Environmental Engineering is constituted as follows:

9786	Mathematics I	
	<i>or</i>	
3617	Mathematics IM	
	<i>and</i>	
9595	Mathematics IIM	
3753	Environmental Engineering II S	8
5739	Environmental Engineering III S	12

Students who gain a place in Law studies may study Law concurrently with the Bachelor of Environmental Studies and count Law subjects as their second major. (Refer to Rule 5.3 above.)

- 7.2** In all cases, a student may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.
- 7.3** A student shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.
- 7.4** A student may present for the degree conceded passes in Level I and Level II subjects provided that the points value of any individual subject for which a conceded pass is presented does not exceed 3 points, and the aggregate points value does not exceed 6 points. Note that conceded passes are not awarded for Social Sciences subjects.
- 7.5** A student may not present for the degree subjects in the same discipline which exceed the following limits:
- 7.5.1** at Level I: subjects to the value of 12 points - note that students must complete studies in a minimum of three disciplines at level I with a minimum of 6 points in at least one discipline
- 7.5.2** at Level II: subjects to the value of 16 points. For the purpose of this clause, 'disciplines' shall be equivalent to the areas of study outlined in 7.1, (i), above.
- 7.6** A student will not be permitted to present for the degree any subject together with any other subject which, in the opinion of the Faculty contains a substantial amount of the same material.
- 7.7** A student will not be permitted to count a subject twice for the degree, nor, in the case of subjects available at two levels, any subject taken at both levels.
- 7.8** Except by permission of the Faculty a student shall not proceed to a subject for which the student has not completed the prerequisite subjects prescribed in the syllabuses.

- 8** Course of study/Subjects of study
- 9** Cross-institutional study
- 10** International exchanges
- 11** Unacceptable combinations of subjects
- 12** Repeating subjects
- 13** Attendance requirement

For information on Rules 8 - 13 refer to the Specific Course Rules for the Bachelor of Arts.

# Bachelor of Social Sciences

## Specific Course Rules

### 1 General

- 1.1 On satisfying the admission requirements for entry to undergraduate studies in the Faculty of Arts, students will enrol in a course of study in the Humanities and Social Sciences (see the Specific Course Rules for the Bachelor of Arts). On completing the relevant degree requirements outlined below, this course of study will allow them to qualify for the Ordinary degree of Bachelor of Social Sciences.

Graduates who have qualified for the Bachelor of Social Sciences and who wish to obtain a subsequent but different undergraduate degree in the Faculty of Arts must apply for entry to a new course of study leading to the subsequent degree and, if successful, will be subject to the rules applying to Status, Exemption and Credit Transfer outlined in the Specific Course Rules for the Bachelor of Arts.

- 1.2 The course of study for the Ordinary degree shall extend over three full-time academic years or the part-time equivalent.

### 2 Admission requirements

The admission requirements for the course of study leading to the Bachelor of Social Sciences are those outlined in the Rules made by Council pursuant to Chapter IX of the University Statutes - Of Admission and Enrolment.

### 3 Assessment and examinations

There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

In some subjects a pass may be recorded in two divisions. For such subjects a pass in the higher division may be prescribed in the syllabuses as a prerequisite for admission either to further courses in that subject or to other subjects.

There shall also be a classification of Conceded Pass. A student may present for the Ordinary degree only a limited number of subjects for which a Conceded Pass has been obtained, as specified in the relevant schedule made under these regulations.

### 4 Status, exemption and credit transfer

Exemption from the requirements of the Bachelor of Social Sciences in lieu of studies towards combined degree programs such as the Bachelor of Laws/Bachelor of Social Sciences is covered under the provisions of Rule 5, status granted in combined degree programs, below.

#### 4.1 Status for Bachelor degree level studies

##### 4.1.1 Status on Account of Previous Studies in any Academic Discipline

Persons who have previously passed subjects in Bachelor degree courses or equivalent in the University of Adelaide or other recognised university in any academic discipline who wish to count towards their degree such subjects may on written application to the Faculty be granted such status as the Faculty shall determine subject to the following conditions:

- 4.1.1.1 Students may present for the degree such subjects to a maximum aggregate points value of 12 points at Level I in lieu of the requirements of clause 7.1 (b), and 8 points at Level II in lieu of 7.1 (f).

##### 4.1.2 Status on account of studies in the Social Sciences

Persons who have previously passed subjects offered in Bachelor degree courses or equivalent in the University of Adelaide or other recognised university in the Social Sciences who wish to count towards their degree such subjects may, on written application to the Faculty Registrar, be granted status towards such specific degree requirements as the Faculty shall determine subject to the following conditions:

##### 4.1.2.1 Status on account of completed degrees

- 4.1.2.1.1 Except with the permission of the Faculty, students may present for the degree such subjects to a maximum aggregate points value of 24 points at Level I; or
- 4.1.2.1.2 Such subjects to a maximum aggregate points value of 18 points at Level I and 8 points at Level II.

##### 4.1.2.2 Status on account of incomplete degrees

For subjects passed in a course of study not yet completed other than those undertaken in an undergraduate award in the Faculty of Arts at the University of Adelaide pursuant to these Specific Course Rules:

4.1.2.2.1 Except with the permission of the Faculty, candidates may present for the degree such subjects to the maximum aggregate points outlined in 4.1.2.1, above; and in addition

4.1.2.2.2 Such subjects in fields of study recognised as major sequences in the Social Sciences, determined on a subject-by-subject basis, to an additional value of 6 points at Level I (if required) and 8 points at Level II.

## 4.2 Status for the Diploma of Associate of the University of Adelaide

Candidates who have qualified for a Diploma of associate of the University of Adelaide (AUA) may be granted such status in an undergraduate Faculty of Arts course as the Faculty shall in each case determine; provided that if status for the degree be granted for more than 18 points presented for the diploma, the student shall surrender the diploma before being admitted to the degree.

## 4.3 Status for the Associate Diploma in Liberal Studies of the University of Adelaide

Candidates who have qualified for the Associate Diploma/Diploma in Liberal Studies may be granted up to 48 points of status in the course for the degree of Bachelor of Arts provided that if status of more than 24 points is granted, the student shall surrender the Associate Diploma/Diploma before being admitted to the degree.

## 4.4 Status for prior Technical and Further Education) TAFE studies

Candidates who have qualified for an Associate Diploma from an Institute of Technical and Further Education (TAFE) may, on application to the Faculty, be granted up to a maximum 6 points at Level I on account of the final year of study in the Associate Diploma.

## 4.5 Status for prior non-Award studies

Subject to Faculty approval, candidates who have completed Non-Award subjects from any recognised higher education institution may apply for status on account of such subjects towards their degree, and, if successful, will be subject to the same limits and conditions outlined in 4.1, above.

## 5 Studies conceded in lieu of combined degree programs

5.1 A candidate of the Faculty of Arts who gains entry to another undergraduate degree program in the University (with the exception of the Bachelor of Laws) and who studies that degree

concurrently with the Bachelor of Social Sciences in order to complete a combined degree program will have the following status granted in lieu of the successful completion of their other degree:

12 points at Level *and*

8 points at Level II (not forming part of the major sequence)

5.2 A candidate of the Faculty of Arts who gains entry to Law Studies and who undertakes Law Studies concurrently with studies in Arts in order to complete a combined degree program will be granted status in the Bachelor of Social Sciences up to and including the following limits on account of their Law Studies:

on completion of the Level I compulsory subjects 9402 Legal Skills I and 5272 Contract:

8 points at Level II (not forming part of the major sequence) *and*

on completion of 12 points of other compulsory subjects listed in the Specific Course Rules of the Bachelor of Laws:

12 points at Level III (not forming part of the major sequence)

5.3 Candidates who gain exemption from part of the requirements of their undergraduate degree under this rule are eligible to apply for status on account of the studies taken into consideration under the provisions of Rule 4, only up to a maximum outlined in 4.1.2.1

## 6 Approval of course of study at enrolment

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

## 7 Qualification requirements

7.1 To qualify for the Ordinary degree of Bachelor of Social Sciences a candidate shall present passes in subjects to the value of 72 points which satisfy the following requirements:

### Level I

(a) Level I Social Science subjects to the value of 12 points chosen from those listed in Rule 8.1, for the Bachelor of Arts  
note: for areas of study designated Social Sciences, see 7.1 (i)

(b) Level I subjects to the value of 12 points chosen from those listed in Rules 8.1 for the Bachelor of Arts, 8.2 Science Subjects, 8.2 Design Studies Subjects and 8.4 Other Arts Subjects, and other subjects offered in the University at Level I available to them

**Level II**

- (c) Level II Social Science subjects to the value of 8 points chosen from those listed in Rule 8 for the Bachelor of Arts, being the Level II component of a major sequence (see (i), below)
- (d) Level II subject to the value of 4 points chosen from those listed in Rules 8.5 for the Bachelor of Arts Social Sciences Subjects below
- (e) the compulsory subject 6204 Issues and Techniques in the Social Sciences II (4 points)
- (f) Level II subjects to the value of 8 points chosen from those listed in Rules 8.5 for the Bachelor Arts Social Sciences and Language Subjects, 8.6 Science Subjects, 8.7 Design Studies Subjects and 8.8 Other Arts Subjects, and other subjects offered in the University at Level II available to them

**Level III**

- (g) Level III Social Science subjects to the value of 12 points chosen from those listed in Rule 8.9 for the Bachelor of Arts, being the Level III component of a major sequence (see (i), below)
- (h) Level III subjects to the value of 12 points chosen from those listed in Rules 8.9 for the Bachelor of Arts, Social Sciences and Language Subjects and 8.10 Science Subjects.

**Level II and III - Major Sequence**

- (i) i As part of the requirements of (c) and (g), above, 8 points of subjects presented at Level II and 12 points of subjects presented at Level III must form a major sequence and be chosen from one of the following social science disciplines recognised by the Faculty of Arts:

Anthropology  
 Economics  
 Environmental Studies  
 Geography  
 History  
 Labour Studies  
 Linguistics  
 Philosophy  
 Politics  
 Psychology - major sequence must include the subject 3170 Psychological Research Methodology III  
 Women's Studies.

- ii In interdisciplinary areas in Social Sciences in the Faculty of Arts, the relevant core topic worth 4 points at level II must be completed in addition to the 8 points at level II and 12 points at level III to satisfy the requirements of a major. These areas are as follows:

Asian Studies (non-language) -  
 1827 Asian Studies II (core topic)  
 Cultural Studies - 8675 Cultural Studies II (core topic)  
 Gender Studies - 4173 Sexing the Disciplines II (Gender Studies core topic)  
 International Studies - 5455 International Studies II (core topic)  
 Labour Studies- 9625 Labour Studies II (core topic)  
 Information on subjects designated as appropriate to an interdisciplinary area of study is available from the Faculty of Arts Office.

Subjects forming part of the above major sequences are identified in Rule 8, for the Bachelor of Arts Course of study/ Subjects of study, below.

- 7.2 In all cases, a candidate may substitute an appropriate subject chosen from Level II to fulfil the requirements of Level I, or from Level III to fulfil the requirements of Level I or II.
- 7.3 A candidate shall complete a Library Skills Workbook, except when an exemption is granted therefrom by the Faculty.
- 7.5 A candidate may present for the degree conceded passes in Level I and Level II subjects provided that the points value of any individual subject for which a conceded pass is presented does not exceed 3 points, and the aggregate points value does not exceed 6 points.
- 7.6 A candidate may not present for the degree subjects in the same discipline which exceed the following limits:
  - 7.6.1 at Level I: subjects to the value of 12 points - note that students must complete studies in a minimum of three disciplines at level I with a minimum of 6 points in at least one discipline
  - 7.6.2 at Level II: subjects to the value of 16 points. For the purpose of this clause, 'disciplines' shall be equivalent to the areas of study outlined in 7.1, (i), above.
- 7.7 A candidate will not be permitted to present for the degree any subject together with any other subject which, in the opinion of the Faculty contains a substantial amount of the same material.

- 7.8 A candidate will not be permitted to count a subject twice for the degree, nor, in the case of subjects available at two levels, any subject taken at both levels.
- 7.9 Except by permission of the Faculty a candidate shall not proceed to a subject for which the student has not completed the prerequisite subjects prescribed in the syllabuses.
- 8 Course of study/Subjects of study**
- 9 Cross-institutional study**
- 10 International exchanges**
- 11 Unacceptable combinations of subjects**
- 12 Repeating subjects**
- 13 Attendance requirement**
- For information on Rules 8 - 13 refer to the Specific Course Rules for the Bachelor of Arts.

## Syllabuses

### Anthropology

<http://chomsky.arts.adelaide.au/anthropology/>

**Note:** subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects please contact the department.>

#### Level I

#### 7419 Introduction to Social Anthropology I

6 points full year

2 lectures, 1 tutorial a week

*restriction:* 9457 Anthropology I

Questioning what we think we know about ourselves and about others is at the core of Social Anthropology. Coming to know differently through the 'deep hanging out' of ethnographic fieldwork and the anthropological analysis which emerges from such intensive 'on the ground' inquiry is the way this discipline seeks insight into what it is to be human. Whether working with ritual performers in an isolated island in the Pacific, African factory workers, celebrators of *mardi gras* in the Caribbean, French cyclists, or with alternative musicians in downtown Adelaide, anthropologists seek to critically explore the different ways of life which human groups have developed around them and made meaningful.

This subject aims to introduce social anthropology and to pass on our enthusiasm for the discipline's capacity to provide insights into social and cultural life. It introduces some of the ways anthropology weaves its insights into human and cultural life and the relationship between ethnographic fieldwork and analysis; the meaningful construction of social life; the comparative perspective which underpins the discipline, and the reflexive nature of anthropological knowledge. This subject also explicitly aims to facilitate students in developing the fundamental skills of tertiary study and critical analysis which will become lifelong assets.

*assessment:* class exercises, critical book review, essay

#### Level II

#### 4832 Anthropology of Ritual, Performance and Art II

4 points semester 2

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject focuses on ritual, cultural performance and art in a broad range of regional settings and religious traditions. The subject locates anthropological approaches to ritual, performance and art within Western traditions and will consider the ways in which these particular cultural elements have held an ongoing fascination for spectators, listeners and participants.

The celebration of bodies in and through societies will be examined through ritual processes of masking, making and moulding people, objects and performances. Paradigm shifts in the anthropological analyses of ritual, performance and art will be examined through various sites of ritual and artistic production, including contemporary sites of performance such as art galleries, museums and ethnographic films.

*assessment:* workshop papers/participation, essay

#### 9732 Culture and Society II: Inspirations for Anthropology

4 points semester 2

2 lectures, 2 seminars a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

Anthropology offers a variety of powerful insights on the diversity and complexity of human life. Anthropology has developed in the exciting rub between theoretical ideas and orientations and ethnographic case studies through which anthropologists have sought to explore how people in particular contexts live and understand their lives.

Culture and Society II is concerned with big questions: what assumptions, ideas, concepts and debates have been pivotal in the productive interaction between theory and ethnography in modern anthropology? how have different perspectives on social life emerging in different times shed light on the plethora of ways in which people around the world live their lives? why do 'old' ideas continue to entice and excite us? what are their enduring relevance to contemporary social and cultural analysis?

The subject will pivot around the 'big pictures' of society and culture opened in the work of Emile Durkheim, Karl Marx and Max Weber. Their ideas and insights continue to be inspirational and relevant because they addressed enduring questions about social life - what is the nature of social order, social conflict and social transformation? This subject will demonstrate that their perspectives are relevant not only to contemporary anthropology but to many other disciplines in the social sciences.

*assessment:* tutorial participation 10%; 1500 essay 30%; 3000 word major essay 40%; tutorial presentations 20%

#### 4287 Discourse and Power II

4 points semester 1

2 lectures, 1 tutorial a week

*restriction:* 4287/8994 The Anthropology of Political Discourse II/III

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject develops a distinctive social anthropological perspective on postmodern society. It builds on the premise that contemporary society is distinguished by singularly complex relations between knowledge and power. It argues that these find critical expression in dominant forms of discourse and language, and it develops the theme that these are constitutive of especially subtle and effective mechanisms of government and discipline. The subject has three parts. In the first we examine in some detail those key texts in which Michel Foucault explores the relationships between knowledge and power, and discourse and discipline, as these have come to distinguish the political technologies of the postmodern epoch. In the second we consider the work of several anthropologists and sociologists who draw on the analytic tool box provided by Foucault in order to explore the detailed functioning of government in relation to such institutions as the family and the economy, as well as such processes as the manufacture of statistics and expressions of racism. The third part of the subject reviews anthropological research on modern science as the source of 'truth' and as an institution of power. Science is approached as a case study which critically illuminates the centrality of power/knowledge relationships in the modern world.

*assessment:* essays, tutorial papers

#### **9643 Media and Culture II**

4 points semester 1  
3 hours per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject explores the relationship between the media and cultural processes. It considers the ways in which the media produces and reproduces culture through the generation and consumption of media messages. The subject examines some contemporary approaches to the analysis of media through a series of studies of media's roles in issues of contemporary social life. In these studies, issues of power and representation are explored as central dimensions of the cultural import of media. Topics include racism, gender, nationalism and multiculturalism, environment and politics.

*assessment:* essays, tutorial/workshop

### **Level III**

**Note:** students wishing to enter Honours should have achieved a minimum credit average in the required major sequence (8 points at Level II, 12 points at Level III)

#### **4834 Aboriginal Land Tenure and Sacred Sites In Australia III**

6 points semester 2  
2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject begins by examining classical Aboriginal land tenure systems. This includes the variety of ways land is held as symbolic and economic property, the way access to it and use of its resources are governed, how a kinship-based social organisation is meshed with local organisation and how the principles of succession to customary title in land are reflected in the disposal of estates of extinct groups and in land tenure disputes. The complex nature of traditional interests in sacred sites is also explored. We then look at how Aboriginal people present claims based on their traditions in the present context of government organisations, tribunals and courts. We discuss the relationship between Aboriginal law, customary law and Australian law, in the context of land ownership. Finally we explore the way anthropologists act professionally as go-betweens in this situation, researching land and sacred sites claims and acting as expert witnesses.

*assessment:* essays, papers, tutorial participation

#### **2160 Culture and Society III: Contemporary Debates**

6 points semester 1

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

Claude Lévi-Strauss, Michel Foucault, Pierre Bourdieu - these are three of the towering figures of mid-to-late twentieth century European social thought. Each has provided a distinctive perspective on the relationship between culture and society in either pre-capitalist or capitalist social systems, yet there are continuities and connections between their approaches also. All three have exercised, and continue to exercise a profound influence on contemporary social anthropology. This subject aims to introduce students to the most important ideas of Lévi-Strauss, Bourdieu and Foucault, and it will do so, first, by providing a general introduction to their most significant theoretical insights, and, second, by a close reading of both their own contributions to ethnography as well as the ethnographies of other social anthropologists who have been markedly influenced by them

*assessment:* seminar participation 10%; seminar presentation 50%; 4000 word major essay 40%

**7748 Depicting Aboriginal Cosmology III**

6 points semester 1

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences*restrictions:* Pre-Colonial Aboriginal Society

Some Aboriginal people remark that 'the land is my mother' and that the two are 'the same but different'. Aboriginalists have variously referred to these relationships as representations, transformations, analogies and equivalences. However, broader lateral thinking is required to fully explicate their multifarious connections. Thus, this subject examines how Aboriginal societies are continually in a flow of interactions with ancestors, people and the landscape, a relationship which is continually being redefined as the need arises within changing Australian contexts. We will examine how sacred places, sounds, images and movements are being resacralised by Aboriginal societies in response to the impact of Australian cultural forces. Thus, the landscape and seascape of Arnhem Land, the monolithic vista of Central Australia, and the rainforests of Cape York are viewed as sites of critical change since colonisation to the present day. In each locale Aboriginal cosmology is viewed as a performance of Aboriginality where the integration of singing, dancing and painting articulate Aboriginal identities to the Australian nation. In recent times, however, the nation's fascination with infiltration into and appropriation of Aboriginal cosmology from a western perspective, has led to claims of indigeneous fraud and deception undermining the very precepts of indigenous cosmology.

*assessment:* book review, essays and tutorial participation**3628 Indigenous Identities and the State III**

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject examines the various ways Indigenous peoples in a variety of nation-state contexts - Indians of North America, Maoris of New Zealand and Aborigines of Australia - construct their identities. It will begin by exploring many of the contradictions which emerge in context where Indigenous peoples have historically been, and continue to be, encapsulated within nation-states which at once desire to control Indigenous populations through legal and welfare systems, while at the same time holding them up as essential representations of nationhood. The subject will then explore how Indigenous peoples must constantly

re-make and realign their identities to affirm a sense of political, social and cultural power and independence from the nation-state but which are, nevertheless, intrinsically dependant upon state constructions of them as a people. Indigenous identities will be examined through their expressions in everyday interactions (such as that between children and the police and welfare agents) as well as in literature.

*assessment:* 3 seminar presentations 20% each, 4000 word essay 40%**1471 Local Communities, Global Cultures III**

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences*restriction:* 9729 Anthropology IIA (1987 or 1986) 6376/ 8047 Communities, Boundaries and Symbols; 3664/1471 Contemporary Communities and Social Movements II/III

The argument that the cultures of contemporary societies in an integrated global system are becoming increasingly homogenised, is a widely-encountered one nowadays. Its proponents point to the extent to which popular culture from powerful sites in the West spread rapidly and comprehensively, and they claim this must be to the detriment of local regional cultural differences as these have emerged over historical time. In this subject, we develop an anthropological perspective on this concept of a global culture which overwhelms all other cultural forms in its path; we explore the status of local communities in relation to it. After an introduction to some of the central ideas about postmodernity, we consider first how local communities as the locales of distinct cultural identities actually respond to the pressures imposed by global economic and social processes. Second, we look at the ways in which new social movements now generate quite novel definitions of community, and innovative ideas about the responsibilities and obligations which go with belonging to them. Finally, we will critically assess the argument that not only are all cultures now 'creole-ised' but that, instead of lamenting the loss of 'authentic' cultures, recognition of this fact paves the way to reconfiguring the interpretive possibilities of social anthropology as a distinctive discipline.

*assessment:* essays, tutorial papers**2366 Media Analysis III**

6 points semester 2

3 hours a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

Media have become the storytellers and myth makers of Western societies today. This subject focuses on the forms and processes of storytelling in media. It examines these from the position of the relationship between the production of knowledge and power at a number of strategic points in the production and reception of media texts. Significant media genres and products are analysed through their practice; for the ways in which they create and reproduce social knowledge and for the factors which produce constraints on their possible range of meanings. Major stories and representations in media are examined in terms of both the creativity and the power entailed and reproduced in them. Topics include: television genres, feature film (including sci-fi), news and current affairs, talk shows and talkback, technology, ethics, ad campaigns and political broadcasts, comedy, fashion/style, the internet and interactive computer programs.

*assessment:* essay, tutorial/workshop exercises

### **1575 The Sexual Body: A Cross-Cultural Perspective III**

6 points semester 2

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The popularity of films such as *Priscilla, Queen of the Desert* and *the Birdcage* indicate an ongoing fascination with our own and other people's bodies, especially those which engage in 'improper' sexual practices. Yet in Australian and most other Western societies, rigid codes of appropriate sexual behaviour continue to shape perceptions of the body. This seemingly contradictory relationship indicates that sexuality is a problematic category in our society. But does this contradiction exist in other societies? How is sexuality understood differently in other cultures? Using a historical and cross-cultural framework, this subject will investigate various theories of sexuality in order to identify particular ideological, political, economic and global influences on these conceptualisations. In particular, we will examine ethnographic research which questions the 'natural' qualities of sexual identities. In order to do this, we will need to focus on what would appear to us to be sexual abnormalities in other cultures such as male pregnancy, third genders, institutionalised homosexual practices which create heterosexual men and transsexual spouses. The subject will also address 'queer' theory and its relevance to anthropological research on sexuality.

*assessment:* tutorial participation/presentation, essays

## **Honours**

### **1105 Honours Anthropology**

24 points

full year

*prerequisites:* (a) four semesters (or the equivalent in full year Anthropology subjects) of Anthropology subjects at Level II/III at least two of which must be at Level III; and (b) attain a standard satisfactory to the Head of Anthropology in Level I, II and III subjects. (A student who has attained an average of 70 or higher in the four Anthropology II/III subjects will generally be deemed to have reached this standard). Students who have obtained these qualifications will automatically be accepted to the Honours program by the Head of the Department. 9732/2160 Culture and Society II/ III are recommended subjects for an Anthropology major sequence and for entry into Honours Anthropology.

Honours in Anthropology is a full year course, involving weekly seminars, essays, and a final dissertation. Students wishing to take Honours should consult the Head of the Department at the beginning of their Level II work. Admission to the program is subject to approval by the Head.

*assessment:* essays and a dissertation

### **Anthropology subjects not offered in 1999**

**3974 Aboriginal Land Tenure and Sacred Sites In Australia II**

**8195 Aborigines and the State II**

**9465 Healing, Ritual and Power II**

**3664 Local Communities, Global Cultures II**

**4604 Media Analysis II**

**4056 The Sexual Body: A Cross-Cultural Perspective II**

**3895 Theories of Practice II**

**6914 Towards an Anthropology of Australian Society II**

4 points

Level II

contact department for syllabus details

**5437 Aborigines and the State III**

**1687 Anthropology of Ritual, Performance and Art III**

**8994 Discourse and Power III**

**6730 Ethnic Identity and Ethnic Conflict III**

**1943 Ethnographic Texts: Portrayals of Other and Self III**

**4064 Healing, Ritual and Power III**

**1501 Media and Culture III**

**7802 Peasantry and Peasant Rebellions III**

**6138 Theories of Practice III**

**1709 Towards an Anthropology of Australian Society III**

contact department for syllabus details

**Asian Studies**

<http://chomsky.arts.adelaide.edu.au/AsianStudies/Index.htm>

The Centre for Asian Studies offers, for the Ordinary degree of Bachelor of Arts, subjects in Chinese, Japanese and Vietnamese language. There are a number of separate subjects in Chinese and Japanese Studies offered by the Centre, which students are expected to combine with their language studies. This is imperative for students who desire to do Joint Honours in Asian Studies combined with another department like Economics, Politics, History and so on, or single Honours in Chinese or Japanese Studies. Language students are advised to check the general and honours handbooks available from the Centre Office well in advance of third year to ensure that they will have sufficient prerequisites for Honours. Non-language students should note that in some cases it is possible to do Joint Honours with the Centre and another department without language.

**Note:** subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects, please contact the department.

*General restrictions:*

1. Students permitted to enrol in a language subject at a particular level are restricted from enrolling in the same language at a lower level unless the change is carried out during the teaching of the subject to enable the student to move to a more appropriate level.
2. Students enrolled in language subjects provided for speakers of the language are restricted from enrolling in the non-speakers language subject of the same level.

**Level I  
Languages**

**Chinese**

Students who have completed Chinese in the Year 12 Public Examination at an appropriate standard or have equivalent knowledge of the language should enrol in Chinese ISA. Beginners should enrol in Chinese IA.

In addition to Chinese language, students might consider taking other subjects related to China taught by the Centre and other departments as part of their degree course. In particular the first-year subject Introduction to Chinese Society and Culture I provides an excellent foundation for other Chinese studies.

**7769 Chinese IA**

3 points semester 1  
5 lectures, 2 hours in the language laboratory per week  
*restrictions:* see introductory notes

The subject consists of the study of the basic grammar, vocabulary and structures of modern standard Chinese (Mandarin) with special emphasis on the style and usage found in China today. The students will learn around 300 Chinese characters and associated compounds, concentrating on vocabulary which relates to contemporary China.

*assessment:* weekly assignments and tests, oral tests, mid-term and final exam

**2126 Chinese IB**

3 points semester 2  
*prerequisites:* 7769 Chinese IA Pass Div 1 or better) or equivalent

5 hours lectures, 2 hours language laboratory per week  
*restrictions:* see introductory notes, also 5978 Chinese I, 9741 Chinese I (Flinders)

This subjects is a continuation from Chinese IA. It continues instruction and practice in the speaking, understanding, writing and reading of modern standard Chinese. Throughout the subject mastery of conversational skills will be reinforced through oral-aural practice and at the same time increased emphasis will be placed on contemporary texts. By the end of the semester students will know around 600 Chinese characters.

*assessment:* weekly assignments and tests, oral tests, mid-term and final exam

**3060 Chinese IA (Flinders)**

4.5 units at Flinders semester 1  
5 hours lectures, 1 hour language laboratory per week  
*restrictions:* see introductory notes

See 7769 Chinese IA above for content

*assessment:* weekly assignments and tests, final exam

**7608 Chinese IB (Flinders)**

4.5 units at Flinders semester 2  
5 hours lectures, 1 hour language laboratory per week  
*prerequisites:* 3060 Chinese IA (Flinders (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

See 2126 Chinese IB above for content

*assessment:* weekly assignments and tests, final exam

**5955 Chinese IS A**

3 points semester 1  
5 classes per week

*prerequisites:* SACE Stage 2 Chinese extended course (at 17 or better) or equivalent

*restrictions:* see introductory notes

See 4323 Chinese IIA for syllabus details - assessment load will be slightly reduced to reflect the lower weighting.

**7434 Chinese ISB**

3 points semester 2  
5 classes per week

*prerequisites:* 5955 Chinese ISA (Pass Div 1 or better) or equivalent

See 3139 Chinese IIB for syllabus details - assessment load will be slightly reduced to reflect the lower weighting

**Japanese**

Students who have completed Japanese in the Year 12 Public Examination at an appropriate standard or have equivalent knowledge of the language should enrol in Japanese ISA. Beginners should enrol in Japanese IA.

In addition to Japanese language, students might consider taking other subjects related to Japan taught by the Centre and by other departments as part of their degree course. In particular the subject Introduction to Japanese Society and Culture provides an excellent foundation for other Japanese studies.

**2909 Japanese IA**

3 points semester 1  
5 hours of classes, 1 hour language laboratory per week

*restrictions:* see introductory notes

This introductory subject is designed to teach the basic grammar and vocabulary of modern spoken Japanese, together with the writing system, hiragana and Katakana and the introduction of basic kanji. Emphasis will be placed on promoting students' communication skills in both spoken and written Japanese through practical tutorials.

*assessment:* continuous assessment using small tests and assignments, final exam

**3902 Japanese IB**

3 points semester 2  
5 hours of classes, 1 hour language laboratory per week

*prerequisites:* 2909 Japanese IA (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

This subject will enable students to broaden the skills in basic Japanese language acquired in Japanese IA in order to provide a solid foundation at the introductory level in both spoken and written Japanese.

*assessment:* continuous assessments using small tests and assignments, final exam

**8956 Japanese IA (Flinders)**

4.5 units at Flinders semester 1  
5 hours of classes, 1 hour language laboratory per week

*restrictions:* see introductory notes

See 2909 Japanese IA above for content

*assessment:* continuous assessments using small tests and assignments, final exam

**7511 Japanese IB (Flinders)**

4.5 units at Flinders semester 2  
5 hours of classes, 1 hour language laboratory per week

*prerequisites:* 8956 Japanese IA (Flinders) (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

See 3902 Japanese IB above for content

*assessment:* continuous assessments using small tests and assignments, final exam

**2530 Japanese ISA**

3 points semester 1  
5 classes, 1 hour language laboratory per week

*restrictions:* see introductory notes

See 3232 Japanese IIA for content. The assessment is reduced to reflect the lower weighting

**2081 Japanese ISB**

3 points semester 2  
5 classes, 1 hour language laboratory per week

See 4273 Japanese IIB for content. The assessment is reduced to reflect the lower weighting.

**Vietnamese**

Students who have completed Vietnamese in the Year 12 Public Examination at an appropriate standard or have equivalent knowledge of the language should enrol directly into Vietnamese ISA. Beginners should enrol in Vietnamese IA.

**5469 Vietnamese IA**

3 points semester 1  
5 lectures, 1 hour language laboratory per week

*restrictions:* see introductory notes

This subject aims to provide the students with a basic foundation in the grammar and vocabulary of spoken and written Vietnamese. Emphasis will be placed on promoting students' communication skills in both spoken and written Vietnamese through practical tutorials in informal situations. A series of planned oral and written activities based on everyday situations in which both grammatical structures and colloquial Vietnamese are practised.

*assessment:* attendance and exercises during semester, class tests, oral exam, written exam. Students are required to pass each component of the subject

**5074 Vietnamese IB**

3 points semester 2

5 lectures, 1 hour language laboratory per week

*prerequisites:* 5469 Vietnamese IA (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

This subject continues to provide the students with the opportunity to increase their knowledge of the grammar and vocabulary of spoken and written Vietnamese. Through language acquisition sessions students will have the opportunity to extend their ability to use the spoken and written language to perform a limited range of communicative tasks within a number of familiar and everyday contexts.

*assessment:* attendance and exercises during semester, class tests, oral exam, written exam. Students are required to pass each component of the subject

**2672 Vietnamese ISA**

3 points semester 1

5 hours per week

*prerequisites:* SACE Stage 2 Vietnamese (16 or better) or equivalent

*restrictions:* see introductory notes

See 3184 Vietnamese IIA for syllabus details. The assessment load will be slightly reduced to reflect the lower weighting.

**9277 Vietnamese ISB**

3 points semester 2

5 hours per week

*prerequisites:* 2672 Vietnamese ISA (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

See 4208 Vietnamese IIB for syllabus details. T assessment load will be slightly reduced to reflect the lower weighting.

**Non-Language study**

**8343 Introduction to Chinese Society and Culture I**

3 points semester 2

2 lectures, 1 tutorial per week

The subject is designed to introduce Chinese society and culture both to students of Chinese language and non-language students. Its approach is thematic and covers both the modern and pre-modern periods. The introduction will be made through Chinese literary and historical writings in translation; contemporary Western scholarship; newspaper and other media reportage; and film. Through such media, historical and contemporary socio-political contexts will be discussed. Themes will include China's religious, intellectual and cultural heritage, political and economic institutions, women, marriage and family, human rights, economic development and the nature of the Chinese language. The approach of the subject is interdisciplinary, and will serve as a good introduction both for students of Chinese language, politics, economy and history and also for students majoring in history, politics or anthropology.

*assessment:* by essay, tutorial papers

**3601 Introduction to Japanese Society and Culture I**

3 points semester 1

2 lecture, 1 tutorial per week

This first year introductory subject covers wide-ranging issues concerning Japanese society and culture. The subject explores key issues and institutions of traditional, modern and contemporary Japan. Topics for discussion range from the Samurai culture and Meiji Restoration to the modern Japanese corporate system, political institutions, postwar society and popular culture. Part 1: Introduction; Part 2: Japanese culture - past and present; Part 3: The modern economic, social and political systems.

*assessment:* written work, participation and exam

**Level II**

**Languages**

**4323 Chinese IIA**

4 points semester 1

5 lectures per week

*prerequisites:* 2126 Chinese IB (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

The subject consists of tuition in speaking, listening to, writing and reading modern standard Chinese. IIA extends students' knowledge of basic grammar, vocabulary and structures found in the spoken and

written form of Chinese today. The main emphasis is on building up students' communicative skills in both speaking and reading through learning activities in class. It is anticipated that by the end of the subjects the student will know about 900 Chinese characters and associated compounds related to contemporary China.

*assessment:* weekly assignments and tests, mid-term and oral tests, exam

### 3139 Chinese IIB

4 points semester 2

5 lectures per week

*prerequisites:* 4323 Chinese IIA (Pass I level) or alternative approved by the Centre

*restrictions:* see introductory notes

This subject consists of tuition in the speaking listening to, writing and reading of modern standard Chinese. The main emphasis is on building up vocabulary and reading experience as a basis for studying contemporary Chinese society and culture. It is anticipated that by the end of the subject, the student will know around 1200 Chinese characters.

*assessment:* weekly assignments and tests, mid-term and oral tests, final exam

### 8704 Chinese IIA (Flinders)

6 units at Flinders semester 1

5 lectures per week

*prerequisites:* 7608 Chinese IB (Flinders) (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

The subject consists of tuition in speaking, listening to, writing and reading modern standard Chinese. IIA extends students' knowledge of basic grammar, vocabulary and structures found in the spoken and written form of Chinese today. The main emphasis is on building up students' communicative skills in both speaking and reading through learning activities in class. It is anticipated that by the end of the subjects the student will know about 900 Chinese characters and associated compounds related to contemporary China.

*assessment:* weekly assignments and tests, mid-term and oral tests, exam

### 4297 Chinese IIB (Flinders)

6 units at Flinders semester 2

5 lectures per week

*prerequisites:* 8704 Chinese IIA (Flinders) (Pass Div 1) or equivalent

*restrictions:* see introductory notes

This subject consists of tuition in the speaking listening, writing and reading of modern standard Chinese. The main emphasis is on building up vocabulary and reading experience as a basis for studying contemporary Chinese society and culture. It is anticipated that by the end of the subject, the student will know between 1100 and 1300 Chinese characters.

*assessment:* weekly assignments and tests, mid-term and oral tests, exam

### 1039 Chinese IISA

4 points semester 1

5 classes per week

*prerequisites:* 7434 Chinese IS B (Pass Div 1) or equivalent

*restrictions:* 4323 Chinese IIA, 3139 Chinese IIB, 8704 Chinese IIA(Flinders), 4297 Chinese IIB(Flinders), 5610 Chinese IIIA

See 5610 Chinese IIIA for syllabus details; assessment will be slightly reduced to reflect the lower weighting.

### 5730 Chinese IISB

4 points semester 2

5 classes per week

*prerequisites:* 1039 Chinese IISA (Pass Div 1) or equivalent

*restrictions:* 4323 Chinese IIA, 3139 Chinese IIB, 8704 Chinese IIA(Flinders), 4297 Chinese IIB(Flinders), 5610 Chinese IIIA, 6872 Chinese IIIB

See 6872 Chinese IIIB for syllabus details; assessment will be slightly reduced to reflect lower weighting.

### 8068 Chinese for Chinese Speakers IIA

4 points semester 1

2 lectures, 1 conversation tutorial per week

*restrictions:* see introductory notes

The subject is designed for students who speak Chinese at home and have studied Chinese in primary/secondary schools overseas in China, Taiwan, Hong Kong, Singapore and Malaysia and for those who have acquired an equivalent standard of linguistic skills in Chinese. It aims to extend students' linguistic skills and knowledge of modern standard Mandarin Chinese. It consists of tuition in oral, reading, writing and translation practice. The emphasis is on improving the students' pronunciation through the mastery of the Pinyin phonetic system

*assessment:* continuous assessment, tests, exam

**3332 Chinese for Chinese Speakers IIB**

4 points semester 2

2 lectures, 1 conversation tutorial per week

*prerequisites:* 8068 Chinese for Chinese Speakers IIA (Pass Div 1 or better) or equivalent*restrictions:* see introductory notes

The subject assumes knowledge and linguistic skills equivalent to Chinese for Chinese Speakers IIA (Pass Div 1 and above). It consists of tuition in oral, reading, writing and translation practice. Students will be taught the basic skills in writing academic essays.

*assessment:* continuous assessment, tests, final exam**2547 Chinese Studies In-Country II**

12 points semester 2

Lectures, tutorials, practicals; full-time in-country for 6 months

*prerequisites:* 4323 Chinese IIA (Pass Div 1 or better) or equivalent

This subject consists of 6 months full-time study in a designated university or college in China. The program will be defined by the Centre for Asian Studies and consist of intensive intermediate level language work, social and cultural studies electives and a special project. The language program and electives will be taught and assessed by staff in China, with supplementary assessment by staff in the Centre for Asian Studies. The special project will consist of a major essay project, which is set and marked by Asian Studies staff and completed while in-country.

**3232 Japanese IIA**

4 points semester 1

5 classes, 1 hour language laboratory per week

*prerequisites:* 3902 Japanese IB (Pass Div 1 or better) or equivalent*restrictions:* see introductory notes

This subject consolidates a foundation in the basic grammar and vocabulary of modern Japanese. Throughout the subject, conversational skills will be reinforced and at the same time increased emphasis will be placed on developing reading and writing skills using a substantial number of characters and their combinations.

*assessment:* semester work, class tests, exams**4273 Japanese IIB**

4 points semester 2

5 classes, 1 hour language laboratory per week

*prerequisites:* 3232 Japanese IIA (Pass Div I or better) or equivalent approved by the Department*restrictions:* see introductory notes, also 1408 Japanese II, 8385 Japanese II (Flinders)

This subject completes the study of elementary grammar and expands knowledge of vocabulary of modern Japanese. Throughout the subject, conversational competence will be reinforced and at the same time increased emphasis will be placed on developing reading and writing skills using a substantial number of characters and their combinations.

*assessment:* semester work, class tests, exams**4007 Japanese IIA (Flinders)**

6 units at Flinders semester 1

5 classes, 1 hour language laboratory per week

*prerequisites:* 7511 Japanese IB (Flinders) (at Pass Div 1 or better) or equivalent*restrictions:* see introductory notes

See 3232 Japanese IIA above for content

*assessment:* semester work, class tests, exams**7999 Japanese IIB (Flinders)**

6 units at Flinders semester 2

5 classes, 1 hour language laboratory per week

*prerequisites:* 4007 Japanese IIA (Flinders) (Pass Div 1 or better) or equivalent*restrictions:* see introductory notes

See 4273 Japanese IIB above for content

*assessment:* semester work, class tests, exams**5981 Japanese IISA**

4 points semester 1

5 hours per week

*prerequisites:* 2081 Japanese ISB (Pass Div 1 or better) or equivalent*restrictions:* 3232 Japanese IIA, 4273 Japanese IIB, 6644 Japanese IIIA

See 6644 Japanese IIIA for syllabus details

**4841 Japanese IISB**

4 points semester 2

5 hours per week

*prerequisites:* 5981 Japanese IISA (Pass Div 1 or better) or equivalent*restrictions:* 3232 Japanese IIA, 4273 Japanese IIB, 4007 Japanese IIA (Flinders), 7999 Japanese IIB (Flinders), 6644 Japanese IIIA, 2814 Japanese IIIB

See 2814 Japanese IIIB for syllabus details

**3184 Vietnamese IIA**

4 points semester 1

5 lectures, 1 hour language laboratory per week

*prerequisites:* 5074 Vietnamese IB (Pass Div 1 or better) or equivalent

This subject consolidates students' knowledge of the grammar and vocabulary of Vietnamese as well as extending their speaking and writing skills in the language. A series of planned oral and written language activities with emphasis on the phonological syntactical structure and lexical items will be presented to students in relevant contexts and used by them to perform communicative tasks. Emphasis will be on contemporary texts and materials.

*assessment:* attendance and work during semester, class tests, exam. Students are required to pass each component of the subject

**4208 Vietnamese IIB**

4 points semester 2

5 lectures, 1 hour language laboratory per week

*prerequisites:* 3184 Vietnamese IIA (at Pass Div 1 or better) or equivalent

This subject continues to provide students with an opportunity to build on their existing abilities in using Vietnamese both in the written and oral forms. Throughout the subject, mastery of conversational skills will be reinforced through oral-aural practice to be presented in relevant contexts and at the same time increased emphasis will be placed on contemporary texts.

*assessment:* attendance, semester work, tests, exam. Students must pass each component of the subject

**8064 Vietnamese IIS A**

4 points semester 1

5 hours per week

*prerequisites:* 9277 Vietnamese ISB (Pass Div 1 or better) or equivalent*restrictions:* 3184 Vietnamese IIA; 4208 Vietnamese IIB; 4248 Vietnamese IIIA

See 4248 Vietnamese IIIA for content; assessment load is slightly reduced to reflect the lower weighting

*assessment:* continuous assessment, final exam**8647 Vietnamese IIS B**

4 points semester 2

5 hours per week

*prerequisites:* 8064 Vietnamese IIS A (Pass Div 1 or better) or equivalent*restrictions:* 3184 Vietnamese IIA; 4208 Vietnamese IIB; 4248 Vietnamese IIIA

See 5145 Vietnamese IIIB for content; assessment load will be slightly reduced to reflect the lower weighting

*assessment:* continuous assessment, final exam**4010 Vietnamese In-Country Studies II**

12 points semester 2

Full-time in-country for 6 months

*prerequisites:* 3184 Vietnamese IIA (Pass Div 1 or better) or equivalent

This subject consists of six months full-time study in a designated university or college in Vietnam. The program will be defined by the Centre for Asian Studies and consist of intensive intermediate level language work, social and cultural studies, electives and a special project. The electives will be taught by staff in Vietnam and assessed jointly by staff in the Centre for Asian Studies and in Vietnam. The special project will consist of a major essay project, which is set and marked by the Centre for Asian Studies staff and completed while in-country.

*assessment:* language work (continuous assessment and final exam) 60%; elective subjects 10%, special project 30%

**Non-Language study****8062 Arts and Cultures of Asia II**

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject aims to provide an Australian perspective to Asian art, taking the collection of the Art Gallery of South Australia as a cultural statement about what Australians thought important and had the means to acquire. Emphasis will be on the vector forces of Indian and Chinese cultures which, when mixed together, produced many derivative transformed art forms, religious ideas and symbols. Lectures will concentrate on providing general outlines of Chinese, Japanese, Indian and South East Asian cultures in which art objects are to be located. Themes, symbols and art forms which have been transformed from one culture to another will be given special consideration. Attention will be given to written works insofar as they illustrate the local holdings. Tutorials will often centre on objects in the gallery collection. A broad range of visual materials will illustrate the lectures.

*assessment:* slide test 20%; 3000 word essay 50%; tutorial work 30%

**1827 Asian Studies II (core topic)**

4 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject will introduce Asia and Asian Studies as an area-focused discipline and also forms of discourse on Asia in a range of traditional disciplines such as politics, economics, history, sociology and philosophy. Some of the key constructs/theories for the study of Asia will be introduced and a number of thematic issues will be examined in order to integrate theoretical knowledge with empirical examples

*assessment:* participation, tutorial papers and essays

**6014 Early China: Sages and Shamans II**

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* 9981/8055 Society and Culture in Traditional China II (before 1989).

This subject introduces the salient aspects of Chinese society and culture from the early formative stages of Chinese civilisation up until the end of the Tang Dynasty. It first considers the key environmental and cultural features of Chinese society. It then looks at how the Chinese Empire was united and at the philosophical, religious, political and economic factors which contributed to that unity. In doing so the subject addresses questions about the relationship between the philosophies and social structure of the early empire and about the economic, administrative and technological foundations of political unity. The subject does not assume any knowledge of Chinese and provides a foundation for further study of later periods of Chinese history. It is also a useful companion course for Chinese language studies.

*assessment:* tutorial papers, essays

**7811 East Asian Capitalism II**

4 points semester 1

1 lecture, two-hour workshop per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This subject examines the character of the capitalist industrial East Asia focusing on two countries; Japan and Korea. In order to understand the dynamism of industrial East Asia, this subject emphasises the need to consider these countries as a distinct region rather than as separate countries. The approach to the subject is to examine how social and political factors interact with economic ones, nationally and internationally, in

the rise and operations of these countries. The course is also partly historical in approach, but its primary goal is to understand the present.

Topics covered include; East Asia as a region, the heritage of premodern traditions, East Asian capitalism as distinct from the Anglo-American type, capitalism in modern Imperial Japan, Korea under Japanese Imperialism, the state and market in East Asian development, business ideologies in East Asia, the state and labour relations, social network and trust, bureaucratic tradition and corruption, East Asia as an economic region.

The subject does not assume that students have any background in Asian Studies, but aims at providing a solid understanding of capitalist Asia as a distinct industrial region.

*assessment:* two tutorial papers, one major essay, participation.

**1802 East Asian Economies II**

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* may not be counted with 9476 East Asian Economies

The subject is designed to introduce students to the nature and structure of the economies of East Asia. It will examine the mechanisms which shape their economic activity and the role of historical and cultural factors in the development of their economic institutions. The contribution of these institutions to economic growth will also be closely examined.

*assessment:* tutorial papers, essays, final exam

**7402 Japanese Society: Development and the Environment II**

4 points semester 2

1 lecture, two-hour workshop per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject examines social transformations in rural Japan in the postwar period from the perspective of the sociology of development and the environment. It analyses how postwar socio-political structures formed the foundation for Japan's rapid economic growth, and how this in turn affected the rural areas of Japan. The core question asked in the course is why rural areas in Japan have been enmeshed in social problems leading to an ever-increasing dependence on the centre. Among the issues examined are the decline of agriculture, environmental problems, problems arising from resorts and developmental projects, and the breakdown of the family and local community. The relevance of these

issues in the context of the Asia-Pacific region will also be examined.

*assessment:* essays and workshop participation

### 5091 The Chinese Economy: Growth, Development and Trade II

4 points semester 2  
2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject examines economic growth and development in Chinese society. It aims to provide analytical insights into the processes of economic growth and their relationship to political, social and cultural change. It concentrates on the modern and contemporary period. The subject complements other subjects on Chinese politics, Chinese History and Asian economic growth. The subject begins with an overview of long-term issues in economic development in China, including the relationship between economic growth, resource endowment, technological change and social and cultural development and the impact of imperialism. The subject then concentrates on the relationship between the Chinese revolution and economic change and China's economic development since 1949. In the latter part of the subject, issues such as the relationship between planned economic development and the market, the nature of the 'Maoist' alternative, China's interaction with the world economy, the implications of economic reform and the role of the 'greater Chinese world' of Hong Kong and Taiwan receive special emphasis. Overall, students will gain insights into general issues of economic growth and development and knowledge of specific processes within China.

*assessment:* three tutorial paper, essay

## Level III Languages

### 8028 Advanced Chinese A

6 points semester I  
3 classes per week

*prerequisites:* 5730 Chinese IIS B (Pass Div I) or equivalent

This subject is an advanced program in Chinese language and traditional studies. Students will read a selection of modern Chinese documents and literature. By the end of the subject, students will be familiar with a range of written styles. Throughout the subject, emphasis will also be placed on oral/aural skills and the ability to analyse the materials studied using oral Chinese.

*assessment:* continuous assessment, final exam

### 3744 Advanced Chinese B

6 points semester 2  
3 classes per week

*prerequisites:* 8028 Advanced Chinese IIIA (Pass Div 1) or equivalent

This subject is a continuation of Advanced Chinese IIIA. Students will read a selection of modern and traditional Chinese documents and literature. By the end of the subject students will be familiar with a range of written styles. Throughout the subject, emphasis will also be placed on oral/aural skills and the ability to analyse the materials studied using oral Chinese.

*assessment:* continuous assessment, final exam

### 5610 Chinese IIIA

6 points semester 1  
4 lectures, 1 conversational tutorial

*prerequisites:* 3139 Chinese IIB or 4297 Chinese IIB (Flinders) (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

This subjects aims to consolidate and extend the language skills developed at second year level by means of further oral, reading, writing and translation practice. The emphasis is on the application of the student's language training to the study of Chinese source materials reflecting contemporary Chinese culture and society. It is expected that by the end of the semester students should be able to read original texts in modern Chinese using reference materials, should have an active vocabulary of around 1700 Chinese characters and should be able to discuss the content of the materials studied in Chinese.

*assessment:* oral tests, translations, composition, short essays on the background to materials studied, exam

### 6872 Chinese IIIB

6 points semester 2  
4 lectures, 1 conversational tutorial

*prerequisites:* 5610 Chinese IIIA (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes; 6140 Chinese III

This subject aims to consolidate and extend the language skills developed in Chinese IIIA by means of further oral, reading, writing and translation practice. The emphasis is on the application of the student's language training to the study of Chinese source materials reflecting contemporary Chinese culture and society. It is expected that by the end of the semester students will have extended their linguistics skills and gained further training in reading modern literary and journalistic styles. The texts studied will include:

documentary materials and selected texts dealing with topics related to Chinese society and culture. By the end of the semester students should be able to read original texts in modern Chinese with the aid of reference materials, should have an active vocabulary of around 2000 Chinese characters and should be able to discuss the content of the materials studied in Chinese.

*assessment:* oral tests, translations, composition, short essays on the background to materials studied, exam

#### **4981 Chinese for Chinese Speakers IIIA**

6 points semester 1

2 lectures, 1 conversation tutorial a week

*prerequisites:* 3332 Chinese for Chinese Speakers IIB (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

This subjects aims to consolidate and extend the language skills developed in Chinese for Chinese Speakers IIB by means of further oral, reading, writing and translation practice. The emphasis will be on the application of the student's language training to the study of Chinese source materials reflecting Chinese culture and society. The texts studied will include short stories, documentary materials and selected texts dealing with topics related to Chinese society and culture.

*assessment:* oral tests, translations, composition, short essays on the background to materials studied, exam

#### **7989 Chinese for Chinese Speakers IIIB**

6 points semester 2

2 lectures, 1 conversation tutorial per week

*prerequisites:* 4981 Chinese for Chinese Speakers IIIA (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

This subject aims to consolidate and extend the language skills developed in Chinese for Chinese Speakers IIIA by means of further oral, reading, writing and translation practice. The emphasis will be on the application of the student's language training to the study of Chinese source materials reflecting Chinese culture and society. The texts studied will include: short stories, documentary materials and selected texts dealing with topics related to Chinese society and culture.

*assessment:* oral tests, translations, composition, short essays on the background to materials studied, exam

#### **7364 Chinese Studies In-Country III**

12 points semester 2

Lectures, tutorials, practicals; full time in country for 6 months

*prerequisites:* 5610 Chinese IIIA (Pass Div 1 or better) or equivalent

This subject consists of six months full-time study in a designated University or College in China. The program will be defined by the Centre for Asian Studies and consists of intensive intermediate level language work, social and cultural studies electives and a special project. The language program and electives will be taught and assessed by staff in China, with supplementary assessment by staff in the Centre for Asian Studies. The special project will consist of a major essay project, which is set and marked by Asian Studies staff and completed while in-country.

#### **7537 Advanced Japanese A**

6 points semester 1

5 hours per week

*prerequisites:* 2814 Japanese IIIB (Pass Div 1 or better) or equivalent

The aim of this subject is to build competence at an advanced level of Japanese. The subject provides authentic reading materials dealing with a range of contemporary issues. The objectives are to be able to understand such materials - with the help of dictionaries - and to be able to express ideas regarding the topics appearing in the materials in speech and writing.

*assessment:* continuous 50%, examination 50%

#### **5777 Advanced Japanese B**

6 points semester 2

5 hours per week

*prerequisites:* 7537 Advanced Japanese IIIA (Pass Div 1 or better) or equivalent

This subject is a continuation and extension of the material introduced in Advanced Japanese IIIA.

*assessment:* continuous 50%, examination 50%

#### **6644 Japanese IIIA**

6 points semester 1

5 lectures, 1 hour language laboratory per week

*prerequisites:* 4273 Japanese IIB (Pass Div 1 or better) or equivalent

*restrictions:* see introductory notes

This subject consolidates the language skills of intermediate level Japanese. It deals with materials regarding social and linguistic issues in Japan. Emphasis is placed on building vocabulary in the related areas and widening the understanding of grammatical structures so that students are able to express their ideas both in speech and writing.

*assessment:* continuous assessment, exam

**2814 Japanese IIIB**

6 points semester 2

5 lectures, 1 hour language laboratory per week

*prerequisites:* 6644 Japanese IIIA (Pass Div 1 or better) or equivalent*restrictions:* see introductory notes

This subject develops the language skills of Japanese at an advanced level. It deals with social issues in Australia-Japan relations. Emphasis is placed on building reading and speaking skills in the related areas.

*assessment:* continuous assessment, exam**4616 Japanese IIIA (Flinders)**

6 units at Flinders semester 1

5 classes, 1 hour language laboratory per week

*prerequisites:* 7999 Japanese IIB (Flinders) (Pass Div 1 or better) or equivalent

See 6644 Japanese IIIA above for content

*assessment:* semester work, class tests, exams**4186 Japanese IIIB (Flinders)**

6 units at Flinders semester 2

5 classes, 1 hour language laboratory per week

*prerequisites:* 4616 Japanese IIIA (Flinders) (Pass Div 1 or better) or equivalent

See 2814 Japanese IIIB above for content

*assessment:* semester work, class tests, exams**2577 Advanced Vietnamese A**

6 points not offered in 1999

5 classes per week

*prerequisites:* 8647 Vietnamese IISB (Pass Div 1 ) or equivalent

This subject aims to prepare students for a wider range of experiences in using Vietnamese at an advanced level. The content deals with topics relating to Vietnamese language, literature and culture. It aims to help students expand their vocabulary, familiarise themselves with more complex syntactical structures and a wider range of discourse forms and registers so that they will be able to: use Vietnamese appropriately in a variety of social situations; identify and respond to socio-cultural elements in the language of texts; display some control over complex sentence structure, style and other linguistic elements of Vietnamese, in both speech and writing.

*assessment:* continuous assessment 50%; exam 50%**4722 Advanced Vietnamese B**

6 points not offered in 1999

5 classes per week

*prerequisites:* 2577 Advanced Vietnamese IIIA (Pass Div 1 ) or equivalent

This subject aims to prepare students for a wider range of experiences in using Vietnamese at an advanced level. The content deals with topics relating to Vietnamese language, literature and culture. It aims to help students expand their vocabulary, familiarise themselves with more complex syntactical structures and a wider range of discourse forms and registers so that they will be able to: use Vietnamese appropriately in a variety of social situations; identify and respond to socio-cultural elements in the language of texts; display some control over complex sentence structure, style and other linguistic elements of Vietnamese, in both speech and writing.

*assessment:* continuous assessment 50%; exam 50%**4248 Vietnamese IIIA**

6 points semester 1

5 lectures, 1 hour language laboratory per week

*prerequisites:* 4208 Vietnamese IIB (Pass Div 1 or better) or equivalent*restrictions:* see introductory notes

The subject aims to consolidate and extend the language skills already attained by means of reading, writing and oral-aural practice based on relevant topics. The emphasis is on communicative competence in Vietnamese. It is expected that by the end of the subject students will have consolidated their linguistic skills, gained experience of reading and analysing some selected literary texts as well as documentary materials, eg. documents, newspaper articles written in Vietnamese 'chu quoc ngu'. Students are also expected to be familiar with the cultural and social background of the texts studied. It is proposed to assess the cultural and literary aspects of the subject by essays or seminar papers.

*assessment:* attendance and oral/written exercises, class tests, essay/seminar paper, exam. Students are required to pass each component of subject**5145 Vietnamese IIIB**

6 points semester 2

5 lectures, 1 hour language laboratory per week

*prerequisites:* 4248 Vietnamese IIIA (Pass Div 1 or better) or equivalent*restrictions:* see introductory notes, also 8277 Vietnamese III

This subject aims to consolidate and further extend students' linguistic skills through reading, writing and oral-aural practice based on topics presented in relevant contexts. It continues to place emphasis on communicative competence and advanced writing and reading activities, based on selected modern texts and documentary materials. It is expected that by the end of this subject students will be able to analyse the literary, cultural and social background of the texts studied in depth. The cultural and literary aspects of the course will be assessed by essays or seminar papers.

*assessment:* attendance and oral/written exercises, class tests, essay/seminar paper, exam. Students are required to pass each component of subject

### 3820 Vietnamese In-Country Studies III

12 points semester 2

Full-time in-country for 6 months

*prerequisites:* 4248 Vietnamese IIIA ( Pass Div I) or equivalent

This subject consists of six months full-time study in a designated university or college in Vietnam. The program will be defined by the Centre for Asian Studies and consist of intensive advanced level language work, social and cultural studies, electives and a special project. The electives will be taught by staff in Vietnam and assessed jointly by staff in the Centre for Asian Studies and in Vietnam. The special project will consist of a major essay project, which is set and marked by the Centre for Asian Studies staff and completed while in-country.

*assessment:* language work (continuous assessment and final exam) 60%; elective subjects 10%, special project 30%

### Non-Language Study

#### 8079 Arts and Cultures of Asia III

6 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject aims to provide an Australian perspective to Asian art, taking the collection of the Art Gallery of South Australia as a cultural statement about what Australians thought important and had the means to acquire. Emphasis will be on the vector forces of Indian and Chinese cultures which, when mixed together, produced many derivative transformed art forms, religious ideas and symbols. Lectures will concentrate on providing general outlines of Chinese, Japanese, Indian and South East Asian cultures in which art objects are to be located. Themes, symbols and art forms which have been transformed from one culture to another will be given special consideration.

Attention will be given to written works insofar as they illustrate the local holdings. Tutorials will often centre on objects in the gallery collection. A broad range of visual materials will illustrate the lectures.

*assessment:* slide test 20%; 4500 word essay 50%; tutorial work 30%

#### 6114 Early China: Sages and Shamans III

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restriction:* 9981/8055 Society and Culture in Traditional China II before 1989

This subject introduces the salient aspects of Chinese society and culture from the early formative stages of Chinese civilisation up until the end of the Tang Dynasty. It first considers the key environmental and cultural features of Chinese society. It then looks at how the Chinese Empire was united and at the philosophical, religious, political and economic factors which contributed to that unity. In doing so the subject addresses questions about the relationship between the philosophies and social structure of the early empire and about the economic, administrative and technological foundations of political unity. The course does not assume any knowledge of Chinese and provides a foundation for further study of later periods of Chinese history. It is also a useful companion course for Chinese language studies.

*assessment:* tutorial papers and essays

#### 9170 East Asian Capitalism III

6 points semester 1

1 lecture, 2 hour workshop a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject examines the character of the capitalist industrial East Asia focusing on two countries; Japan and Korea. In order to understand the dynamism of industrial East Asia, this subject emphasises the need to consider these countries as a distinct region rather than as separate countries. The approach to the subject is to examine how social and political factors interact with economic ones, nationally and internationally, in the rise and operations of these countries. The course is also partly historical in approach, but its primary goal is to understand the present.

Topics covered include; East Asia as a region, the heritage of premodern traditions, East Asian capitalism as distinct from the Anglo-American type, capitalism in modern Imperial Japan, Korea under Japanese Imperialism, the state and market in East Asian

development, business ideologies in East Asia, the state and labour relations, social network and trust, bureaucratic tradition and corruption, East Asia as an economic region.

*assessment:* participation, two tutorial papers, major essay

### **8455 Japanese Society: Development and the Environment III**

6 points semester 2

1 lecture, 2 hour workshop a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject examines social transformations in rural Japan in the postwar period from the perspective of the sociology of development and the environment. It analyses how postwar socio-political structures formed the foundation for Japan's rapid economic growth, and how this in turn affected the rural areas of Japan. The core question asked in the course is why rural areas in Japan have been enmeshed in social problems leading to an ever-increasing dependence on the centre. Among the issues examined are the decline of agriculture, environmental problems, problems arising from resorts and developmental projects, and the breakdown of the family and local community. The relevance of these issues in the context of the Asia-Pacific region will also be examined.

*assessment:* essays and workshop participation

### **7043 The Chinese Economy: Growth, Development and Trade III**

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject examines economic growth and development in Chinese society. It aims to provide analytical insights into the processes of economic growth and their relationship to political, social and cultural change. It concentrates on the modern and contemporary period. The subject complements other subjects on Chinese politics, Chinese History and Asian economic growth. The subject begins with an overview of long-term issues in economic development in China, including the relationship between economic growth, resource endowment, technological change and social and cultural development and the impact of imperialism. The subject then concentrates on the relationship between the Chinese revolution and economic change and China's economic development since 1949. In the latter part of the subject, issues such as the relationship between planned economic development and the market, the nature of the 'Maoist'

alternative, China's interaction with the world economy, the implications of economic reform and the role of the 'greater Chinese world' of Hong Kong and Taiwan receive special emphasis. Overall, students will gain insights into general issues of economic growth and development and knowledge of specific processes within China.

*assessment:* three tutorial papers; essay

## **Honours**

### **7247 Honours in Asian Studies**

24 points full year

*prerequisites:* requirements for the BA(Asian Studies); upper credits (70 or better) or distinctions in their third year Asian language and Asian Studies subjects. Entry to Honours is subject to the approval of the Honours Committee of the Centre

The Honours program consists of three elements: a research thesis, a semester subject work unit on theory and methodology in Asian Studies and a semester subject work unit on advanced language

*assessment:* thesis 50%; theory and methodology 25%; advanced language 25%

### **Joint Honours in Asian Studies**

Arrangements are possible for joint honours combining study in the Centre with study in another department.

*prerequisites:* unless special permission is granted by the Honours Committee, students must satisfy one of the two types of prerequisites: Type I - the completion of at least Chinese or Japanese IIIB with a high credit or above; at least two non-language semester subjects at second or third-year levels offered in Asian Studies with the standard of a high credit or above; and acceptance as a Joint Honours candidate within the Department which is jointly participating in the student's Honours program.

Type II - four non-language semester subjects at second and third-year levels offered in Asian Studies with the standard of a high credit or above; and acceptance as a Joint Honours candidate with the Department which is jointly participating in the student's Honours program. Students wishing to take this option are advised to consult the Honours Coordinator of the Centre and the relevant Department as early as possible so that adequate arrangements for entry can be made.

The nature of the Honours work undertaken shall be defined in consultation between the Head of the Departments concerned, the Head of the Centre and the student, and requires the approval of the Faculty of Arts.

**3025 Honours in Chinese Studies**

24 points full year

note: Students wishing to take Honours in Chinese Studies should consult the Honours Coordinator early in their B.A. course and should plan their B.A. program carefully. They are encouraged to stream their courses so that their language study is combined with: (a) a variety of Chinese Studies courses; and (b) a sequence of subjects in one discipline (eg History, Politics, Economics, etc).

*prerequisites:* high credit or above in Chinese IIIB or Advanced Chinese A/B; four semester subjects or equivalent (two at second or third-year level at credit standard or higher) from a specified range of subjects listed in the Centre's Honours Handbook. Students wishing to take Honours but without prerequisites are advised to consult the Honours Coordinator as soon as possible. Entry to the Honours course is subject to the approval of the Honours Committee of the Centre.

Honours work includes course work and thesis - details are in the Centre's Honours Handbook

**1509 Honours in Japanese Studies**

24 points full year

note: Students wishing to take Honours in Japanese Studies should consult the Honours Coordinator early in their B.A. course and should plan their B.A. program carefully. They are encouraged to stream their courses so that their language study is combined with: (a) a variety of Japanese Studies courses; and (b) a sequence of subjects in one discipline (eg History, Politics, Economics, etc).

*prerequisites:* high credit or above in Japanese IIIB or Advanced Japanese A/B; four semester subjects or equivalent (two of at second or third-year level at high credit standard or above) from a specified range of subjects listed in the Centre's Honours Handbook. Students wishing to take Honours but without prerequisites are advised to consult the Honours Coordinator as soon as possible. Entry to the Honours course is subject to the approval of the Honours Committee of the Centre.

Honours work includes course work and thesis - details are in the Centre's Honours Handbook

**Australian Studies**

**3262 Australian Studies II (core topic)**

4 points semester 2  
 2 hour seminar, 1 hour tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This interdisciplinary subject allows Australian students to develop a deeper understanding of the country they live in, and overseas students to gain substantial knowledge of past and present Australia. The subject begins with an overview of Australian environment, culture, economy, demography and politics. Students proceed to a more detailed analysis of contemporary debates in areas such as gender relations, art, sport, literature, media and other political, social and environmental topics. The subject concludes with a consideration of the recurrent themes in such studies, for example, national identity, multiculturalism and Aboriginal reconciliation.

*assessment:* 2000-3000 word reports 30%; oral presentation of reports 10%; 3000 word major essay 50%; seminar participation 10%

**7176 Kurna Language and Language Ecology II**

4 points semester 2

**7681 Kurna Language and Language Ecology III**

6 points semester 2

See entry under Linguistics syllabus details

**6617 Honours in Australian Studies**

24 points full year

*prerequisites:* the major sequence of study required for the Ordinary Degree of Bachelor of Arts (Australian Studies) or its equivalent, with a minimum achievement of four credit results at Levels II and III

An Honours year including a thesis, a core subject in Australian Studies theories and methodologies and an elective as determined by the Award Committee

*assessment:* 15000 word thesis 50%; 6000-7000 word core subject 25%; 6000-7000 word elective 25%

**Classics**

The Classics discipline offers, for the Ordinary degree of Bachelor of Arts, subjects in classical languages and civilisation. Classical texts are studied in translation in all subjects other than language subjects. Some knowledge of an ancient language is however required of Honours students.

Please note that, subject to staffing, non-language subjects are offered on a rotational basis. It is intended therefore, that subjects not offered in 1999 should be available in 2000.

Latin I and Ancient Greek I do not assume any prior language knowledge. Students who have completed Latin or Ancient Greek at Year 12 Level to an appropriate standard may, upon consultation with the Head of Department, and subject to approval by the Faculty of Arts, enrol directly into Latin II or Ancient Greek II.

Subjects are not available to students with exemption from lectures.

**5714 Ancient Greek I**

6 points full year

4 tutorials a week

*restriction:* not available to students who have reached a level of satisfactory achievement in SACE stage 2 Ancient Greek or equivalent

Complete survey of grammar and syntax, with translation from and into Greek. A selection of passages from various authors is to be studied by students to understand the meaning, background and style of the language.

*assessment:* short test each semester; grammar and translation exam end of semester 1; vocabulary test, end-of-year translation exam, knowledge of grammar

**8984 Classics I: From Egypt to Rome**

6 points full year

2 lectures, 1 tutorial a week

This subject is designed as an introduction to the ancient world. Students will be introduced to the literature and material remains of the distant past. The lectures in semester I will deal with Egypt, Mesopotamia, Syro-Palestine, Minoans and Mycenaeans and in semester 2 with Greece and Rome.

*assessment:* 4 x 1200 word tutorial papers 60%; 2 x two-hour exams 40%

**2346 Latin I**

6 points full year

3 tutorials a week

*restriction:* not available to students who have reached a level of satisfactory achievement in SACE stage 2 Latin or equivalent

Complete survey of grammar and syntax, with translation from and into Latin. A selection of passages from various authors is to be studied by students to understand the meaning, background and style of the language.

*assessment:* short test each semester; grammar, translation exam end of semester 1; vocabulary test, end-of-year translation exam, knowledge of grammar

**Level II****8996 Ancient Greek II**

8 points full year

3 tutorials a week

*prerequisites:* 5714 Ancient Greek I (Pass Division 1) or equivalent, or satisfactory achievement in SACE stage 2 Ancient Greek or equivalent

*restriction:* not available to students who have passed 7773 Ancient Greek IIA or equivalent before 1993

One hour a week will be devoted to unseen translation and study of grammar and syntax. One hour will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester for examination in Orientation Week.

*assessment:* end of semester exam on preparation texts; passages for translation, passages for

grammatical analysis; critical paper on each discussion text; exams on unseen translation ability; short grammar tests; vacation reading exam - translation only

### 7175 Ancient Greek IIS

8 points full year

4 tutorials a week

*prerequisites:* acceptance for Honours

*restriction:* not available to students who have reached a level of satisfactory achievement in SACE stage 2 Ancient Greek or equivalent

Complete survey of grammar and syntax, with translation from and into Greek. A selection of passages from various authors is to be studied by students to understand the meaning, background and style of the language.

*assessment:* short semester tests; grammar, translation exam end of semester 1; vocabulary test, end-of-year exam in translation, knowledge of grammar

### 6761 Classical Mythology II

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* 1951 Classical Mythology before 1996

The subject examines some of the functions of myth in Greek and Roman society. For illustrative purposes, some attention is paid to myths in other cultures, but the subject is mainly concerned with the Greek and Roman material that deals with the Olympian goddesses, Apollo, Dionysus, Creation, the Golden Age, the Heroes, Foundation Legends, and the Underworld. The role of myth today and its relationship to film will also be considered.

*assessment:* 2.5 hour exam 40%; short exercise 10%; tutorial participation 10%; 2 x 1500 word papers 40%

### 7275 Early Greek Archaeology II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* any previous Classical/Greek Archaeology, Art or Architecture subjects offered by the University

The aim of this subject is to study Greek Archaeology with an emphasis upon its art and architecture. The subject begins with the Mycenaeans and continues until the end of the Archaic period (c. 480 B.C.).

*assessment:* two-hour exam 35%; slide test 20%; 3 x 1000 word tutorial papers 45%

### 9343 Early Medieval Europe: AD 200-800 II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* 2467/ 8335 Medieval Europe II/ III, 4884/9693 Medieval Europe II/Europe III before 1990, or Early Medieval West II/III before 1999

This subject examines a period of transformation, from the barbarian invasions of the old Roman Empire to the 'new' Roman Empire of Western Europe. The intellectual and religious tensions within this period will be studied especially the role of the Church in the society as well as its material culture and socio-economic and political structures. Regions surveyed will include the Frankish, Anglo-Saxon, and Lombardic Italian kingdoms.

*assessment:* two-hour exam 40%; 3 x 1000 word tutorial papers 60%

### 7230 Greek and Roman Drama II

4 points semester 1

1 lecture, 1 seminar, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject provides a systematic study of some of the major areas of Greek and Roman drama. It traces the origins and development of drama within its historic context and considers the work of the major tragic and comic writers, including Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence and Seneca. The subject will not require knowledge of any ancient language.

*assessment:* two-hour exam 45%; 3 x 1300 word tutorial papers 55%

### 3591 Later Greek Archaeology II

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* not available to students who have completed previous Classical or Greek Archaeology, Art or Architecture subjects offered by the University

This subject continues the study of Greek archaeology from the Classical period to the Hellenistic period in the Eastern Mediterranean world.

*assessment:* two-hour exam 35%; slide test 20%; 3 x 1000 word tutorial papers 45%

**7937 Latin II**

8 points full year

3 tutorials a week

*prerequisites:* 2346 Latin 1 (Pass Division 1) or equivalent, or satisfactory achievement in SACE stage 2 Latin or equivalent

*restriction:* not available to students who have passed 6048 Latin IIA or equivalent before 1993

One hour a week will be devoted to unseen translation and study of grammar and syntax. One hour will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester for examination in Orientation Week.

*assessment:* end of semester exam on preparation texts; passages for translation, passages for grammatical analysis; critical paper on each discussion text; exams on unseen translation ability; short grammar tests; vacation reading exam - translation only

**3630 Latin IIS**

8 points full year

3 tutorials a week

*prerequisites:* acceptance for Honours

*restriction:* not available to students who have reached a level of satisfactory achievement in SACE Stage 2 Latin or equivalent

Complete survey of grammar and syntax, with translation from and into Latin. A selection of passages from various authors to be studied by students to understand the meaning, background and style of the language.

*assessment:* short semester tests; grammar, translation exam end of semester 1; vocabulary test, end-of-year exam in translation, knowledge of grammar

**9360 Pamphylia in Antiquity: In-Country Studies II**

4 points semester 2

The summer school, to be held in Southern Turkey in July, is designed to give students the opportunity to study the Hellenistic and Roman settlement of Pamphylia in the field. The subject will deal with the history and archaeology of the region, including the architectural and art history (the cities are so well preserved here that students can have first hand experience of most aspects of Greco-Roman culture). Students will be encouraged to reconstruct the Greek and Roman way of life. Further details available from the Department.

*assessment:* 1000 word tutorial paper 25%; 2 x 2000 word research papers 75%

**9437 Roman Imperial History AD 14–192 II**

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* any Roman Imperial History subject before 1996

This subject covers the political and social history of Rome from Tiberius to Commodus. The last four weeks of the semester will be devoted to a special topic: slavery and the Roman family

*assessment:* 2 hour exam 40%; 3 x 1250 word tutorial papers 50%; tutorial attendance 10%

**8739 Roman Republican History 133 BC–AD 14 II**

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* not available to students who have completed any Roman Republican history subject before 1996

This subject considers the fall of the Roman Republic and the transition from Republican government to Imperial rule.

*assessment:* two-hour exam 40%; 3 tutorial papers 60%

**7294 Songs for Heroes II**

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

European heroic poetry: In particular, the Iliad, Aeneid, Chanson de Roland, Nibelungenleid, and Henry V. This course combines literary study with examination of the conflict between the heroic ethos of the 'shame-culture' and the more cooperative ethos of the 'guilt-culture', and examines the social consequences for both men and women of the cult of heroism.

*assessment:* 3 x 1300 word tutorial papers 55%; two-hour exam 45%

## Level III

**5944 Ancient Greek III**

12 points full year  
3 tutorials a week

*prerequisites:* 8996 Ancient Greek II (Pass Div I) or equivalent

One hour will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. The remaining hour will be spent on grammar work, including translation into Greek. There is also a text to be read before the start of the first semester for examination in Orientation Week. Three books of Homer are to be read privately during the year.

*assessment:* end of semester exam on preparation texts; passages for translation, passages for grammatical analysis; critical paper on each discussion text; exams on unseen translation ability; short grammar tests; vacation reading exam - translation only; Homer reading also examined

**3943 Ancient Greek IIIS**

12 points full year  
3 tutorials a week

*prerequisites:* acceptance for Honours and 7175 Ancient Greek IIS (Pass Div I) or equivalent

One hour will be devoted to unseen translation and study of grammar and syntax. One hour will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester, for examination in Orientation Week.

*assessment:* preparation texts assessed by end of semester exam; passages set for translation and short passages for grammatical analysis; critical paper on each discussion text; exams to test unseen translation ability; short grammar tests during year. Vacation reading exam involves translation only

**3906 Archaeological Theory and Method (A) III**

6 points semester 1  
1.5 hours per week

Quota of twenty places for students enrolled at third and Honours/Graduate Diploma level (combined)

*prerequisites:* at least 8 points in Archaeology/Art and Architecture subjects at Adelaide (or equivalent at

Flinders) for students intending to take Honours (Classical Studies) at Adelaide or are on Honours track in Archaeology at Flinders

*restriction:* honours students from Adelaide or Flinders universities who have already undertaken the Graduate Diploma in Archaeology

The subject examines the history of and current issues within archaeology as a methodological discipline. Lectures and seminars cover the history of classical archaeology, twentieth century archaeological research in the Old World and developments in the interpretation of ancient cultures, using classical examples.

*assessment:* one-hour exam 50%; semester paper 40%; semester preparation 10%

Note: students taking Honours (Classical Studies) at the University of Adelaide may, with the permission of the department, take this subject in their fourth year as a 'special option', provided they have not previously completed it.

**3644 Classical Mythology III**

6 points semester 2  
2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restriction:* 1951 Classical Mythology before 1996

The subject examines some of the functions of myth in Greek and Roman society. For illustrative purposes, some attention is paid to myths in other cultures, but the course is mainly concerned with the Greek and Roman material that deals with the Olympian goddesses, Apollo, Dionysus, Creation, the Golden Age, the Heroes, Foundation Legends, and the Underworld. The role of myth today and its relationship to film will also be considered.

*assessment:* 2.5 hour exam 30%; 2500 word essay 25%; 2 x 1250 tutorial papers 35%; tutorial attendance 10%

**1193 Early Greek Archaeology III**

6 points semester 1  
2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Science

*restriction:* not available to students who have completed previous Classical or Greek Archaeology, Art or Architecture subjects offered by the University

The aim of this subject is to study Greek archaeology, with an emphasis upon its art and architecture. The subject begins with the Mycenaean, and continues until the end of the Archaic period (c.480 B.C.).

*assessment:* two-hour exam 30%; slide test, 15%; 2 x 1300 word seminar papers 30%; 3000 word essay 25%

**1763 Early Medieval Europe: AD 200-800 III**

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences*restriction:* 2467/8335 Medieval Europe II/III, 4884/9693 Medieval Europe II/III before 1993, or Early medieval West II/III before 1999

This subject examines a period of transformation from the barbarian invasions of the old Roman Empire to the 'new' Roman Empire of Western Europe. The intellectual and religious tensions within this period will be studied especially the role of the Church in society as well as its material culture and socio-economic and political structures. Regions surveyed will include the Frankish, Anglo-Saxon, and Lombardic Italian Kingdoms.

*assessment:* two-hour exam 40%; 2 x 1300 word seminar papers 30%; 3000 word essay 30%**6180 Greek and Roman Drama III**

6 points semester 1

1 lecture, seminar, tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject provides a systematic study of some of the major areas of Greek and Roman drama. It traces the origins and development of drama within its historic context and considers the work of the major tragic and comic writers, including Aeschylus, Sophocles, Euripides, Aristophanes, Menander, Plautus, Terence and Seneca. The course will not require knowledge of any ancient language.

*assessment:* two-hour exam 30%; 3 x 1300 word seminar papers 45%; 3000 word essay 25%**2029 Later Greek Archaeology III**

6 points semester 2

2 lectures and 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences*restriction:* not available to students who have completed previous Classical or Greek Archaeology, Art or Architecture subjects offered by the University

This subject continues the study of Greek archaeology from the Classical period to the Hellenistic period in the Eastern Mediterranean world.

*assessment:* two-hour exam 30%; slide test 15%; 2 x 1300 word tutorial papers 30%; 3000 word essay 25%**4232 Latin III**

12 points full year

3 tutorials a week

*prerequisite:* 7937 Latin II (Pass Div I) or equivalent

One hour a week will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. The remaining hour will be spent on grammar work, including translation into Latin. There is also a text to be read before the start of the first semester for examination in Orientation Week. Three books of Virgil's Aeneid, are to be read privately during the year.

*assessment:* preparation texts assessed by end of semester exam; passages set for translation and short passages for grammatical analysis; critical paper on each discussion text; exams to test unseen translation ability; short grammar tests during year. Vacation reading exam involves translation only; Virgil reading also examined.**3454 Latin IIIS**

12 points full year

3 tutorials a week

*prerequisites:* acceptance for Honours and 3630 Latin IIS (Pass Division I) or equivalent

One hour a week will be devoted to unseen translation and study of grammar and syntax. One hour a week will be spent on a discussion text: text will be translated beforehand and discussed in class, with attention given to literary analysis, as well as narrative content. One hour will be spent on a preparation text, prepared beforehand and translated in class. There is also a text to be read before the start of the first semester, for examination in Orientation Week.

*assessment:* preparation texts assessed by end of semester exam; passages set for translation and short passages for grammatical analysis; critical paper on each discussion text; exams to test unseen translation ability; short grammar tests during year. Vacation reading exam involves translation only**7754 Pamphylia in Antiquity: In-Country Studies III**

6 points semester 2

This summer school (to be held in Southern Turkey in July) is designed to give students the opportunity to study the Hellenistic and Roman settlement of Pamphylia in the field. The subject will deal with the history and archaeology of the region, including the architectural and art history (the cities are so well

preserved here that students can have first hand experience of most aspects of Greco-Roman culture). Students will be encouraged to reconstruct the Greek and Roman way of life.

*assessment:* 1000 word tutorial paper 25%; 2 x 3500 word research papers 75%

**5830 Roman Imperial History AD 14–192 III**

6 points semester 2

2 lectures and 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Science

*restriction:* any Roman Imperial History subject before 1996

This subject covers the political and social history of Rome from Tiberius to Commodus. The last four weeks of the Semester will be devoted to a special topic: slavery and the Roman family.

*assessment:* 2 hour exam 30%; 3000 word essay 25%; 2 x 1250 tutorial papers 35%; tutorial attendance 10%

**3189 Roman Republican History  
133 BC–AD 14 III**

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restriction:* any Roman Republican history subject before 1996.

This subject considers the fall of the Roman Republic and the transition from Republican government to Imperial rule.

*assessment:* 2 hour exam 40%; 2 x 1200 word tutorial paper 30%; 3500 word research papers 30%

**4804 Songs for Heroes III**

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

European heroic poetry: In particular, the Iliad, Aeneid, Chanson de Roland, Nibelungenleid, and Henry V. This course combines literary study with examination of the conflict between the heroic ethos of the 'shame-culture' and the more co-operative ethos of the 'guilt-culture', and examines the social consequences for both men and women of the cult of heroism.

*assessment:* 3 x 1300 word tutorial papers 45%; 3000 word essay 25%; two-hour exam 30%

**Honours**

**4210 Honours Classical Studies**

24 points full year

Students wishing to take an Honours degree in Classical Studies should consult the Head of the Classics discipline, if possible before beginning studies at Level II

*prerequisites:* acceptable standard in 1014 Classical Studies I or 8984 Classic I: From Egypt to Rome; at least four semester subjects taught in Classics discipline - at least two must be Level III; successful completion of two years' study in Greek and/or Latin. For further information see the Head of Department

The study of three Greek or Latin texts in the original language; candidates must offer one of the texts for examination at the beginning of the first semester; a common course (including 2 x 2500 word essays); special topics chosen in accordance with the interests of the candidates (2 x 3000 word essays); a 15000-20000 word dissertation in semester 2.

The exact arrangement of the subject may be varied by the Head of the discipline in accordance with the interests of the students and the availability of specialised teaching.

**8302 Honours Greek and/or Latin**

24 points full year

Students wishing to take an Honours degree in Greek and/or Latin should consult the Head of Department, if possible before beginning studies at Level II

*prerequisites:* for Greek - 5944 Greek III; for Latin: 4232 Latin III; for Greek and Latin - 5944 Greek III and 4232 Latin III

The study of six Greek or six Latin or three Greek and three Latin texts in the original language, chosen with reference to the interests of the candidates. Two of the texts must be offered for examination at the beginning of the first semester. Unseen translation will also be tested by examination. the study of Greek and/or Latin literature through essays together with the study of other material in accordance with the interests of candidates. When students take Honours in both Latin and Greek, including the dissertation (see section c), the need to study such other material may be relaxed. unless determined otherwise in consultation with candidates, a special topic chosen from the field of Greek and/or Latin literature in accordance with the interests of the candidates. The topic will be the subject of a 15000-20000 word dissertation to be written during semester 2. Topics which, while not purely literary, depend on the interpretation of ancient literature, may be approved.

The exact arrangement of the course may be varied by the Head of the discipline in accordance with the interests of the students and the availability of

specialised teaching. If the dissertation is not included, the work of Sections A and B will be expanded to take its place.

### Joint Honours

Arrangements are possible for joint honours combining study in the discipline of Classics with study in another discipline in the Faculty of Arts. Interested students should consult the Head of the discipline.

### Cultural Studies

**8675 Cultural Studies II (core topic)**

4 points semester 2  
2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject introduces students to methodologies and theoretical frameworks used in cultural studies through a detailed examination of a number of aspects of contemporary Australian culture. Topics to be

examined will vary from year to year according to the availability of staff but may include home life; work; leisure; consumption; cityscape; landscape; nation/ethnicity/race/language; the politics of discourse, sexualities, global/local; postcoloniality.

*assessment:* essays and classwork

### 9831 Honours in Cultural Studies

24 points full year  
contact hours determined by the Award Committee

*prerequisites:* major sequence of study required for the Ordinary Degree of Bachelor of Arts (Cultural Studies) or its equivalent; minimum achievement of four credit results at Levels II and III

Honours includes a thesis, a core subject in Cultural Studies theories and methodologies and an elective as determined by the Award Committee

*assessment:* 15000 word thesis 50%; 6-7000 word core subject 25%; 6000-7000 word elective 25%

### English Language and Literature

The Department of English offers one full-year subject at Level I, and a wide variety of semester subjects at Levels II and III. The Level I subject 1278 English I is offered for both day and evening students. No quota is applied for entry at Level I. The English I Handbook, available from the English Office, gives detailed course, teaching and assessment information and should be obtained by all prospective students.

The subjects offered at Level II and III will only be offered as staffing and enrolments permit, either in 1999 or in subsequent years. Where the same subjects are offered at both second and third year level, students at the higher level will be required to undertake additional work.

For full information on English subjects offered at second and third year levels, teaching arrangements, methods of assessment and details of set texts and editions, students should obtain copies of subject handouts from the English office.

All subjects at all levels are usually taught by means of lectures and tutorials/seminars, and are not normally available to students with exemption from lectures.

**Note:** subjects unavailable in 1999 are listed for information. For syllabus details and future availability of these subjects, please contact the department.

### Level I

**1278 English I**

6 points full year  
2 lectures, 1 tutorial a week

*assumed knowledge:* ability to write clear, correct English

An introduction to some characteristic features of literature and language and also to the critical vocabularies used to describe them. Classes will be taught by relating some major English literary texts of the 16th century onwards to 20th century language and literature from both the Old World and the New. Two six week blocks of options are offered within the subject, enabling students to exercise some choice in selection of texts studied.

*assessment:* essays, exam

## Level II

### 8401 Australian Cultural Studies II

4 points semester 1

1 lecture, two-hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This subject analyses contemporary Australian culture using theories and methodologies from the area of cultural studies. Students are expected to read widely in cultural studies and to situate their analyses of Australian culture within wider debates in cultural studies. Areas of Australian culture examined are popular literary forms, everyday life, television and film.

*assessment:* essays, presentations

### 3121 Contemporary Australian Film II

4 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This subject examines recent Australian films through a cultural studies framework, introducing students to a range of theoretical approaches to film. The subject has a particular focus on the way that contemporary Australian films deal with questions of gender, class, race, sexuality and national identity.

*assessment:* 2000-2500 word seminar paper 45%; take home exam 45%; attendance and participation 10%

### 6557 Contemporary Australian Writing: New Directions 1973 to the Present II

4 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

An exploration of the new diversity in Australian writing since the 1970s, when the production of Australian literature increased dramatically.

*assessment:* seminar papers, take home exam

### 8675 Cultural Studies II (core topic)

4 points semester 2

See Cultural Studies for syllabus details

### 7109 English for Professional Purposes II

4 points semester 1

3 hours lectures/practical workshops a week

quota may apply

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This is a developmental subject for students wishing to achieve greater linguistic competence in written expression and/or to enhance fluency and style. It is not a subject in English as a second language or a remedial English subject. It is suitable for students wishing to increase their skills as academic writers in the tertiary context. Among other topics, grammar, syntax, the construction of an argument and editing will be included.

*assessment:* class exercises, essays, exam, participation

### 1635 Medieval English Literature II

4 points semester 1

two 1.5 hour seminars per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

A study of some major English texts, authors, and genres of the period 1350-1450. Texts studied will include a variety of tales from Chaucer's *Canterbury Tales*; Sir Gawain and the Green Knight, Malory's *Morte D'Arthur* and a selection of medieval mystery and morality plays.

*assessment:* essays, exams

### 7946 Modern Drama from Europe, America and Britain II

4 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* TEN 305 Modern Drama

This subject will examine a range of dramatic texts from Europe, America and Britain, beginning with the emergence of modern drama at the close of the nineteenth century and then focusing on a number of key texts in the twentieth century. Although the theatrical (performance) text will be considered, the major emphasis will be on the written (dramatic) text.

*assessment:* essays, exam

**5720 Modernist Literature II**

4 points semester 1

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

2 lectures, 1 tutorial a week

restriction: 5313 Modernist Literature (1987, 1988)

A detailed study of the works of T. S. Eliot and James Joyce.

*assessment:* essays**8777 Questions of Post-Modernism II**

4 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

The subject will examine available definitions of Postmodernism and the debates surrounding them. While the focus will be on questions of literary representation, the subject will consider their intersection with wider cultural practices, for example post-colonial and feminist issues. The subject examines prose fiction, drama and poetry. Students will be encouraged to read beyond the select list.

*assessment:* essays and classwork**4146 The Idea of Youth: Fiction, Film and Youth II**

4 points semester 1

1 lecture, two-hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This subject uses changing ideas about youth and youth culture as a focus for introducing a range of modern UK and Irish fiction and film, and as a means of introducing contemporary cultural criticism and theory. The aim of the subject is to introduce students to some of the current parameters for studying fiction, film and cultural theory, and to consider how those terms are engaged with one another in contemporary literary, film and cultural studies. Each week a new critical concept will be introduced through the frame of reading literary and filmic texts which participate in the ongoing recognition of what youth means, and its relation to the idea of 'culture'. Students successfully completing this subject will be familiar with some of the major tendencies in modern UK and Irish fiction and film, and will be able to utilise and contextualise some of the most influential terms and concepts from contemporary cultural theory.

*assessment:* attendance and participation 10%, 1500 word exercise based on seminar presentation 20%, essay (set topic) 2000 words 30%, essay (free choice) 2500 words 40%

**7371 Twentieth Century American Literature II**

4 points semester 2

1 lecture, 1 two hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

restriction: 6214 American Studies prior to 1988

Study of selected fiction, film and poetry produced in the USA since 1900. The emphasis will be on the shift from modernism to postmodernism.

*assessment:* tutorial assignments, essays**1362 Victorian Literature II**

4 points semester 1

1 lecture, two-hour seminar per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This subject will consider the work of some important Victorian novelists and poets, with particular reference to the nature and modes of their responses to a changing social scene and to an evolving climate of ideas. Issues to be considered include the impact of industrialism, the changing face of rural England, the situation of women in Victorian society, and varieties of faith and doubt.

*assessment:* essays**1549 Women's Writing: The Nineteenth Century II**

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This subject will consider the rise of the woman writer in the nineteenth century and the development of a female literary tradition. It will look at questions which arise out of the adoption of a woman-centred perspective for the writer and the critic. Texts both central to and outside the British female tradition will be considered, with reference to historical context and contemporary feminist literary theory. Special attention will be given to problems of language and subjectivity, the construction of sexuality and sexual differences, and ways in which gender affects writing and reading.

*assessment:* essays, tutorial participation

### Level III

#### 1834 Australian Cultural Studies III

6 points semester 1

1 lecture, two-hour seminar per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

An analyses of contemporary Australian culture using theories and methodologies from the area of cultural studies. Students are expected to read widely in cultural studies and to situate their analyses of Australian culture within wider debates in cultural studies. The areas of Australian culture examined are popular literary forms, everyday life, television, and films.

*assessment:* essays, presentations

#### 8439 Contemporary Australian Film III

6 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

This subject examines recent Australian films through a cultural studies framework, introducing students to a range of theoretical approaches to film. The subject has a particular focus on the way that contemporary Australian films deal with questions of gender, class, race, sexuality and national identity.

*assessment:* 2500 word seminar paper 30%; 2500 word assignment 30%; take home exam 30%; attendance, participation 10%

#### 1815 Contemporary Australian Writing: New Directions 1973 to the Present III

6 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

An exploration of the new diversity in Australian writing since the 1970s, when the production of Australian literature increased dramatically.

*assessment:* seminar papers, take home exam

#### 4720 English for Professional Purposes III

6 points semester 1

3 hours lectures/practical workshop per week

quota may apply

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

This is a developmental subject for students wishing to achieve greater linguistic competence in written

expression and/or to enhance fluency and style. It is not a subject in English as a second language or a remedial English subject. It is suitable for students wishing to increase their skills as academic writers in the tertiary context. Among other topics, grammar, syntax, the construction of an argument and editing will be included.

*assessment:* class exercises, essays, exam, participation

#### 3234 Medieval English Literature III

6 points semester 1

two 1.5 hour seminars per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

A study of some major English texts, authors, and genres of the period 1350–1450. Texts studied will include a variety of tales from Chaucer's *Canterbury Tales*; *Sir Gawain and the Green Knight*, Malory's *Morte D'Arthur* and a selection of medieval mystery and morality plays.

*assessment:* essays and exam

#### 7451 Modern Drama from Europe, America and Britain III

6 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

restriction: TEN 305 Modern Drama

This subject will examine a range of dramatic texts from Europe, America and Britain, beginning with the emergence of modern drama at the close of the nineteenth century and then focusing on a number of key texts in the twentieth century. Although the theatrical (performance) text will be considered, the major emphasis will be on the written (dramatic) text.

*assessment:* essays, exam

#### 3046 Modernist Literature III

6 points semester 1

2 lectures, 1 tutorial per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

restriction: 5313 Modernist Literature (1987, 1988)

Detailed study of the works of T. S. Eliot and James Joyce.

*assessment:* essays

**5496 Questions of Post-Modernism III**

6 points semester 2

1 lecture, two-hour seminar a week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

This subject will examine available definitions of Postmodernism and the debates surrounding them. While the focus will be on questions of literary representation, the course will consider their intersection with wider cultural practices, for example post-colonial and feminist issues. The course examines prose fiction, drama and poetry. Students will be encouraged to read beyond the select list.

*assessment:* essays, classwork**6771 The Idea of Youth: Fiction, Film and Youth III**

6 points semester 1

1 lecture, two-hour seminar per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

This subject uses changing ideas about youth and youth culture as a focus for introducing a range of modern UK and Irish fiction and film, and as a means of introducing contemporary cultural criticism and theory. The aim of the subject is to introduce students to some of the current parameters for studying fiction, film and cultural theory, and to consider how those terms are engaged with one another in contemporary literary, film and cultural studies. Each week a new critical concept will be introduced through the frame of reading literary and filmic texts which participate in the ongoing recognition of what youth means, and its relation to the idea of 'culture'. Students successfully completing this subject will be familiar with some of the major tendencies in modern UK and Irish fiction and film, and will be able to utilise and contextualise some of the most influential terms and concepts from contemporary cultural theory.

*assessment:* attendance and participation 10%, 2000 word exercise based on seminar presentation 20%, essay (set topic) 2500 words 30%, essay (free choice) 3500 words 40%

**4596 Twentieth Century American Literature III**

6 points semester 2

1 lecture, two-hour seminar per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences*restriction:* 6214 American Studies prior to 1988

Study of selected fiction, film and poetry produced in the USA since 1900. The emphasis will be on the shift from modernism to postmodernism.

*assessment:* tutorial assignments, essays - usually entails in-depth study of a single writer or film-maker chosen in consultation with tutor

Level III students are required to do additional reading and a more substantial tutorial report and final essay than at Level II

**2257 Victorian Literature III**

6 points semester 1

1 lecture, two-hour seminar per week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

This subject will consider the work of some important Victorian novelists and poets, with particular reference to the nature and modes of their responses to a changing social scene and to an evolving climate of ideas. Issues to be considered include the impact of industrialism, the changing face of rural England, the situation of women in Victorian society, and varieties of faith and doubt.

*assessment:* essays**5687 Women's Writing: The Nineteenth Century III**

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisite:* minimum 8 points from Level II Humanities or Social Sciences

This subject will consider the rise of the woman writer in the nineteenth century and the development of a female literary tradition. It will look at questions which arise out of the adoption of a woman-centred perspective for the writer and the critic. The subject is concerned with questions of gender and representation. Texts both central to and outside the British female tradition will be considered, with reference to historical context and contemporary feminist literary theory. Special attention will be given to problems of language and subjectivity, the construction of sexuality and sexual differences, and ways in which gender affects writing and reading.

*assessment:* essays, tutorial participation**Honours****9639 Honours English Language and Literature**

24 points full year

*note:* Students wishing to take Honours English are advised to consult the Head of Department before beginning third year courses to ensure that they meet the prerequisites, to have their subject choice approved and to finalise enrolment

*prerequisite:* major in English (8675 Cultural Studies II may be counted towards such a major); minimum Credit standard in at least four one-semester subjects (or equivalent) - least two at Level III; minimum requirement is 20 points. Prerequisites for a Joint Honours degree in English and some other subject may be varied from those listed above at the discretion of the respective departmental Heads.

The English Department Honours sub-committee will consider each application to study Honours English. Admission to Honours is always at the discretion of the Head of Department acting on the advice of the Honours sub-committee. In extraordinary cases a student who has not met the above prerequisites, but can satisfy the Departmental Honours sub-committee and the Head that she or he is qualified to undertake Honours English, may be accepted into Honours.

It is expected that by the end of their Honours year students will be familiar with major aspects of English Literature. The work for the Honours year consists of taking a common subject (Literary Theory), two other subjects, and the writing of a short Honours Thesis. A list of subjects for 1999 will be available from the Department late in 1998, and students should consult the Departmental Honours Handbook. Students should note that the availability of these subjects will depend on a sufficient number of people electing to take them.

The Honours year is considered a year of full-time study, and regular attendance at classes is required.

*assessment:* details in the Honours Handbook - at present envisaged as by thesis, mid-year exam and/or work presented throughout the year.

### English Language and Literature subjects not offered in 1999

**2424 Drama Since 1900 II**

**3112 Fiction and Drama in England from 1850 to 1910 II**

**8228 Legal Representations: From Book to Website II**

**7012 Major English Texts 1650-1800 II**

**7792 New Literature in English: Africa II**

### Environmental Studies

<http://chomsky.arts.adelaide.edu.au/Environmental/>

Note: subjects unavailable in 1999 are listed for information. For syllabus details and future availability of these subjects, please contact the department.

#### Level I/II

The Mawson Graduate Centre offers two core subjects in Environmental Studies which may be taken at either level I or II, but not both. The first subject introduces core environmental concepts necessary for understanding and addressing environmental concerns in a transdisciplinary fashion and the second subject places the study of environmental concerns into specific environmental contexts.

**4361 Environmental Studies I: Core Concepts**

3 points

semester 1

**6418 Environmental Studies II: Core Concepts**

4 points

semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum of 6 points in Social Sciences at level I

This subject introduces core concepts, derived from a variety of disciplinary sources, which are necessary for understanding and addressing environmental concerns in a transdisciplinary fashion. The subject is divided into four modules, each of which provides a conceptual framework which approaches, understands and structures environments differently. In any one year, four of the following five modules will be offered - Prehistory and Environment; Philosophy and

Environment; Gender and Environment; Policy and Environment, and Planning and Environment.

Prehistory and Environment examines the interactions between prehistoric human societies and their environments, from the time of the first stone tool-making hominids, until the emergence of urban civilisations and the advent of writing. Philosophy and Environment develops the rich vein of what is known in modern western societies as ecophilosophy. Gender and Environment explores the interface between gender studies and environmental studies, particularly in the context of the range of theoretical positions and political practice known as ecofeminism. Policy and Environment introduces both micro and macro environmental policy-making models, while Planning and Environment investigates forms of environmental monitoring and protection legislation such as environmental impact assessment.

*assessment:* tutorial participation 10%; tutorial presentations/exercises 30%; 4000 word essay 60%

### **3281 Environmental Studies I: Core Contexts**

3 points semester 2

### **2082 Environmental Studies II: Core Contexts**

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum of 6 points in Social Sciences at level I

This subject, which places the study of environmental concerns into specific environmental contexts, is divided into four modules, each of equal length. In any one year four of the following five modules will be offered - Quaternary Environments, Global Environments, Coastal Environments, Urban Environments: Ecological Perspectives, and Urban Environments: Social Perspectives.

'Quaternary Environments' introduces the global environmental fluctuations of the last two million years of geological time known as the Quaternary period. This module will explore the effects of accelerating human impact on Quaternary environments and consider how far the evidence of this impact may be useful in predicting future environmental change. 'Coastal Environments' studies human impacts on these vulnerable environments around the world, although the main focus attempts to protect and rehabilitate the Australian coast. The two Urban Environments modules focus on towns and cities. The first considers urban environments from an ecological perspective, with an emphasis on the environmental problems created by the impacts of urbanisation on native ecosystems. The second considers urban environments from a social perspective, with an emphasis on people, politics, and environmental justice. 'Global Environments' examines those environmental problems

which transcend national boundaries. The scientific, legal, political and economic means by which these transnational environmental problems are created, prevented or abated are reviewed.

*assessment:* tutorial participation 10%; tutorial presentations/exercises 30%; 4000 word essay 60%

### **Level II**

Students who wish to satisfy the requirements for the Bachelor of Environmental Studies must complete the two core subjects listed above. Where these have been done at Level I, students must then choose Environmental Social Sciences subjects at Level II. The approved options are: Aboriginal Land Tenure and Sacred Sites in Australia II, Japanese Society: Development and the Environment II, Aquatic and Biotic Environments, Geographical Analysis of Population, Landscape and Soil Resources, South Australian Aboriginal History, Heritage and History in Contemporary Australia, Kaurua Language and Language Ecology, and The Political Economy of the Global Village. Not all options are available every year.

### **Level III**

Note: the prerequisite for these subjects is normally completion of the core topic at Level I or II and/or 8 points of Environmental Social Sciences at Level II.

### **7731 Environmental Politics III**

6 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* see Level III introductory note

*restrictions:* 2005 Green Politics and Policy; 5140 Environmental Policy; 2005 Environmental Politics

This subject is divided into two parts. The first, political theory, investigates the ways environmental thought connects with major threads of traditional political theories. In addition, this section seeks to understand recent innovations which have contributed to what we now understand as modern environmental political thought. After establishing the philosophical and epistemological underpinnings, the subject then concentrates on policy making. There are numerous political processes through which participants pursue political goals. These range from the informal dynamics of networks, groups and social movements through to the more institutionalised responses of organisations, corporations, political parties and governments. These processes are reviewed using comparative analytical models and extra/inter/national examples taken from Australasia, the Asia-Pacific, North and South America, Europe and Africa.

*assessment:* tutorial participation 10%; tutorial presentations/exercises 30%; essays/reports totalling 6000 words 60%

### 8905 Environmental Reconstruction and Rehabilitation III

6 points semester 2

2 lectures, 3 hours of practical work per week; fieldwork

*prerequisites:* see Level III introductory note

*restrictions:* 8249 Environmental Restoration and Rehabilitation

This subject examines environmental reconstruction and rehabilitation strategies for conserving native species and ecosystems in human-dominated environments where the native vegetation cover has been fragmented and native ecosystems persist only as remnant patches and strips scattered within a matrix of introduced vegetation and human constructions on settled (rural-agricultural, industrial and urban) land. The subject considers strategies for the design of 'island and corridor' ecological reserve systems, but concentrates on strategies for the rehabilitation of remnant native ecosystems outside of ecological reserves and reconstruction strategies intended to promote biological and soil conservation on settled land by creating analogs of native ecosystems.

In addition to lectures, the subject includes practical sessions involving laboratory and field exercises. These exercises are used to illustrate concepts presented by the lectures and to demonstrate techniques of environmental reconstruction and rehabilitation.

*assessment:* tutorial participation 10%; presentation/exercise 30%; essays/reports totalling 6000 words 60%

### 4088 Environmental Systems Management III

6 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* see Level III introductory note

*restrictions:* 3216 Environmental Systems Management

This subject examines some of the ways in which human societies have sought to modify and manipulate their natural environment from the time of prehistoric hunter-gatherers and the inception of plant and animal domestication until the present day. The aim of the subject is to suggest how our global, physical and biological resources may be managed on a more sustainable basis by careful evaluation of both the beneficial and adverse effects of various forms of human interaction with local, regional and global natural systems.

*assessment:* tutorial participation 10%; tutorial presentations/exercises 30%; essays/reports totalling 6000 words 60%

### 5886 History and Philosophy of Environmentalism III

6 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* see Level III introductory note

*restrictions:* 5941 History and Philosophy of Environmentalism

This subject sets those scientific, political, social, ethical ideas and aspirations we call environmentalism into the mainstream of the development of Western thought and culture. It shows that the dominant Western attitudes to our environment have been formed primarily by despotic rather than stewardship religious views, reductionist rather than holistic scientific methods, anthropocentric rather than ecocentric philosophical attitudes and exploitative rather than conservative economic theories and practices. The way that these erstwhile dominant attitudes are changing is described.

The subject will examine the variety of philosophical and ethical arguments why humans should protect and conserve the environment of which they are a component. A particular feature of this subject will be practical investigations of ethical, political and economic dilemmas raised by a variety of particular, often personal issues such as genetic engineering, vegetarianism, ecotourism, nonviolent direct action and others.

*assessment:* tutorial participation 10%; tutorial presentations/exercises 30%; essays/reports totalling 6000 words 60%

## Honours

### 2521 Honours Environmental Studies

24 points full year

*prerequisites:* two Level III Environmental Studies subjects (to the value of 12 points) with Credit or above grades in both subjects; approval of the Director of the Mawson Graduate Centre

The subject consists of two parts - the first, worth 12 points, is a compulsory full-year workshop on environmental research methodology leading to submission of a dissertation. The second part consists of two elective topics, each worth 6 points and each studied during a single-semester of lecture/seminars and tutorials/practicals. Details of the Honours elective topics available each year are given in the Mawson Graduate Centre's Honours Handbook.

*assessment:* a dissertation of approximately 15000 words; essays and project work for each elective topic totalling approximately 7000 words per topic

**Environmental Studies subjects not offered in 1999****7195 Environmental Hazards III**

6 points

Level III

contact department for syllabus details

**European Studies**

Note: subjects unavailable in 1999 are listed for information. For syllabus details and future availability of these subjects, please contact the department.

Subjects are not available to students with exemptions from lectures and tutorials

**2806 Cinema in France from *Nouvelle Vague* to 1995 II**

4 points

semester 2

1 lecture, 1 tutorial, 2 hours practical per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The *Cahiers du Cinema* team of critics-turned-filmmakers (Godard, Truffaut, Chabrol, Rivette etc.) showed the individual's attempts to escape Gaullist society. Heirs to literary culture, the directors of the *Nouvelle Vague* saw themselves as authors and foreshadowed the 1968 upheaval as well as the need for female emancipation. The films of the 70s by Sautet and Tavernier are politically marked by the Women's Liberation Front and the militancy against a lasting right-wing regime. The Mitterrand years (1981-1995) fostered a fecund production (Varda, Carax, Rochant etc.) with an insight into the fate of the victims (unemployed, homeless and other have-nots) of what Chirac was to label '*la fracture sociale*', the alleged social break-up resulting from fourteen years of socialism. Another feature of the 80s is a retrospective assessment of France's historical role in war and colonisation (Malle, Chabrol, Denis). Students will be introduced to the basics of film language and required to attend weekly film screenings. Seminar presentations will deal with 2 to 3 additional films by the directors presented in class or other directors of the selected period.

*assessment:* 3500-word essay 50%; test 20%; seminar presentation 30%

**7756 Contemporary Europe A II**

4 points

semester 1

See Politics entry for syllabus details

**9381 Contemporary Europe B II**

4 points

semester 2

1 lecture, 1 tutorial, 2 hours practical per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The content of this subject supplements that of Contemporary Europe A, which focuses on the politics and society of Western Europe. The historical framework for Contemporary Europe B is provided by events in western but also in eastern Europe from the defeat of fascism in 1945 through to the present. Within this broader framework the course considers key historical, intellectual and cultural developments in postwar Europe. Thus attention will be devoted to the creation of two quite different postwar Europes, the theory and practice of "real socialism", the cultural and intellectual impact of the revolutionary events of 1968 in East and West, relations between the sexes and the generations, the decline and fall of the eastern bloc and, with it, the alleged "end of history", the intellectual and cultural influences of postmodernism, and the construction of European regional, national and supranational identities. Finally the course will devote attention to contemporary Europe's relations with Australia. Students will be encouraged to make use of the Barr Smith Library's European Documentation Centre and of materials in any European languages they may be studying

*assessment:* 1500-2000 word tutorial paper 25%; 3500-4500 word major essay 40%, end-of-semester test 25%, tutorial participation 10%

**3871 European Philosophy: The Death of God II**

4 points

semester 2

3 contact hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject introduces students to the modern European philosophical tradition from Baruch Spinoza to Martin Heidegger and explores the major metaphysical and existential problem that runs through tradition. That problem was formulated by Friedrich Nietzsche as the 'death of God': the stringent demands for scientific certitude lead to the conclusion that there is neither an objective purpose to human existence nor an objective set of moral guidelines. This is the condition of nihilism. We will examine why so many philosophers in the modern European tradition reached this conclusion and how they responded to it. We will look at the impact of modern science on seventeenth, eighteenth and nineteenth century European philosophy such as the application of scientific techniques to the study of the Bible (Spinoza and Reimarus), and the attack upon rationalist metaphysics by Immanuel Kant, the anthropological readings of Christianity in the neo-Hegelians and examine the attempts to find some meaning in the light of the crisis that European philosophers feel emerges with the

'death of God'. We will look at how Kant tries to ground morality, how Hegel attributes purposefulness to history, Nietzsche's ideas of the superman and the eternal return and Martin Heidegger's idea of Being.

*assessment:* 2 essays of 3000 words 80% and seminar participation 20%

### 2443 Great Ideas of Western Civilisation A II

4 points semester 1

3 contact hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The Great Ideas of Western Civilisation A focuses upon the great innovations and reference points in religion, politics, philosophy, the arts and science in the Western Tradition. We will be studying some of the most powerful, beautifully written, exciting and dangerous books that have ever been written. The ideas to be discussed in Great Ideas of Western Civilisation A (and the writers we will focus upon) are: philosophy versus poetry (Plato and Homer); 'God' (the Bible, Plato and Aristotle); Rome and early Christendom (Cicero, Virgil, St. Paul and St. Augustine); scholasticism and mysticism (St. Thomas Aquinas, Meister Eckhart and Hildegard of Bingen); Ancient and Renaissance Art and Architecture; learning, freedom and faith (Erasmus and Luther); the scientific revolution (Galileo, Bacon, Descartes and Newton); the evolution of liberalism and commercial society (Locke, Montesquieu, Rousseau); the tribunal of reason (Voltaire and Kant); romanticism and music (Wagner); communism and the superman (Marx and Nietzsche); evolution and the unconscious (Darwin and Freud).

*assessment:* 2 essays of 3000 words 80% and seminar participation 20%

### 1390 Great Ideas of Western Civilisation B II

4 points semester 2

3 contact hours per week or equivalent

*prerequisites:* minimum 6 points from Level II Humanities or Social Sciences

Great Ideas of Western Civilisation B explores the Great Literary Texts of Western Civilisation. These will be grouped according to genres, so that students may appreciate the intricacies of prose, theatre and poetic language. We shall work with one text per week. The texts and themes include Shakespeare's *Hamlet* (indecision and destruction), Sophocles' *Oedipus the King* (destiny and desire), Homer's *Iliad* (wrath and insight), Dante's *Commedia* (the meaning of hell, purgatory and paradise), Milton's *Paradise Lost* (pride, fall, redemption), Goethe's *Faust* (the redemption of perpetual striving), Baudelaire's *The Flowers of Evil* (creating beauty from evil), Rimbaud's *Illuminations*

(the unleashing of the senses), Rabelais' *Gargantua and Pantagruel* (fundaments, folly, feasting, fertility and fun), Cervantes' *Don Quixote* (love, honour and other day-dreams), Dostoyevsky's *The Brothers Karamazov* (universal disorder), Proust's *Remembrance of Things Past* (life as a work of art), Joyce's *Ulysses* ('Every-body's heroic journey) and Beckett's *Company* (death and decay). The survey of Great Texts will not only cover the aforementioned themes, but also consider their innovations in the form and texture of the language.

*assessment:* 2 essays of 3000 words 80% and seminar participation 20%

### 2948 Music and Politics: German Song and Society II

4 points semester 2

2 lectures, 1 seminar per week

*prerequisites:* Passes in Level I subjects in Music or Humanities and Social Sciences to a value of 6 points

*restriction:* any German Studies Level II/III where a student has chosen a modified and reduced version of Music and Politics as part of it

This subject offers a survey of the development of German song in its social and historical context. Beginning with a brief account of song practice in the Middle Ages, it then analyses in some detail the 19th and early 20th century lied, investigating the way the main exponents of the genre (Schubert, Schumann, Brahms, Wolf, Strauss, Berg) attempted to solve the problem of the tensions in the relationship between text and music, the social and political dimensions of choice of text, changes in performance practice and the place of the lied in German cultural life of the time.

This is followed by a discussion of the different paths taken by German song in the later 20th century - Weimar cabaret, the Brecht songs of Weill and Eisler and the political songs of East and West Germany up until re-unification.

*assessment:* seminar presentation 10%; 1000 word seminar paper 20%; 1000 word essay 20%; 3000 word major essay 50%

### 1057 Power, Love and Evil II

4 points semester 1

3 hour seminar per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences.

The dominant trend in social theory is to explore the dynamics of power and social relationships in terms of social structures and variables of identity such as class, race, gender and ethnicity. In this subject we will be taking a different path. We will approach social

relationships and power through reflecting on the passions and the two most intense modes of power, the existential and the cosmological. In recognition of the severe methodological constraints which the languages of social theory and philosophy place upon our understanding of the passions, we will draw upon images and experiences expressed in religion, literature, film and popular music as well as philosophy and social theory. We will be considering material as diverse as the Bible, Plato's Symposium, writings of the Marquis de Sade and the novelist Josephine Hart, the philosophers Spinoza, Nietzsche, Kierkegaard and Rosenstock-Huussy, the films *Seven*, *Dangerous Liaisons* and *Damage* and personal testimonies of Brian Kiernan, Rian Malan, Dietrich Bonhoeffer and Helmuth von Moltke.

*assessment:* seminar participation, including personal dossier and group presentation 35% - may include a creative project, such as an original song, poem, video or short piece of creative writing; 3000-word major essay 40%; 1500-word tutorial paper 25%

### 3543 The Holocaust II

4 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences.

*restrictions:* any German Studies Level II/III subject in which the student has chosen a modified and reduced version of 'the Holocaust' as part of it

Even more than fifty years after it took place, the Holocaust remains one of the most controversial events in the 20th century. This subject adopts a multi-disciplinary approach in attempting to come to terms with it. The focus will be primarily on the origins, the practices and the sequences of the persecution of Europe's Jews during the Second World War, but the fate of other groups, such as gypsies and homosexuals will also be taken into account. In doing this a number of historiographical controversies will be discussed, including historical revisionism, the differences between structuralist and internationalist approaches, the question of comparability and so on. In the second half of the semester issues of representation of the Holocaust will be addressed. Using a wide range of texts, students will consider what consequences the Holocaust has had and continues to have for Australia. The subject will be co-taught by staff from the History and German Studies departments.

*assessment:* 1500-word tutorial paper 20%; 3000-word major essay 40%; tutorial participation, attendance 10%; exam 30%

## Level III

### 7714 Cinema in France from Nouvelle Vague to 1995 III

6 points semester 1

1 lecture, 1 tutorial, 2 hours practical per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The *Cahiers du Cinema* team of critics-turned-film-makers (Godard, Truffaut, Chabrol, Rivette etc.) showed the individual's attempts to escape Gaullist society. Heirs to literary culture, the directors of the *Nouvelle Vague* saw themselves as authors and foreshadowed the 1968 upheaval as well as the need for female emancipation. The films of the 70s by Sautet and Tavernier are politically marked by the Women's Liberation Front and the militancy against a lasting right-wing regime. The Mitterrand years (1981-1995) fostered a fecund production (Varda, Carax, Rochant etc.) with an insight into the fate of the victims (unemployed, homeless and other have-nots) of what Chirac was to label '*la fracture sociale*', the alleged social break-up resulting from fourteen years of socialism. Another feature of the 80s is a retrospective assessment of France's historical role in war and colonisation (Malle, Chabrol, Denis). Students will be introduced to the basics of film language and required to attend weekly film screenings. Seminar presentations will deal with 2 to 3 additional films by the directors presented in class or other directors of the selected period.

*assessment:* 4500-word essay 50%; test 20%; seminar presentation 30%

### 7973 Contemporary Europe A III

6 points semester 1

See entry under Politics for syllabus details

### 1366 Contemporary Europe B III

6 points semester 2

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The content of this subject supplements that of Contemporary Europe A, which focuses on the politics and society of Western Europe. The historical framework for Contemporary Europe B is provided by events in western but also in eastern Europe from the defeat of fascism in 1945 through to the present. Within this broader framework the course considers key historical, intellectual and cultural developments in postwar Europe. Thus attention will be devoted to the creation of two quite different postwar Europes, the theory and practice of "real socialism", the cultural and intellectual impact of the revolutionary events of 1968

in East and West, relations between the sexes and the generations, the decline and fall of the eastern bloc and, with it, the alleged "end of history", the intellectual and cultural influences of postmodernism, and the construction of European regional, national and supranational identities. Finally the course will devote attention to contemporary Europe's relations with Australia. Students will be encouraged to make use of the Barr Smith Library's European Documentation Centre and of materials in any European languages they may be studying.

*assessment:* One tutorial paper (1500 or 2000 words) 25%, One major essay (3500 or 4500 words) 40%, One end of semester test 25%, Tutorial participation 10%

### 3391 European Philosophy: The Death of God III

6 points semester 2

3 contact hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject introduces students to the modern European philosophical tradition from Baruch Spinoza to Martin Heidegger and explores the major metaphysical and existential problem that runs through tradition. That problem was formulated by Friedrich Nietzsche as the 'death of God': the stringent demands for scientific certitude lead to the conclusion that there is neither an objective purpose to human existence nor an objective set of moral guidelines. This is the condition of nihilism. We will examine why so many philosophers in the modern European tradition reached this conclusion and how they responded to it. We will look at the impact of modern science on seventeenth, eighteenth and nineteenth century European philosophy such as the application of scientific techniques to the study of the Bible (Spinoza and Reimarus), and the attack upon rationalist metaphysics by Immanuel Kant, the anthropological readings of Christianity in the neo-Hegelians and examine the attempts to find some meaning in the light of the crisis that European philosophers feel emerges with the 'death of God'. We will look at how Kant tries to ground morality, how Hegel attributes purposefulness to history, Nietzsche's ideas of the superman and the eternal return and Martin Heidegger's idea of Being.

*assessment:* 2 essays of 4000 words 80% and seminar participation 20%

### 3014 Great Ideas of Western Civilisation A III

6 points semester 1

3 contact hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

he Great Ideas of Western Civilisation A focuses upon the great innovations and reference points in religion, politics, philosophy, the arts and science in the Western Tradition. We will be studying some of the most powerful, beautifully written, exciting and dangerous books that have ever been written. The ideas to be discussed in Great Ideas of Western Civilisation A (and the writers we will focus upon) are: philosophy versus poetry (Plato and Homer); 'God' (the Bible, Plato and Aristotle); Rome and early Christendom (Cicero, Virgil, St. Paul and St. Augustine); scholasticism and mysticism (St. Thomas Aquinas, Meister Eckhart and Hildegard of Bingen); Ancient and Renaissance Art and Architecture; learning, freedom and faith (Erasmus and Luther); the scientific revolution (Galileo, Bacon, Descartes and Newton); the evolution of liberalism and commercial society (Locke, Montesquieu, Rousseau); the tribunal of reason (Voltaire and Kant); romanticism and music (Wagner); communism and the superman (Marx and Nietzsche); evolution and the unconscious (Darwin and Freud).

*assessment:* 2 essays of 4000 words 80% and seminar participation 20%

### 8072 Great Ideas of Western Civilisation B III

6 points semester 2

3 contact hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

Great Ideas of Western Civilisation B explores the Great Literary Texts of Western Civilisation. These will be grouped according to genres, so that students may appreciate the intricacies of prose, theatre and poetic language. We shall work with one text per week. The texts and themes include Shakespeare's *Hamlet* (indecision and destruction), Sophocles' *Oedipus the King* (destiny and desire), Homer's *Iliad* (wrath and insight), Dante's *Commedia* (the meaning of hell, purgatory and paradise), Milton's *Paradise Lost* (pride, fall, redemption), Goethe's *Faust* (the redemption of perpetual striving), Baudelaire's *The Flowers of Evil* (creating beauty from evil), Rimbaud's *Illuminations* (the unleashing of the senses), Rabelais' *Gargantua and Pantagruel* (fundaments, folly, feasting, fertility and fun), Cervantes' *Don Quixote* (love, honour and other day-dreams), Dostoyevsky's *The Brothers Karamazov* (universal disorder), Proust's *Remembrance of Things Past* (life as a work of art), Joyce's *Ulysses* ('Every-body's heroic journey) and Beckett's *Company* (death and decay). The survey of Great Texts will not only cover the aforementioned themes, but also consider their innovations in the form and texture of the language.

*assessment:* 2 essays of 4000 words 80% and seminar participation 20%

**3579 Music and Politics: German Song and Society III**

6 points semester 2  
2 lectures, 1 seminar per week

*prerequisites:* Passes in Level II subjects in Music or Humanities and Social Sciences to a value of 8 points

*restriction:* any German Studies Level II/III subjects where a student has chosen a modified and reduced version of Music and Politics as part of it

This subject offers a survey of the development of German song in its social and historical context. Beginning with a brief account of song practice in the Middle Ages, it then analyses in some detail the 19th and early 20th century lied, investigating the way the main exponents of the genre (Schubert, Schumann, Brahms, Wolf, Strauss, Berg) attempted to solve the problem of the tensions in the relationship between text and music, the social and political dimensions of choice of text, changes in performance practice and the place of the lied in German cultural life of the time.

This is followed by a discussion of the different paths taken by German song in the later 20th century - Weimar cabaret, the Brecht songs of Weil and Eisler and the political songs of East and West Germany up until re-unification.

*assessment:* seminar presentation 10%; 1500 word seminar paper 20%; 1500 word essay 20%; 4500 word major essay 50%

**2495 Power, Love and Evil III**

6 points semester 1  
3 hour seminar per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

See 1057 Power, Love and Evil II for content

*assessment:* seminar participation, including personal dossier and group presentation 35% - may include a creative project, such as an original song, poem, video or short piece of creative writing; 4000-word major essay 40%; 2000-word tutorial paper 25%

**8292 The Holocaust III**

6 points semester 1

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* any German Studies Level II/III subject in which the student has chosen to take a modified and reduced version of 'the Holocaust' as part of it

See 3543 The Holocaust II for content details

*assessment:* 2000-word tutorial paper 20%; 4000-word major essay 40%; tutorial participation and attendance 10%; exam 30%

**Honours****1743 Honours in European Studies**

24 points full year

*prerequisites:* for BA (European Studies) (Honours): completion of BA (European Studies) with a minimum credit standard at Level III; for BA (Honours): major sequence in European Studies with credit standard at Level III plus at least one full year of a language

A thesis topic would normally be drawn from the central themes explored in European Studies at undergraduate level and would be supervised by a staff member teaching in an area of European Studies. Two papers will result from the seminars, one of which will be the core seminar in European Studies and the other seminar undertaken in one of the major participating departments Graduate Certificate in Historical Studies.

*assessment:* thesis (approximately 15,000 word) 50%; 2 x 5000 word seminar papers 25% each. The Award Committee will be responsible for the Honours grades

## French Studies

### Level I

#### 4242 French I: Language and Culture

6 points full year

2 lectures (cultural studies), 2 hours of tutorials (oral and written expression) and 2 hours of programmed independent study (including computer and audio-visual materials) per week

*prerequisites:* SACE Stage 2 French with a scaled score of 14/20 or higher or an equivalent qualification acceptable to the Department

This subject constitutes the advanced first year stream consolidating the language skills of French matriculants and developing reading and research skills in the area of cultural studies. Students will acquire knowledge of current issues in French society, as well as develop critical and analytic skills to apply to their reading.

*assessment:* continuous assessment, tests, essays, language exam

#### 2520 French IA (S1): Beginners' French

3 points semester 1

4 hours language classes, 1 hour language laboratory each week

*restriction:* 2224 French IA; not open to Matriculants in French

This subject introduces students to the language and civilisation of contemporary France. In addition to intensive language training in the four basic skills – listening, speaking, reading and writing – various aspects of French society and culture will be introduced through the study of documents ranging from newspaper articles to short texts. The emphasis throughout will be on communicative skills, both oral and written.

*assessment:* continuous assessment, tests, exams

#### 1962 French IA (S2): Beginners' French

3 points semester 1

4 hours of language classes; 1 reading class; 1 hour language laboratory each week

*prerequisites:* 2520 French IA (S1) Beginners' French (Pass Div I) or equivalent

*restriction:* 2224 French IA; not open to Matriculants in French

This subject continues the intensive language training undertaken in 2520 (above) with the addition of a weekly class devoted to the development of reading and analytical skills.

*assessment:* continuous assessment, tests, written exams

#### 8768 French IM: Intermediate French

6 points full year

4 hours language classes per week; 1 lecture per week on French texts for part semester 1 and all semester 2

*assumed knowledge:* SACE Stage 1 French or equivalent acceptable to the Department

*restriction:* 4242 French I, 2520 French IA (S1): Beginners' French; 1962 French IA (S2): Beginners' French

This subject is designed for students whose knowledge of French is intermediate between zero (or negligible) knowledge and advanced knowledge of French. Students for whom this subject is intended include the following: students who have studied French at school to year 10 or Year 11, but who have not matriculated in French; students with a score of less than 14/20 at matriculation French; students who have passed Matriculation French in the accelerated course; students who matriculated in French 10 years ago or more.

This subject provides intensive language training in the four basic skills- reading, listening, writing, speaking. Students will also be introduced to various aspects of French society and culture.

*assessment:* continuous assessment; tests; essays; language exam

### Level II

#### 5691 French II: Language and Culture

8 points full year

2 lectures (cultural studies 1, language 1); 2 tutorials (cultural studies 1, language 1); 1 hour the language laboratory per week

*prerequisites:* 4242 French I (Pass Div I) or 8768 French IM: Intermediate French (Credit)

*restriction:* 4242 French I (Pass Div II), 8768 French IM: Intermediate French (Pass)

Language training in the speaking and writing of French including grammar exercises, comprehension, composition and translation, based on contemporary French material. A reading course based on a wide range of texts.

Semester 1 - *Enfances brisées*. The theme of childhood will be examined through the close study of three Francophone novels: *Métisse blanche*, which deals with the plight of a half-caste child in colonial Vietnam; *L'Enfant*, the account of poverty stricken childhood in nineteenth century France; *La Vie devant soi*, a humorous description of a displaced child in the multicultural context of twentieth century Paris. Semester 2 - Sex and Destiny: Society and the Individual in Early French Fiction. Three works of French fiction dating from the eighteenth century will be studied: *Crébillon fils: Les Egarements du cœur*

*et de l'esprit*, Prévost's *Manon Lescaut* and Laclos's *Les Liaisons Dangereuses*. The focus will be on the problematics of the relationship between the private self and the public self. The three texts feature strong women characters, and this will provide the opportunity to discuss questions of sex and gender roles, and how they contribute to shaping our destiny.

*assessment*: continuous - exam ( three hour language paper); reading course; tutorial papers; essays

### 9045 French IIA(S1): Language and Culture

4 points semester 1

2 lectures (language, cultural studies); 3 tutorials (language)

*prerequisites*: 1962 French IA(S2)(Pass Div I); 2224 French IA: Beginners French (Pass Div I); 8768 French IM: Intermediate French (Pass); 4242 French I (Pass Div II)

*restriction*: 4242 French I; 1962 French IA(S2)(Pass Div II); 2224 French IA:Beginners' French (Pass Div II); 8768 French IM: Intermediate French (Credit); 3440 French IIA

Consolidation of written language skills with exercises - composition, comprehension, translation, grammar - leading to essay writing. Reinforcement of oral/aural skills through intensive audio-visual based tutorials. A core subject on French culture in common with French I.

*assessment*: continuous assessment- written assignments; oral, written class tests; essays

### 9096 French IIA (S2): Language and Culture

4 points semester 2

2 lectures (language, cultural studies); 3 tutorials (language); 1 hour language laboratory per week.

*prerequisites*: 2520 French IIA (S1) or equivalent

*restriction*: 4242 French I; 1962 French IA (S2); 2224 French IA: Beginners' French; 8768 French IM: Intermediate French; 3440 French IIA

This subject offers a continuation of the work completed in 9045 French IIA (S1) and is organised on exactly the same basis.

*assessment*: continuous - written assignments; oral, written class tests; essays; language exam

### 3475 French Studies II (S1)

4 points semester 1

1 lecture, 2 tutorials

*prerequisites*: 4242 French I (Pass Division I); or 8768 French IM: Intermediate French (Credit) or 3440 French IIA: Language and Culture

*restriction*: not normally taken in same Calendar year as 9045/9096 French IIA (S1)/(S2); 1057/2495 Power, Love and Evil II/III

The program for study is based on that offered in 1057 Power, Love and Evil II. Students enrolled in French Studies IIS1 will attend lectures in 1057 but will do their reading and assignments in French, and attend tutorials conducted in French.

*assessment*: tutorial papers, essays

### 5245 French Studies II (S2)

4 points semester 2

1 lecture, 2 tutorials

*prerequisites*: 4242 French I (Pass Division I); or 8768 French IM: Intermediate French (Credit) or 3440 French IIA: Language and Culture

*restriction*: not normally taken in same Calendar year as 9045/9096 French IIA (S1)/(S2); 2806/7714 Cinema in France: From *Nouvelle Vague* to 1995 II/III.

The program for study is based on that offered in 2806 Cinema in France: From *Nouvelle Vague* to 1995 II. Students enrolled in French Studies IIS2 will attend lectures in 2806 but will do their reading and assignments in French, and attend tutorials conducted in French.

*assessment*: tutorial papers, essays

### 5936 Special Subject in French Language and Culture II

8 points full year

5 hours per week

*prerequisites*: minimum 6 points in Level I Humanities and Social Sciences

*restriction*: not available to students who have done French at level I

This subject offers the opportunity for students in second year to be introduced to French language and culture at a more intensive level than at first year. It is particularly appropriate for prospective post-graduates needing reading skills in French and/or students wishing to do an Honours degree in the Centre for European Studies who are not majoring in a European language but who need to develop a reading ability of the French language for research purposes. The research essay component of the subject enable students to choose a topic in line with their own research interest. Students will be required to read selected French texts, although they will write their essay in English.

*assessment*: as for French IA S1 & S2 or French IM or French 60%: I; 2 x 1500 word essays in English on French culture to be negotiated with the subject coordinator 40%

**Level III****4304 French III: Language and Culture**12 points full year

2 lectures (cultural studies, language), 2 tutorials (cultural studies, language), laboratory session each week

*prerequisites:* 5691 French II

*restriction:* 4652 French IIIA: Language and Culture; 3475 French Studies IISI and 5245 French Studies IIS2 alone do not normally qualify for entry to 4304 French III: Language and Culture (special circumstances may be considered)

This subject comprises two strands - language and cultural studies - which have in common an emphasis on the acquisition of research skills. The language strand gives tuition in advanced grammar and syntax, through regular assignments and class exercises. There is also a specialised translation component (on Franco-Australian connections) which provides opportunities for individual research on language issues. The cultural studies strand in semester 1 looks at the short story in the nineteenth century (prescribed texts by Nerval, Balzac, Flaubert, Mérimée, Maupassant), and work on a choice of online and print texts can be undertaken as an individual research project. The semester 2 program - 'cultural identity and political power' - looks at colonisation and decolonisation, with texts by Maupassant and Tournier from France, Sembène from Senegal, Poulin from Quebec and Kanak writers from New Caledonia.

*assessment:* continuous - exam ( 3 hour language paper, oral interview); reading course; tutorial papers, tests, essays

**4652 French IIIA: Language and Culture**12 points full year

2 lectures (language and cultural studies); 2 tutorials (language and cultural studies); 1 hour laboratory per week

*prerequisites:* 9096 French IIA(S2): Language and Culture; 3440 French IIA

Advanced language work (translation, written expression, stylistics, grammar exercises); comprehension exercises and dictations, using the language laboratory; oral expression tutorials and a core component on French culture in common with French II.

*assessment:* language - continuous assessment (assignments and tests), end of year exam comprising 3 hour language paper, oral interview; reading course - tutorial papers, tests, essays

**2648 French Studies III (S1)**6 points semester 1

1 lecture, 2 tutorials a week

*prerequisites:* 5691 French II or 3475 French Studies IISI or 5245 French Studies IIS2 or 3440 French IIA: Language and Culture (Credit)

*restrictions:* 1057/2495 Power, Love and Evil II/III

Either: Medieval Studies (see below) *or* Power, Love and Evil (see 2495 Power, Love and Evil III for syllabus details).

In cultural terms, the mediaeval period was immensely rich: the so-called 'dark ages' actually saw the production of some of France's most valuable and magnificent cultural treasures. Far from being unenlightened and chaotic, mediaeval society was remarkably coherent, thanks largely to the harmony that existed, in philosophical terms, between spiritual and secular values. This subject seeks to come to an understanding of mediaeval society and its values through the study of the language and literature of the period (an Arthurian romance, a farce play, the poetry of Villon); but will also look at art and architecture, as cultural expressions of the values and ideals of the times. The texts will be studied in the original language so time will be spent examining some of the features of Old French and working through the books as a group.

*assessment:* tutorials, oral/written assignments in French; essays

**6175 French Studies III (S2)**6 points semester 2

1 lecture, 2 tutorials per week

*prerequisites:* 5691 French II or 3475 French Studies IISI or 5245 French Studies IIS2 or 3440 French IIA: Language and Culture (Credit)

*restrictions:* 2806/7714 Cinema in France: From *Nouvelle Vague* to 1995 II/III.

Content of 7714 Cinema in France: From *Nouvelle Vague* to 1995 III but with readings, tutorials and oral/written assignments presented in French.

*assessment:* tutorial papers, essays

**9863 Special Subject in French Language and Culture III**12 points full year

5 hours per week

This subject offers the opportunity for students in third year to be introduced to French language and culture at a more intensive level than at first year. It is particularly appropriate for prospective post-graduates needing reading skills in French and/or students

wishing to do an Honours degree in the Centre for European Studies who are not majoring in a European language but who need to develop a reading ability of the French language for research purposes. The research essay component of the subject enable students to choose a topic in line with their own research interest. Students will be required to read selected French texts, although they will write their essay in English.

*assessment:* as for French Language at Levels I or II 60%; 2 x 3000 word essays in English on French culture, negotiated with the subject coordinator 40%

## Honours

### 4360 Honours French Language and Culture

24 points full year

*note:* Students intending to take Honours should consult the Head of Department before the beginning of their studies at Level II. It is also possible to take a combined Honours degree, consisting of French and another subject. For this also, students should consult the Head of Department before the beginning of their Level II studies.

*prerequisites:* (i) 5691 French II or 3440 French IIA: Language and Culture, followed by 4304 French III; (ii) 1 of the following: 3475 French Studies IISI, 5245 French Studies IIS2, 2648 French Studies IIIS1, 6175 French Studies IIIS2 before entry to the Honours year; (iii) to devote their honours year entirely to advanced courses and exercises (including a 12,000 word thesis or equivalent additional coursework) in language and cultural studies. However, the Department may vary the prerequisites in (ii) above where the applicant for Honours has demonstrated a high level of ability.

The Honours year content will consist of the following: Language - two hours per week are devoted to advanced writing skills and oral/aural proficiency.

Cultural studies - (3 hours per week). For 1999, semester 1 and 2 subjects are core subjects prescribed for French Studies III S1 and IIIS2, assessed at a higher level. Alternative courses of study may be offered on the Flinders campus. For the full range of courses, consult the departmental handbook.

Seminar thesis: one hour per fortnight will be devoted to research techniques and the art of thesis and seminar presentation. In addition, students will be required to attend some departmental research seminars.

*assessment:* continuous assessment of language and cultural studies; 12000 word thesis in French.

## Geography

The disciplines of Geography and Environmental Studies amalgamated in July 1998 to form a new Department of Geographical and Environmental Studies. Students may combine subjects from both disciplines in accordance with the respective degree and/or course regulations.

The Geography course structure concentrates on two broad and overlapping themes: the understanding of spatial patterns in society, and the interaction of human society with the natural environment. Each or both of these may be followed through a first, second and third level progression of subjects. A range of subjects, some taught in collaboration with the Department of Geology and Geophysics, and the Faculty of Agricultural and Natural Resource Sciences is available in some aspects of systematic physical geography.

As well as contributing to the students' general academic training, the Geography program also teaches a variety of practical skills appropriate to applied geographical analysis and useful in the workforce or further research (eg. field techniques, social survey methods, computer mapping, remote sensing). Hence many Geography subjects involve practicals and field work.

More detailed information about the Department and its courses, including guidance on the selection of suitable cognates and sequences, is given in the Departmental Handbook, available from the Geographical and Environmental Studies Office.

*Note:* subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects, please contact the department.

## Level I

### 5988 Geography IA: Population, Society and Environment

3 points semester 1

2 lectures, average 2 hours tutorials/ practical work per week

*restrictions:* 8215 People and Social Environments; 6396 People and Environments; 9587 (or AJOI) Geography I; 7613 Geography IA: Society and Space

An introduction to the geographical study of a range of demographic, social, environmental and economic issues. Australia is the initial focus for examining processes of population change, including fertility, mortality and migration and the controversial questions of carrying capacity and social and ecological sustainability. Elements of Australia's social environment are then addressed, particularly equity and access to services, the spatial distribution of social phenomena and patterns of inequality. The next major section focuses on Asia and the Pacific, drawing on selected case studies from Indonesia and elsewhere, to compare and contrast the population dynamics and social and environmental patterns observed in Australia with those of our nearest neighbours. Examples will be drawn from both rural and urban areas and include poverty and food security, health, employment and the meaning of 'sustainable

development', with an emphasis on the economic and environmental crisis in our region

*assessment:* coursework 50%; exam 50%

### **5207 Geography IB: Natural Environments**

3 points semester 2

2 lectures; average 2 hours tutorials/ practical work per week

*restrictions:* 8301 Environmental Studies IB; 6396 People and Environments; 9587 (or AJOI) Geography I; 4823 Geography IB: Society and the Physical Environment; 9198 (or AJIH) Physical Geography IH

In this subject students are provided with a foundation in natural processes with which to critically evaluate the magnitude and rate of human impact on Earth. Global environmental change is examined with an emphasis on Australasia. The implications of continental movement over time for landscape, climate and ecological evolution are examined. The influence of feedback mechanisms and the relationships between the natural elements are considered. Major components include landscapes, soil properties, processes and types, climates, freshwaters, coasts and biodiversity. Modern techniques for observing and modelling natural landscapes will be examined in detail. An ongoing theme is the impact of industrialised society on natural environments at a range of scales.

*assessment:* coursework 50%; exam 50%

### **Level II**

For guidance on choosing subject combinations, students are referred to the Geographical and Environmental Studies Department Handbook.

### **5603 Aquatic and Biotic Environments II**

4 points semester 1

2 lectures, three hour practical per week; 5 days fieldwork

*prerequisites:* 6396 People and Environments I, or Level I Geography subjects to the value of at least 6 points including 3482 Introduction to Physical Geography I or 4823 Geography IB

*restriction:* 3502 Applied Physical Geography

This subject provides an introduction to the role of climate, water, plants, and animals in explaining the environment around us. Accordingly, the themes addressed in this subject include the operation of the water cycle, land run-off interactions, water quality, groundwater processes, ecosystems, environmental gradients and feedbacks and the structure and dynamics of selected Australian biogeographic regions. An overlying theme will be the conservation of biodiversity and wetlands. The material presented in lectures will be supported by weekly practical

exercises and field trips. The subject is intended to complement 5262 Landscape and Soil Resources.

*assessment:* practical and fieldtrip reports, poster, written exam

### **8673 Economic Geography II**

4 points semester 1

2 lectures; 2 hour tutorial/practical session a week

*prerequisites:* Level I Geography or Environmental Studies subjects to the value of at least 6 points, or any other subject/s approved by the Head of Department.

This subject is concerned with the forces and processes which influence the spatial organisation of economic activity. It seeks to understand, for example, why Australian farmers experience such variable fortunes; why do manufacturing industries favour some locations over others; why has manufacturing declined in Australia; why have service industries prospered; what determines the location of shopping centres or banks; why has road transport captured so much business from railways. In addition, in order to understand the origins of many of our environmental problems and derive solutions, it is necessary to appreciate how the economic system functions. Human behaviour is the problem, not the biophysical environment. Though the space-economy is clearly an interaction system, the subject proceeds from a consideration of the agricultural sector, to that of service activity, then to manufacturing and finally to transport.

Lecture topics include: how farmers make decisions about what to grow and how to grow it; how government policy affects farmers, the problems of risk and uncertainty; the concept of economic rent and land use patterns; urbanisation of the countryside; where the jobs are - growth in importance of the service sector, consumer and producer services; the importance of the manufacturing sector and explanations for its regional growth or decline.

*assessment:* practical exercises, tutorial work, essay, written exam

### **5581 Geographical Analysis of Population II**

4 points semester 2

2 lectures, 1 two hour practical/ tutorial session per week; 3 days compulsory field work

*prerequisites:* Level I Geography or Environmental Studies subjects to the value of at least 6 points; or any other subject/s approved by the Head of Department

The human population, its distribution and change constitutes one of the most basic of all geographical variables. This subject covers both static and dynamic aspects of population geography, from spatial and

ecological perspectives, and considers the implications of population change for public policy and the environment. Static aspects include population distribution, density, and population/resource balance. The dynamic aspects include fertility and mortality over space and time, and the links between social, economic, environmental and demographic change. Particular emphasis is placed on migration as a spatial process, covering both migration theory and models, and empirical studies of migration impact, with particular reference to Australia.

The practical work is an important part of the course and covers introduction to computer handling of census and survey population data using package programs, field data collection using social survey techniques, hypothesis testing and report writing; and an introduction to population projection methods.

*assessment:* field camp report; practical, tutorial exercises; written exam

### 5262 Landscape and Soil Resources II

4 points semester 2

2 lectures; 3 hours practical work per week; 3 day field trip

*prerequisites:* 3482 Introduction to Physical Geography I or 5683 Earth Science I

*restrictions:* 5681 Soil Resources II (5681 Earth Science II prior to 1998); 5262 Geography of Soil Resources

This subject provides an introduction to landscape evolution and soil development focusing largely on the Australian scene. Land formation is a major theme, as is the weathering and erosion of these forms and the deposition of sediments. A variety of Australian landscape forms are examined in detail, emphasising their influence on the nature of associated soils. Land degradation and modern approaches to land use and landscape rehabilitation are major themes, including social barriers to adoption of conservation practices, and efforts to overcome them. This subject is taught jointly by the Departments of Geographical and Environmental Studies and Soil Science. The subject is intended to complement 5603 Aquatic and Biotic Environments II.

*assessment:* practical and field reports; major essay and written examination.

### 9030 Social Geography II

4 points semester 2

*prerequisites:* Level I Geography subjects to the value of at least 6 points or any other subject(s) approved by the Head of Department

*restriction:* 3265 Social Geography

This subject is concerned with the spatial patterns and processes that derive from the social organisation of human society. It examines the way human groups occupy territorial space, create and change settlement patterns, and evolve patterns of social interaction. It deals with the local impact of national and international forces on settlement and interaction systems. It considers the major settings of countryside and city, and the interaction between urban and rural, primarily in the context of Western societies.

*assessment:* practical, tutorial assignments; major essay; written exam

## Level III

### 6159 Cities and Housing III

6 points semester 2

2 lectures, 1 hour tutorial/practical work a week; possibly up to 5 days field work

*prerequisites:* Level II Geography or Environmental Studies subjects to the value of at least 8 points

*restriction:* 8388 Equity in Cities: A Comparative Perspective

*assumed knowledge:* 8673 Economic Geography II; or 9030 Social Geography II; or 5581 Geographical Analysis of Population II

A study of the role of economic restructuring in transforming urban space in a range of western cities (Australian, North American, British, and European). Key features of labour and housing markets, and provision of services in cities are examined, and relevant aspects of urban and housing policy are discussed. Themes include the characterisation of structural change and how that is reshaping urban regions viz. deindustrialisation, 'flexible' production systems, the global integration of capital, the new international division of labour. The effects of these processes within the built environment are variously reflected in the decline of inner area manufacturing, the rise of 'post-Fordist' processing zones and 'first order' centres of international finance, downtown revitalisation, gentrification and displacement, the formation of new consumption landscapes.

The geography of housing is examined, including the residential property market and differences between the public and private sectors, rental tenure and owner-occupation. Government policy with respect to housing, infrastructure, and service provision within cities forms a related theme. There will be case studies of inter city policy, the Urban Aid Program, and the treatment of 'housing stress' in the UK; HUD assisted programs in the US; national urban policy in the Netherlands; urban consolidation and Better Cities in Australia.

*assessment:* essay or project, tutorial participation, exam

**1514 Environment and Development in South East Asia III**

6 points semester 2

2 lectures, 1 hour tutorial a week; practical work; non-compulsory field work in Indonesia, dependant on resources

*prerequisites:* Level II Geography or Environmental Studies subjects to the value of at least 8 points

The subject examines aspects of the physical and human environments of insular and mainland Southeast Asia, noting both historical patterns of change and current ecological and social issues. While the emphasis is on the present, the modern situation will be placed in context through an exploration of its historical roots. Major topics will include: theoretical approaches to Southeast Asian environments-tools and techniques; two centuries of change in the forests; indigenous access to and management of forest resources; land degradation and globalisation of upland and lowland agriculture; population growth, migration and colonisation; urban and industrial environments and the economic crisis; the nature and measurement of development; development interventions and aid delivery; Australia and Southeast Asia.

*assessment:* tutorial papers, essay or field report, exam

**6177 Environmental Change III**

6 points semester 1

2 lectures, 3 hours seminar/ practical work a week; 5-7 days fieldwork

*prerequisites:* Level II Geography subjects to the value of at least 8 points including 5603 Physical/Aquatic and Biotic Environments II, or 5262 Geography of Soil Resources/Landscape and Soil Resources

The theme of this subject is the non-static nature of the environment. Factors which have contributed to the shaping of the present environment are explored, including geological, climatic and anthropogenic changes. Climatic and vegetation fluctuations during the Quaternary and Holocene will be examined, including the role of interactions and feedbacks between elements of the Ecosphere in forcing change. The interaction of humans with the environment will be addressed at a global scale. Environmental changes which have taken place in Australia over the last two centuries will be explored via a number of case studies. Techniques used to determine environmental change over these time scales will be examined and employed practically.

*assessment:* seminar; essay; practical and field report; written examination

**9923 Geographical Information Systems III**

6 points semester 1

2 lectures, 3 hours practical work a week

*prerequisites:* Level II Geography subjects to the value of at least 8 points

Geographical information systems are essentially computer data banks containing spatially referenced information about human and natural aspects of the earth's surface, together with the facility to manipulate and analyse these data.

The subject aims to introduce students to the concepts and theory implicit in geographical information systems, and to the practical use of such systems with the aid of computers. It deals with the problems involved in the construction and use of large geographic databases, including measurement, and the retrieval and analysis of spatial data. It deals also with the representation of graphic and cartographic data as the main means of communicating spatial relationships, including the study of the logic involved in such communication. The practical work teaches basic skills in handling the contents of geographical information systems with the use of computers. This includes means of establishing a spatial database, retrieving and analysing such data and producing literary, graphic and cartographic output.

*assessment:* coursework and written exam

**1150 Regional Development III**

6 points semester 1

2 lectures, 2 hours tutorial/practical work per week; field work to be determined

*prerequisites:* Level II Geography subjects to the value of at least 8 points or any other subject/s, including commerce, economics, environmental studies, law, other social sciences, approved by Head of Department

*restriction:* 4030 Economic Geography III; 2951 Regional Economic Analysis and Development

This subject is concerned with the nature and processes of regional development, and thus with the problems of restructuring, uneven development and spatial inequality. Variation in economic welfare will be of central concern. However, not all aspects of the 'good life' are dependent upon economic 'progress' and perhaps some are inversely related. Topics to be covered include: the nature of regions; the relationship between economic growth and development; sustainable development; the nature of regional problems and problem regions; explanation for regional development and uneven development; stage models; the role of technology in regional development; orthodox regional equilibrium theory; dualism; linkages economic base, input-output, cumulative causation, centre-periphery, growth poles;

critiques of orthodox equilibrium theory; dependency; the rise of flexible production systems and the emergence of new industrial regions.

*assessment:* coursework, written exam

### Honours

#### 3178 Honours Geography

24 points full year

*prerequisites:* normally Level III Geography subjects to the value of at least 12 points, with a credit or above in at least two Level III subjects, will be expected. Admission to the program is not automatic, and is subject to approval by the Head.

The subject consists of three parts. First there is a core topic in the philosophy and practice of Geography which is compulsory. Second, students are expected to select two elective topics. Details of the Honours electives available in 1999 will be found in the Departmental Handbook. Third, all students must undertake a thesis on an approved topic.

*assessment:* thesis 60%; coursework 40%

#### Geography subjects not offered in 1999

##### 4166 Spatial Information Analysis II

4 points Level II  
contact department for syllabus details

##### 7198 Remote Sensing III(A)

1453 Rural Social Geography III  
6 points Level III  
contact department for syllabus details

### German Studies

Detailed information on course aims and the options available may be found in the Departmental Handbook. Students are requested to collect their copy of the year's Departmental Handbook from the European Studies office.

Students may be required to attend tutorials at times additional to those published in the calendar.

Students may wish to supplement their academic coursework by joining the German Students' Club, the Adelaide German Club, the Goethe Society, and by additional independent work in the Language Laboratory.

note: evening classes (in addition to day classes) are offered in German Studies I, II and III in 3-yearly cycles as staff and student numbers allow. In 1999 German Studies II and III will be offered in the day and the evening.

All subjects are offered only as staff and student numbers allow.

### Level I

#### 8431 German Studies I

6 points full year  
3 lectures, 1 tutorial a week

*assumed knowledge:* at least Year 11 German in SA schools or its equivalent

*restriction:* 5723 German IA: Beginners' German

The aim of German Studies I is to introduce students to the life and language of German-speaking countries, to make them more skilled at speaking and writing the language and more informed about contemporary German culture. In the first semester all students will take the course: Germany, Austria and Switzerland from 1945 to 1999. Three out of four hours are devoted to practical language instruction in formal language classes and small tutorial groups. In second semester all students will do the course Introduction to German Cultural Studies: Media, Literature, Film. Students with outstanding qualifications in language may, with the permission of the Department, take the language components of the course at a more advanced level. Further information on subject content can be obtained from the discipline of German Studies in the Centre for European Studies.

*assessment:* language - weekly exercises, end of semester tests, tutorial participation; other - essays, end of semester tests or working papers; reasonable balance of achievement in all areas required to pass subject

#### 5723 German Studies IA: Beginner's German

6 points full year  
5 hours lectures a week

*restriction:* 8431 German Studies I; 1316 German for Reading and Research I; except with departmental permission: South Australian Matriculation in German or its equivalent

With no previous knowledge of German assumed, special emphasis will be placed on speaking and comprehension, then on reading, writing and grammar. It is expected that each student will spend at least four hours of private study, reviewing work done in class and preparing lessons. Aspects of German culture will be a component of language instruction throughout the year. Successful completion of this course with a Division 1 pass admits students to 1214 German IIA, from which they may proceed to all third year courses in German.

*assessment:* written exercises, end of semester tests, tutorial participation

**5396 German Studies I (Flinders) Part 1**

4.5 units at Flinders semester 1

3 lectures, 1 tutorial per week

*assumed knowledge:* at least Year 11 German or equivalent

*restrictions:* 8431 German Studies I; 6806 German Studies I (Flinders)

This subject is offered to students enrolled in courses at Flinders University of South Australia; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the discipline of German Studies in the Centre for European Studies.

**9815 German Studies I (Flinders) Part 2**

4.5 units at Flinders semester 2

3 lectures, 1 tutorial per week

*prerequisites:* a grade of PI or better in 5396 German Studies I (Flinders) Part I or its equivalent

*restrictions:* 8431 German Studies I; 6806 German Studies I (Flinders)

This subject is offered to students enrolled in courses at Flinders University of South Australia; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the discipline of German Studies in the Centre for European Studies.

**1051 Beginners' German Studies IA (Flinders) Part I**

4.5 units at Flinders semester 1

5 hours lectures per week

*restriction:* 5723 German Studies IA; 4698 Beginners German Studies IA

This subject is offered to students enrolled in courses at Flinders University of South Australia; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the discipline of German Studies in the Centre for European Studies.

**8952 Beginners' German Studies IA (Flinders) Part 2**

4.5 units at Flinders semester 2

5 hours lectures per week

*restriction:* 5723 German Studies IA; 4698 Beginners German Studies IA

This subject is offered to students enrolled in courses at Flinders University of South Australia; it is taught on the Flinders University campus. For information on enrolment procedures, students should contact the Faculty of Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the Department of German Studies.

**Level II**

**8093 German in Germany II**

4 points summer semester

To be held in January 1999

*prerequisites:* 8431 German Studies I (Pass Div I); 5723 German Studies IA; Beginner's German Studies (Pass Div I), or equivalent

The subject is divided into two components running concurrently: a) an intensive language course undertaken at the Prolog Language School in Berlin over a period of four weeks. Students will undertake 4 hours of instruction per day in a totally German-speaking language environment in groups of not more than ten students; b) a cultural/historical program organised in cooperation with the Faculty of Communication and History at the Technical University of Berlin. This program will entail a preliminary lecture before travelling to Berlin as well as a series of lectures and activities in Berlin devoted to the theme 'Berlin in Modern Germany'. There will also be visits to the German Historical Museum, the Museum of the Second World War at Karlshorst, the Museum at Checkpoint Charlie, The Sachsenhausen Memorial, Sans Soucci Palace in Potsdam, the Museum of Industrial Art and Design, the Bauhaus Museum and the New Synagogue. In addition there will be guided tours to historically significant sites. For details, contact the German discipline in the Centre for European Studies.

*assessment:* Language test carried out at Prolog - end of 4th week - 50%; 2000 word essay on history or culture of modern Berlin (due after return to Adelaide and before commencement of semester 1) 50%

**8706 German Studies II: Language, Literature and Culture**

8 points full year

3 lectures, 1 tutorial a week

*prerequisites:* 8431 German Studies I (Pass Div I); 5723 German Studies IA: Beginner's German Studies (Pass Div I)

*restriction:* 1214 German Studies IIA; no part of this subject may be counted toward any other subject in the Department of German Studies.

Like all subjects in German at second and third year level, this subject offers a balance between practical language instruction and studying the social, literary and political culture of German-speaking countries in the past and present, with particular emphasis on the last 250 years, from the eighteenth century Enlightenment to the present. Language instruction consists of one formal hour per week and one weekly tutorial in small groups. In Semester 1, all students will take the Core Course: Studies in German Literature and Cultural Background. In Semester 2, all students will choose one of various options offered. Details are available in the Departmental handbook.

Students with outstanding qualifications in language may, with the permission of the Head of the discipline, take the language components of the course at a more advanced level.

*assessment:* language - weekly exercises, end of semester tests, tutorial participation. other - essays, end of semester tests; reasonable balance of achievement in all areas required to pass subject

**1214 German Studies IIA: Language, Literature and Culture**

8 points full year

2 formal hours per week language instruction; 2 small group tutorials per week

*prerequisites:* 5723 German Studies IA: Beginners' German (Pass Div I)

*restriction:* 8706 German Studies II; not be counted toward any other subject in the German Department

German Studies IIA offers a balance between practical language instruction and teaching a critical appreciation of literature, culture and society in German-speaking countries. German Studies IIA students will do the 'background' course and options and language classes with German Studies I, but they will have one tutorial specific to their needs.

*assessment:* language - weekly exercises, semester tests, tutorial participation. other - essays, end of semester tests or working papers; reasonable balance of achievement in all areas required to pass subject

**8693 German Studies IIA (Flinders) Part 1**

6 units at Flinders semester 1

3 lectures, 1 tutorial a week

*prerequisites:* Pass I or higher in 8952 German Studies IA (Flinders) Part 2 or equivalent

*restriction:* 8431 German Studies I, 6806 German Studies I (Flinders), 5396 German Studies I (Flinders) Part 1, 9815 German Studies I (Flinders) Part 2

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures students should contact the Faculty of Arts office at the University of Adelaide or the BA office at Flinders. Information on subject content can be obtained from the discipline of German Studies in the Centre for European Studies at Adelaide.

**7034 German Studies IIA (Flinders) Part 2**

6 units at Flinders semester 2

3 lectures, 1 tutorial a week

*prerequisites:* Pass I or higher in 8693 German Studies IIA (Flinders) Part 1 or equivalent

*restriction:* 8431 German Studies I, 6806 German Studies I (Flinders), 5396 German Studies I (Flinders) Part 1, 9815 German Studies I (Flinders) Part 2

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures students should contact the Faculty of Arts office at the University of Adelaide or the BA office at Flinders. Information on subject content can be obtained from the discipline of German Studies in the Centre for European Studies at Adelaide.

**4363 German Studies IIB (Part 1)**

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* Pass Div I in 8431 German Studies I and 5723 German Studies IA: Beginners' German

*restriction:* European Philosophy: The Death of God II/III; The Holocaust II/III; 1245 German Studies IIB. Not normally taken in the same Calendar year as 1214 German Studies IIA

Students enrolled in German IIB 1 will attend lectures in 3543 The Holocaust II or 3871 European Philosophy: The Death of God II, but reading, assignments and attend tutorials to be conducted in German.

*assessment:* as for 3543 The Holocaust II/ 3871 European Philosophy: The Death of God II, but written assignments in German and word lengths may vary

**4475 German Studies IIB (Part 2)**

4 points semester 2

2 lectures and 1 tutorial a week

*prerequisites:* Pass Div I in 8431 German Studies I and 5723 German Studies IA:Beginners' German

*restriction:* Music and Politics II/III; Contemporary Europe B II/III; German Studies IIB; not normally taken in the same year as 1214 German Studies IIA

Students enrolled in German IIB 2 will attend lectures in 2948 Music and Politics II or 9381 Contemporary Europe B II, but reading, assignments and tutorials will be conducted in German.

*assessment:* as for 2948 Music and Politics II/9381 Contemporary Europe B II, but written assignments will be in German and word lengths may vary

**7831 German Studies II (Flinders) Part 1**

6 units at Flinders semester 1

3 lectures, 1 tutorial per week

*prerequisites:* Pass Div I or better in 9815 German I (Flinders) Part 2 or equivalent

*restriction:* 8706 German Studies II; 1214 German Studies IIA

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures, students should contact the Faculty of Arts office, The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the discipline of German Studies in the Centre for European Studies.

**7586 German Studies II (Flinders) Part 2**

6 units at Flinders semester 2

3 lectures, 1 tutorial per week

*prerequisites:* Pass or better in 7831 German Studies II (Flinders) Part I or equivalent

*restriction:* 8706 German Studies II; 1214 German Studies IIA

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures, students should contact the Faculty, Arts office of The University of Adelaide or the School of Humanities at Flinders University. Information on the subject content can be obtained from the discipline of German Studies in the Centre for European Studies.

**2454 Special Subject in German Language and Culture II**

8 points full year

5 hours per week

*prerequisites:* minimum 6 points in Level I Humanities and Social Sciences

*restriction:* not available to students with Level I German

This subject offers the opportunity for students in second year to be introduced to German language and culture at a more intensive level than at first year. It is particularly appropriate for prospective post-graduates needing reading skills in German and/or students wishing to do an Honours degree in the Centre for European Studies who are not majoring in a European language but who need to develop a reading ability of the German language for research purposes. The research essay component of the subject enable students to choose a topic in line with their own research interest. Students will be required to read selected German texts, although they will write their essay in English.

*assessment:* as for German IA or German I 60%; 2 x 1500 word essays in English on German culture to be negotiated with the subject coordinator 40%

**Level III**

**8953 German in Germany III**

6 points summer semester

To be held in January 1999

*prerequisites:* Pass Div I in 8431 German Studies I and 5723 German Studies IA: Beginner's German Studies

The subject is divided into two components running concurrently: a) an intensive language course undertaken at the Prolog Language School in Berlin over a period of four weeks. Students will undertake 4 hours of instruction per day in a totally German-speaking language environment in groups of not more than ten students; b) a cultural/historical program organised in cooperation with the Faculty of Communication and History at the Technical University of Berlin. This program will entail a preliminary lecture before travelling to Berlin as well as a series of lectures and activities in Berlin devoted to the theme 'Berlin in Modern Germany'. There will also be visits to the German Historical Museum, the Museum of the Second World War at Karlshorst, the Museum at Checkpoint Charlie, The Sachsenhausen Memorial, Sans Soucci Palace in Potsdam, the Museum of Industrial Art and Design, the Bauhaus Museum and the New Synagogue. In addition there will be guided tours to historically significant sites. For details, contact the German discipline in the Centre for European Studies.

*assessment:* Language test carried out at Prologue - end of 4th week - 50%; 3000 word essay on history or culture of modern Berlin (due after return to Adelaide and before commencement of semester 1) 50%

### **8877 German Studies III: Language, Literature and Culture**

12 points full year

3 lectures, 1 tutorial a week

*prerequisites:* 8706 German Studies II or 1214 German Studies IIA or 1245 German Studies IIB

*restriction:* may not be counted toward any other subject in the German Studies Department.

Like all subjects in German Studies at second and third year level, German Studies II offers a balance between practical language instruction and studying the social, literary and political culture of German-speaking countries in the past and present, with particular emphasis on the last 250 years, from the eighteenth century Enlightenment to the present. Language instruction consists of one formal hour per week and one weekly tutorial in small groups.

In semester 1, all students will take the core subject: Studies in German Literature and Cultural Background. In Semester 2, all students will choose one of the various options offered. Details are available in the Departmental handbook.

*assessment:* language - weekly exercises, end of semester tests, tutorial participation; other - essays, end of semester tests or working papers.

note: where students take subject components also available to second year students, a higher level of achievement is required and additional work must be completed

### **2572 German Studies IIIA: Language, Literature and Culture**

12 points full year

3 lectures, 1 tutorial per week

*prerequisites:* 1214 German IIA

*restriction:* 8706 German Studies II; 1245 German Studies IIB; 8877 German Studies III; 4959 German Studies IIIB. May not be counted towards any other subject in the German Studies Department.

This subject follows on from 1214 German Studies IIA. Students will do the language section of the subject with German Studies II and the core subject and options with German Studies III. Language instruction consists of one formal hour per week and one weekly tutorial. In semester 1, students will take the core subject: Studies in German Literature and Cultural Background. In Semester 2, all students will choose one of the various options offered. Details are available in the Departmental handbook.

*assessment:* language - written exercises, end of semester tests, tutorial participation; other - essays/end of semester tests/working paper; reasonable balance of achievement in all aspects required to pass subject

### **4675 German Studies IIIB (Part 1)**

6 points semester 1

2 lectures and 1 tutorial a week

*prerequisites:* 8076 German Studies II or 1214 German Studies IIA or 4363 German Studies IIB (part 1) or 4474 German Studies IIB (Part 2)

*restriction:* European Philosophy: The Death of God II/III; The Holocaust II/III; 4959 German Studies IIIB

Students enrolled in German IIIB 1 will attend lectures in either 8292 The Holocaust III or 3391 European Philosophy: The Death of God III, but will do their reading and assignments in German and attend tutorials conducted in German.

*assessment:* as for 8292 The Holocaust III/3391 European Philosophy: The Death of God III, but written assignments in German, word lengths may vary

### **5228 German Studies IIIB (Part 2)**

6 points semester 2

2 lectures and 1 tutorial a week

*prerequisites:* 8076 German Studies II or 1214 German Studies IIA or 4363 German Studies IIB (part 1) or 4474 German Studies IIB (Part 2)

*restriction:* Music and Politics III/III; Contemporary Europe B II/III; 4959 German Studies IIIB

Students enrolled in German IIIB 2 will attend lectures in either 3579 Music and Politics III or 1366 Contemporary Europe B III, but will do their reading and assignments in German and attend tutorials conducted in German.

*assessment:* as for 3579 Music and Politics III/1366 Contemporary Europe B III, but written assignments in German and word lengths may vary

### **5977 German Studies III (Flinders) Part 1**

6 units at Flinders semester 1

3 lectures and 1 tutorial per week

*prerequisites:* Pass or better in 7586 German Studies II (Flinders) Part II or equivalent

*restriction:* 8877 German Studies III; 2572 German Studies IIIA

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures, students should contact the Faculty, Arts office of The University of Adelaide or the School of Humanities at Flinders University.

**1665 German Studies III (Flinders) Part 2**

6 units at Flinders semester 1

3 lectures, 1 tutorial per week

*prerequisites:* Pass or better in 5977 German Studies III (Flinders) Part I or equivalent

*restriction:* 8877 German Studies III; 2572 German Studies IIIA

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures, students should contact the Faculty of Arts office, The University of Adelaide or the School of Humanities at Flinders University.

**7141 German Studies IIIA (Flinders) Part 1**

6 units at Flinders semester 1

3 lectures, 1 tutorial a week

*prerequisites:* Pass I or higher in 7034 German Studies IIA (Flinders) Part 2 or equivalent

*restriction:* 8706 German Studies II, 7831 German Studies II (Flinders) Part 1, 7586 German Studies II (Flinders) Part 2

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures students should contact the Faculty of Arts office at the University of Adelaide or the BA office at Flinders. Information on subject content can be obtained from the discipline of German Studies in the Centre for European Studies at Adelaide.

**1186 German Studies IIIA (Flinders) Part 2**

6 units at Flinders semester 2

3 lectures, 1 tutorial a week

*prerequisites:* Pass I or higher in 7141 German Studies IIIA (Flinders) Part 1 or equivalent

*restriction:* 8706 German Studies II, 7831 German Studies II (Flinders) Part 1, 7586 German Studies II (Flinders) Part 2

This subject is offered to Flinders University students and is taught on the Flinders campus. For information on enrolment procedures students should contact the Faculty of Arts office at the University of Adelaide or the BA office at Flinders. Information on subject content can be obtained from the discipline of German Studies in the Centre for European Studies at Adelaide.

**5343 Special Subject in German Language and Culture III**

12 points full year

5 hours per week

This subject offers the opportunity for students in third year to be introduced to German language and culture

at a more intensive level than at first year. It is particularly appropriate for prospective post-graduates needing reading skills in German and/or students wishing to do an Honours degree in the Centre for European Studies who are not majoring in a European language but who need to develop a reading ability of the German language for research purposes. The research essay component of the subject enable students to choose a topic in line with their own research interest. Students will be required to read selected German texts, although they will write their essay in English.

*assessment:* as for German language at Levels I or II 60%; 2 x 3000 word essays in English on German culture to be negotiated with subject coordinator 40%

**Honours**

**1261 Honours German Studies**

24 points full year

note: students may obtain the permission of the Faculty of Arts to combine German Studies with another discipline for the Honours degree. They should consult the Honours Coordinator as soon as possible, so that a suitably modified course can be arranged.

*prerequisites:* Ordinary degree

*requirements:* Students will write a dissertation on some aspect of German Studies. Choice of subject should be made not later than the middle of the second semester in the preceding year. Students must also attend advanced courses in language, together with one option. Both thesis topics and options should be chosen in consultation with the Honours Coordinator.

**History**

<http://arts.adelaide.edu.au/History>

For full information on History subjects, methods of assessment and teaching arrangements, students should obtain a copy of the History Department handbook, available from the History Office or the Departmental home page.

Details of the subjects listed below may be subject to changes up to the enrolment period, depending on the availability of staff and resources.

**Note:** subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects, please contact the department.

**Level I**

**5755 Europe: Empire and War 1800-1950 I (Part 1)**

3 points semester 1

3 hours per week

Europe: Empire and War 1800-1950 (1) is one of a pair of semester-length subjects which may be taken independently but which students are advised to take

together. Its counterpart - Europe: Empire and War 1800-1950 (2) - is offered in Semester 2. The topics and issues studied in Europe: Empire and War (1) & (2) range over European and World History from the period of the French Revolution and Napoleon through the end of the Second World War and the beginning of the so-called Cold War.

The subject will be taught as a series of self-contained but interlinked modules. The modules will enable the student to focus on a number of key events in the evolution of the modern world while at the same time gaining an understanding of their broader historical context and of the long-term issues which they raise. The modules cover a spectrum of political, social, cultural and economic issues relating to developments in European history, Imperialism and Global conflict.

*assessment:* exam; written assignments

### **1431 Europe: Empire and War 1800-1950 I (Part 2)**

3 points semester 2  
2 lectures, 1 tutorial a week

Europe: Empire and War 1800-1950 (2) is one of a pair of semester-length subjects which may be taken independently but which students are advised to take together. Its counterpart - Europe: Empire and War 1800-1950 (1) - is offered in Semester 1.

The topics and issues studied in Europe, Empire and War 1 and 2 range over European and World History from the period of the French Revolution and Napoleon through the end of the Second World War and the beginning of the so-called Cold War. The subject will be taught as a series of self-contained but interlinked modules. The modules will enable the student to focus on a number of key events in the evolution of the modern world while at the same time gaining an understanding of their broader historical context and of the long-term issues which they raise. The modules cover a spectrum of political, social, cultural and economic issues relating to developments in European history, Imperialism and Global conflict.

*assessment:* examination; written assignments

### **4378 Europe: Medieval and Renaissance I**

3 points semester 1  
3 hours lectures, tutorials per week

A study of the major political, social, economic, religious and cultural developments of the High Middle Ages and the Renaissance.

*assessment:* 1500 word essay 50%; 3 hour exam 50%; compulsory attendance and participation at tutorials

### **1668 Europe: Reformation to Revolution I**

3 points semester 2  
3 hours lectures, tutorials per week

A chronological and thematic survey of Western Europe from the period of the Northern Renaissance to the French Revolution. Topics and themes to be considered in detail will include the Reformation and Counter Reformation, the spread of Protestantism, the political and social impact of the Reformation, The Wars of Religion in France, the Thirty Years' War, the emergence of the nation states, the development of the great powers, the Enlightenment, the collapse of the old order.

*assessment:* 2000 word essay 50%; 3 hour exam 50%

## **Level II**

### **6144 Aborigines in Twentieth Century Australia II**

4 points semester 2  
3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The aim of the subject is to give students an understanding of the Aboriginal experience of life in twentieth century Australia. Topics covered will include government policy, institutionalisation, Aboriginal art and literature, political movements and identity. A central concern of the subject will be to present Aboriginal perspectives.

*assessment:* essay, tutorials

### **3083 Asia Today: Miracle and Meltdown II**

4 points semester 1  
3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject deals with the 'Asian Miracle' and subsequent partial 'Meltdown' of the 1980s and 1990s. Both are vitally important to an understanding of current developments both in Asia and Australia. It will examine the social, economic and political origins of the modern condition in the region; the social and political revolutions in China, Japan, Korea, Indonesia and Vietnam and transfer of power in former colonies; the struggles for new directions in social and political; and the crisis in economic management in the 1970s to the growth patterns of the past decade and subsequent setbacks of the last twelve months.

*assessment:* project or exam

**5405 Britain (A): Uniting the Kingdoms II**

4 points semester 1

3 hours lectures, tutorials per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* 5028/2095 England Under the Stuarts, 5097 The English Revolution (Prior to 1989), 3235/4779 The English Revolution 1529-1760.

A study of state and society in England from the Reformation to the union with Scotland in 1707. Some attention will be given to relations between England and the other kingdoms of The British Isles leading to the emergence of the British state.

*assessment:* essays, exam

**5585 Britain (B): Aristocracy to Democracy II**

4 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject will examine government and society in Britain from the Glorious Revolution of 1688 to the Second Reform Act of 1867. It will concentrate on three main themes: aristocracy in government and society, the rise of the middle classes, and Britain's emergence as the world's most powerful nation.

*assessment:* essays, exam

**6360 Enter the Dragon: Chinese Business in Asia II**

4 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject provides a general survey of Chinese business in Asia outside Mainland China. It covers the Chinese in Southeast Asia and the Chinese in Hong Kong, Macao and Taiwan. With growing importance of the ethnic Chinese role in the fast economic development in East and Southeast Asia, it is timely to examine the Chinese business in a broader historical perspective. It examines the origins and changes of Chinese business since the second half of the 19th century to the present. It explores into the ideology, structure and typology of Chinese business in Asia. It attempts to answer questions such as what are the characteristics of Chinese business? what accounts for the success of Overseas Chinese in business? To what extent does Chinese business differ from Western or Australian business?

*assessment:* research project or exam

**8034 Europe at War IIA: 1914-1945**

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

A study of the principal aspects of the European conflicts of 1914-1918 (the Great War, or First World War) and 1939-1945 (the Second World War). Among the issues considered are the importance of war in shaping the history of the 20th century, the issues of responsibility for the outbreaks of the two world wars, the conduct of military operations on land, at sea and in the air, and the manner in which war has influenced developments in politics and society.

*assessment:* tutorial performance, essay, exam

**1740 Fascism and National Socialism II**

4 points semester 1

3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* 3549 Fascism and National Socialism prior to 1989

Right wing ideologies of the twentieth century and the movements or parties that claimed to be based on them provide the focus of this subject. Broadly it covers the period 1900-1945. There will be some discussion of the intellectual and cultural origins of fascism and current analyses of political changes in post-communist Europe. Major themes to be covered in lectures and tutorials include political, social and cultural dislocation following World War I; Italian fascism, its appeal and its leader; the distinguishing features of National Socialism in Germany (notably racialism, policies of exclusion and repression); social and cultural life in Nazi Germany and Fascist Italy; debates surrounding the nature of right-wing movements in other European countries; and degrees of cooperation, collaboration and resistance in occupied Europe.

*assessment:* tutorial papers; research; essay; tutorial attendance and participation

**1281 Heritage and History in Contemporary Australia II**

4 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject explores changing attitudes towards the built an natural environment, raising questions about the visible past and why we should (or should not) seek

to save it. Topics covered include the definition of heritage, the rise of heritage consciousness, heritage and public policy, historical buildings, sites and precincts, and the presentation of the past in historical museums.

*assessment:* exam, written assignments

### 3948 History and the Internet II

4 points semester 2

3 hours per week (lecture/demonstration and practical in a computer lab)

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject aims to teach Internet research, communication and publishing skills applicable to both the academic and commercial workplace, introduce students to key aspects in modern world history, and teach critical historical skills to enable students to differentiate between crank history sites and serious academic history sites. Students will learn how to use a browser (Netscape), search engines, the Barr Smith Library and other academic institutions' computer services, email, online discussion groups, and academic newsgroups. Students will draw up an annotated Bibliography/Webliography) on an historical topic of their choice and publish the research project on the Web. The subject is divided into three components: a brief history of the Internet in the light of other revolutions in mass communication (the invention of printing, the industrial and electronic revolutions) and its emergence out of the needs of US military and nuclear research institutions during the Cold War; an examination of a selection of history sites on the WWW from major universities, academic libraries and archives on such subjects as the French Revolution, the First and Second World Wars, the Holocaust, and Modern Art; an in depth examination of a history research topic of the student's choice.

*assessment:* attendance 10%, participation in online discussion group 20%, 1250 word essay 15%, 1250 word annotated bibliography/webliography 15%, 2500 word internet research project 40%

### 8251 Imperial Russia II

4 points semester 1

3 hours per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

Tsars and Tsaritsas; the peasants in serfdom and emancipation; the nobility: aristocracy and gentry and the fight against modernity; Russian industrialisation and the rise of the proletariat; educating Russians; the professional elite and the erosion of imperial political culture; the road to revolution; the 1905 revolution and

the establishment of the Duma system; the collapse of Tsardom.

*assessment:* 3000-word research essay 40%; seminars 20%; final examination 40%

### 6651 Life Stories: Australia 1850-1980 II

4 points semester 2

See Women's Studies for syllabus details

### 8731 Modern America: World War I to Imperial Decline II

4 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* H717 Social History of the United States in the Nineteenth and Twentieth Centuries (1983)

This subject aims to analyse the rise and fall of the American empire from World War I to the present. The prime focus will be on the structural changes in American society as it underwent enormous transformation within the historical framework of wars, rapid industrialisation, depression and the rise and decline of American world influence. The main historical topics and events to be examined include the industrialisation of America; the impact of urbanisation and immigration; and the nature of 20th century American society as it emerges in the World War I era. After examining the dramatic events of World War I, the Great Depression, World War II and the Cold War, the final section of the subject will examine the decline of the American economy and the decreasing influence of America as a world superpower.

*assessment:* essay, tutorial performance, exam

### 6748 Responses to War (A): Up to WWI II

4 points semester 2

2 lecture/film sessions per week; fortnightly group discussions

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* versions of this subject prior to 1997

The aim of this subject is to use the history of ideas and culture to gain insights into the nature of war and the combat experience, to explore the impact of war on individuals and societies and to examine the impact of war on ideas and culture from the ancient world to the eve of the First World War. The method adopted to do this is historical. Thus biography, historical context, the historical origin and evolution of ideas and an evaluation of the historical accuracy of the sources will all play an important part. I will examine a selection of

the extraordinary variety of responses to war from the ancient world to the present. These include the responses of actual participants in fighting, contemporary civilian eyewitnesses and those who were just influenced generally by the wars of their time. The underlying assumption of the subject is that the experience of war, whether directly or indirectly, has had a profound impact on the way many individuals think and that this change in thinking has been reflected in their work in such diverse media as novels, plays, art, music, political philosophy and film making.

*assessment:* attendance at a minimum number of lecture/film sessions 20%; attendance and satisfactory participation at group discussions 10%; 2000-word essay on 'Film and History' 20%; 2000 word essay and/or test 20%; exam 30%

### **4695 South Australian Aboriginal History II**

4 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

A history of Aboriginal/European relations in South Australia from settlement to the passage of the Aborigines Act in 1911. Issues addressed will include Aboriginal culture, responses to colonisation, Aborigines and the economy, administration, missions, religious and scientific constructions of Aboriginality, legal status and 'White Australia'. There will be a particular focus on the theme of 'representations of Aboriginality'.

*assessment:* tutorials, essays

### **3543 The Holocaust II**

4 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* any German Studies Level II/III subject in which the student has chosen to take a modified and reduced version of 'the Holocaust' as part of it

Even more than fifty years after it took place, the Holocaust remains one of the most controversial events in the 20th century. This subject adopts a multi-disciplinary approach in attempting to come to terms with it. The focus will be primarily on the origins, the practices and the consequences of the persecution of Europe's Jews during the Second World War, but the fate of other groups, such as gypsies and homosexuals will also be taken into account. In doing this a number of historiographical controversies will be discussed, including historical revisionism, the differences between structuralist and internationalist approaches, the question of comparability and so on. In the second

half of the semester issues of representation of the Holocaust will be addressed. Using a wide range of texts, students will consider what consequences the Holocaust has had and continues to have for Australia. The subject will be co-taught by staff from the History and German Studies departments.

*assessment:* 1500 word tutorial paper 20%; 3000 word major essay 40%; tutorial participation, attendance 10%; exam 30%

### **5595 The Southeast Asian Past II**

4 points not offered in 1999

3 hours per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject offers an opportunity to come to grips with the past history of the states and societies which now comprise Southeast Asia - Indonesia, Malaysia, Thailand, Burma, Vietnam, Cambodia and the Philippines. Not least of the fascinations of that past is the way it is frequently cited as an important explanation of present day Southeast Asia's position as one of the most dynamic parts of the late 20th century world. What is without doubt is that many of the major 'why' questions about contemporary Southeast Asia can only be answered satisfactorily on the basis of a knowledge of the region's past. That past embraces not only several centuries of colonialism but also history of developments in state-building, religion, trade and agriculture ranging back into the first millennium AD: along with a study of Western imperialism in the several parts of early-modern Southeast Asia, the subject also focuses on such things as the Khmer empire at Ankor (Cambodia), the powerful states of central Java which created the Borobudur and Prambanan temples and the rich world of sea-borne commerce which characterised the region long before the arrival of European colonisers.

*assessment:* exam or essays

### **4590 Twentieth Century Australia: Home and Away II**

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject considers key topics in understanding modern Australia, including the birth of the nation, the century's great crises (the world wars and the depressions), the problems of reform and prosperity post 1945 and the breakdown of consensus leading to recent and contemporary issues. Selected issues at present are colonialism, the Aborigines, the environment and the economy today. The subject

emphasises research work finding and using primary sources and tutorial work which debates issues.

*assessment:* 1000 word document analysis 25%; debate tutorial presentation 15%; 3500 word essay 60%; two-hour redeeming end of semester exam offered where necessary

### Level III

#### 9722 Aborigines in Twentieth Century Australia III

6 points semester 2

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The aim of the subject is to give students an understanding of the Aboriginal experience of life in twentieth century Australia. Topics covered will include government policy, institutionalisation, Aboriginal art and literature, political movements and identity. A central concern of the course will be to present Aboriginal perspectives.

*assessment:* essays, tutorials

#### 8172 Asia Today III

6 points semester 1

3 contact hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject deals with the 'Asian Miracle' and subsequent partial 'Meltdown' of the 1980s and 1990s. Both are vitally important to an understanding of current developments both in Asia and Australia. It will examine the social, economic and political origins of the modern condition in the region; the social and political revolutions in China, Japan, Korea, Indonesia and Vietnam and transfer of power in former colonies; the struggles for new directions in social and political; and the crisis in economic management in the 1970s to the growth patterns of the past decade and subsequent setbacks of the last twelve months.

*assessment:* 2 essays, or exam and essay

#### 2037 Britain (A): Unifying the Kingdoms III

6 points semester 1

3 hours lectures, tutorials per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* 5028/2095 England Under the Stuarts, 5097 The English Revolution (Prior to 1989), 3235/4779 The English revolution 1529-1760.

A study of state and society in England from the Reformation to the union with Scotland in 1707. Some attention will be given to relations between England

and the other kingdoms of The British Isles leading to the emergence of the British state.

*assessment:* exam 50%; essay 50%

#### 3314 Britain (B): Aristocracy to Democracy III

6 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject will examine government and society in Britain from the Glorious Revolution of 1688 to the Second Reform Act of 1867. It will concentrate on three main themes: aristocracy in government and society, the rise of the middle classes, and Britain's emergence as the world's most powerful nation.

*assessment:* essays, exam

#### 1706 Enter the Dragon: Chinese Business in Asia III

6 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject provides a general survey of Chinese business in Asia outside Mainland China. It covers the Chinese in Southeast Asia, and the Chinese in Hong Kong, Macao and Taiwan. With growing importance of the ethnic Chinese role in the fast economic development in East and Southeast Asia, it is timely to examine Chinese business in a broader historical perspective. This subject examines the origins and changes of the Chinese business since the second half of the 19th century to the present. It explores into the ideology, structure and typology of Chinese business in Asia. It attempts to answer questions such as what are the characteristics of Chinese business? what accounts for the success of Overseas Chinese in business? To what extent does Chinese business differ from Western or Australian business?

*assessment:* essay and examination

#### 2386 Europe at War IIIA: 1914-1945

6 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

A study of the principal aspects of the European conflicts of 1914-1918 (the Great War, or First World War) and 1939-1945 (the Second World War). Among the issues considered are the importance of war in shaping the history of the 20th century, the issues of

responsibility for the outbreaks of the two world wars, the conduct of military operations on land, at sea and in the air, and the manner in which war has influenced developments in politics and society.

*assessment:* tutorial performance, essay, examination

### **3877 Fascism and National Socialism III**

6 points semester 1

3 hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

Right wing ideologies of the twentieth century and the movements or parties that claimed to be based on them provide the focus of this subject. Broadly it covers the period 1900-1945. There will be some discussion of the intellectual and cultural origins of fascism and current analyses of political change in post-communist Europe. Major themes to be covered in lectures and tutorials include political, social and cultural dislocation following World War I; Italian fascism, its appeal and its leader; distinguishing features of National Socialism in Germany (notably racialism, policies of exclusion and repression); social and cultural life in Nazi Germany and Fascist Italy; debates surrounding the nature of right-wing movements in other European countries; and degrees of cooperation, collaboration and resistance in occupied Europe.

*assessment:* short tutorial papers, research essay, tutorial attendance, participation

### **4200 Heritage and History in Contemporary Australia III**

6 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject explores changing attitudes towards the built an natural environment, raising questions about the visible past and why we should (or should not) seek to save it. Topics covered include the definition of heritage, the rise of heritage consciousness, heritage and public policy, historical buildings, sites and precincts, and the presentation of the past in historical museums.

*assessment:* exam, written assignments

### **2097 History and the Internet III**

6 points semester 2

3 hours per week (lecture/demonstration and practical in a computer lab)

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject aims to teach Internet research, communication and publishing skills applicable to both the academic and commercial workplace, introduce students to key aspects in modern world history, and teach critical historical skills to enable students to differentiate between crank history sites and serious academic history sites. Students will learn how to use a browser (Netscape), search engines, the Barr Smith Library and other academic institutions' computer services, email, online discussion groups, and academic newsgroups. Students will draw up an annotated Bibliography/Webliography) on an historical topic of their choice and publish the research project on the Web. The subject is divided into three components: a brief history of the Internet in the light of other revolutions in mass communication (the invention of printing, the industrial and electronic revolutions) and its emergence out of the needs of US military and nuclear research institutions during the Cold War; an examination of a selection of history sites on the WWW from major universities, academic libraries and archives on such subjects as the French Revolution, the First and Second World Wars, the Holocaust, and Modern Art; an in depth examination of a history research topic of the student's choice.

*assessment:* attendance 10%, participation in online discussion group 20%, 2000 word essay 15%, 2000 word annotated bibliography/webliography 15%, 3500 word internet research project 40%

### **5158 Imperial Russia III**

6 points semester 1

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

Tsars and Tsaritsas, the peasants in serfdom and emancipation; the nobility: aristocracy and gentry and the fight against modernity; Russian industrialisation and the rise of the proletariat; educating Russians; the professional elite and the erosion of imperial political culture; the road to revolution; the 1905 revolution and the establishment of the Duma system; the collapse of Tsardom.

*assessment:* 3000 word research essay 40%; tutorials/seminars 10%; textbook exam 10%; final exam 40%

### **5271 Life Stories: Australia 1850-1980 III**

6 points semester 2

see Women's Studies for syllabus details

**2955 Modern America: World War I to Imperial Decline III**

6 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences*restriction:* H717 Social History of the United States in the Nineteenth and Twentieth Centuries (1983)

This subject aims to analyse the rise and fall of the American empire from World War I to the present. The prime focus will be on the structural changes in American society as it underwent enormous transformation within the historical framework of wars, rapid industrialisation, depression and the rise and decline of American world influence. The main historical topics and events to be examined include the industrialisation of America; the impact of urbanisation and immigration; and the nature of 20th century American society as it emerges in the World War I era. After examining the dramatic events of World War I, the Great Depression, World War II and the Cold War, the final section of the subject will examine the decline of the American economy and the decreasing influence of America as a world superpower.

*assessment:* essay, tutorial performance, exam**3504 Responses to War (A): Up to 1900 III**

6 points semester 2

2 lecture/film sessions per week; fortnightly group discussion

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences*restriction:* versions of this subject prior to 1997

The aim of this subject is to use the history of ideas and culture to gain insights into the nature of war and the combat experience, to explore the impact of war on individuals and societies and to examine the impact of war on ideas and culture from the ancient world to the eve of the First World War. The method adopted to do this is historical. Thus biography, historical context, the historical origin and evolution of ideas and an evaluation of the historical accuracy of the sources will all play an important part. I will examine a selection of the extraordinary variety of responses to war from the ancient world to the present. These include the responses of actual participants in fighting, contemporary civilian eyewitnesses and those who were just influenced generally by the wars of their time. The underlying assumption of the subject is that the experience of war, whether directly or indirectly, has had a profound impact on the way many individuals think and that this change in thinking has been reflected in their work in such diverse media as novels, plays, art, music, political philosophy and film making.

*assessment:* attendance at a minimum number of lecture/film sessions 20%; attendance and satisfactory participation at group discussions 10%; 3000-word essay on 'Film and History' 20%; 3000 word essay and/or test 20%; exam 30%

**6253 South Australian Aboriginal History III**

6 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

A history of Aboriginal/European relations in South Australia from settlement to the passage of the Aborigines Act in 1911. Issues addressed will include Aboriginal culture, responses to colonisation, Aborigines and the economy, administration, missions, religious and scientific constructions of Aboriginality, legal status and 'White Australia'. There will be a particular focus on the theme of 'representations of Aboriginality'.

*assessment:* tutorials, essays**8292 The Holocaust III**

6 points semester 1

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* any German Studies Level II/III subject in which the student has chosen to take a modified and reduced version of 'the Holocaust' as part of it

Even more than fifty years after it took place, the Holocaust remains one of the most controversial events in the 20th century. This subject adopts a multi-disciplinary approach in attempting to come to terms with it. The focus will be primarily on the origins, the practices and the sequences of the persecution of Europe's Jews during the Second World War, but the fate of other groups, such as gypsies and homosexuals will also be taken into account. In doing this a number of historiographical controversies will be discussed, including historical revisionism, the differences between structuralist and internationalist approaches, the question of comparability and so on. In the second half of the semester issues of representation of the Holocaust will be addressed. Using a wide range of texts, students will consider what consequences the Holocaust has had and continues to have for Australia. The subject will be co-taught by staff from the History and German Studies departments.

*assessment:* 2000 word tutorial paper 20%; 4000 word major essay 40%; tutorial participation and attendance 10%; exam 30%

**3038 The Southeast Asian Past III**

6 points not offered in 1999

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject offers an opportunity to come to grips with the past history of the states and societies which now comprise Southeast Asia - Indonesia, Malaysia, Thailand, Burma, Vietnam, Cambodia and the Philippines. Not least of the fascinations of that past is the way it is frequently cited as an important explanation of present day Southeast Asia's position as one of the most dynamic parts of the late 20th century world. What is without doubt is that many of the major why questions about contemporary Southeast Asia can only be answered satisfactorily on the basis of a knowledge of the region's past. That past embraces not only several centuries of colonialism but also history of developments in state-building, religion, trade and agriculture ranging back into the first millennium AD: along with a study of Western imperialism in the several parts of early-modern Southeast Asia, the subject also focuses on such things as the Khmer empire at Ankor (Cambodia), the powerful states of central Java which created the Borobudur and Prambanan temples and the rich world of sea-borne commerce which characterised the region long before the arrival of European colonisers.

*assessment:* exam or essays

**6913 Twentieth Century Australia: Home and Away III**

6 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject considers key topics in understanding modern Australia, including the birth of the nation, the century's great crises (the world wars and the depressions), the problems of reform and prosperity post 1945 and the breakdown of consensus leading to recent and contemporary issues. Selected issues at present are colonialism, the Aborigines, the environment and the economy today. The subject emphasises research work finding and using primary sources and tutorial work which debates issues.

*assessment:* 1000 word document analysis 25%; debate/tutorial presentation 15%; 5000 word essay 60%; 2-hour end of semester redeeming exam where necessary

**Honours**

**8717 Honours History**

24 points full year

*prerequisites:* minimum 8 points at Level II, 12 points at Level III in subjects offered by History Department; Credit standard in at least two full year (or four semester) History (or in some cases, related) subjects

Note: application forms for admission to Honours and a detailed brochure on the course are available from the History Office; students with questions about the course or their eligibility for it should consult the Honours Coordinator.

Honours work includes the writing of a thesis, a common course on the principles and practice of historical research and writing, and a special subject. Students may choose their special subject from a list published in the Honours handbook.

### Indonesian Language

(available on the University of Adelaide campus, taught by Flinders University)

#### Level I

- 7049 Indonesian Introductory, Part 1**  
3 points semester 1  
5 hours per week

This subject is concerned with developing a preliminary communicative ability in an number of everyday situations and to develop a knowledge and understanding of modes of Indonesian interaction in different social contexts.

*assessment:* continuous - end of semester written, oral tests; Culture and Society component assessed by film reviews

- 5492 Indonesian Introductory, Part 2**  
3 points semester 2  
5 hours per week

*prerequisites:* 7049 Indonesian Introductory, Part 1

This subject is concerned with developing a preliminary communicative ability in an number of everyday situations and to develop a knowledge and understanding of modes of Indonesian interaction in different social contexts.

*assessment:* continuous - end of semester written, oral tests; Culture and Society component assessed by film reviews

- 5957 Indonesian Introductory A, Part 1**  
3 points semester 1  
4 hours per week

*prerequisites:* SACE Stage 2 Indonesian (15 or better) or permission of Convenor

The subject aims to develop listening, speaking and writing skills in Indonesian and to extend students' understanding of the structure of Indonesian through exercises in grammar and translation. Two hours per week are devoted to translation and grammar and three hours per week to small group tutorials, which aim to develop speaking, listening and writing skills in Indonesian.

*assessment:* written, oral tests

- 7336 Indonesian Introductory A, Part 2**  
3 points semester 2  
4 hours per week

*prerequisites:* 5957 Indonesian, Introductory A, Part I, with a grade of Pass I or better

The subject aims to develop listening, speaking and writing skills in Indonesian and to extend students' understanding of the structure of Indonesian through exercises in grammar and translation. Two hours per week are devoted to translation and grammar and three hours per week to small group tutorials, which aim to develop speaking, listening and writing skills in Indonesian. Two hours per week are devoted to translation and grammar and three hours per week to small group tutorials, which aim to develop speaking, listening and writing skills in Indonesian.

*assessment:* written, oral tests

#### Level II

- 9193 Indonesian, Intermediate, Part 1**  
4 points semester 1  
5 hours per week

*prerequisites:* 5492 Indonesian, Introductory Part 2, with a grade of Pass I or better

The subject aims to develop communicative skills and to extend students' understanding of language structure in modern Indonesian. Two hours per week are devoted to translation and grammar. Three hours per week are devoted to small group tutorials which aim to develop speaking, listening and writing skills in Indonesian.

*assessment:* written, oral tests

**5346 Indonesian, Intermediate, Part 2**

4 points semester 2

5 hours per week

*prerequisites:* 9193 Indonesian, Intermediate, Part 1, Pass I or better

The subject aims to develop communicative skills and to extend students' understanding of language structure in modern Indonesian. Two hours per week are devoted to translation and grammar. Three hours per week are devoted to small group tutorials which aim to develop speaking, listening and writing skills in Indonesian.

*assessment:* written, oral tests

**2216 Indonesian, Intermediate A, Part 1**

4 points semester 1

3 lectures, 1 tutorial per week

*prerequisites:* 7336 Indonesian Introductory A Part 2

This topic focuses on developing and extending oral and written skills in Indonesian through a variety of distinct but inter-related activities and approaches; reading, translation, discussion and writing in Indonesian based on Indonesian source materials relating to the social sciences. Intensive Indonesian comprehension and oral presentation of a variety of historical and current affairs sources in both audio and video format.

*assessment:* written, oral tests

**3910 Indonesian, Intermediate A, Part 2**

4 points semester 2

3 lectures, 1 tutorial per week

*prerequisites:* 5957 Indonesian Intermediate A Part 1

This topic focuses on developing and extending oral and written skills in Indonesian through a variety of distinct but inter-related activities and approaches; reading, translation, discussion and writing in Indonesian based on Indonesian source materials relating to the social sciences. Intensive Indonesian comprehension and oral presentation of a variety of historical and current affairs sources in both audio and video format.

*assessment:* written, oral tests

**Level III**

**4032 Indonesian, Advanced III, Part I**

6 points semester 1

3 lectures, 1 tutorial per week

*prerequisites:* Indonesian language at Level II

This topic focuses on developing and extending oral and written skills in Indonesian through a variety of

distinct but interrelated activities and approaches reading, translation, discussion and writing in Indonesian based on Indonesian source materials relating to the social sciences. Intensive Indonesian comprehension and oral presentation of a variety of historical, cultural and current affairs sources in both audio and visual format.

*assessment:* to be advised

**4209 Indonesian, Advanced III, Part 2**

6 points semester 2

3 lectures, 1 tutorial per week

*prerequisites:* 4032 Indonesian, Advanced Part 1

This topic focuses on developing and extending oral and written skills in Indonesian through a variety of distinct but interrelated activities and approaches reading, translation, discussion and writing in Indonesian based on Indonesian source materials relating to the social sciences. Intensive Indonesian comprehension and oral presentation of a variety of historical, cultural and current affairs sources in both audio and visual format.

*assessment:* to be advised

**International Studies**

**5455 International Studies II (core topic)**

4 points semester 1

3 hours per week

*prerequisites:* 6 points in Humanities/Social Sciences at Level I

Lectures will be given by specialists in different disciplines explaining the key theoretical concepts and methodologies used in their field to explain international phenomena. Lectures will cover: international politics, international trade theory, international labour studies, international law, feminist theory, international history, international culture, global environment, post-colonialism, international organisations and globalisation.

*assessment:* 1500 word minor essay 30%; 3000 word essay 60%; tutorial participation 10%.

**6168 Honours in International Studies**

24 points full year

The thesis topic would normally be drawn from the central themes explored in 5455 International Studies II (core topic) and would be supervised by a staff member participating in the core subject.

Two papers will result from seminars, one of which will be the core seminar in International Studies (as designated by the Award Committee) and one other seminar undertaken in one of the major participating

departments in the award, i.e., Politics, History, Asian Studies and Economics. One paper may be drawn from one of the language departments or from one of the other participating departments in the Faculty.

*assessment:* thesis approx. 15000 words 50%; 2 x 5000 word seminar papers 25% each

### Italian Language and Culture

(available on The University of Adelaide campus, taught by Flinders University)

Note: the language at each level is for both beginners and advanced students. Students will be streamed within the topic.

#### Level I

##### 7848 Italian I Part 1

3 points semester 1

5 hours per week

The subject consists of - classes in common that provide an intensive familiarisation with the basic elements of Italian phonology and grammar and offer an introduction to aspects of modern Italy; classes divided according to linguistic competence at the point of entry (streams normally consisting of Beginners and Advanced), where emphasis is placed on developing the skills of comprehension and active use of spoken and written Italian in the context of language goals that for each student are realistic and rewarding. The program, which presupposes regular attendance at all five scheduled hours, includes both lecture-type instruction and tutorials where students are expected to participate interactively in the language-learning process.

*assessment:* to be advised

##### 7885 Italian I Part 2

3 points semester 2

5 hours per week

*prerequisite:* 7848 Italian I Part 1

The subject develops further the basic language skills acquired in first semester and extends the students' proficiency in both spoken and written Italian. The topic consists of classes divided according to levels of linguistic competence, where emphasis is placed on the continuing development of the skills of comprehension and active use of spoken and written Italian in the context of realistic and rewarding language goals. The program presupposes regular attendance at all scheduled classes, including both the lecture-type instruction and the interactive language tutorials.

*assessment:* to be advised

#### Level II

##### 4195 Italian II Part 1

4 points semester 1

5 hours per week

*prerequisite:* 7885 Italian I Part 2

The subject is designed to strengthen and extend the students' linguistic proficiency in the four basic skills (listening, speaking, reading and writing) acquired at level I, and to provide further study in the area of Italian society and culture. The Language component consists of classes divided according to levels of linguistic competence (separate streams of second-level Beginners and second-level Advanced), where particular emphasis is placed on oral-aural comprehension and on the use of spoken and written Italian in the context of language goals that for each student are realistic and rewarding. In the Cultural component (2 hours per week) students consider issues relating to contemporary Italian culture and society as illustrated in a selection of Italian texts.

*assessment:* to be advised

##### 4119 Italian II Part 2

4 points semester 2

5 hours per week

*prerequisite:* 4195 Italian II Part 1

The subject continues the development, from Level II Part 1, of communication skills, both spoken and written, through the progressive study of more advanced grammatical structures in the context of conversation practice, composition, drills, and translation to and from Italian. Students take a total of two hours in common (culture) and a further 2-3 hours of language in separate streams divided according to linguistic competence. These classes are programmed for interaction within the group. The cultural component consists of the study of selections of Italian prose and/or poetry set in the context of Italian society and chosen for their recognised literary worth and their suitability for this language level.

*assessment:* to be advised

#### Level III

##### 4622 Italian III Part 1

6 points semester 1

5 hours per week

*prerequisite:* 4119 Italian II Part 2

The subject is designed to strengthen and extend the students' proficiency in the four macro skills (written and oral comprehension and communication) acquired at level II, and to provide the opportunity for the study

of specific aspects of Italian society and culture. The Language classes cover advanced Italian grammar, particularly syntax, commensurate with this level, and are divided according to the students' linguistic competence (separate streams for third-level Beginners and third-level Advanced). The cultural component consists of a monographic study in the area of Italian literature (details available at the time of enrolment). In lieu of this monographic study available at Adelaide University, students may take the segment The Italians in Australia offered in first semester on the Flinders University campus.

*assessment:* to be advised

**6069 Italian III Part 2**

6 points semester 2

5 hours per week

*prerequisite:* 4622 Italian III Part 1

The subject is designed to extend further the students' proficiency in the four macro skills (written and oral comprehension and communication) acquired in the first semester of level III, and to provide the opportunity for the close study of an aspect of Italian society and culture. The Language classes cover advanced Italian grammar, particularly syntax, commensurate with this level, and are divided according to the students' linguistic competence (separate streams for third-level Beginners and third-level Advanced). The cultural component consists of a monographic study in an area of Italian society, language or literature (details available at the time of enrolment).

*assessment:* to be advised

**Labour Studies**

<http://www.labour.adelaide.edu.au/>

**Note:** all Labour Studies subjects are available externally. Subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects, please contact the department.

**Level I and II**

**9742 Australian Labour History II**

4 points semester 2

A history of work and unionism, of workers' attitudes, of their families' experience and of their involvement in political activity.

Chronology and themes: the origins of the Australian workers: convicts and free labour; bushrangers and diggers; the nineteenth century long boom; depression and drought in the 1980s; the emergence of unions; the great strikes 1890-4; the ALP's foundations, nature and performance; the foundations and effects of the arbitration network; World War I, syndicalism,

bolshevism and the middle classes; our two greatest strike waves; the 1930's slump; Labour in charge in the 1940s; the Communist Party of Australia; the 'Ming' dynasty; 1970-92 - sea changes in the labour movement; women and labour; race ethnicity and work.

*assessment:* essays, other written work totalling approx. 4000 words for level I, 6000 words for level II

**9821 Australian Labour Organisations I**

3 points semester 2

**3162 Australian Labour Organisations II**

4 points semester 2

3 hour class per week

*restrictions:* Union Studies I

Membership: collective survey of individuals' links with unions, discussion of diversity in unions, etc; History: the history of workers' organisations, union traditions of militancy, social and political policies, etc; The Working Class: composition of unions in the total work-force, gender balance and union density; Organisation: internal structures and resources of unions, shop stewards, representative democracy and registration; Peak Councils: trades and labour councils, industry federations, ACTU Executive and Congress; Employers: associations, Chambers of Commerce and Manufacturers, NFF, BCA, CAI; Blue Collar unions: study of craft or manual unions, including the part played by women in these unions; White Collar unions: study of public sector or services unions, including the part played by women in these unions; Wages: federal awards, national wage cases, allowances, superannuation, enterprise bargaining, Jurisdiction: State awards, dual registration, 'industry' rule, reinstatement provisions, etc; Women in Unions: equal pay for work of equal value, equal employment opportunity, affirmative action; Health and Safety: legislation and education, powers of union safety officers, workers' compensation, etc; Radical Policies: militancy and political ideology in the union movement, communism, socialism, feminism.

*assessment:* essays, other written work totalling approx. 4000 words for level I, 6000 words for level II

**3517 Gender, Work and Society I**

3 points semester 1

**3450 Gender, Work and Society II**

4 points semester 1

3 hour class per week

Sexual inequalities in capitalist society; social patterns of sexual oppression; sexual inequalities in the Australian economy and workforce; gender and economic policies; the politics of gender in the

workplace; women and trade unions; strategies for achieving sexual equality.

*assessment:* essays, other written work totalling approx. 4000 words for level I, 6000 words for level II

### 1977 Labour, Culture and the Media I

3 points semester 2

### 6440 Labour, Culture and the Media II

4 points semester 2

2 hour lecture, 1 tutorial per week

This subject will develop students' understanding of the role of culture in symbolising and communicating the aims and ideals of the labour movement and will equip students to critically analyse cultural and media constructions of the notions of work and the "worker" in Australian society. The course will explore examples of cooperation between artists and other cultural workers and unions in Australia and overseas from the nineteenth century through to the present day. Key events and texts from the 1890s, the 1930s, the Cold War, the 1960s and the present will be examined to assess the contribution of art and culture to expressing and promoting union views and concerns. The role of both the mass and alternative media in representing and challenging these views will also be considered. Industrial issues arising from the current expansion in the culture and media industries will be discussed, as will the effectiveness of unions' use of their own media, mass media and campaign work in attempting to promote their concerns. Students will assess the range of strategies available to the labour movement to raise issues and conduct debates within the public domain and learn practical skills in media analysis.

*assessment:* essays, other written work totalling approx. 4000 words for level I, 6000 words for level II

### 8482 Work, Race and Culture I

3 points semester 1

### 8416 Work, Race and Culture II

4 points semester 1

3 hour class each week

Problems of Race and Ethnic relations at work: an introduction to the history of migration to Australia from the deep past to the present, the conquest of black Australia by the white invaders, the nature of race and the political issue of racism, Australian and Anglo-racism unions and Australian working class culture, Land Rights, Mabo and Wik, black deaths in custody, the stolen generation; Immigrant Workers: the history of modern migration to Australia, migrant workers, migrants and politics, the Fitzgerald report, multiculturalism, the Blainey Debate, Asian immigration, One Nation, a divided working class?

*assessment:* essays, other written work totalling approx. 4000 words for level I, 6000 words for level II

## Level II

### 9625 Labour Studies II (core topic)

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Science

This subject will provide students with an introduction to contemporary knowledge and debates on a range of work and labour issues. In particular it will provide a brief survey of multidisciplinary approaches to the study of work from the perspective of current literature in the disciplines of economics, politics, sociology, gender studies, history and industrial relations. It will introduce students to an international perspective on work issues through a comparative analysis of Australia and a number of other countries in the context of global restructuring.

*assessment:* essays, tutorial papers and reports to the equivalent of 6000 words

## Level III

### 9241 Labour Market Studies III

6 points semester 1

3 hour class each week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject provides an overview of models of labour markets in terms of both orthodox and heterodox economic theory. It aims to develop students' ability to evaluate current developments with respect to patterns of participation in paid and unpaid work, wages dispersion and relativities, employment and unemployment policy, labour market programs and education and training.

*assessment:* essay, other written work totalling approximately 9000 words

### 8643 Labour Strategies III

6 points semester 2

3 hour class each week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* 7295 Union Studies IIIB

Strategies developed within various theoretical frameworks by different tendencies in the industrial and/or political wings of the labour movement to advance the interests of labour, including: comparative analyses of the relationship between the union movement and the industrial relations system in Australia with that in other times and places;

assessment of the adequacy of theories of unionism, of industrial relations, of human resource management and of participatory democracy to explain the place of labour in Australia; critical analysis of the process whereby industrial legislation is made, modified and implemented and of the ideologies involved in the process; development of policies with respect to the organisation of work and workers within modern, high-productivity labour management schemes; planning the effective use of industrial relations mechanisms to advance the interests of labour; historical analysis of the shift from industrial relations and employee relations to workplace relations and individual contracts as analytical categories and of the corresponding labour strategies.

*assessment:* 4000 word critical essay; 4000 word research exercise or equivalent

### 8073 Political Economy of Globalisation III

6 points semester 2  
3 hour class each week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* Political Economy IIIB; 1310 Political Economy III; 4211 Political Economy III (BA)

This subject is about the complex processes of global economic restructuring which are deeply affecting every society throughout the world in the late 1990s. The subject is organised in two parts. The first examines some of the theories which have emerged to explain the processes which have been described as 'globalisation' and 'restructuring' and their impact on national, local and international economies. The remaining topics examine in more detail the impact of restructuring and globalisation upon governments and the future of the state - at international, national and local levels. The reading for the subject is drawn from a number of disciplinary areas since the topic of global restructuring crosses over the areas of sociology, economic and urban geography, economics, political economy, gender and cultural studies.

*assessment:* essays, workbook totalling approximately 9000 words

### 2205 Social and Labour Research III

6 points semester 1  
1 lecture, 1 seminar/workshop per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* 7489 Social and Labour Research IV

An investigation of social and labour research paradigms, approaches and methods; policy development processes and outcomes; policy and

research as approaches to social analysis; emergent trends and issues in social and labour research.

*assessment:* seminar paper 20%; case study 30%; essay 50% to a total of approximately 9000 words

## Honours

### 2373 Honours Labour Studies

24 points full year

*prerequisites:* Bachelor of Labour studies degree or a major sequence in Labour studies in another award of the Faculty. Admission to Honours is at the discretion of the Head of Labour Studies acting on the advice of the staff committee.

Honours in Labour Studies involves weekly seminars, essays and a dissertation. A list of options listed for 1999 is available from the department. The choice of subjects and the dissertation topic must be approved by the Head of the Centre for Labour Studies before enrolment. Arrangements for joint honours with other departments or centres may be negotiated.

*assessment:* essays, dissertation

### Labour Studies subjects not offered in 1999

## Linguistics

There are currently no subjects in Linguistics at Level I. Intending students are advised to take English I, or a language other than English (LOTE) as appropriate preparation.

### Level II

#### 9744 Computer Assisted Language Learning II

4 points semester 1 or 2

3 hours per week

quota may apply

assumed knowledge: an understanding of Windows and MS-DOS

*prerequisites:* any Level I language other than English

The subject offers an introduction to the use of computers in language learning. Topics in the subject include: the role of the word processor, applications for tutorial programs, text reconstruction, authorising and internet resources for language teaching. The subject offers a balance in practical computing skills and a critical understanding of the features of second language acquisition which come into play in using computers in language learning. The course is suitable for students thinking of pursuing a career of teaching Western European languages. Students are advised to see the lecturer in advance of the course if they wish to prepare materials using the following languages: Amharic, Arabic, Croatian, Czech, Greek, Hebrew, Lithuanian, Persian, Polish, Portuguese, Romanian, Russian, Serbian, Slovak or Slovenian.

The subject uses the MS-DOS platform. Some reference will be made to the Macintosh platform.

*assessment:* computing - weekly exercises, semester test 30%; other - essays, project 70%

#### 7892 Foundations of Linguistics II

8 points full year

2 hour lecture per week, 1 tutorial per fortnight

*prerequisites:* pass in English I, or any Level I language other than English, to the value of 6 points or alternative approved by Professor of Linguistics

No previous knowledge of linguistics is assumed. The subject will give students an overview of the field of modern linguistics, basic skills in linguistics and sociolinguistic analysis and an understanding of the educational, political and social aspects of language issues in Australia. The subject is divided into two main parts, an introduction to modern linguistics in the first semester and language issues in Australia in the second.

*assessment:* practicals 20%; project or essay 30%; exam 50%

#### 4307 Functional Grammar and Discourse II

4 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject is an up-to-date introduction to Functional Systemic Linguistics. It is of particular interest to those considering a career in language teaching and students concerned with the analysis of texts. The following topics will be dealt with: Overview of grammar, mood, modality, clause complex, transitivity, nominal group, grammatical metaphor, theme, verbal group, discourse and context.

*assessment:* 2000 word essay 50%; 4 marked assignments 50%

#### 7176 Kurna Language and Language Ecology II

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject will introduce students to the Kurna language, the original language of Adelaide and the Adelaide Plains. Students will gain familiarity with the Kurna sources and will investigate Kurna in relation to neighbouring languages focussing on both linguistic and cultural ties. Students will gain an appreciation of Kurna history and of Kurna within its contemporary social context. This will include the acquisition of some facility in the language itself. The subject will include guest lecturers from Kurna elders and at least one excursion to places of significance to Kurna people.

*assessment:* 3 practical assignments; video report; tutorial presentation based on student's own research, essay or equivalent report

### Level III

#### 1577 Computer Assisted Language Learning III

6 points semester 1 or 2

3 hours per week

quota may apply

*prerequisites:* any Level I language other than English

The subject offers an introduction to the use of computers in language learning. Topics in the subject include: the role of the word processor, applications for tutorial programs, text reconstruction, authorising and internet resources for language teaching. The course offers a balance in practical computing skills and a

critical understanding of the features of second language acquisition which come into play in using computers in language learning. The course is suitable for students thinking of pursuing a career of teaching Western European languages. Students are advised to see the lecturer in advance of the course if they wish to prepare materials using the following languages: Amharic, Arabic, Croatian, Czech, Greek, Hebrew, Lithuanian, Persian, Polish, Portuguese, Romanian, Russian, Serbian, Slovak or Slovenian.

The subject uses the MS-DOS platform. Some reference will be made to the Macintosh platform.

*assessment:* computing - weekly exercises, semester test 30%; other - essays and project 70%

### **4829 Computer Assisted Language Learning: Project III**

6 points semester 2

1 tutorial, 1 practical per week

quota may apply

*co/prerequisites:* Computer Assisted Language Learning II/III

*assumed knowledge:* a computer language or ability to prepare hypercard stacks

Students in this subject are expected to be, or wish to be, language teachers. It is designed to offer students the opportunity to develop the skills and knowledge gained in CALL II or III into a major project. Contact hours will largely be of the tutorial and practical format where students present work for critical evaluation by others and undertake self-directed reading to inform their project. The project may be in any negotiated area of computer assisted language learning. Typical areas might be those of the preparation of materials using hypermedia or a research project in the area of CALL and pedagogy.

*assessment:* project work

### **4914 Foundations of Linguistics III**

12 points full year

2 hour lecture per week and 1 tutorial per fortnight

*prerequisites:* pass in English II, or Level II languages other than English, to the value of 8 points or alternative approved by Professor of Linguistics

No previous knowledge of linguistics is assumed. The course will give students an overview of the field of modern linguistics, basic skills in linguistics and sociolinguistic analysis and an understanding of the educational, political and social aspects of language issues in Australia. The course is divided into two main parts, an introduction to modern linguistics in the first semester and language issues in Australia in the second.

*assessment:* practicals 20%; project or essay 30%; exam 50%

### **8276 Functional Grammar and Discourse III**

6 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject is an up-to-date introduction to Functional Systemic Linguistics. It is of particular interest to those considering a career in language teaching and students concerned with the analysis of texts. The following topics will be dealt with: Overview of grammar, mood, modality, clause complex, transitivity, nominal group, grammatical metaphor, theme, verbal group, discourse and context.

*assessment:* 3000 word essay 50%; 5 assignments 50%

### **7681 Kurna Language and Language Ecology III**

6 points semester 2

2 lectures, 1 tutorial per week; field trips

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject will introduce students to the Kurna language, the original language of Adelaide and the Adelaide Plains. Students will gain familiarity with the Kurna sources and will investigate Kurna in relation to neighbouring languages focussing on both linguistic and cultural ties. Students will gain an appreciation of Kurna history and of Kurna within its contemporary social context. This will include the acquisition of some facility in the language itself. The subject will include guest lecturers from Kurna elders and at least one excursion to places of significance to Kurna people.

*assessment:* 3 practical assignments; video report; tutorial presentation based on student's own research, essay or equivalent report

### **5222 Language and Environment III**

6 points semester 2

1 lecture, 1 tutorial per week

*prerequisites:* 7892/4914 Foundation of Linguistics II/III

This subject examines both the central role of human languages in the perceptions of environmental matters (language of ecology) and the nature of the environment in which such languages can survive (ecology of language). Students will learn to apply available linguistic techniques and methods to the analysis of environmental discourse and will learn

about the interdependencies between linguistic and cultural diversity. A wide range of primary English language documents will be analysed and contrasted with environmental discourse in languages other than English. Students will find out about the rapidly growing ecolinguistic literature published around the world. Topics for discussion include: Ecospeak, environmental metaphors, upgrading environmental terminology, cross-cultural discourse about environmental issues.

*assessment:* essay 50%; practical assignment 30%; 1 tutorial presentation 20%

### **6549 Language Maintenance and Language Planning III**

6 points semester 1

1 lecture, 1 tutorial per week

*prerequisites:* Foundations of Linguistics II/III

Students will be familiarised with the ecology and sociology of language approaches to language maintenance as well as the technical linguistic apparatus needed in the area of language engineering. Particular attention will be given to language planning in Australia and neighbouring countries. At the end of this course students will have an understanding of the wider ramifications of language planning and maintenance as well as skills in the area of micro language engineering

*assessment:* essay 30%; tutorial presentation or practical work 20%; exam 50%.

### **8262 Language, Cognition and Reality III**

6 points semester 2

1 lecture, 1 tutorial per week

*prerequisites:* 7892/4914 Foundation of Linguistics II/III

This subject is concerned with the role the lexical and grammatical structures of languages play in shaping their users' perceptions of reality. It will begin with the classical Sapir-Whorf hypothesis of linguistic relativity and consider more recent findings in the area of categorisation, environmental discourse and political rhetoric. Particular attention will be paid to the role of linguistic and conceptual diversity in the 21st century.

*assessment:* essay 30%; tutorial presentation 20%; exam 50%.

### **8710 Special Topic in Linguistics III**

6 points semester 2

2 lectures, 1 tutorial per week

Subject to teaching from visiting scholars

*prerequisites:* Foundations of Linguistics II/III or subject/s approved by Professor of Linguistics

This subject has been designed for students who wish to inform themselves of recent developments in theoretical or applied linguistics. It will involve the participation of distinguished visiting scholars.

*assessment:* 3000 word essay 50%; 5 assignments 50%

## **Mathematics**

### **9894 Computer Literacy**

3 points semester 1

3 lectures, 1 practical per week

*restriction:* not available for students in the B.Sc.(Ma. & Comp.Sc.) or B.Comp.Sc. Cannot be counted together with 4003 Computer Applications I, 9276 Computer Science I, 2499 Information Systems I or 6918 Scientific Computing I

This subject aims to provide a foundation for the use of computers and computer applications, gain a basic understanding of the capabilities of a computer system and to provide hands-on experience in using standard software applications (including email, word processing, spreadsheets, web and hypertext tools, databases). No programming is taught in this subject. Students are required to work in groups on a major project which is the basis of the assessment.

*assessment:* practical and written assignments

### **4425 Quantitative Methods Using Computers I**

3 points semester 1

2 lectures, 2 hour practical per week

*restriction:* Level I subject designed for Arts students, not to be counted towards any degree with 9786 Mathematics I, 3617 Mathematics IM, 4003 Computer Applications, 9276 Computer Science I or 6918 Scientific Computing

This subject will introduce students to some of the ways the computer is used in the acquisition, production and presentation of information. The course will introduce students to word processing, spreadsheets, electronic mail and databases. The first half of the course will include a hands-on introduction to word processing and the use of electronic mail for the transfer of information, including bibliographic searches, and communication between staff and students. The second half of the course will consider spreadsheets and concentrate on two of their many uses: the analysis and presentation of numerical information by graphs, tables and charts, and the creation and manipulation of databases.

*assessment:* two projects plus weekly assignments

### 4357 Mathematics IH

3 points semester 1

See B.Sc. in Faculty of Mathematical and Computer Sciences for syllabus details

### Modern Greek: Language, Culture and Literature

(available on The University of Adelaide campus, taught by Flinders University)

Note: the language at each level is for both beginners and advanced students. Students will be streamed within the topic.

#### Level I

### 6422 Modern Greek I Part 1

3 points semester 1

5 hours per week

Language consisting of section A for students who have had no formal instruction in the language - 2 hours per week in a systematic introduction to the Greek language through class interaction for gradually improving communication skills (all grammar explanations in English); or of section B for students who have had some formal instruction in the language - 2 hours per week, including a special tutorial with a computer program) of language workshops for gradually improving conversational and compositional skills based on a variety of contemporary themes such as Greek culture and its multiple contexts, culture and the media, youth issues in Greece and Australia.

All students will have 2 hours of lectures and class discussion on Greek Culture and Society as viewed by Europeans and by Greeks in Greece and Australia. Culture is discussed from the perspectives of cultural anthropology, literary studies, linguistics and history.

*assessment:* regular class assessment; culture component is based on a class project

### 4752 Modern Greek I Part 2

43 points semester 2

*prerequisites:* 6422 Modern Greek I Part 1

5 hours per week

Language at the appropriate level of either section A or B. Section A- 2 hours per week plus special tutorial with a computer programme to review the fundamental aspects of Greek grammar and introduction to the writing of simple passages, and further class interaction for the improvement of communication skills. Section B- 2 hours per week plus special tutorials in computer language laboratory as language workshops for gradually improving sentence structure, paragraph connection, and cohesion in expression based on contemporary issues, research and bibliography techniques.

All students take the culture component of 2 hours of lectures, demonstrations, discussion on Aspects of Greek culture from antiquity to the present - to include folklore and contemporary culture, language and literature, philosophy and politics.

*assessment:* Section A or B - regular class assessment; culture component - individual research projects

#### Level II

### 2579 Modern Greek II(B) Part 1

4 points semester 1

4-5 hours per week

*prerequisites:* 4572 Modern Greek I Part 2

There are two interconnected study components in this topic. Greek language, history and structural development -1 hour per week lecture plus two separate tutorials (1 hour each for two separate groups), language workshops for gradually improving conversational and compositional skills based on a variety of contemporary themes such as technology and information, environment and tourism, Greek and Australian relations.

Greek culture and society - 2 hours per week of lectures and tutorials based on current affairs dealing with a range of Greek cultural issues such as Hellenic and Christian mythology, cultural syncretism, the past in the present.

*assessment:* language - regular class assessment; Greek culture and society - class projects

### 9015 Modern Greek II(B) Part 2

4 points semester 2

4-5 hours per week

*prerequisites:* Modern Greek II Part 1

There are two interconnected study components in this topic. Greek language, structural development and contemporary use - 1 hour lecture, plus two separate tutorials (1 hour each for two separate groups) consisting of language workshops for gradually improving conversational and compositional skills based on a variety of contemporary themes, history and the modern society, Greek world diaspora and language diversity, "pop" language and culture.

Greek Culture and Society - 2 hours per week of lectures and tutorials based on varied textual material with themes such as language use and cultural identity, the influence of past to the present, the fictional writer and history.

*assessment:* language - regular class assessment; culture - class project

**Level III****1184 Modern Greek III(B) Part 1**

6 points semester 1

4-5 hours per week

*prerequisites:* Modern Greek II Part 2

There are two interconnected study components in this topic. Greek language, history and structural development - 1 hour per week lecture plus two separate tutorials (one hour each for two separate groups), language workshops for gradually improving conversational and compositional skills based on a variety of contemporary themes such as technology and information, environment and tourism, Greek and Australian relations.

Greek culture and society: 2 hours per week of lectures and tutorials based on current affairs dealing with a range of Greek cultural issues such as Hellenic and Christian mythology, cultural syncretism, the past in the present.

*assessment:* language - regular class assessment; culture - assessment is based on a class project

**6622 Modern Greek III(B) Part 2**

6 points semester 2

4-5 hours per week

*prerequisites:* Modern Greek III Part 1

There are two interconnected study components in this topic. Greek language, structural development and contemporary use - 1 hour lecture, plus two separate tutorials (1 hour each for two separate groups) consisting of language workshops for gradually improving conversational and compositional skills based on a variety of contemporary themes, history and the modern society, Greek world diaspora and language diversity, 'pop' language and culture.

Greek Culture and Society: 2 hours per week of lectures and tutorials based on varied textual material with themes such as language use and cultural identity, the influence of past to the present, the fictional writer and history.

*assessment:* language - regular class assessment; culture - based on a class projects

**Modern Greek subjects not offered in 1999****2442 Modern Greek II(A) Part 1****5504 Modern Greek II(A) Part 2**

4 points Level II

contact department for syllabus details

**5877 Modern Greek III(A) Part 1****7077 Modern Greek III(A) Part 2**

6 points Level III

contact department for syllabus details

**Philosophy**<http://chomsky.arts.adelaide.edu.au/philosophy/>

There are semester subjects offered in philosophy at all three levels. Level I subjects are offered both in the day and the evening.

As a general rule the Department requires two Level I subjects before proceeding to Level II subjects, the exception being Logic II which requires Logic I. Normally two Level II subjects are required before proceeding to Level III and this is normally recommended. See the details of Level II and of Level III subjects for exceptions to the normal requirement.

Note: subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects, please contact the department.

**Level I****6001 Argument and Critical Thinking I**

3 points semester 1

2 lectures, 1 tutorial a week

Arguments are the means by which knowledge advances. This subject aims to study arguments in an informal way, and to develop a set of theoretical tools for identifying arguments and errors in arguments. These are then applied to the study of a loose group of theories, including the Bermuda triangle, paranormal phenomena, alien abductions etc. Another aim of the subject is to develop in students the capacity to write a clear, well-structured and well-argued essay.

*assessment:* exam, essays**7743 Logic I**

3 points semester 2

2 lectures, 1 tutorial a week

*assumed knowledge:* competence in English*restriction:* 7743 Logic IH, 3037 Logic II, 4259 Logic IIIA

An introduction to modern formal logic.

*assessment:* exams

**9014 Philosophy IA: Mind, Knowledge and God**

3 points semester 2

2 lectures, 1 tutorial a week

*restriction:* 9014 Philosophy IHA

Of all the objects in the universe, the one you are most intimately acquainted with is your own mind. It is this object that enables you to sense and think about the world in which you are embedded. And yet, of all the kinds of objects in the universe, the mind is one we know least about. Why is this? What is it about the mind that has made it so resistant to scientific explanation? This subject begins with this fundamental problem, and through an examination of rationality, meaning, consciousness and the self, attempts to develop an understanding of the relationship between mind and the material world. With this as a foundation, the subject then confronts the problem of knowledge: Can we be said to know, with any degree of certainty, anything about the world in which we are embedded? The subject concludes with an examination of one of the most fundamental questions of all: Does God exist?

*assessment:* 1400-1800 word essay 40%; tutorial participation 10%; exam 50%

**5704 Philosophy IB: Morality, Society and the Individual**

3 points semester 1

2 lectures, 1 tutorial a week

*restriction:* 5704 Philosophy IHB

Ethics - is there a rational basis for morality, whether in terms of self-interest, the will of God, the demands of society, or the greatest happiness of the greatest number? Evolution and Ethics - does sociobiology throw light on human nature, and what moral implications does it have? Animal Rights. Problems of Freedom - Is there a conflict between human freedom and a law-governed nature? Is there a conflict between liberty and state authority?

*assessment:* exam 50%; tutorial participation 10%; essay 1400-1800 words 40%

**Level II**

**6769 Bioethics II**

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or passes in other subject/s approved by Head of Department

*restrictions:* 3538/1237 Moral Problems II/III

The spectacular recent advances in the life sciences and medical technology have arguably not been matched by advances in moral understanding. Indeed, new technological possibilities pose difficult moral and social choices for individuals, for society, and specifically for the medical professional. This subject aims to provide a guide to informed ethical reasoning concerning such issues as; abortion, euthanasia, in vitro fertilisation, genetic choices and eugenics, doctor-patient relations (the good physician, paternalism versus autonomy, lying to the ill, clinical trials), aging, dementia and mortality, 'repressed memory syndrome', justice and health care.

*assessment:* three essays to a total of 4800-6000 words

**8606 Cognitive Science: Minds, Brains and Computers II**

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* passes in Level I Philosophy, Psychology, Computer Science or Mathematics subjects of at least 6 points value, at least 3 points of which are at Pass Div I level or better; or alternative approved by Head of Department

This subject provides an introduction to the philosophical foundations of Cognitive Science, which is a relatively new interdisciplinary field of study that embraces aspects of philosophy, psychology, computer science and neuroscience. Topics to be discussed will include some of the following: the nature of commonsense psychology and its relevance to a mature theory of mind; the computer as a model of the mind; classical and connectionist computational theories of cognition; computational models of consciousness.

*assessment:* essays to a total of 4800-6000 words, tutorial participation

**2593 Evolution, Ethics and the Meaning of Life II**

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or any other subject/s approved by Head of Department

*restrictions:* 2593/7193 Human Nature & Values II/III

What bearing does the fact of our evolution have on our understanding of ourselves? This subject will explore this general question by considering the impact of biology on the development of human nature. In doing so it will confront the highly contentious debate between evolutionary psychologists (the new

sociobiologists) and social theorists about the respective roles of genes and culture in making us the way we are. The general aim of the subject will be to consider whether there is anything in our biological nature that can form the foundation of a naturalised approach to ethics, values, and even the meaningfulness of life.

*assessment:* essays to a total of 4800-6000 words and tutorial participation

### 3037 Logic II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* Pass Div I in 7743 Logic I, or 8575 Discrete Mathematics or 9276 Computer Science I, or equivalents or permission of Head of Department. Students without Logic I must consult the course coordinator before lectures begin, for preliminary reading. Having passed Logic II, such students are not permitted subsequently to take Logic I

*restriction:* 9286 Logic II, 4259 Logic IIIA

Standard first-order logic and its meta-theory. Topics from the philosophy of logic.

*assessment:* exam, essay - attendance at lectures and tutorials is required.

### 4245 Moral and Social Philosophy II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or passes in other subject/s approved by Head of Department, or a pass in any two of: 7427 History of Political Thought (A) II, or 6148 History of Political Thought (B) II, or 6795 History of Political Thought (A) III, or 8361 History of Political Thought (B) III; or a pass in 5353 Problems of Political Philosophy II or 6643 Problems of Political Philosophy III or 1867 Justice Law and the State

The moral theories of Hume and Kant; theories of social justice. Topics include - concepts of equality and rights; John Rawls and egalitarian liberalism; Robert Nozick and libertarian justice; is reverse discrimination just? the liberal/communitarian debate; multiculturalism, group rights and the politics of recognition; the rights of indigenous peoples.

*assessment:* three essays to a total of 4800-6000 words

### 9946 Philosophy of Religion II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or any other subject/s approved by Head of Department

*restriction:* 5525 Philosophy of Religion except with the permission of Department

Miracles, arguments for God's existence, religious experience, faith and knowledge, God and evil.

*assessment:* 2 essays to a total of 4600-54000 words, tutorial assessment

### 4549 Reality, Truth and Meaning II

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div I in 3 of those points, or any other subject/s approved by Head of Department

*restrictions:* 4549/2915 Issues in the Philosophy of Language II/III

This subject will examine the interrelated issues of truth, reference and meaning from a primarily analytical perspective. Key concepts will include truth-conditions, realism and naturalism. It will also devote some time to comparative critical discussion of rival structuralist and hermeneutical approaches to language and meaning.

*assessment:* tutorial participation, 2500 word essay, take home exam

### 5902 Theory of Knowledge II

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* either passes in Level I Philosophy subjects to the value of 6 points, with a Pass Div. I in 3 of those points, or any other subject/s approved by Head of Department

*restriction:* 7594/6570 Knowledge and Language II and III

This subject covers some of the main topics in Epistemology, ie that part of Philosophy concerned with the nature of knowledge and the justification of belief. The topics covered will include: scepticism - the denial that there is any knowledge of, or even justified belief about, the facts of existence; relativism - the denial that there are facts of existence to know about; knowledge - the various attempts to explain what is meant by saying that someone knows that something is so; justification - the various theories

about what it is that justifies, supports, or confirms belief; the problem of the a priori - the problem of explaining how some propositions, eg logical truths, can be regarded as known independently of experience; and Hume's sceptical problem about induction or scientific inference. While mainly on contemporary thinking about these problems, the subject will include historical material, and students with historical interests will be able to do at least two of the three essays on such material.

*assessment:* essays to a total of 4800-6000 words

### Level III

#### 9760 Bioethics III

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level II Philosophy subjects to the value of 8 point; or a credit in Level II Philosophy to the value of 4 points; or passes in other subject/s approved by Head of Department; or completion of at least one year of any degree in the Faculty of Medicine, or completion of any degree

*restrictions:* 3538/1237 Moral Problems II/III

The spectacular recent advances in the life sciences and medical technology have arguably not been matched by advances in moral understanding. Indeed, new technological possibilities pose difficult moral and social choices for individuals, for society, and specifically for the medical professional. This subject aims to provide a guide to informed ethical reasoning concerning such issues as; abortion, euthanasia, in vitro fertilisation, genetic choices and eugenics, doctor-patient relations (the good physician, paternalism versus autonomy, lying to the ill, clinical trials), aging, dementia and mortality, 'repressed memory syndrome', justice and health care.

*assessment:* three essays to a total of 7500-9000 words

#### 5086 Cognitive Science: Minds, Brains and Computers III

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level II Philosophy subjects to the value of 8 points; or a credit in a Level II Philosophy subject to the value of 4 points; or passes in Level II Psychology, Computer Science or Mathematics subjects of at least 8 points value; or other subjects approved by Head of Department

This subject provides an introduction to the philosophical foundations of Cognitive Science, which is a relatively new interdisciplinary field of study that embraces aspects of philosophy, psychology, computer science and neuroscience. Topics to be discussed will include some of the following: the nature of

commonsense psychology and its relevance to a mature theory of mind; the computer as a model of the mind; classical and connectionist computational theories of cognition; computational models of consciousness.

*assessment:* essays to a total of 7500-9000 words, tutorial participation

#### 7193 Evolution, Ethics, and the Meaning of Life III

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level II Philosophy subjects to the value of 8 points, or a credit in a level II Philosophy subject, or any other subject/s approved by Head of Department

*restrictions:* 2593/7193 Human Nature & Values II/III

What bearing does the fact of our evolution have on our understanding of ourselves? This subject will explore this general question by considering the impact of biology on the development of human nature. In doing so it will confront the highly contentious debate between evolutionary psychologists (the new sociobiologists) and social theorists about the respective roles of genes and culture in making us the way we are. The general aim of the subject will be to consider whether there is anything in our biological nature that can form the foundation of a naturalised approach to ethics, values, and even the meaningfulness of life.

*assessment:* essays to a total of 7500-9000 words and tutorial participation

#### 4259 Logic IIIA

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* 3037 Logic II or 5780 Logic III or, with the permission of the Head of Department, an equivalent background. Students without a pass in Logic II must consult the subject coordinator before lectures begin for preliminary reading. Students who pass Logic IIIA are not permitted to take Logic I.

*restriction:* Logic III before 1989

Infinite sets, computability, first-order logic, non-classical logic, philosophical aspects of logic, mathematics and computing.

*assessment:* essay, exam

**5213 Moral and Social Philosophy III**

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level II Philosophy subjects to the value of 8 points, or a credit in a Level II Philosophy subject to the value of 4 points, or any other subjects approved by the Head of Department, or a pass in any two of 7427 History of Political Thought (A) II, or 6148 History of Political Thought (B) II or 6795 History of Political Thought (A) III or 8361 History of Political Thought (B) III; or a pass in 5353 Problems of Political Philosophy II, or 6643 Problems of Political Philosophy III, or 1867 Justice, Law and the State

The moral theories of Hume and Kant; theories of social justice. Topics include - concepts of equality and rights; John Rawls and egalitarian liberalism; Robert Nozick and libertarian justice; is reverse discrimination just? the liberal/ communitarian debate; multiculturalism, group rights and the politics of recognition; the rights of indigenous peoples.

*assessment:* three essays to a total of 7500-9000 words

**7173 Philosophy of Religion III**

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level II Philosophy subjects to the value of 8 points, or a credit in a Level II Philosophy subject to the value of 4 points, or any other subject/s approved by Head of Department

*restriction:* 5525 Philosophy of Religion except with the permission of the Head of Department

Miracles, arguments for God's existence; religious experience, faith and knowledge, God and evil.

*assessment:* 2 essays to a total of 6800-8000 words and tutorial assessment.

**2915 Reality, Truth and Meaning III**

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* either passes in Level II Philosophy subjects to the value of 8 points, or a credit in a level II Philosophy subject, or any other subject/s approved by Head of Department

*restrictions:* 4549/2915 Issues in the Philosophy of Language II/III

This subject will examine the interrelated issues of truth, reference and meaning; from a primarily analytical perspective. Key concepts will include truth-conditions, realism and naturalism. It will also devote some time to comparative critical discussion of rival

structuralist and hermeneutical approaches to language and meaning.

*assessment:* tutorial participation, 2 x 3500-4000 word essays

**1415 Theory of Knowledge III**

6 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* either passes in Level II Philosophy subjects to the value of 8 points, or a credit in a Level II philosophy subject to the value of 4 points, or other subject approved by Head of Department

This subject covers some of the main topics in Epistemology, ie that part of Philosophy concerned with the nature of knowledge and the justification of belief. The topics covered will include: scepticism - the denial that there is any knowledge of, or even justified belief about, the facts of existence; relativism - the denial that there are facts of existence to know about; knowledge - the various attempts to explain what is meant by saying that someone knows that something is so; justification - the various theories about what it is that justifies, supports, or confirms belief; the problem of the a priori - the problem of explaining how some propositions, eg logical truths, can be regarded as known independently of experience; and Hume's sceptical problem about induction or scientific inference. While mainly on contemporary thinking about these problems, the subject will include historical material, and students with historical interests will be able to do at least two of the three essays on such material.

*assessment:* essays to a total of 7500-9000 words

**Cross Listed Subjects**

The Philosophy Department wishes to inform students that in addition to these subjects, the Department cross-lists two subjects from other Adelaide Departments (Foundations of Chinese Thought 11/111, Asian Studies, and Ancient Philosophy 11/111, Classics), and two subjects from Flinders Philosophy (Gender and Power, and Self and Subjectivity). All these subjects may be taken as part of a Philosophy major and count toward the minimum 24 point requirement for entry into the Honours program. (However, for a restriction see below under Honours Philosophy).

## Honours

### 3315 Honours Philosophy

24 points full year

*prerequisites:* except with permission of Department, a minimum 24 points of Philosophy subjects, including 12 points at Level III at an average of 70% or more. (Logic IIIA may be counted as a 6 point Level III subject for this purpose)

Note: in the event that a student is taking one or two of Foundations of Chinese Thought III and Ancient Philosophy III, then the entry requirement, that a student shall obtain an average of at least 70% in two designated third year Philosophy subjects, is interpreted to mean that at least one of those two designated subjects shall be a subject taught in a Philosophy Department, and the student must have at least 70% in that subject, as well as an average of 70% in both subjects.

There is no Logic prerequisite for the Honours year, but Honours courses occasionally require a knowledge of logic to at least Level I. Prospective Honours students are therefore encouraged to take 7743 Logic I. Prospective honours students are advised that at least one honours option must be in a metaphysics/epistemology area, and at least one in a moral/social area; so that students should have included at least 4 points from each area in second or third year subjects as preparation. This should be discussed with the Honours coordinator in third year. Honours Philosophy is organised jointly with the Philosophy Department at Flinders University and some courses will be offered by that Department.

The Honours program comprises three semester-length subjects and a thesis. Prospective Honours students should consult with the Head of the Department before the end of January.

*assessment:* 3 x 5000-6000 word essays; 8000 word thesis

The Philosophy Department also offers specialist Honours programs in Logic and Cognitive Science. Entry requirements differ from those specified above. For further information consult the Department.

### Physics for the degree of Bachelor of Arts

#### 2934 Physics, Ideas and Society I

3 points semester 2

2 lectures, 1 tutorial a week

This subject is non-mathematical in character and no previous knowledge of physics is assumed. It is intended primarily for students of the humanities and social sciences and is taught in the style of those disciplines. 2934 Physics, Ideas and Society I is designed to provide an understanding of some of the principal ideas of physics and of the scientific background to some of the philosophical, political and social issues that confront society.

Topics to be selected from the following - physics and its laws; the fundamental constituents of matter; energy and the earth; space, time and relativity; the universe.

*assessment:* essays, tutorial work

### Politics

<http://chomsky.arts.adelaide.au/politics/>

Where the same options are offered at more than one level, either at Level I and II, or Level II and III, students undertaking options at the higher level will be required to undertake additional work in those options. It is also advisable to check the Politics Departmental notice board to make sure that there have been no late changes made to subjects and their availability.

Subjects are not available to students with exemption from lectures.

**Note:** subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects, please contact the department.

**Level I****8429 An Introduction to International Politics I**

6 points full year  
2 lectures, 1 seminar per week

This subject provides an entry for the various upper level subjects in the field. It surveys the history of the interstate system since Westphalia and intellectual inquiries and controversies about it. It then looks at recent developments in the international system, particularly since the end of the Cold War, and in the Asia-Pacific, South Asia, Middle East and European areas, and the role of the most powerful state, the USA. It also examines the foreign policies of the major powers of Europe and Asia and the leading issues of the day for international organisations including the UN, the World Trade Organisation, APEC, ASEAN and the European Union. It concludes with an examination of Australian foreign policy from its emergence as a sovereign state to the more recent controversies about Australia's appropriate terms of engagement with Asia involving Human Rights and economic integration. A subject guide is attached.

*assessment:* 2 x 2500-3000 word essays 50%; 2 x 1000-1500 word tutorial papers 35%; tutorial presentations and discussion 15%

**3291 Australian Politics I**

6 points full year  
2 lectures, 1 tutorial a week

*restriction:* P712 Liberal Democracy in Australia or 5270 Australian Politics prior to 1989

The subject will focus on the nature of the Australian political system in its social, cultural and economic context. It covers recent issues and students will be introduced to relevant theoretical debates in a range of areas. Topics covered include: national identity, political culture, governmentality, political parties, pressure groups, trade unions, business organisations, environmental issues, the media, class, gender, race, ethnicity, the impact of economic globalisation, new information technology and the developing information economy. A wide range of politicians, journalists and social commentators agree that Australians will continue to face unprecedented social, economic and political changes as we approach the twenty-first century. Consequently, a major focus will be on the processes of change and political responses to them.

*assessment:* tutorial participation 10%, 2 x 1000-1500 word tutorial papers 30%; 2 x 2500-3000 word essays (or substitute optional 3 hour exams for essays) 60%

**6266 Justice, Law and Society I**

3 points semester 2  
2 lectures, 1 tutorial per week

*restriction:* Justice Law and the State I

The aim of this subject is to introduce students to fundamental issues in political theory through an examination of the nature of justice and the interrelationship between morality, law and politics in liberal-democratic societies. All societies need rules. But what constitutes a just law and why? In examining this question students explore different theoretical approaches to issues central to our notions of justice such as human rights, equality and freedom, while examining their role in various political and legal debates like drug legislation, affirmative action, censorship, and euthanasia. The second half of this subject focuses on the issue of punishment. Although all societies have law-breakers, it is the question of how we should punish them and why which is crucial to theories of justice. We study the nature and purpose of prisons, the death penalty, war crimes trials and whether or not we have the right to rebel against unjust laws.

*assessment:* participation 15%; 1500-2000 word minor essay 35%; 2500-3000 word major essay 50%

**Level II****5289 Anarchism and Libertarianism II**

4 points semester 2  
2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject will study the emergence and development of anarchism as a political theory of the community. Its grounds for opposing liberal-democracy, capitalism and Marxism will be examined. The tradition of libertarianism with its emphasis on the minimal state and competitive individualism will also be examined. Topics to be covered: Anarchism and Liberalism; the Problem of Authority; Autonomy and Community; Co-operation versus Competition; Anarchist Theories of Property; the State and Political Power; Anarchism and Marxism; Anarchy and Utopia; Violence and Pacifism; the Spanish Experience; Anarchism and the Russian Revolution; Anarchism and Ecology; Anarchism, Art and Architecture; Anarchism and Post-modernism; the Libertarians and the Free Individual; the Market and the Individual; Liberty, the State and the New Right.

*assessment:* essays, tutorial papers

### 8363 Comparative Politics (B) II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* Comparative Politics B II/III in 1998

With the steep rise in the internationalisation of finance, manufacture, communications and culture, bringing with it terms such as 'globalisation', 'global village', 'boundary-less world', the study of comparative politics has become more difficult. Such processes have made traditional approaches involving using the state and discrete -- often idiosyncratic -- systems of government appear less valuable. More recent approaches have focussed on societies instead, examining how well they absorb, or cope with, the process of internationalisation. But here again, thinkers in a variety of international settings, when told to 'think globally, act locally', often ask the questions: 'whose thought, and how to act locally?' Depending on whether it is an extremist Russian nationalist, the head of a large American corporation, or Muslim-Modernist Malaysian, the answers to these questions may be quite different. Looking at a variety of countries and cultures, this subject looks at the strengths and weaknesses of a number of approaches to the study of comparative politics, and asks if there is a suitable comparative approach in politics in an age of globalisation/internationalisation.

*assessment:* essay, tutorial papers

### 8089 Comparative Politics (A) II

4 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* Comparative Politics A II/III in 1998

The Northeast Asian region (made up of the People's Republic of China, Japan, Russian Far East, the Koreas, Taiwan [the Republic of China] and the Hong Kong-SAR) offers a rich groundwork for the study of comparative politics and the use of a comparative technique. Overlapping ancient cultures, conflicting interests and ideologies, a long history of relations (at times harmonious, but as often ones based on rivalry and conflict), interplay of East and West, significant economic growth patterns in the post-war era, all of these features contribute to making this one of the more intriguing regions for scholars to study and to understand (as indeed the current economic crisis gripping the large portions of Northeast Asia has shown). In addition, it is intended to give students a foundation in area studies, introduce them to the major political and economic themes present in the region, and, finally, to invite them to ask the question: 'what is regionalism?'

### 9333 Conflict and Change: Contemporary African Politics II

4 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* Politics of Trade and Development B II/III

In considering the politics of the newly independent states of Africa and the South Pacific, two features stand out: the speed and spread of change (often sudden and unexpected) and the wide scope for comparative analysis. Change does not imply development: traditional concepts of political science do not necessarily carry the same meaning. The 'developed' political process based on a multi-party system as an essential feature of constitutional democracy had been, in some African states, viewed as incompatible with African needs and aspirations: thus, the rise of the 'democratic one-party state'. However, the 1990's have renewed debates about governance and politics in Africa. Initial theoretical and empirical-based interpretations have proven vulnerable in the face of change. This subject will attempt to expose students to some major patterns of contemporary politics in both East Africa and the South Pacific.

*assessment:* tutorial participation 20%; first essay 30%; second essay 50%

### 7756 Contemporary Europe A II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* Politics and Society in Western Europe I/II

This subject examines contemporary western Europe. It studies the key political and institutional systems that have shaped the nations of western Europe since 1945 and explains the dominance of the west and the emergence of the European Union. Particular attention is paid to locating recent developments in their historical context and explaining the social patterns of modern Europe. Topics covered include: national integrity, the nation state, the rise of nationalism and the development of modern political culture, political systems, systems of government, elections and party systems, social and economic structures, and the rise and implications of the European Union.

*assessment:* minor essay of 1500-2000 words 30%, major essay of 2500-3000 words 50%, tutorials 20%

**9381 Contemporary Europe B II**

4 points semester 2

See entry under European Studies for syllabus details

**3456 Culture, Globalisation and Power II**

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences*restriction:* Culture and Imperialism II/III prior to 1999

This subject will aim at a study of the postcolonial world and of the effects of imperialism upon the development of culture and ideology. A key theoretical perspective will be that deriving from works of Edward Said, in particular, *Orientalism* and *Culture and Imperialism*. The subject will be wide ranging in its scope and will take examples from both the developed, as well as the developing world. However, a prime area of study will be the countries of the African continent.

*assessment:* coursework, tutorial participation.**7427 History of Political Thought (A) II**

4 points semester 1

2 hour seminar, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences*restriction:* 8044 History of Political Thought pre-1989

The subject examines the recurring ideas and problems of Western political thought, from the classical Greek schools to the rise of 'modern' political theory in the thought of Machiavelli. Major themes: 1. the relationship between philosophy and politics, the aims of political community and the nature of 'the good life'; 2. foundations of justice and law in nature and convention; 3. Judeo-Christian concepts of sovereignty and secular order; 4. Machiavellian and Renaissance conceptions of the state.

*assessment:* 2 essays 80%; tutorial work 20%**3114 Late 20th Century Political and Social Thought II**

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences*restriction:* *Passing the Post: Contemporary Thinkers and Thought II/III*

This subject will focus on the major intellectual movements of the second half of the twentieth century. It will commence with an overview of the mid-century scene and proceed, through a discussion of the

philosophy of existentialism, to examine those major iconoclastic movements that have used the term 'post' to signal the nature of their project. A focus will be on the subjective and the as key elements in the development of contemporary social and political philosophy. Ideas and movements to be critically examined and discussed will include existentialism, post-Marxism, post-structuralism, post-modernism, post-feminism and post-colonialism. Attention will also be paid to new directions on the left, including the civil society debate, the market socialism debate and the debate over the ecological crisis. Philosophers and theorists whose views will be critically addressed will include Friedrich Nietzsche, Martin Heidegger, Jean-Paul Sartre, Jacques Derrida, Michel Foucault, Jean Baudrillard, Jean-François Lyotard, Edward Said, Camille Paglia and Francis Fukuyama.

*assessment:* tutorial paper 15%, minor essay 35%, major essay 50% totalling 6000 words**5874 Politics and Art II**

4 points semester 2

1 lecture, 2 hour seminar per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

Art and politics are rivals for a society's allegiance. Solzhenitzen called the artist 'a foreign government in the heart of a nation'. Both politics and art thrive on conflict and produce charismatic, powerful leaders. Appealing to passions, sublime ideals and impossible dreams, both aspire to re-create the visible world. Art proclaims nature and beauty as its ideals, yet the artist is often seen as an outsider, a decadent, corrupting influence that subverts morality and distorts natural sentiments. 'In art,' said Camus, 'rebellion is consummated and perpetuated in the act of real creation.' These dangers have led governments to imprison artists, or enlist them as 'servants' of the state to propagate political ideas to the masses. Recent critics have argued that art is not an innocent luxury or a playful engagement with beauty, but is in fact a powerful tool used to control perceptions, determine values and shape our bodies.

Classical, modern and postmodern theories of art and aesthetics will be used to discuss artistic creation, the experience of 'art objects,' and the effects of art on contemporary society and culture. The S.A. Gallery of Art, exhibitions and performances will be used as practical, eye-opening contexts for understanding theoretical and critical perspectives.

*assessment:* 1000 word review; 3000 word essay; seminar demonstration and participation

**8801 Politics, Power and Popular Culture II**

4 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject will introduce students to the processes of globalisation and its relationship to local politics. The subject seeks to investigate the modes of political power and the manner by which these are represented within the media and popular culture. The subject will examine, from a uniquely political perspective, issues of gender, race, class and ethnicity in several different genres; television, sport, film, theatre, art and literature.

*assessment:* by two papers to a total of 5500 words and by a participation mark

**1280 Public Policy in Australia II**

8 points full year

3 hours per week or the equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject will examine public policy from a variety of perspectives, beginning with the traditional notion of public policy as simply what governments do in Australia, through to post-structuralist and postmodernist appraisals of what is public policy and what it represents. The subject will also address contemporary political concerns such as abortion, land rights, environmental protection, privatisation, equal opportunities, multiculturalism, law reform, race relations, Australian identity, health care and globalisation. The subject aims to relate the theoretical debates to examples of policy making such as cultural policy and media policy (Australian content), environmental policy, Aboriginal policy, health policy, Affirmative Action, sexual harassment, education policy, child care, economic policy and the global economy. Students will be expected to develop a policy issue that interests them and present it at a conference at the end of the second semester.

*assessment:* by four papers to a total of 10,000 words and by a participation mark.

**3503 Sex, Gender and Politics II**

4 points semester 1

3 hours per week or equivalent

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restriction:* 1652 Women, Power and Politics II; 4683 Power and Politics III

All too often 'politics' is understood as something to do with elections. Indeed, 'politics', 'political institutions',

'political obligations and participation' (citizenship), and even 'political activism/struggle' are traditionally conceived in terms of a relationship between a people and their government. However, as an academic discipline, politics may be far more broadly defined as concerned with the dynamics of power. In this context, it is increasingly obvious in contemporary thought that the arenas of sex and gender challenge traditional, narrow conceptions of politics as merely a matter of studying 'the state'. This subject provides an introduction to the range of contemporary debates about the significance of sex and gender, and how they change what is understood as the field of 'the political'.

The subject will consider certain terms and frameworks (such as postmodernism, feminism and studies of masculinities); areas like 'sexology', scientific accounts of sex, reproduction, sexual identities, the regulation of the body/desire; the gendered state and citizenship, intersections between sex and race, sex and the workforce, and forms of struggle associated with sex/gender relations; legal/policy questions such as censorship, sexual 'deviance', sexual law reform, anorexia, surrogacy and AIDS.

*assessment:* two essays to a total of 5000 words and a participation mark

**1886 The Political Economy of the 'Global Village' II**

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject explores a contemporary paradox. It is inescapably evident that international trends are drawing separate national economies such as Australia's ever more tightly into a single global market. At the same time we are witnessing the unprecedented assertion of separate identity by hitherto suppressed and marginalised ethnic groups, regions, communities, genders and subjects. In studying this apparent contradiction we will examine the forces which are driving globalisation, including the media, information technology, environmental changes, multinational enterprises, and travel. We will consider whether increasing globalisation is leading to a diminishing role for national governments and whether more global forms of government are inevitable. The social impact on local communities—especially on marginal groups such as indigenous peoples and women—of global economic pressures to restructure, or undertake structural adjustment will also be explored. We will also look at prominent examples of the assertion of local identity and culture. Religious fundamentalism and violent localism will be explored.

The Internet will be a central metaphor and a point of reference for work in the subject - fusing the global and the local - and will be used as a channel of discourse and tool of empowerment for the culturally marginal.

*assessment:* tutorial participation 20%; first essay 30%; second essay 50%

### Level III

#### 5446 Anarchism and Libertarianism III

6 points semester 2

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject will study the emergence and development of anarchism as a political theory of the community. Its grounds for opposing liberal-democracy, capitalism and Marxism will be examined. The tradition of libertarianism with its emphasis on the minimal state and competitive individualism will also be examined. Topics to be covered: Anarchism and Liberalism; the Problem of Authority; Autonomy and Community; Co-operation versus Competition; Anarchist Theories of Property; the State and Political Power; Anarchism and Marxism; Anarchy and Utopia; Violence and Pacifism; the Spanish Experience; Anarchism and the Russian Revolution; Anarchism and Ecology; Anarchism, Art and Architecture; Anarchism and Post-modernism; the Libertarians and the Free Individual; the Market and the Individual; Liberty, the State and the New Right.

*assessment:* essays, tutorial papers

#### 1738 Comparative Politics (B) III

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* Comparative Politics B II/III in 1998

With the steep rise in the internationalisation of finance, manufacture, communications and culture, bringing with it terms such as 'globalisation', 'global village', 'boundary-less world', the study of comparative politics has become more difficult. Such processes have made traditional approaches involving using the state and discrete -- often idiosyncratic -- systems of government appear less valuable. More recent approaches have focussed on societies instead, examining how well they absorb, or cope with, the process of internationalisation. But here again, thinkers in a variety of international settings, when told to 'think globally, act locally', often ask the questions: 'whose thought, and how to act locally?' Depending on whether it is an extremist Russian nationalist, the head of a large American corporation, or Muslim-Modernist Malaysian, the answers to these

questions may be quite different. Looking at a variety of countries and cultures, this subject looks at the strengths and weaknesses of a number of approaches to the study of comparative politics, and asks if there is a suitable comparative approach in politics in an age of globalisation/internationalisation.

### **1602 Late 20th Century Political and Social Thought III**

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* Passing the Post: Contemporary Thinkers and Thought II/III

This subject will focus on the major intellectual movements of the second half of the twentieth century. It will commence with an overview of the mid-century scene and proceed, through a discussion of the philosophy of existentialism, to examine those major iconoclastic movements that have used the term 'post' to signal the nature of their project. A focus will be on the subjective and the as key elements in the development of contemporary social and political philosophy. Ideas and movements to be critically examined and discussed will include existentialism, post-Marxism, post-structuralism, post-modernism, post-feminism and post-colonialism. Attention will also be paid to new directions on the left including the civil society debate, the market socialism debate and the debate over the ecological crisis. Philosophers and theorists whose views will be critically addressed will include Freidrich Nietzsche, Martin Heidegger, Jean-Paul Sarte, Jacques Derrida, Michel Foucault, Jean Baudrillard, Jean-François Lyotard, Edward Said, Camille Paglia and Francis Fukuyama.

*assessment:* tutorial paper 15%, minor essay 35%, major essay 50%, totalling 8000 words

**2786 Politics and Art III**

6 points semester 2

1 lecture, 2 hour seminar per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

Art and politics are rivals for a society's allegiance. Solzhenitzen called the artist 'a foreign government in the heart of a nation.' Both politics and art thrive on conflict and produce charismatic, powerful leaders. Appealing to passions, sublime ideals and impossible dreams, both aspire to re-create the visible world. Art proclaims nature and beauty as its ideals, yet the artist is often seen as an outsider, a decadent, corrupting influence that subverts morality and distorts natural sentiments. 'In art,' said Camus, 'rebellion is consummated and perpetuated in the act of real creation.' These dangers have led governments to imprison artists, or enlist them as 'servants' of the state to propagate political ideas to the masses. Recent critics have argued that art is not an innocent luxury or a playful engagement with beauty, but is in fact a powerful tool used to control perceptions, determine values and shape our bodies.

Classical, modern and postmodern theories of art and aesthetics will be used to discuss artistic creation, the experience of 'art objects,' and the effects of art on contemporary society and culture. The S.A. Gallery of Art, exhibitions and performances will be used as practical, eye-opening contexts for understanding theoretical and critical perspectives.

*assessment:* 2 x 1000 word reviews; 4000 word essay; seminar demonstration and participation

**6945 Politics, Power and Popular Culture III**

6 points semester 2

3 hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject will introduce students to the processes of globalisation and its relationship to local politics. The subject seeks to investigate the modes of political power and the manner by which these are represented within the media and popular culture. The subject will examine, from a uniquely political perspective, issues of gender, race, class and ethnicity in several different genres, television, sport, film, theatre, art and literature.

*assessment:* 2 papers totalling 7500 words, participation

**9796 Public Policy in Australia III**

12 points full year

3 hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject will examine public policy from a variety of perspectives, beginning with the traditional notion of public policy as simply what governments do in Australia, through to post-structuralist and postmodernist appraisals of what is public policy and what it represents. The subject will also address contemporary political concerns such as abortion, land rights, environmental protection, privatisation, equal opportunities, multiculturalism, law reform, race relations, Australian identity, health care and globalisation. The subject aims to relate the theoretical debates to examples of policy making such as cultural policy and media policy (Australian content), environmental policy, Aboriginal policy, health policy, Affirmative Action, sexual harassment, education policy, child care, economic policy and the global economy. Students will be expected to develop a policy issue that interests them and present it at a conference at the end of the second semester.

*assessment:* by four papers to a total of 15,000 words and by a participation mark.

**7707 Sex, Gender and Politics III**

6 points semester 1

3 hours per week or equivalent

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences*restriction:* 1652/4683 Women Power & Politics II/III

All too often 'politics' is understood as something to do with elections. Indeed, 'politics', 'political institutions', 'political obligations and participation' (citizenship), and even 'political activism/struggle' are traditionally conceived in terms of a relationship between a people and their government. However, as an academic discipline, politics may be far more broadly defined as concerned with the dynamics of power. In this context, it is increasingly obvious in contemporary thought that the arenas of sex and gender challenge traditional, narrow conceptions of politics as merely a matter of studying 'the state'. This subject provides an introduction to the range of contemporary debates about the significance of sex and gender, and how they change what is understood as the field of 'the political'.

The subject will consider certain terms and frameworks (such as postmodernism, feminism and studies of masculinities); areas like 'sexology', scientific accounts of sex, reproduction, sexual identities, the regulation of the body/desire; the gendered state and citizenship, intersections between

sex and race, sex and the workforce, and forms of struggle associated with sex/gender relations; legal/policy questions such as censorship, sexual 'deviance', sexual law reform, anorexia, surrogacy and AIDS.

quota will apply

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

As a central part of this subject students will have the opportunity to spend a short time as 'interns' working within specified areas of the South Australian public sector, while completing an agreed research task. Students will be allocated placements from among a range of offerings which include members of State parliament, public service departments, statutory authorities and other non-government organisations.

Final placement will depend upon availability and the application of an internal quota. In order to complete the process of placement allocation, students should finalise their enrolment by the completion of the normal enrolment period.

The first half of the subject deals with a study of these institutions and their place in the broader political system. During the second half of the semester students complete their internship placement while working on a specific research project.

*assessment:* 2000 word essay 20%; 5000-7000 word major research paper. 80%

**2979 The Political Economy of the 'Global Village' III**

6 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject explores a contemporary paradox. It is inescapably evident that international trends are drawing separate national economies such as Australia's ever more tightly into a single global market. At the same time we are witnessing the unprecedented assertion of separate identity by hitherto suppressed and marginalised ethnic groups, regions, communities, genders and subjects. In studying this apparent contradiction we will examine the forces which are driving globalisation, including the media, information technology, environmental changes, multinational enterprises, and travel. We will consider

whether increasing globalisation is leading to a diminishing role for national governments and whether more global forms of government are inevitable. The social impact on local communities—especially on marginal groups such as indigenous peoples and women—of global economic pressures to restructure, or undertake structural adjustment will also be explored. We will also look at prominent examples of the assertion of local identity and culture. Religious fundamentalism and violent localism will be explored.

The Internet will be a central metaphor and a point of reference for work in the subject - fusing the global and the local - and will be used as a channel of discourse and tool of empowerment for the culturally marginal.

*assessment:* tutorial participation 20%; first essay 30%; second essay 50%

**Honours**

**5442 Honours Politics**

24 points full year

quota may apply

*prerequisites:* at least Credit standard in required major sequence (8 points at Level II; 12 points at Level III).

There is a preliminary Honours meeting in November of each year where applications will be available. Please check Departmental Noticeboard for date of meeting, which will also be announced in lectures.

## Psychology

<http://www.psychology.adelaide.au>

A four-year sequence of study in Psychology is available which has received provisional accreditation by the Australian Psychological Society as meeting the requirements for Associate Membership of the Society, and which has been accepted by the S.A. Psychological Board as fulfilling its requirements with respect to formal study in Psychology as specified in the Psychological Practices Act in this State.

However, in order to comply fully with the accreditation requirements of the Australian Psychological Society, candidates wishing to be eligible for entry into Honours Psychology in the year 2000 and beyond will need to complete a total of at least 24 points of Psychology subjects at level II and level III combined. The subject, 4416 Psychological Research Methodology II is to be taken in conjunction with 5486 Psychology II (new) as prerequisites for the level III subjects and Honours Psychology. The subject 5846 Psychology II (new) may be taken alone by those not wishing to proceed to level III Psychology.

Candidates who have completed the undergraduate programme in Psychology before 1999 and who wish to apply for entry into Honours Psychology in 2000 or later may take further subjects at level III to the value of 4 points to make up the requirement

The accredited sequence consists of 5104 Psychology I; 5486 Psychology II (new) and 4416 Psychological Research Methodology II; a selection of subjects at level III which must include 3170 Psychological Research Methodology III to a total of at least 12 points; and 4702 Honours Psychology. Those not intending to take Psychology beyond level II may take 5104 Psychology I and 5486 Psychology II (new) without 4416 Psychological Research Methodology II.

Note: subjects unavailable in 1999 are listed for information. For syllabus details and future availability of these subjects, please contact the department.

## Level I

### 5104 Psychology I

6 points full year

3 lectures per week; either 1 tutorial or 1 hour practical work in most weeks

quota may apply

*assumed knowledge:* qualification for entry into Year 12 Mathematics IS and satisfactory achievement at Year 12 level in a literary subject using English.

This subject aims to provide an introductory overview of contemporary psychology by considering a representative range of psychological topics of current interest and to equip students for further study of psychology. The topics that may be covered include innate behaviour, conditioning, intelligence, personality, cognitive psychology, developmental psychology, language, social psychology, abnormal psychology, the biological bases of behaviour, and elementary descriptive statistics. The scientific study of human mental processes and human and animal behaviour is introduced, with emphasis on objective enquiry, problem solving and effective communication. On successful completion, students will have basic knowledge in specific topics covered, together with skills in research methods and in evaluating psychology knowledge claims.

*assessment:* approximately equal marks to assignments through the year and end of semester examinations

## Level II

### 4416 Psychological Research Methodology II

4 points semester 2

2 lectures, workshop each week; occasional practicals

*prerequisites:* 5104 Psychology I

*corequisite:* 5846 Psychology II (new)

*restriction:* not available to students who have completed, or are currently enrolled in, 3170 Psychological Research Methodology III

The subject presents an introduction to current approaches to enquiry in psychology. It considers the relative merits and shortcomings of these approaches and attempts to locate them within a broad framework of epistemological understanding. Consideration will be given to methods ranging from the interpretive to the experimental and to appropriate procedures for analysing and drawing conclusions from the data they produce. The use of computer-based methods and packages for the treatment of both textual and numerical data will be emphasised.

*assessment:* 4 practical exercises 50%, exam 50%

### 5846 Psychology II (new)

8 points full year

3 lectures per week; 1 seminar sequence (6 sessions); practical exercise each semester

*prerequisites:* 5104 Psychology I

The subject is oriented towards the controlled study of human and animal behaviour, both individual and social, and is concerned also with the possibilities for the wider application of contemporary psychological theories. Specialised seminar sequences allow some choice of additional topics.

*assessment:* equal marks to assignments through the year, end of semester examinations

## Level III

At the third year level, 3170 Psychological Research Methodology (4 points) and a set of 2 point-subjects will be offered to cover a range of topics in Psychology. These are organised into two groups. The range of subjects to be offered in any year will be subject to the availability of staff and other necessary resources.

Group A: 3650 Applied Behaviour Change and Training III; 8779 Metapsychology III; 8659 Social Psychology; 7324 Studies in Personality III and 5673 The Philosophy and Psychology of Consciousness III.

Group B: 8267 Animal Behaviour III; 2196 Environmental Psychology III; 7196 Intelligence III;

4770 Neuroscience in Psychology III; 2921 Psychology of Language in Thought and Action III.

The 12 points required for a major sequence in Psychology must include 3170 Psychological Research Methodology and 4 other psychology subjects from the list above, with at least one subject chosen from each group. Students wishing to complete a substantial proportion of their study at level III in psychology (to the value of 8 points or more) are advised to undertake the subject Psychological Research Methodology, since the majority of the practicals assume competence in statistical analysis and the use of the computer-based statistical package at the level provided in that subject. A similar assumption about familiarity with statistical procedures and methodological issues may be made in the presentation of the other material.

Application for entry into Honours Psychology requires the completion of a major sequence, as above, to a satisfactory standard.

All Level III subjects have associated practical work assignments which contribute 25% of the final mark. In the case of Psychological Research Methodology, this consists of workshops and a substantial exercise in statistical computing.

Details about the practical work, including formal contact time, are included in the Third Year Psychology Handbook. It is not possible to stipulate formal contact hours for practical work in the syllabus entries below since this varies among the different practical exercises; in some cases the data-gathering, and in all cases the statistical analyses and the preparation of the reports, are completed in the students' own time. It is assumed that students will either be concurrently enrolled in Psychological Research Methodology, or have completed it (or some equivalent) previously. Where this is not the case students may need to devote additional time to develop competence in the statistical techniques employed.

### 8267 Animal Behaviour III

2 points semester 1

1 lecture a week; 3 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restriction:* 3609 Animal Behaviour prior to 1989

This subject will proceed from the point reached in the Psychology II section devoted to the topic. The central theme will be the behaviour of mammals and its evolution. Primates, the carnivora and the ungulates, will receive particular attention, but other species will also be treated. Play behaviour, domestication, behaviour in captivity and man-animal contacts will be emphasised. Extensive use will be made of film and it

is hoped to organise a visit to an animal instrumentality in the Adelaide area.

Approximately 12 film screenings will be arranged in association with the course and a film program will be available from the Departmental Office during Orientation Week.

*assessment:* final exam; report of a practical exercise to be conducted in the Adelaide Zoological Gardens

### **3650 Applied Behaviour Change and Training III**

2 points semester 1

1 lecture per week; 3 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

This subject is concerned with changing existing behaviours and training new skills in applied settings. The first part of the course reviews the evidence concerning the effectiveness of psychotherapy and behaviour modification and their application to work behaviours in organisations. Particular emphasis is placed on the implications of this evidence for the design and evaluation of behaviour change programs in applied settings. The second part of the course is concerned with the principles and practice of training new work and social skills and with teaching work related information to adults in applied settings.

*assessment:* final exam; report of a practical exercise

### **2196 Environmental Psychology III**

2 points semester 2

1 lecture a week; 3 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restriction:* 2766 Environmental Psychology pre-1989

An introduction to environmental psychology including perception and cognition, stressors, personal space and territoriality, aesthetics, and human-environment interactions. The course is intended to complement any of the standard textbooks on environmental psychology.

*assessment:* final exam; report of a practical exercise

### **7196 Intelligence III**

2 points semester 2

1 lecture a week; 3 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restriction:* 1508 Intelligence prior to 1989

This subject reviews recent cognitive analytical approaches to the study of individual differences in intelligence, comparing the psychometric paradigm with various information processing models. Particular emphasis is given to the consequences of mental retardation, brain damage, and ageing for intellectual functioning.

*assessment:* final exam; report of a practical exercise

### **8779 Metapsychology III**

2 points semester 1

1 lecture a week; 3 tutorials, practical briefing sessions

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

This subject treats the psychological enterprise as the object of study, that is the network of individuals, groups and institutions involved in the production, dissemination and application of psychological knowledge claims. Findings from philosophy, history, sociology and psychology itself will be considered in an attempt to extend the understanding of the psychological enterprise. The course encourages a critical approach to psychological and scientific knowledge claims, and is informed by insights from post-structuralist and postmodern thinkers. The aim is not to provide final answers, but to assist participants to develop a more critical perspective of the discipline.

*assessment:* final exam, report of a practical exercise

### **4770 Neuroscience in Psychology III**

2 points semester 2

1 lecture a week; 3 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restriction:* 8743 Physiological Psychology pre-1989

This subject seeks to expose further some of the difficulties of understanding Psychology in brain terms, and to develop an impression of what, in principle, can be achieved by an interchange of ideas between the two disciplines, Psychology and Neuroscience by examining, on the one hand, emotion as a representative psychological construct, and on the other, what can be understood of the brain's functional organisation.

The subject consists, essentially, of three principal components: theoretical contemplations of the 'structure' of emotion, and its functional relevance in psychological explanation; research approaches in its various aspects; and the implications of physiological perspectives in a consideration of emotion.

*assessment:* final exam; report of a practical exercise

### **3170 Psychological Research Methodology III**

4 points full year

semester 1 - 1 lecture a week, workshops in computing and statistics, practical work; semester 2 - 1 lecture a week, 4 tutorials

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restriction:* 1759 Methodology and Statistics pre- 1989

This subject will add to the range of statistical significance tests taught in Psychology I and Psychology II a number of more complex techniques. These will include multifactor analysis of variance, planned and post-hoc contrasts, trend analysis, analysis of covariance and multiple regression. Students will gain further experience with the use of statistical software (specifically SPSS) on the University's computers, and will carry out a practical exercise in this area. In semester 2, a wide range of issues relating to research design will be covered in lectures and tutorials. Topics will range from the general (eg. the various concepts of reliability and validity, the logical of inference from data obtained in different ways, the use of quasi-experimentation and unobtrusive measures) to the highly specific (eg. the consideration of the inferences that have been made by specific researchers using particular research designs in particular areas of psychological interest). Qualitative methods as well as quantitative methods will be reviewed.

*assessment:* end of semester exam papers; practical in statistical computing

### **8659 Social Psychology III**

2 points semester 1

1 lecture a week; 4 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restrictions:* 6423 Social Psychology and Intergroup Relations III; 4553 Cognition and Affect in Social Relationships III; 8659 Social Psychology and Intergroup Relations III

An expanding body of research in contemporary social psychology has been the study of social cognition. This tradition concerns itself with the way in which individuals and groups attend to, process, interpret, mentally represent and understand social information. Concepts central to social cognition research include attributions, schemas, scripts, categories and prototypes. These central concepts will be developed and expanded by the consideration of affective, social, cultural and symbolic influences. Less mainstream

approaches to the study of social life such as social identity theory, social representations, and discursive psychology will be compared and contrasted to the social cognition tradition. The aim of this subject is to critically examine the extent to which these different theoretical approaches can be usefully integrated. A practical exercise illustrating central theoretical concepts will be conducted.

*assessment:* final exam; report of the practical exercise

### **7324 Studies in Personality III**

2 points semester 2

1 lecture a week; 3 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restriction:* 5202 Personality prior to 1989

The study of personality as a sociocultural product; interactional concepts of personality; discursive construction of identity, self, the subject and subjection; discourse analysis in studies of the person; poststructuralist, social constructionist and narrative perspectives.

*assessment:* final exam, report of a practical exercise

### **5673 The Philosophy and Psychology of Consciousness III**

2 points semester 1

1 lecture a week; 3 tutorials, practical work

*prerequisites:* 3149 Psychology II; or 5846 Psychology II (New) and 4416 Psychological Research Methodology II

*restriction:* 1967 The Philosophy and Psychology of Consciousness prior to 1989

This subject examines the place in Psychology of the phenomena associated with such terms as 'consciousness', 'awareness' and 'experience'. Lectures and tutorials deal with the place of these types of concept in an overall scientific program, considering relevant issues at levels ranging from the philosophical to the physiological. Specific topics include the mind-body problem, the feasibility of a reductionist approach, the place of phenomenology and existentialism, and the suggestions of physiologists on the nature of the mechanisms that might underlie consciousness. Several viewpoints are examined, such as the evolutionary, the humanistic, the cognitive and cross-cultural approaches.

*assessment:* final exam; report of a practical exercise

## Honours Level

Note: from the year 2000, students wishing to apply for entry into 4702 Honours Psychology will need to have completed at least 24 points in Psychology subjects in levels II and III, combined, with no fewer than 12 at level III, including 3170 Psychological Research Methodology III (see note preceding the entry for Psychology I).

### 4702 Honours Psychology

24 points full year

*quota:* will apply

*prerequisites:* satisfactory standard in 5104 Psychology I; 3149 Psychology II; third-year psychology subjects totalling at least 12 points value, including 3170 Psychological Research Methodology III; or equivalent subject sequence from other degree courses deemed acceptable by the Head of Department. The entry standard normally requires an overall Credit or Distinction in two of the first, second or third-year assessments of psychology subjects, and, in any case, at least a good pass (60% or better) on average for level III subjects. Academic achievement is the only criterion for entry to the course. No more than six places in the course are available for students who have degrees from Universities outside South Australia. Intending applicants seeking further information should obtain the Honours Introductory Booklet from the Department.

Honours Psychology is a full year's course of lectures and discussions on advanced topics. It also involves a dissertation embodying the results of a research investigation carried out under supervision of a member of the staff of the Department or other person nominated by the Department for the purpose; and a theoretical essay.

*assessment:* (provisional) achievement in the examinations of four half-semester topics 40%; empirical research thesis 45%; theoretical essay 15%

## Social sciences

### 6204 Issues and Techniques in the Social Sciences II

4 points semester 2

2 lectures, 1 tutorial/computer workshop per week

*prerequisites:* minimum 6 points in any social science discipline at level I

This subject is compulsory for students wishing to take the degrees of Bachelor of Social Science and Bachelor of Environmental Studies in the Division of Humanities and Social Sciences at The University of Adelaide. Its objectives are: to provide students with a basic understanding of the philosophical underpinnings of modern social science; to provide

students with a perspective on the role of social sciences within contemporary society, especially in Australia; to enhance students' individual development as professional social scientists and assist them in the development of their own individual career paths within the social sciences; to provide students with some basic skills in the collection, analysis, interpretation and presentation of social science information; and to enhance students' prospects of entering a satisfying and rewarding career in the social sciences upon completion of their degree.

*assessment:* participation 20%; project 40%; exam 40%

## Spanish and Portuguese Language and Literature

(available on the University of Adelaide campus, taught by Flinders University)

Note: the language at each level is for both beginners and advanced students. Students will be streamed within the topic.

### Level I

#### 9994 Spanish I Part 1

3 points semester 1

5 hours per week

This topic is specifically for those who want to approach the Spanish language for the first time, and uses the latest communicative approaches to language by stressing involvement in two sorts of activities: those relating directly to students, their interests and lives, and those relating to the worlds of Spain and Latin America. The primary goal is to teach students to interact in Spanish as naturally and as spontaneously as possible.

*assessment:* periodic tests on aural comprehension and writing skills, oral exam, aural and written exam

#### 5593 Spanish I Part 2

3 points semester 2

5 hours per week

*prerequisite:* 9994 Spanish I Part 1

This topic is for those who have completed Spanish I Part 1 an equivalent introduction to the language. It uses the latest communicative approaches to language by stressing involvement in two sorts of activities, those relating directly to students, their interests and lives, and those relating to the worlds of Spain and Latin America. The primary goal is to encourage students to feel free to interact in Spanish as naturally and as spontaneously as possible.

*assessment:* periodic tests on aural comprehension and writing skills, oral exam, aural and written exam

## Level II

### 7202 Spanish II Part 1

4 points semester 1

5 hours per week

*prerequisite:* 5593 Spanish I Part 2

This subject consolidates and extends the language work done in level I and provides further practice through grammar and composition exercises. It also further develops the aural/oral communication skills of the student through continuous oral practice in the classroom and language and computer laboratory exercises. The readings and cultural component will focus on contemporary issues pertaining to the Hispanic countries.

*assessment:* continuous - periodical tests on aural comprehension and writing skills, oral and written exam

### 3832 Spanish II Part 2

4 points semester 2

5 hours per week.

*prerequisites:* 7202 Spanish II Part 1

This subject consolidates and extends the language work done in 7202 Spanish II Part 1 and provides further practice through grammar and composition exercises. It also further develops the aural/oral communication skills of the student through continuous oral practice in the classroom and language and computer laboratory exercises.

*assessment:* continuous - periodical tests on aural comprehension and writing skills, oral and written exam

### 3034 Beginners Portuguese Part 1

4 points semester 1

4 hours per week

The goals of this subject are to familiarise students with the basic structures of Portuguese and to encourage students to feel free to interact in Portuguese as naturally and as spontaneously as possible and to establish a minimal level of skills in aural comprehension and conversation.

*assessment:* written exams 50%; oral assessment 50%

### 2755 Beginners Portuguese Part 2

4 points semester 2

4 hours per week

*prerequisite:* satisfactory standard in Beginners Portuguese Part 1 or consent of Topic Coordinator.

This topic is for those students who have completed PORT 2101 or have had an equivalent introduction to the language. It uses the latest communicative

approaches and aims to develop further the students' skills in both spoken and written Portuguese. This topic will also focus on relevant aspects of culture, history, traditions, sports and the arts, giving special emphasis to the literatures of the different Portuguese speaking countries.

*assessment:* oral assessment 50%; written exams 50%

## Level III

### 3286 Spanish III Part 1

6 points semester 1

5-6 hours per week

*prerequisites:* 3832 Spanish II Part 2

This subject comprises two parts. A core component comprises lectures and exercises in Spanish grammar, conversation and composition which build on and consolidate the language learning of the level I and II subjects - this component is compulsory for all students majoring in Spanish. The second component comprises different units chosen from modules offered by the Spanish department, including Spanish and Latin American Literature, Spanish and Latin American cinema, Flamenco dancing and music, Commercial Spanish, Spanish Translation (not all modules are offered every year).

*assessment:* language section and elective modules with a strong language component - written exercises, end of semester written and oral exams; cultural components - written essays, class presentations and end of semester exams

### 5342 Spanish III Part 2

6 points semester 2

5-6 hours per week

*prerequisites:* 3286 Spanish III Part 1

This subject comprises two parts. A core component comprises lectures and exercises in Spanish grammar, conversation and composition which builds on and consolidates the language learning of the level I and II subjects - this component is compulsory for all students majoring in Spanish. The second component comprises different units chosen from modules offered by the Spanish department, including Spanish and Latin American Literature, Spanish and Latin American cinema, Flamenco dancing and music, Commercial Spanish, Spanish Translation (not all modules will be offered every year).

*assessment:* language section and elective modules with a strong language component - written exercises, end of semester written and oral exams; cultural components - written essays, class presentations and end of semester exams

**2693 Advanced Portuguese Part 1**

4 points semester 1

3 hours per week

*prerequisite:* satisfactory standard in Beginners Portuguese Part 2 or consent of Topic Coordinator

This topic provides the student with advanced training in oral, aural and written Portuguese as well as a more sophisticated treatment of the cultures and customs of the Portuguese speaking peoples. Classes will include the extensive use of music, role playing and videos and written materials reflecting the diverse aspects of every day life.

*assessment:* periodic tests on aural comprehension, writing skills; oral exam; end of semester aural, written exam

**7445 Advanced Portuguese Part 2**

4 points semester 2

3 hours per week

*prerequisite:* satisfactory standard in Advanced Portuguese Part 1 or consent of Topic Coordinator

This topic will continue to provide the students with advanced training in oral, aural and written Portuguese as well as a more sophisticated treatment of the cultures and customs of the Portuguese speaking peoples. Classes will include the extensive use of music, role playing and videos and written materials reflecting the diverse aspects of every day life. Literary texts by a representative selection of writers from the Portuguese speaking countries will be studied.

*assessment:* periodic tests on aural comprehension, writing skills; oral exam; end of semester aural, written exam

**cognates****6994 Introduction to Latin America**

4 points semester 1

2-3 hours per week

*prerequisite:* minimum 6 points from Level I Humanities or Social Sciences

This topic will introduce the student to the major social, political and economic issues facing Latin America today, employing a multi-disciplinary approach, videos and class discussions. Contemporary issues involving governance, economic development, social change, human rights and ethnicity issues will be covered. This subject may be studied at Level II or as Part III of Spanish IIIB.

*assessment:* tests, essays

**Women's Studies**

<http://chomsky.arts.adelaide.edu.au/WomensStudies>

**Note:** subjects unavailable in 1999 are listed for your information. For syllabus details and future availability of these subjects, please contact the department.

**Level I****3517 Gender, Work and Society I**

3 points semester 1

Sexual inequalities in capitalist society; social patterns of sexual oppression; sexual inequalities in the Australian economy and workforce; gender and economic policies; the politics of gender in the workplace; women and trade unions; strategies for achieving sexual equality.

*assessment:* essays and other written work to a total of approximately 4000 words

**8066 Introduction to Gender Studies I**

3 points semester 1

2 hour lecture, 1 tutorial a week

*restriction:* Women's Studies I

This subject aims to examine how gender studies contributes to our understanding of women in Australian society. Topics will vary but may include discussion of debates around sexuality, bodies, politics, work, the relations of race, ethnicity and gender, and the role of men.

*assessment:* tutorial papers and essays to a total of 3000 words; attendance at lectures, tutorials are compulsory

**1977 Labour, Culture and the Media I**

3 points semester 2

2 hour lecture, 1 tutorial per week

This subject will develop students' understanding of the role of culture in symbolising and communicating the aims and ideals of the labour movement and will equip students to critically analyse cultural and media constructions of the notions of work and the "worker" in Australian society. The course will explore examples of cooperation between artists and other cultural workers and unions in Australia and overseas from the nineteenth century through to the present day. Key events and texts from the 1890's, the 1930s, the Cold War, the 1960s and the present will be examined to assess the contribution of art and culture to expressing and promoting union views and concerns. The role of both the mass and alternative media in representing and challenging these views will also be considered. Industrial issues arising from the current expansion in the culture and media industries will be discussed, as

will the effectiveness of unions' use of their own media, mass media and campaign work in attempting to promote their concerns. Students will assess the range of strategies available to the labour movement to raise issues and conduct debates within the public domain and learn practical skills in media analysis.

*assessment:* essays, other written work totalling approximately 4000 words

## Level II

### 9959 Australian Feminist History II

4 points semester 1

2 lectures, 1 tutorial a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* Gender Divisions in Some Western Societies

A survey of Australian feminist history set in a context of recent debates in feminist history. Topics include Aboriginal women, the historiography of the women convicts, pioneer women, women's separate sphere, first-wave feminism, sexuality, the birth rate, women's paid and unpaid work, the depression and the world wars.

*assessment:* 3500 word essay; 1500 word seminar paper, seminar participation and 1000 word report

### 1603 Gender in a Post Colonial World II

4 points semester 2

1 lecture, two-hour seminar a week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

The subject examines theories and issues of western feminism from the perspective of the 'other', from women writing beyond the English-speaking west, including Asia, Africa, South America and fourth world peoples and non-English speaking background immigrants in western nations. While the subject explores the experiences of women in other cultures, the focus will be on how we think western feminist issues differently when they are viewed from beyond Anglo-feminist frameworks.

*assessment:* major and minor essays, reports, oral presentations totalling up to 6000 words

### 5943 Gender, 'The Body' and Health II

4 points semester 1

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject will explore the social and historical location of understandings of 'the body', gender and

health. In particular it will investigate the role that the concept of biology and biological difference play in the construction of gender, and of health/illness. The subject will draw on historical and contemporary instances to explore the plausibility of materialist, socio-biological, social constructionist, Foucauldian and post-modern theories of embodiment and its relationship to gender.

Topics will include the exploration of changing understandings of reproduction, the immune system, biological rhythms and psychosomosis and in doing so will focus on contemporary diseases which may include repetition injury, infertility, impotence, cancer, obesity, anxiety disorders, osteoporosis.

The subject will draw centrally from feminist scholarship in sociology, anthropology and the history and philosophy of science.

*assessment:* 1000 word essay 25%; seminar preparation, attendance, participation, 1000 word presentation 35%; 2000 word major essay 40%

### 3450 Gender, Work and Society II

4 points semester 1

3 hour class per week

Sexual inequalities in capitalist society; social patterns of sexual oppression; sexual inequalities in the Australian economy and workforce; gender and economic policies; the politics of gender in the workplace; women and trade unions; strategies for achieving sexual equality.

*assessment:* essays and other written work to a total of approximately 6000 words

### 6440 Labour, Culture and the Media II

4 points semester 2

2 hour lecture, 1 tutorial per week

This subject will develop students' understanding of the role of culture in symbolising and communicating the aims and ideals of the labour movement and will equip students to critically analyse cultural and media constructions of the notions of work and the "worker" in Australian society. The course will explore examples of cooperation between artists and other cultural workers and unions in Australia and overseas from the nineteenth century through to the present day. Key events and texts from the 1890's, the 1930s, the Cold War, the 1960s and the present will be examined to assess the contribution of art and culture to expressing and promoting union views and concerns. The role of both the mass and alternative media in representing and challenging these views will also be considered. Industrial issues arising from the current expansion in the culture and media industries will be discussed, as will the effectiveness of unions' use of their own

media, mass media and campaign work in attempting to promote their concerns. Students will assess the range of strategies available to the labour movement to raise issues and conduct debates within the public domain and learn practical skills in media analysis.

*assessment:* essays and other written work to a total of approximately 6000 words

### **6651 Life Stories: Australian 1850 - 1980 II**

4 points semester 2

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject will draw upon biographical and autobiographical writing between 1850-1990 in order to explore the lives of Australian men, women and children and their social context. Key concerns will be the construction and interaction notions of masculinity and femininity and questions of where to draw the dividing line between history and fiction. The subject is structured into six units which each explore a particular tradition of life writing as a window onto the socio-cultural history of a specific decade. We will examine the conventions of secular hagiography detailing the work of constitutional and political figures of the 1880s and 1890s. Exploring the traditions of social history we will consider lives potentially lost to history in the 1930s and 1950s and examine life-writing as a political strategy in the 1970s-1980s.

*assessment:* major and minor essays, reports, oral presentations, totalling up to 6000 words

### **8800 Perspectives on Sexualities II**

4 points semester 1  
subject to staffing

3 hours per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject will explore the ways in which sexuality is socially and culturally constructed. It will investigate how, on the one hand, sexuality is a category through which social and cultural life is organised which needs to be studied separately and how, on the other hand, the category of sexuality is always in interaction with other categories, such as gender and race in the complex regimes of contemporary life. Topics may include: sexuality in the workplace, sexual violence, identity politics, children and sexuality, representations of sexuality in the media, prostitution, pornography, abortion and HIV/AIDS. The subject will draw centrally from feminist scholarship, sociology, anthropology and the history and philosophy of science.

*assessment:* 1000 word essay 20%; 1000 word analysis of a cultural text 25%; 3000 word major essay 40%; attendance, participation and reading 10%

### **6857 Popular Culture, Film and Representation II**

4 points semester 1

2 hour lecture, 1 tutorial per week

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

*restrictions:* 4700 Women and the Media II

Students will examine a variety of approaches to popular culture and analyse the constructions of masculinity and femininity in the popular media. The focus will be on visual media, particularly on film and film theory, although it may also include an analysis of newspapers, advertisements, women's magazines, romance fiction, and the like. The subject will consider contemporary debates concerning the production and consumption of popular culture, the significance of spectator positions and the dynamics of pleasure and desire in the maintenance of gender representations in the media.

*assessment:* short applied analysis 1,000 words 20%; seminar presentation and 1000 word paper 20%; 3000-word essay 60%.

### **4173 Sexing the Disciplines II (Gender Studies core topic)**

4 points semester 2

*prerequisites:* minimum 6 points from Level I Humanities or Social Sciences

This subject serves as an introduction to the category gender as a tool of analysis and to the main debates and theoretical issues. These will be explored in relation to a number of disciplinary areas, for example politics and anthropology, as well as in relation to interdisciplinary and cross-disciplinary work, for example bioethics and masculinities. As a discussion of gender issues in the humanities and social sciences, this subject is designed to interest students across the Faculty of Arts as well as those enrolled in the BA (Gender Studies).

*assessment:* essays, tutorial papers, reports and participation to an equivalent of up to 6000 words

### Level III

#### 2345 Australian Feminist History III

6 points semester 1

1 lecture, two-hour seminar a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restriction:* 1489 History IIIB Women in History; 9959 Gender Divisions in Some Western Societies II/III; 9959 Australian Feminist History II

A survey of Australian feminist history set in a context of recent debates in feminist history. Topics include Aboriginal women, the historiography of the women convicts, pioneer women, women's separate sphere, first-wave feminism, sexuality, the birth rate, women's paid and unpaid work the depression and the world wars.

*assessment:* 5000 word essay, 1000 word seminar paper, seminar participation reports

#### 6734 Autobiographical Writings III

6 points semester 2

also available externally

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

In this subject students will read autobiographies and autobiographical fiction written by women from various cultures and career backgrounds and explore the similarities and differences of life experiences. The subject will explore current feminist, postcolonial, poststructuralist and deconstructive narrative theories of self-representation in relation to the autobiographical text. Students will also engage in creative writing activities

*assessment:* seminar paper, projects to an equivalent of 8000 words

#### 9904 Feminist Thought III

6 points semester 2

also available externally

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restriction:* 3466 Survey of Feminist Thinkers prior to 1992

This subject introduces students to a range of feminist positions, exploring the debates between and within feminist theory. Topics include debates with the disciplines in the humanities and social sciences, especially the contributions and challenges of psychoanalysis, post-structuralism, Foucault, postmodernism and cultural studies.

*assessment:* participation/review 20%; tutorial paper 30%; major essay 50%

#### 8550 Gender in a Post Colonial World III

6 points semester 2

1 lecture, two hour seminar a week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject examines theories and issues of western feminism from the perspective of the 'other', from women writing beyond the English-speaking west, including Asia, Africa, South America and fourth world peoples and non-English speaking background immigrants in western nations. While the subject explores the experiences of women in other cultures, the focus will be on how we think western feminist issues differently when they are viewed from beyond Anglo-feminist frameworks.

*assessment:* major and minor essays, reports, oral presentations up to 9000 words

#### 5150 Gender, Environment, Development III

6 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* 3377 Gendered Spaces, Gendered Development III

Since the late 1980s the connection between gender, environment and development (GED) has emerged as an area of special interest for academics, policy makers and activists. GED is now a focus of international research in both Gender Studies and Environmental Studies, has entered the rhetoric of policy makers at the highest international levels and has generated an international NGO network. This subject will explore the theoretical and political implications of linking gender, environment and development by analysing current global GED issues and selected examples of local GED issues in the Australasian region.

*assessment:* tutorial participation 10%; tutorial presentations/exercises 30%; essays/reports totalling 6000 words 60%

#### 7378 Gender, 'The Body' and Health III

6 points semester 1

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

The subject will explore the social and historical location of understandings of 'the body', gender and health. In particular it will investigate the role that the

concept of biology and biological difference play in the construction of gender and of health/illness. The subject will draw on historical and contemporary instances to explore the plausibility of materialist, socio-biological, social constructionist, Foucauldian and post-modern theories of embodiment and its relationship to gender. Topics will include the exploration of changing understandings of reproduction, the immune system, biological rhythms and psychosomosis and in doing so will focus on contemporary diseases which may include repetition injury, infertility, impotence, cancer, obesity, anxiety disorders, osteoporosis. The subject will draw centrally from feminist scholarship in sociology, anthropology and the history and philosophy of science.

*assessment:* 1500 word essay 25%; seminar preparation, attendance, participation, 2000 word presentation 35%; major 3000 word essay 40%

### 5271 Life Stories: Australian 1850 - 1980 III

6 points semester 2

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject will draw upon biographical and autobiographical writing between 1850-1990 in order to explore the lives of Australian men, women and children and their social context. Key concerns will be the construction and interaction notions of masculinity and femininity and questions of where to draw the dividing line between history and fiction. The subject is structured into six units which each explore a particular tradition of life writing as a window onto the socio-cultural history of a specific decade. We will examine the conventions of secular hagiography detailing the work of constitutional and political figures of the 1880s and 1890s. Exploring the traditions of social history we will consider lives potentially lost to history in the 1930s and 1950s and examine life-writing as a political strategy in the 1970s-1980s.

*assessment:* major and minor essays, report, oral presentations, totalling 9000 words

### 5869 Perspectives on Sexualities III

6 points semester 1  
subject to staffing

also offered externally

3 hours per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

This subject will explore the ways in which sexuality is socially and culturally constructed. It will investigate how, on the one hand, sexuality is a category through which social and cultural life is organised which needs

to be studied separately and how, on the other hand, the category of sexuality is always in interaction with other categories, such as gender and race in the complex regimes of contemporary life. Topics may include: sexuality in the workplace, sexual violence, identity politics, children and sexuality, representations of sexuality in the media, prostitution, pornography, abortion and HIV/AIDS. The subject will draw centrally from feminist scholarship, sociology, anthropology and the history and philosophy of science.

*assessment:* 1500 word essay 20%; seminar presentation and 1500 word analysis of a cultural text 25%; 3000 word essay 40%; attendance, and participation and reading 10%.

### 8613 Popular Culture, Film and Representation III

6 points semester 1

2 hour lecture, 1 tutorial per week

*prerequisites:* minimum 8 points from Level II Humanities or Social Sciences

*restrictions:* 4700/9670 Women and the Media II/ III

Students will examine a variety of approaches to popular culture and analyse the constructions of masculinity and femininity in the popular media. The focus will be on visual media, particularly on film and film theory, although it may also include an analysis of newspapers, advertisements, women's magazines, romance fiction, and the like. The subject will consider contemporary debates concerning the production and consumption of popular culture, the significance of spectator positions and the dynamics of pleasure and desire in the maintenance of gender representations in the media.

*assessment:* 1500 word applied analysis 20%; seminar presentation and 1000 word paper 20%; 4000 word essay 60%

## Honours

### 8829 Honours Women's Studies

24 points full year

*prerequisites:* minimum credit average in the required major sequence (8 points at Level II; 12 points at Level III)

The work of the Honours year consists of taking a core subject (a theory/research subject 'Critique and Construct') and one elective subject and writing an Honours thesis. A list of subjects to be offered is available from the Department. Students from allied Arts Departments may enrol for joint Honours program with the approval of the respective Heads of Department/Postgraduate Coordinators. Some subjects will be offered through a collaborative arrangement

with the Women's Studies Unit at Flinders University. Students should contact the Department for a list of these. Students may choose electives from the postgraduate subjects available through the Department, or appropriate postgraduate subjects available at another tertiary institution in South Australia.

Students who wish to do Honours should consult with the Honours Convenor about their eligibility and their plans for the Honours program.

*assessment:* thesis 50%; core (theory/research) subject 25%; elective 25%

**Women's Studies subjects not offered in 1999**

**2901 Women's Health Issues I**

3 points Level I

**5913 Power and Difference: Post-Colonial Perspectives II**

4 points Level II

**1892 Power and Difference: Post-Colonial Perspectives III**

6 points Level III

contact department for syllabus details

## Bachelor of Arts (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

A student may gain one or more of the following degrees:

- Honours degree of Bachelor of Arts
- Honours degree of Bachelor of Arts (Asian Studies)
- Honours degree of Bachelor of Arts (Australian Studies)
- Honours degree of Bachelor of Arts (Cultural Studies)
- Honours degree of Bachelor of Arts (European Studies)
- Honours degree of Bachelor of Arts (International Studies)

#### 2 Admission requirements

- 2.1 Students for the Honours degree shall not begin their Honours work until they have qualified for an Ordinary degree of the Faculty of Arts, or some other degree deemed by the Faculty to be appropriate preparation, and have completed a major sequence relevant to the appropriate Honours degree syllabus, or equivalent acceptable to the Department or Award Committee concerned, in their undergraduate degree.
- 2.2 Students wishing to take Honours must obtain the approval of the Head of the Department or Departments, or of the Award Committee for named degrees concerned.
- 2.3 A student may not enrol a second time for Honours in the same degree and Department if the student (i) has already qualified for Honours in that Department; or (ii) has presented for examination in that Department but has failed to obtain Honours; or (iii) withdraws from the course, unless the Faculty under Rule 8, below permits the student to re-enrol.
- 2.4 No graduate who has obtained an Honours degree in a subject or field of study in another Department or equivalent may obtain the Honours degree of Bachelor of Arts in a corresponding subject, field of study, or Department of the Faculty of Arts.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

The work of the Honours year must be completed in one full year of full-time study, save that on the recommendation of the Head of the Department or Departments concerned, or the Award Committee concerned the Faculty may permit a student to spread the work over two years, but not more, under such conditions as it may determine.

#### 5 Qualification requirements

- 5.1 A student may proceed to the Honours degree in one of the subjects listed in Rule 6, below, comprising course work and a dissertation, or, if being supervised by more than one Department, a combination of those subjects. A combination requires Faculty approval on the recommendation of the Departments concerned and shall include such work as shall be deemed by the Faculty to be equivalent to a single subject of a points value of 24 points.
- 5.2 The course of study and dissertation topic for the Honours year for students must be approved by the Head of the Department or Departments concerned before enrolment.
- 5.3 A student may, subject to the approval of the Faculty in each case, proceed to the Honours degree in a subject taught in a Department in another Faculty. Such students must consult the Head of the Department concerned who must seek the approval of the Faculty of Arts.
- 5.4 A student wishing to proceed to Honours in subjects within the Faculty of Mathematical and Computer Sciences is referred to the Specific Course Rules for the Honours Degree of the degree of Bachelor of Science in the Faculty of Mathematical and Computer Sciences.

## 6 Course of study/Subjects of study

A student may proceed to the Honours degree in one of the following subjects or certain approved combinations of the following subjects, provided that the student has obtained, before enrolment, the approval of the Head of the Department concerned:

8302 Honours Ancient Greek and/or Latin	24
1105 Honours Anthropology	24
3025 Honours in Chinese Studies	24
4210 Honours Classical Studies	24
7711 Honours Economics	24
9639 Honours English Language and Literature	24
2521 Honours Environmental Studies	24
1760 Honours Ethnomusicology (B.A.)	24
4360 Honours French Language and Culture	24
3178 Honours Geography	24
1261 Honours German Language and Literature	24
8717 Honours History	24
1509 Honours in Japanese Studies	24
2373 Honours Labour Studies	24
5276 Honours Musicology (B.A.)	24
3315 Honours Philosophy	24
5442 Honours Politics	24
4702 Honours Psychology	24
8829 Honours Women's Studies	24

A student may proceed to the Honours degree in one of the following subjects or certain approved combinations of the following subjects, provided that the student has obtained, before enrolment, the approval of the Award Committee concerned:

7247 Honours Asian Studies	24
6617 Honours Australian Studies	24
9831 Honours Cultural Studies	24
1743 Honours European Studies	24
6168 Honours International Studies	24

Students who have been granted permission to study an honours program supervised by two Departments will be advised of the appropriate subject title and code at the time of enrolment.

## 7 Attendance requirements

A candidate shall not be eligible to present for assessment, by examination, thesis or otherwise, unless he or she has regularly attended the prescribed classes and has done written and laboratory or other practical work, where

required, to the satisfaction of the department/s concerned. A candidate is required to meet regularly with his or her supervisor during the preparation and writing of the thesis component of the course.

Pursuant to this clause, a candidate who is not eligible to present work for assessment will receive a final result of NAH (Not Awarded), unless he or she withdraws from the course before the required date.

## 8 Review of academic progress

A student who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course, shall be reported to the Faculty which may permit the student to re-enrol for the Honours degree under such conditions (if any) as it may determine.

## 9 Assessment and examinations

9.1 Except by permission of the Faculty a student shall take the whole of the final examination (if any) for the Honours degree at the one annual examination.

9.2 The names of the students who qualify for the Honours degree shall be published within the following classes and divisions:

First Class	
Second Class	Division A
	Division B
Third Class	

## Bachelor of Environmental Studies (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 A student may gain an Ordinary degree of Bachelor of Environmental Studies, an Honours degree of Bachelor of Environmental Studies, or both.

#### 2 Admission requirements

- 2.1 Students for the Honours degree shall not begin their Honours work until they have qualified for the Ordinary degree of Bachelor of Environmental Studies or some other degree deemed by the Faculty of Arts to be appropriate preparation
- 2.2 Students wishing to take Honours must obtain the approval of the Head of the Department or Departments, or of the Award Committee for named degrees.
- 2.3 A student may not enrol a second time for Honours in the same degree and Department if the student (i) has already qualified for Honours in that Department; or (ii) has presented for examination in that Department but has failed to obtain Honours; or (iii) withdraws from the course, unless the Faculty under Rule 8, below permits the student to re-enrol.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

The work of the Honours year must be completed in one year of full-time study, save that on the recommendation of the Head of the Department or Departments or Award Committee concerned, the Faculty may permit a student to spread the work over two years, but not more, under such conditions as it may determine.

#### 5 Qualification requirements

- 5.1 A student may proceed to the Honours degree in the subject listed in Rule 6, below, comprising course work and a dissertation, or, if being supervised by more than one Department, a combination of this subject and a subject or subjects offered at the Honours level by the other Department. A combination requires Faculty

approval on the recommendation of the Departments concerned and shall include such work as shall be deemed by the Faculty to be equivalent to a single subject of a points value of 24 points.

- 5.2 The course of study and dissertation topic for the Honours year for students must be approved by the Head of the Department or Departments or Award Committee concerned before enrolment.
- 5.3 A student may, subject to the approval of the Faculty in each case, proceed to the Honours degree in a subject taught in a Department in another Faculty. Such students must consult the Head of the Department concerned who must seek the approval of the Faculty of Arts.

#### 6 Course of study/Subjects of study

A student may proceed to the Honours degree in the following subject, provided that the student has obtained, before enrolment, the approval of the Director of the Mawson Graduate Centre:

2521 Honours Environmental Studies 24

A student may also proceed to the Honours degree in certain approved combinations of the subject 2521 Honours Environmental Studies and a subjects or subjects offered by another Department at the Honours level, provided that the student has obtained, before enrolment, the approval of Head of the Department or Departments or Award Committee concerned.

Students who have been granted permission to study in a joint honours program supervised by the Mawson Graduate Centre and another Department will be advised of the appropriate subject title and code at the time of enrolment.

#### 7 Attendance requirements

A candidate shall not be eligible to present for assessment, by examination, thesis or otherwise, unless he or she has regularly attended the prescribed classes and has done written and laboratory or other practical work, where required, to the satisfaction of the department/s concerned. A candidate is required to meet regularly with his or her supervisor during the preparation and writing of the thesis component of the course.

Pursuant to this clause, a candidate who is not eligible to present work for assessment will receive a final result of NAH (Not Awarded), unless he or she withdraws from the course before the required date.

## **8 Review of academic progress**

A student who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course, shall be reported to the Faculty which may permit the student to re-enrol for the Honours degree under such conditions (if any) as it may determine.

## **9 Assessment and examinations**

**9.1** The names of the students who qualify for the Honours degree shall be published within the following classes and divisions:

First Class

Second Class      Division A

Division B

Third Class

## **10 Articulation with other awards**

Students who successfully complete the subject 2521 Honours Environmental Studies and who wish to proceed to the Master of Environmental Studies award will be credited with having completed Part II of the Master of Environmental Studies award and will be able to complete the Master of Environmental Studies award with one further year of full-time study involving 24 points of coursework.

## Bachelor of Labour Studies (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

- 1.1 A student may gain an Ordinary degree of Bachelor of Labour Studies, an Honours degree of Bachelor of Labour Studies, or both.

#### 2 Admission requirements

- 2.1 Students wishing to take Honours must have completed the degree of Bachelor of Labour Studies degree or equivalent as acceptable to the University. Admission to Honours is at the discretion of the Head of the Centre for Labour Studies acting on the advice of the Staff Committee of the Centre for Labour Studies.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 The work of the Honours year must be completed in one year of full-time study, save that on the recommendation of the Head of the Centre for Labour Studies, the Faculty may permit a student to spread the work over two years, but not more, under such conditions as it may determine.

#### 5 Qualification requirements

- 5.1 Honours in Labour Studies is a full-year course (or two year part-time course), involving weekly seminars, essays and a dissertation.
- 5.2 The choice of subjects and dissertation topic by students must be approved by the Head of the Centre for Labour Studies before enrolment.
- 5.3 Arrangements are possible for joint honours combining study in the Centre for Labour Studies with study in other Departments.

#### 6 Course of study/Subjects of study

- 6.1 All students shall enrol in the subject:  
2373 Honours Labour Studies

#### 7 Review of academic progress

- 7.1 A student who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course shall be

reported to the Faculty which may permit the student to re-enrol for the Honours degree under such conditions (if any) as it may determine.

- 7.2 A student may not enrol a second time for the Honours degree of Bachelor of Labour Studies if the student:

- (a) has already qualified for Honours in Labour Studies
- (b) has presented for but has failed to obtain the Honours degree of Bachelor of Labour Studies *or*
- (c) withdraws from the course, unless the Faculty under 7.1, above, permits the student to re-enrol.

#### 8 Assessment and examinations

- 8.1 The names of the students who qualify for the Honours degree shall be published within the following classes and divisions:

First Class	
Second Class	Division A
	Division B
Third Class	

### Syllabus

#### 2373 Honours Labour Studies

24 points full year

*prerequisites:* Bachelor of Labour studies or a major sequence in Labour studies in another award of the Faculty. Admission to Honours is at the discretion of the Head of the Centre for Labour Studies acting on the advice of the Centre's staff committee.

Weekly seminars, essays and dissertation. A list of options listed for 1999 is available from the department. Subjects and the dissertation topic must be approved by the Faculty before enrolment. Arrangements for joint honours with other departments or centres may be negotiated.

*assessment:* essays, dissertation

## Bachelor of Social Sciences (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 General

A student may gain an Ordinary degree of Bachelor of Social Sciences, an Honours degree of Bachelor of Social Sciences, or both.

#### 2 Admission requirements

2.1 Students for the Honours degree shall not begin their Honours work until they have qualified for an Ordinary degree of the Faculty of Arts, or some other degree deemed by the Faculty to be appropriate preparation, and have completed a major sequence relevant to the appropriate Honours degree syllabus, or equivalent acceptable to the Department or Award Committee concerned, in their undergraduate degree.

2.2 Students wishing to take Honours must obtain the approval of the Head of the Department or Departments, or of the Award Committee for named degrees concerned.

2.3 A student may not enrol a second time for Honours in the same degree and Department if the student (i) has already qualified for Honours in that Department; or (ii) has presented for examination in that Department but has failed to obtain Honours; or (iii) withdraws from the course, unless the Faculty under Rule 8, below permits the student to re-enrol.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

The work of the Honours year must be completed in one year of full-time study, save that on the recommendation of the Head of the Department or Departments or Award Committee concerned, the Faculty may permit a student to spread the work over two years, but not more, under such conditions as it may determine.

#### 5 Qualification requirements

5.1 A student may proceed to the Honours degree in one of the subjects listed in Rule 6, below, comprising course work and a dissertation, or, if being supervised by more than one Department, a combination of those subjects. A combination

requires Faculty approval on the recommendation of the Departments concerned and shall include such work as shall be deemed by the Faculty to be equivalent to a single subject of a points value of 24 points.

5.2 The course of study and dissertation topic for the Honours year for students must be approved by the Head of the Department or Departments or Award Committee concerned before enrolment.

5.3 A student may, subject to the approval of the Faculty in each case, proceed to the Honours degree in a subject taught in a Department in another Faculty. Such students must consult the Head of the Department concerned who must seek the approval of the Faculty of Arts.

#### 6 Course of study/Subjects of study

A student may proceed to the Honours degree in one of the following subjects or certain approved combinations of the following subjects, provided that the student has obtained, before enrolment, the approval of the Head of the Department concerned:

1105 Honours Anthropology	24
7711 Honours Economics	24
2521 Honours Environmental Studies	24
3178 Honours Geography	24
8717 Honours History	24
6081 Honours Linguistics	24
2373 Honours Labour Studies	24
3315 Honours Philosophy	24
5442 Honours Politics	24
4702 Honours Psychology	24
8829 Honours Women's Studies	24

A student may proceed to the Honours degree in one of the following multi-disciplinary areas provided that the student has obtained, the approval of the Award Committee:

9831 Honours Cultural Studies	24
6168 Honours International Studies	24

Students who have been granted permission to study in a joint honours program supervised by the two Departments will be advised of the appropriate subject title and code at the time of enrolment.

## **7 Attendance requirements**

A candidate shall not be eligible to present for assessment, by examination, thesis or otherwise, unless he or she has regularly attended the prescribed classes and has done written and laboratory or other practical work, where required, to the satisfaction of the department/s concerned. A candidate is required to meet regularly with his or her supervisor during the preparation and writing of the thesis component of the course.

Pursuant to this clause, a candidate who is not eligible to present work for assessment will receive a final result of NAH (Not Awarded), unless he or she withdraws from the course before the required date.

## **8 Review of academic progress**

A student who is unable to complete the course for the Honours degree within the time allowed, or whose work is unsatisfactory at any stage of the course, or who withdraws from the course, shall be reported to the Faculty which may permit the student to re-enrol for the Honours degree under such conditions (if any) as it may determine.

## **9 Assessment and examinations**

9.1 Except by permission of the Faculty a student shall take the whole of the final examination (if any) for the Honours degree at the one annual examination.

9.2 The names of the students who qualify for the Honours degree shall be published within the following classes and divisions:

First Class

Second Class      Division A

Division B

Third Class

## Graduate Certificate in Applied Demography

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as with the Specific Course Rules set out below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Applied Demography shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2. Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or the equivalent of part-time study, and no more than two years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

4.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete core subjects to the value of 12 points, as follows:

#### 4.2 Core subjects

All candidates shall complete the following subjects:

2837 Introduction to Demography	3
5628 Computer Applications in Demography	3
4101 Demographic Projections and Forecasts	3
9052 Applications of Demography	3

- 4.3 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5. Status, exemption and credit transfer

- 5.1 A candidate normally would not be granted status for any subject which he or she has completed for another award.
- 5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned  
(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

#### 7. Articulation with other awards

A candidate for the Graduate Diploma in Applied Demography who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

### Syllabuses

See Master of Arts (Applied Demography) for syllabus details

# Graduate Certificate in Australian Studies

There will be no intake into this course in 1999

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the Graduate Certificate in Australian Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University. Students would normally be expected to have passed a second or third year level subject in an aspect of Australian studies in their undergraduate degree.

**1.2** Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

Except by the special permission of the Head of the Department of Education, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

Except with the special permission of the Faculty, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

### 5 Qualification requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects with an aggregate of twelve points, including the compulsory subject 6310 Issues for Australians and two elective subjects.

### 6 Course of study

#### 6.1 Compulsory subject

All candidates shall satisfactorily complete:

6310 Issues for Australians IV 4

#### 6.2 Elective subjects

Candidates shall satisfactorily complete subjects to the value of eight points from the following or from Level IV subjects chosen in consultation with the Course Coordinator:

Anthropology	
5011 Aborigines and the State IV	4
5069 Towards an Anthropology of Australian Society IV	4
3080 Aboriginal Land Tenure and Sacred Sites IV	4
2164 Depicting Aboriginal Cosmology IV	4
Education	
8832 Education in Multilingual Settings	4
5093 Gender, Education and Social Change	4
8900 Schools as Cultural Systems	4
9217 Teaching the Australian Studies Curriculum	4
English	
9455 Australian Cultural Studies IV	4
7491 Contemporary Australian Writing	4
History	
1442 Aborigines in 20th Century Australia IV	4
8032 South Australian Aboriginal History IV	4
Labour Studies	
3649 Political Economy of Globalisation IV	6
Politics	
4197 Public Policy in South Australia IV	4

Women's Studies

9410 Australian Feminist History: A Survey 6

5756 Power and Difference: Postcolonial  
Perspectives PG 6

**7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

There shall be two systems of classification of pass in subjects for the Graduate Certificate: either Non-Graded Pass, or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

### core topic

#### 6310 Issues for Australians

4 points not offered in 1999  
2 hours per week

A seminar-based, one semester subject investigating issues in the field of Australian Studies with a particular focus on Australian culture. The subject will address a range of areas such as Aboriginal writing, media ownership and control, Australian film and television, tourism and culture, and landscape and culture.

assessment: essays, papers equivalent to 8,000 words

### electives

#### Anthropology

##### 5010 Aborigines and the State IV

4 points not offered in 1999  
2 lectures, 1 tutorial per week

restriction: 8195/5437 Aborigines and the State II/III

This subject focuses on the seemingly inexorable encapsulation of the Aboriginal people of Australia within the wider nation state. That is, it views the process whereby Aborigines have been transformed from autonomous hunter-gatherers into, and maintained as, dependent Fourth World peoples. After briefly surveying the history of and Aboriginal reaction to the European colonisation of Australia, attention is devoted to a range of contemporary issues in both remote and urban environments. Here the thrust is to place such phenomena as Aboriginal Land Rights, community development programs, alcohol abuse, and high arrest and incarceration rates in their broader socio-politico-economic context.

assessment: essays, papers equivalent to 8,000 words

##### 5069 Towards an Anthropology of Australian Society IV

4 points not offered in 1999  
3 hours per week

restriction: 6914/1709 Towards an Anthropology of Australian Society II/III

Anthropology provides an exciting challenge to our understanding of the familiar. This subject critically examines what for many is an apparently familiar field Australian culture and society. At the same time this subject provides a context in which to critically examine dominant anthropological agendas, research methods and modes of presentation. By engaging in apparently familiar fields this subject addresses questions which underpin the location and future of

anthropological research in Australia. Central questions are: why, beyond work focused on Aboriginal cultures, has so little ethnographic research been done in Australia; what is the value of ethnographic perspectives; what is the relationship between 'texts', as cultural products, and everyday life; how can cultural research in Australia profitably proceed.

assessment: essays, papers equivalent to 8,000 words

#### Education

For syllabus details of Education electives see Master of Education Studies

#### English

##### 9455 Australian Cultural Studies IV

4 points semester 1  
1 lecture, two-hour seminar a week

The subject analyses contemporary Australian culture using theories and methodologies from the area of cultural studies. Students are expected to read widely in cultural studies and to situate their analyses of Australian culture within wider debates in cultural studies. The areas of Australian culture examined are popular literary forms, everyday life, television, and film.

assessment: essays, papers equivalent to 8,000 words

##### 7491 Contemporary Australian Writing

4 points semester 2  
1 lecture, two-hour seminar a week

restriction: 6557/1815 Contemporary Australian Fiction: New Directions 1970-1990 II/III

An exploration of the new diversity in Australian fiction since the 1970s, when the production of Australian literature increased dramatically.

assessment: essays, papers equivalent to 8,000 words

#### History

##### 8032 South Australian Aboriginal History IV

4 points semester 1

restriction: South Australian Aboriginal History at undergraduate level for syllabus details

See entry for 6253 South Australian Aboriginal History III in BA under History

assessment: essays, papers equivalent to 8000 words

## Labour Studies

### 3649 Political Economy of Globalisation IV

6 points semester 2

See Grad. Dip. Labour Studies for syllabus details

## Politics

### 4197 Public Policy in South Australia IV

4 points not offered in 1999

2 two-hour seminars per week

*restriction:* 1280 Public Policy in Australia II; 9796 Public Policy in Australia III; Politics Honours Special: Public Policy in Australia

See 9990 Private and Public Policy in South Australia III in the Bachelor of Arts for content details.

*assessment:* essays, papers equivalent to 8,000 words

## Women's Studies

### 9410 Australian Feminist History: A Survey

4 points semester 1

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restrictions:* 9959/2345 Gender Divisions in Some Western Societies Since 1700 II/III, 1489 History IIIB (Women in History)

A survey of Australian feminist history set in a context of recent debates in feminist history. Topics include Aboriginal women, the historiography of the women convicts, pioneer women, women's separate sphere, first-wave feminism, sexuality, the birth rate, women's paid and unpaid work, the depression and the world wars.

*assessment:* 4000 word essay or oral history project, 1500 word seminar paper/research, seminar presentation, participation

### 5756 Power and Difference: Postcolonial Perspectives PG

6 points not offered in 1999

3 hours per week

*restrictions:* 3708/9279 Power and Difference

Students will consider feminist, postmodern and postcolonial perspectives on constructions of race, class and gender differences with specific (but not exclusive) reference to Australian culture (19th and 20th century). With reference to the work of postcolonial, French feminist, psychoanalytic, Foucauldian and deconstructive critics students will examine the role of high and mass cultural materials (novels and art forms, histories, journalism, traveller's tales, the tabloid press, film, cartoons, photography,

newspapers and the like) in constructing networks of knowledge and power through representations of difference/marginality. The subject will examine the possibilities for maintaining and resisting dominant power relations in the operations of language, social institutions and everyday life experiences. It will also consider reading and viewing practices to understand how readers are positioned by texts and how to read otherwise'.

*assessment:* 1500 word applied analysis 20%; 1000 word seminar presentation/paper 20%; 4000 word project research paper 60%; book and journal 50%, 4000 word major essay 50%

# Graduate Certificate in Cognitive Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Cognitive Science shall have qualified for a degree of the University incorporating major studies in one or more of the following disciplines: philosophy, psychology, linguistics, computer science, neurophysiology, neuroanatomy, mathematics; or for a degree of another institution accepted for the purpose by the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

Except by the special permission of the Head of the Department of Philosophy, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of the Award

To qualify for the Graduate Certificate a student shall satisfactorily complete a course of one semester of full-time study or the part-time equivalent, and not more than two years of part-time study.

### 5 Qualification requirements

Students of the Graduate Certificate shall complete 12 points of subjects as outlined in Rule 6, see below.

### 6 Course of study/Subjects of study

Students for the Graduate Certificate shall complete subjects to the value of 12 points as follows:

### 6.1 Core Subject

All students shall complete the following subject:

1207 Cognitive Science: Minds, Brains and Computers IV 4

(Students who are exempted from studying the subject 1207 Cognitive Science: Minds, Brains and Computers IV due to having previously completed either 8606 Cognitive Science: Minds, Brains and Computers II or 5086 Cognitive Science: Minds, Brains and Computers III or its equivalent will be required to present a further 4 point elective subject listed in 6.1.2 in lieu of this requirement.)

### 6.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 8 points chosen from the following six groups of subjects, with no more than 4 points of subjects being presented from any one group:

#### Group A Philosophy Subjects

8733 Issues in the Philosophy of Language IV 4

6655 Mental Representation, Consciousness and Self IV 4

3390 Logic IV 4

#### Group B Psychology Subjects

4308 Intelligence IV 2

5296 Neuroscience in Psychology IV 2

2960 Philosophy and Psychology of Consciousness IV 2

9292 Psychology of Language in Thought and Action IV 2

8299 Social Psychology IV 2

#### Group C Computer Science Subjects

8352 Artificial Intelligence IV 2

1777 Knowledge Representation IV 2

2340 Advanced Artificial Intelligence IVA (Computer Vision) 2

5042 Advanced Artificial Intelligence IVB (Machine Learning) 2

**Group D Linguistics Subjects**

4594 Foundations of Linguistic Theory IV 4

3355 Language, Cognition and Reality IV 6

**Group E Histology and Anatomy Subjects**

2967 Integrative and Comparative  
Neuroanatomy (CS) IV 4

**Group F Physiology Subjects**

3155 Neurobiology IV 2

The availability of some of the above elective subjects varies from year to year. Students should contact the relevant department(s) for information about subject availability over the projected period of their study program.

Many of these elective subjects have had their normal prerequisites waived for the purposes of this graduate program in Cognitive Science. However, students enrolling in these subjects are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact subject coordinators for information about appropriate background reading.

**7 Academic progress**

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**8 Assessment and examinations**

8.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

9.1 Students who complete this course are also eligible to apply for entry to the Graduate Diploma in Cognitive Science course, and if successful, on gaining entry, may apply for status for the work they have undertaken in the Graduate Certificate.

9.2 Students who have conferred upon them the award of Graduate Certificate in Cognitive Science who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

**Syllabuses**

See Master of Cognitive Science for syllabus details

## Graduate Certificate in Creative Writing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Creative Writing shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University, and present a suitable portfolio of creative writing

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2. Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points, as follows:

##### 4.1 Core subject

All candidates shall complete the following subject:

4320 Work in Progress 6

##### 4.2 Elective subjects

All candidates shall complete an elective subject to the value of 6 points selected from the following:

8500 Australian Cultural Studies IV 6

9156 Contemporary Australian Film IV 6

8307 Contemporary Australian Writing IV 6

3255 Drama Since 1900 IV 6

7313 Fiction and Drama in England IV 6

3876 Legal Representations: From Book to Website IV 6

7450 Major English Texts IV 6

9717 Medieval English Literature IV 6

9596 Modern Drama from Europe, America and Britain IV 6

2085 Modernist Literature IV 6

6933 New Literatures in English IV 6

3904 Poetry of the English Renaissance IV 6

5358 Questions of Postmodernism IV 6

9185 Romanticism IV 6

9631 The Idea of Youth: Fiction, Film and Theory IV 6

5845 Twentieth Century American Literature IV 6

1698 Victorian Literature IV 6

8972 Women's Writing in the Nineteenth Century IV 6

4.3 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

5.1 A candidate normally would not be granted status for any subject which he or she has completed for another award.

5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned

- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

**7. Articulation with other awards**

A candidate for the Graduate Diploma in Creative Writing who satisfies the requirements of the Graduate Certificate but who does not complete the requirements of the Graduate Diploma may be admitted to the Graduate Certificate.

**Syllabuses**

---

See Master of Arts (Creative Writing) for syllabus details

## Graduate Certificate in Educational Studies

This award does not qualify the candidate for registration as a teacher. For the purposes of professional registration, a candidate must complete the Graduate Diploma in Education.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

There will be no intake into this course in 1999

# Graduate Certificate in Environmental Policy, Planning and Management

There will be no intake into this course in 1999.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Environmental Policy, Planning and Management shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, to qualify for the Graduate Certificate a student shall satisfactorily complete a course of one semester of full-time study or not more than four consecutive semesters of part-time study.
- 4.2 Part-time students shall take the subject 9865 Environmental Policy and Planning Project in their final semester.

### 5 Qualification requirements

- 5.1 The course of study for the Graduate Certificate shall be made up of the compulsory subject Environmental Policy and Planning Project, together with three elective subjects.

### 6 Course of study/Subjects of study

All students shall satisfactorily complete the compulsory subject:

9865 Environmental Policy and Planning Project 3

Students shall complete elective subjects to the value of 9 points taken from the following:

4079 Ecofeminist Theory and Politics 3

7766 Ecotourism: Opportunities and Impacts 3

1716 Educating for the Environment 3

7007 Environmental Earth Science 3

9474 Environmental Hazards 3

8865 Environmental Impact Assessment (Env.St) 3

7420 Environmental Organisation and Activism 3

2005 Environmental Politics 3

8249 Environmental Restoration and Rehabilitation 3

1683 Environmental Risk Management 3

3216 Environmental Systems Management 3

2056 Environmental Writing 3

4550 Gender, Environment, Development 3

5941 History, Philosophy and Ethics of Environmentalism 3

6631 Managing Coastal Environments 3

8375 Practical Environmentalism 3

1201 Principles of Environmental Science 3

9873 Special Topic in Environmental Management 3

2667 Special Topic in Environmental Planning 3

7888 Special Topic in Environmental Policy 3

8594 Special Topic in Environmental Science 3

2267 Special Topic in Environmental Studies 3

2124 Urban Environments 3

## **7 Review of academic progress**

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre of Environmental Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## **Syllabuses**

---

### **9865 Environmental Policy and Planning Project**

3 points not offered in 1999

1 hour workshop per week

This subject will require students to compete a policy or planning document relevant to a selected environmental management issue.

*assessment:* to be advised

See Master of Environmental Studies for other syllabus details

# Graduate Certificate in Environmental Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the Graduate Certificate in Environmental Studies shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

**1.2** The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

### 2 Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 4 Course requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points, as follows:

#### 4.1 Core subjects

All candidates shall complete one subject from either of the following two groups of subjects:

#### Environmental History and Philosophy Group

5941 History and Philosophy of Environmentalism 3

1722 Special Topic in Environmental History and Philosophy 3

#### Environmental Science Group

1201 Principles of Environmental Science 3

8594 Special Topic in Environmental Science 3

#### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 9 points selected from the following Environmental Policy, Planning and Management Group of subjects:

4079 Ecofeminist Theory and Politics 3

7766 Ecotourism: Opportunities and Impacts 3

1716 Educating for the Environment 3

2550 Environmental Earth Science 3

1865 Environmental Futures: Local/Global Sustainability 3

9474 Environmental Hazards 3

8865 Environmental Impact Assessment (Env.St.) 3

7420 Environmental Organisation and Activism 3

2005 Environmental Politics 3

8249 Environmental Reconstruction and Rehabilitation 3

1683 Environmental Risk Management 3

3216 Environmental Systems Management 3

2056 Environmental Writing 3

4550 Gender, Environment, Development 3

6631 Managing Coastal Environments 3

8375 Practical Environmentalism 3

9873 Special Topic in Environmental Management 3

2667 Special Topic in Environmental Planning 3

7888 Special Topic in Environmental Policy 3

2267 Special Topic in Environmental Studies 3

2124 Urban Environments 3

**4.3** No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

## **5 Status, exemption and credit transfer**

- 5.1** A candidate normally would not be granted status for any subject which he or she has completed for another award.
- 5.2** A candidate who fails a subject and is allowed to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

- 6.1** There shall be four classifications of pass in any subject for the Graduate Certificate:
- Pass with High Distinction
  - Pass with Distinction
  - Pass with Credit *and*
  - Pass.
- 6.2** (a) A candidate shall not be eligible to be assessed, by examination or otherwise, unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to be assessed, by examination or otherwise, shall be deemed to have failed the subject.

## **7 Review of academic progress**

A candidate for the Graduate Diploma in Environmental Studies who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

## **Syllabuses**

---

See Master of Environmental Studies for syllabus details

## Graduate Certificate in Historical Studies

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

- |  |   |
|--|---|
| <b>1 Admission requirements</b>  | 2215 History IV (Full Year) 12  |
| <b>1.1</b> An applicant for admission to the course of study for the Graduate Certificate in Historical Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.   | 6493 History IV A 6<br>4782 History IVB 6<br><i>or</i><br>7877 Individual Historical Study (Full Year) 12   |
| <b>1.2</b> Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate. | 8834 Individual Historical Study A 6<br>3499 Individual Historical study B 6  |
| <b>2 Status, exemption and credit transfer</b>   | <b>7 Academic progress</b>  |
| Except by the special permission of the Head of the Department of History, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.   | <b>7.1</b> A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.   |
| <b>3 Approval of course of study at enrolment</b>  | <b>7.2</b> A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.  |
| Each student's course of study shall be approved by the Faculty at enrolment each year.  | <b>8 Assessment and examinations</b>  |
| <b>4 Duration of the Award</b>   | <b>8.1</b> There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.  |
| Except with the special permission of the Head of Department of History, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.  | <b>8.2</b> For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of History as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject. |
| <b>5 Qualification requirements</b>  |   |
| Students of the Graduate Certificate shall complete 12 points of subjects as outlined in Rule 6, see below.  |   |
| <b>6 Course of study/Subjects of study</b>   |   |
| Students for the Graduate Certificate students shall complete subjects to the value of 12 points chosen from the following:  |   |
| Full-year and semester length Level III History subjects listed in Rule 8.9 of the Specific Course Rules of the Bachelor of Arts (see page 219), to be taken as:   |   |

## Syllabuses

---

### **2215 History IV (Full Year)**

12 points full year

2 lectures, 1 tutorials a week

*restrictions:* Subject by same name at Level II or III

Content to be selected from any of the Level III full year History subjects listed as current

*assessment:* as for selected subject with additional requirements as stipulated by the Subject convenor

### **6493 History IVA**

6 points semester 1 or 2

2 lectures, 1 tutorials a week

*restrictions:* Subject by same name at Level II or III

Any Level III semester length History subjects listed as current

*assessment:* as for selected subject with additional requirements as stipulated by the Subject convenor

### **4782 History IVB**

6 points semester 1 or 2

2 lectures, 1 tutorials a week

*restrictions:* Subject by same name at Level II or III

Any Level III semester length History subjects listed as current

*assessment:* as for selected subject with additional requirements as stipulated by the Subject convenor

### **7877 Individual Historical Study (Full Year)**

12 points full year

2 hours individual consultation

Syllabus details to be determined in consultation with Course Coordinator

### **8834 Individual Historical Study A**

6 points semester 1 or 2

2 hours individual consultation

Syllabus details to be determined in consultation with Subject Coordinator

### **3499 Individual Historical Study B**

6 points semester 1 or 2

2 hours individual consultation

Syllabus details to be determined in consultation with Subject Coordinator

## Graduate Certificate in International Studies

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in International Studies shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the Graduate Certificate a candidate shall satisfactorily complete subjects to the value of 12 points as follows:

##### 4.1 Core Subjects

All candidates shall complete the following subjects:

8414 Graduate International Studies	6
3094 International Studies Seminar	6

4.2 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

5.1 A candidate normally would not be granted status for any subject which he or she has completed for another award.

5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

#### 7 Articulation with other awards

A candidate for the Graduate Diploma in International Studies who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

### Syllabuses

See Master of Arts (International Studies) for syllabus details

## Graduate Certificate in Labour Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: this course is also offered externally

| Pass with High Distinction   |                          |   |                           |   |  |   |                                    |   |                                     |   |  |   |   |                               |   |                                    |   |                                 |   |                                     |   |                                  |   |                                     |   |                                    |   |                                       |   |                                      |   |   |   |                            |                       |                             |       |
| Pass with Distinction  |                          |   |                           |   |  |   |                                    |   |                                     |   |  |   |   |                               |   |                                    |   |                                 |   |                                     |   |                                  |   |                                     |   |                                    |   |                                       |   |                                      |   |   |   |                            |                       |                             |       |
| Pass with Credit <i>and</i>  |                          |   |                           |   |  |   |                                    |   |                                     |   |  |   |   |                               |   |                                    |   |                                 |   |                                     |   |                                  |   |                                     |   |                                    |   |                                       |   |                                      |   |   |   |                            |                       |                             |       |
| Pass.  |                          |   |                           |   |  |   |                                    |   |                                     |   |  |   |   |                               |   |                                    |   |                                 |   |                                     |   |                                  |   |                                     |   |                                    |   |                                       |   |                                      |   |   |   |                            |                       |                             |       |

## **7 Articulation with other awards**

A candidate for the Graduate Diploma in Labour Studies who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

## **Syllabuses**

---

See Master of Arts (Labour Studies) for syllabus details

## Graduate Certificate in Language Education

There will be no intake into this course in 1999.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate shall have qualified for a degree of the University and a Graduate Diploma in Education of the University, or hold qualifications from another institution accepted by the University for the purpose.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the relevant department, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Graduate Certificate shall be completed in one semester of full-time study or not more than two years of part-time study.

#### 5 Qualification requirements

##### 5.1 Advanced French:

All students shall take subjects to the value of 12 points, comprising the compulsory subjects 1526 Aspects of Culture and Society in French-Speaking Countries (4 points) and 1373 Issues in Second Language Learning and Curriculum (4 points) together with an elective subject to the value of 4 points.

- 5.2 The Faculty may, on the recommendation of the Department of French, require suitably qualified native-speaking candidates to take the subject

1133 Special Project in French Teaching or French Culture as an alternative to the subject 2171 Advanced Language: Written and Oral Proficiency.

##### 5.3 Advanced German:

All students shall complete subjects to the value of twelve points comprising the compulsory subjects 8060 Survey of German-Speaking Countries Today (three points) and 3333 Strategies and Materials in Teaching German (four points) together with five points of elective subjects.

- 5.4 The Faculty may, on the recommendation of the Department of German, require suitably qualified native-speaking candidates to take the subject 5647 Special Project in German Teaching as an alternative to the subjects 2626 Advanced Language (German) and 8589 German Conversation Tutorial.

##### 5.5 Applied Linguistics

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete the subjects outlined in 6.3 below, with an aggregate points value of twelve points

#### 6 Course of study/Subjects of study

##### 6.1 Advanced French

###### 6.1.1 Compulsory subjects

All students shall take the following subjects:

1526 Aspects of Culture and Society in French Speaking Countries	4
1373 Issues in Second Language Learning and Curriculum	4

###### 6.1.2 Elective subjects

Candidates shall take (subject to the approval of the Faculty as outlined in 5.2 above):

*either*

2171 Advanced Language: Written and Oral Proficiency	4
--	---

*or*

1133 Special Project in French Teaching or French Culture	4
---	---

Additional subjects may be offered at the discretion of the Council.

## 6.2 Advanced German

### 6.2.1 Compulsory subjects

All candidates shall take the following subjects:

8060 Survey of German-Speaking Countries Today	3
3333 Strategies and Materials in Teaching German	4

### 6.2.2 Elective subjects

Candidates shall take (subject to the approval of the Faculty, as outlined in 5.2 above):

*either*

2626 Advanced Language (German)	3
8589 German Conversation Tutorial	2

*or*

5647 Special Project in German Teaching	5
---	---

Additional subjects may be offered at the discretion of the Council.

## 6.3 Applied Linguistics

The subjects of the Graduate Certificate in Language Education (Applied Linguistics) are the following:

1138 Language and Learning (Applied Linguistics)	4
6555 Language Awareness	4
4017 Practical Linguistic Analysis	2
5959 Language Teaching	2

Additional subjects may be offered at the discretion of the Council.

## 7 Review of academic progress

**7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

**7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

**7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of French Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

**8.1** There shall be two systems of classification of pass in any subject for the Graduate Certificate: Non-Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

### Advanced French

The Department of French Studies, in cooperation with the Department of French at Flinders, offers a Graduate Certificate in Language Education (Advanced French). The aim of the course is to enable practising teachers of French to enhance their language skills and to further their professional development.

The language of instruction in all subjects will be French.

### 1526 Aspects of Culture and Society in French Speaking Countries

4 points not offered in 1999

2 weeks intensive study during school vacations

Explores central cultural and social issues in France and French speaking countries today. It will focus on five themes: La Vème république; Les médias en France; L'immigration; L'Europe; La francophonie. Films and novels, the press and television will be discussed in relation to these aspects.

*assessment:* assignment/s 60%; examination 40%

### 1373 Issues in Second Language Learning and Curriculum

4 points not offered in 1999

2 weeks of intensive study during school vacation

The subject examines current research in second language acquisition; to examine curriculum design for language teaching; to develop practical strategies and resources for teaching French.

It will focus on language use in the classroom and different types of interaction; it will include the principles and practice of syllabus and program design; the development and use of resources for teaching French; procedures for monitoring and assessing students progress. This subject will be offered as a common component with the Graduate Certificate in Language Education (Applied Linguistics) and will involve French staff for the language specific issues.

*assessment:* portfolio including reports on topics covered in course

### 2171 Advanced Language: Written and Oral Proficiency

4 points not offered in 1999

2 lectures a week

The subject aims to develop communicative competence in the form of general linguistic proficiency. Participants who complete the course successfully may expect to be able to operate more effectively in the four skills (reading, listening, speaking and writing) and in particular to integrate

them as in real life. These skills are not developed in isolation but in the context of those issues which are of most importance in understanding contemporary French-speaking societies. The issues are closely coordinated in a rational framework corresponding to the recommendations of *En fin de Compte*. This course book was awarded the National Prize for excellence in all foreign language teaching in the UK in 1990.

*assessment:* active classroom participation, 10 500 word assignments, 30 minute oral exam

### 1133 Special Project in French Teaching or French Culture

4 points not offered in 1999

1 hour a week

The Special Project is an alternative to 2171 Advanced Language: Written and Oral Proficiency and replaces this subject for students with advanced language skills. It consists of an individual project on some aspect of French culture relevant to the secondary syllabus. It may be based on the student's own teaching needs or experience and could involve the preparation of a monograph which would be of use to other teachers with their classes. The project will be done under a supervisor and the discussion will be conducted in French.

For those who would prefer to do their Special Project on issues in language learning and curriculum, they are advised to join the Classroom Research Subject in Applied Linguistics which will be offered by the University of Adelaide.

*assessment:* extended 6000 word essay

### Advanced German

The language of instruction in all subjects for the Graduate Certificate in Language Education (Advanced German) will be German.

### 8060 Survey of German-Speaking Countries Today

3 points not offered in 1999

2 lectures a week

The aim of this subject is to treat many of the central social, cultural and political issues in German-speaking countries today. The unification of the two Germanies will be the major object of study, with comparisons with and contrasts to Austria and Switzerland. Topics surveyed will include the importance of the European Community, the changing relationships of the Western countries to Central and Eastern Europe and major political parties. There will also be discussion of the revolution in and disappearance of the GDR, of problems encountered by individuals when they try to enjoy their guaranteed freedoms, and of the difficulties caused by and for ethnic German migrants, asylum-seekers, and other outsider groups. The particular concerns of women, environmentalists and the need to develop and adapt educational systems will also be discussed. The survey will use material from newspapers, journals, radio and television to illustrate and inform the discussion.

*assessment:* essay 60%; semester work 40%

### 3333 Strategies and Materials in Teaching German

4 points not offered in 1999

2 lectures a week

This subject deals with language teaching methodology in a very practical sense. It will concentrate on the practical aspects of teaching German as a foreign language in a school setting: ways of establishing the needs of learners; analysing and evaluating existing materials (ie the textbooks most widely used in SA); criteria for the development of new materials; preparing exercises for specific communicative needs.

The subject will rely heavily on the experience and contributions of the participants, because improving our language teaching methods is as much a cooperative exercise as language learning itself.

*assessment:* essay 60%; semester work 40%

### 2626 Advanced Language (German)

3 points not offered in 1999

2 lectures a week

The aim of this subject is to upgrade existing language skills by written and oral work in modern German at an advanced level. The subject will emphasise linguistic problems encountered in the classroom situation and recent changes in usage in German. The alternative to this subject for students already having substantially these skills is the Special Project.

*assessment:* exam 50%; classwork 50%

### 8589 German Conversation Tutorial

2 points not offered in 1999

1 tutorial a week

The aim of this subject is to upgrade existing fluency and conversational skills in modern everyday German by intensive oral work in small groups. Special attention will be given to topics of current cultural, political and social interest and to recent changes in spoken German idioms. The alternative to this subject for students already having substantially these skills is the Special Project.

*assessment:* participation

### 5647 Special Project in German Teaching

5 points not offered in 1999

1 hour a week average

The Special Project is an alternative to both 2626 Advanced Language and 8589 German Conversation Tutorial and replaces these subjects for those students who already have substantially those language skills. It consists of an individual project embodying research into some aspect of German Language Teaching Methodology, or a related field acceptable to the Department, and may be based on the student's own teaching experience. A supervisor will be assigned to the project and individual guidance sessions will take place on a regular basis. Supervision will be conducted in German.

*assessment:* extended 6000 word essay

## Applied Linguistics

### 1138 Language and Learning (Applied Linguistics)

4 points not offered in 1999

1 lecture, 1 tutorial a week

The aim of this subject is to introduce current research in second language acquisition. The course will include: introduction to the nature and functions of language; research on language development; the role of instruction; language learning strategies; contrastive linguistics, error analysis and inter-language approaches to second language studies.

*assessment:* 4000 word essay 60%; assignments 40%

### 6555 Language Awareness

4 points not offered in 1999

1 lecture, 1 tutorial a week

The aim of this subject is to alert students to the social, political and psychological context of a range of languages other than English. Particular emphasis will be placed on official language policies in Australia and their implications for language teaching.

*assessment:* 4000 word essay 60%; assignments 40%

### 4017 Practical Linguistic Analysis

2 points not offered in 1999

1 lecture per fortnight; 1 practical per week

This subject aims at providing students with the essence of traditional school grammar and practical skills in linguistic analysis and error analysis.

*assessment:* 4000 word essay 60%; assignments 40%

### 5959 Language Teaching

2 points not offered in 1999

1 lecture, 1 tutorial a week

This subject will familiarise learners with a number of methods and techniques used in the second language classroom. It will address the technological resources currently available and show how they can be integrated with the learning process.

*assessment:* research report 60%; assignments 40%

## Graduate Certificate in Logic

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Logic shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University, which includes a pass in Logic I or an equivalent subject.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Status, exemption and credit transfer

Except by the special permission of the Head of the Department of Philosophy, no student may gain status towards the Graduate Certificate for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the Graduate Certificate a student shall satisfactorily complete a course of one semester of full-time study or not more than two years of part-time study.

#### 5 Qualification requirements

Students of the Graduate Diploma shall complete 12 points of subjects as outlined in Rule 6, see below.

#### 6 Course of study/Subjects of study

Students for the Graduate Diploma students shall complete subjects to the value of 12 points as follows:

#### 6.1 Core Subjects

All students shall complete the following subject:

3402 Advanced Logic A (PG) 6

(Students who are exempted from studying the subject 3402 Advanced Logic A (PG) due to having previously completed 4259 Logic IIIA or its equivalent will be required to present a further 6 points of elective subjects listed in 6.1.2 in lieu of this requirement.)

#### 6.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 6 points chosen from the following:

2614 Advanced Logic B (PG) 2

7665 Argument (PG) 4

1619 Artificial Intelligence (PG) 2

1998 Intermediate Logic (PG) 4

2254 Knowledge Representation (PG) 2

#### Flinders University Subjects:

COMP 3007 Artificial Intelligence 2

COMP 3009 Computational Logic 2

PHIL 2080 Logic, Reasoning and Argumentation 4

#### 7 Academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

#### 8 Assessment and examinations

8.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not,

without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **9 Articulation with other awards**

- 9.1** Students who complete this course are also eligible to apply for entry to the Graduate Diploma in Logic course, and if successful, on gaining entry, may apply for status for the work they have undertaken in the Graduate Certificate.
- 9.2** Students who have conferred upon them the award of Graduate Certificate in Logic who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.

## **Syllabuses**

---

*syllabus details:* see Master of Logic

## Graduate Certificate in Philosophy

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1** An applicant for admission to the course of study for the Graduate Certificate in Philosophy shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2** The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2. Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points, as follows:

- 4.1** All candidates shall complete two of the following subjects:

5670 Introductory Philosophy (PG)	6
9673 Metaphysics (PG)	6
4708 Epistemology (PG)	6
9522 Modern Moral Philosophy (PG)	6
4482 Political and Legal Philosophy (PG)	6

- 4.2** No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award. Intending students must consult with the Head of Department to discuss their proposed course of study.

#### 5 Status, exemption and credit transfer

- 5.1** A candidate normally would not be granted status for any subject which he or she has completed for another award.
- 5.2** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

- 6.1** There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2** (a) a candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) for the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

#### 7. Articulation with other awards

A candidate for the Graduate Certificate in Philosophy and who has been granted status towards the Graduate Diploma for subjects presented for the Graduate Certificate to a value of more than six points must surrender the Graduate Certificate before being admitted to the Graduate Diploma.

### Syllabuses

See Master of Arts (Philosophy) for syllabus details

## Graduate Certificate in Population Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Population Studies shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2. Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points as follows:

##### 4.1 either

(a)

1556 Population Data Analysis 4

2924 Computer Applications in Population Studies 4

and one subject chosen from the following:

(b)

3790 Population Studies 4

5678 Ageing of Populations 4

4024 Demography of the Family 4

1762 Applied Demography 4

or

Any three subjects chosen from those listed in Rule 4.1(b) above.

- 4.2 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5. Status, exemption and credit transfer

- 5.1 A candidate normally would not be granted status for any subject which he or she has completed for another award.
- 5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
  - (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
  - (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

#### 7. Articulation with other awards

A candidate for the Graduate Diploma in Population and Human Resources who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

### Syllabuses

See Master of Arts (Population and Human Resources) for syllabus details

## Graduate Certificate in Public Affairs

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Public Affairs shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate

#### 2. Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points as follows:

##### 4.1 Core subjects

1883 Approaches to Policy	6
1592 Australian Public Policy: Challenge of Change	6

4.2 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5. Status, exemption and credit transfer

5.1 A candidate normally would not be granted status for any subject which he or she has completed for another award.

5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

#### 7. Articulation with other awards

A candidate for the Graduate Diploma in Public Affairs who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

### Syllabuses

See Master of Arts (Public Affairs) for syllabus details

## Graduate Certificate in Social Sciences

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Certificate in Social Sciences shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2. Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points as follows:

##### 4.1 Core subjects

4462 Approaches to Social Sciences  
Research (4 pt) 4

or

4226 Approaches to Social Sciences  
Research (6 pt) 6

and

4.2 core subjects available in the following Social Sciences graduate coursework degrees in the Faculty of Arts: Applied Linguistics, Cognitive Science, Educational Studies, Environmental Studies, International Studies, Labour Studies, Philosophy, Population and Human Resources, Spatial Information Science and Women's Studies.

4.3 No candidate will be permitted to count for the Graduate Certificate any subject that, in the

opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

5.1 A candidate normally would not be granted status for any subject which he or she has completed for another award.

5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

#### 7. Articulation with other awards

A candidate for the Graduate Diploma in Social Sciences who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

### Syllabuses

See Master of Social Sciences for syllabus details

# Graduate Certificate in Spatial Information Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Certificate in Spatial Information Science shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate

### 2 Duration of course

to qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 4 Course requirements

- 4.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to a total of 12 points, as follows:
- |  |   |
|--|---|
| 6155 Introduction to Spatial Data Models         | 3 |
| 4613 Introduction to Spatial Information Systems | 3 |
| 5107 Spatial Data Modelling & Analysis           | 3 |
| 3088 Spatial Data Visualisation                  | 3 |
- 4.2 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

### 5 Status, exemption and credit transfer

- 5.1 A candidate normally would not be granted status for any subject which he or she has completed for another award.
- 5.2 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

### 6 Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

### 7. Articulation with other awards

A candidate for the Graduate Diploma in Spatial Information Science who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

## Syllabuses

See Master of Spatial Information Science syllabus details

## Graduate Certificate in Women's Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: some subjects are offered externally

### Specific Course Rules

#### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the Graduate Certificate in Women's Studies shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

**1.2** The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Certificate a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Certificate.

#### 2 Duration of course

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete one semester of full-time study or not more than two years of part-time study.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the Graduate Certificate, a candidate shall satisfactorily complete subjects to the value of 12 points, as follow:

##### 4.1 Core subject

All candidates shall complete the following subject:

5528 Theories of Feminism 6

##### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of at least 6 points selected from the following:

9410 Australian Feminist History:  
A Survey 6  
3612 Autobiographical Writings 6

5133 Environmental Feminism 6

4434 Exploring Sexualities 6

2649 Gender, Environment, Development  
(Women's Studies) 6

3919 Gender in a  
Post Colonial World IV 6

2360 Gender Relations and Social Policy 6

4588 Popular Culture, Film and  
Representation PG 6

5756 Power and Difference: Post Colonial  
Perspectives PG 6

3326 Twentieth Century Women Writers 6

3045 Women, Work and Economics 6

9008 Women's Studies Special Topic 6

**4.3** No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

**5.1** A candidate normally would not be granted status for any subject which he or she has completed for another award.

**5.2** A candidate who fails a subject and is allowed to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

**6.1** There shall be four classifications of pass in any subject for the Graduate Certificate:

Pass with High Distinction

Pass with Distinction

Pass with Credit *and*

Pass.

**6.2** (a) A candidate shall not be eligible to be assessed, by examination or otherwise, unless the prescribed work has been completed to the satisfaction of the teaching staff concerned

- (b) For the purpose of this Rule, a candidate who is refused permission to be assessed, by examination or otherwise, shall be deemed to have failed the subject.

## **7 Articulation with other awards**

- 7.1 A candidate for the Graduate Diploma in Women's Studies who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.
- 7.2 A candidate who satisfies the requirements of the Graduate Certificate is eligible to apply for entry to the Graduate Diploma with full credit for the work completed in the Graduate Certificate.

## **Syllabuses**

---

See Master of Arts (Women's Studies) for syllabus details

## International Graduate Certificate in Environmental Management

This course is available only to fellows sponsored by the United Nations Environment Program.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the International Graduate Certificate in Environmental Management shall have qualified for a degree of the University or for a degree of another university or institution accepted for the purpose by the University; and have at least two years' professional experience in environmental management or other cognate areas.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the International Graduate Certificate a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the International Graduate Certificate.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, no student may gain status towards the International Graduate Certificate for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 Except with special permission of the Faculty the course for the International Graduate Certificate shall be completed in one semester of full-time study.

#### 5 Qualification requirements

- 5.1 All students shall complete the compulsory subjects 8558 Principles of Sustainable Environmental Management (UNEP) and 9705 Special Project (UNEP), together with elective subjects to a total value of 12 points.

- 5.2 No student will be permitted to count for the International Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another qualification.

- 5.3 A student who fulfils the requirements outlined in 5.1 and 5.2 will be awarded the International Graduate Certificate in Environmental Management jointly by the United Nations Environmental Program and The University of Adelaide.

#### 6 Course of study/Subjects of study

- 6.1 A student may proceed to qualify for the International Graduate Certificate by satisfactorily completing subjects with a minimum aggregate of 12 points from the following:

##### (a) compulsory subject

All students shall satisfactorily complete the following subjects:

9705 Special Project (UNEP) 6

##### (b) elective subjects

Students shall satisfactorily complete subjects to the value of 6 points from the following:

9111 Ecotourism: Opportunities and Impacts (UNEP) 2

5418 Educating for the Environment (UNEP) 2

7910 Environmental Hazards (UNEP) 2

8184 Environmental Impact Assessment (UNEP) 2

6573 Environmental Policy (UNEP) 2

6979 Environmental Restoration (UNEP) 2

6500 Environmental Risk Management (UNEP) 2

6679 Environmental Systems Management (UNEP) 2

8008	Gender, Environment, Development (UNEP)	2
2717	Managing Coastal Environments (UNEP)	2
1121	Special Topic in Environmental Management (UNEP)	2

- 6.2 Students who wish to enrol in a subject for which they do not have the necessary preliminary knowledge may be required to undertake such bridging studies prior to the commencement of the subject as the Faculty may deem necessary.

## 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre for Environmental Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

- 8.1 A student who satisfactorily completes the requirements of a subject for the International Graduate Certificate shall be awarded a non-graded pass.

## Syllabuses

### compulsory subjects

#### 9705 Special Project (UNEP)

6 points semester 1 or 2

1 meeting with supervisor per week

Participants are required to carry out a problem analysis and problem solving study dealing with an environmental topic specific to their home country or sub-region. The study has to be embedded into the context of integrated environmental management for sustainable development so as to bring out its future global significance

*assessment:* three bound copies of Special Project to be produced; written report and the oral presentation. (Failure in this component means the Certificate will not be awarded)

### elective subjects

#### 9111 Ecotourism: Opportunities and Impacts (UNEP)

2 points semester 1

1 workshop per week

This subject examines ecotourism from an environmental management perspective. The main focus of the subject is nature-based tourism in Australia, but some attention is also given to Australian culture-based (indigenous) tourism and to the international scope of the tourism industry.

The introductory lectures of the subject present current definitions of ecotourism and the key characteristics that distinguish ecotourism from mainstream nature-based tourism. The introduction is followed by a review of the history of nature-based tourism and its cultural significance in Western societies. Subsequent lectures consider the economics of the tourism industry and its ecological and social impacts. These lectures critically examine the claim that ecotourism will be able to realise the economic returns being achieved by other segments of the tourism industry while managing the biophysical and social impacts of tourism so that ecotourism activities will be ecologically and socially sustainable.

In addition to lectures, the subject includes practical work intended to provide students with experience of identifying ecotourism opportunities, evaluating ecotourism operations and assessing ecotourism impacts.

*assessment:* to be advised

#### 5418 Educating for the Environment (UNEP)

2 points semester 2

1 workshop per week

Educating for the environment adds to the generally accepted purposes of education the development of an environmental consciousness among learners in order to change values, attitudes, actions and behaviours in ways that will help in saving our environment and creating an improved future world. The process of teaching itself is important in this.

The first objective of this subject will be to identify the principles on which the development of this environmental consciousness should be based and document its spread in formal education systems. The problem of incorporating Environmental Education into conventional models of curriculum development will also be considered. The second objective will be to consider how educational processes in both formal and informal spheres of education reflect the principles on which environmentalism is based: an active, committed, less hierarchical system of education.

*assessment:* to be advised

#### 7910 Environmental Hazards (UNEP)

2 points not offered in 1999

1 workshop per week

This subject gives an introduction to the description, classification and human perception of environmental hazards. It covers rapid on-set events such as earthquakes, storms and cyclones, flooding, volcanic activity, together with human induced events such as explosions, oil and chemical spills, nuclear accidents and major transport disasters. The subject also covers risk assessment, adjustment to hazards, disaster preparedness and planning. The subject uses Australian and/or local examples where appropriate.

*assessment:* to be advised

#### 8184 Environmental Impact Assessment (UNEP)

2 points semester 2

1 workshop per week

This subject introduces the methodology of environmental impact assessment (EIA) and examines the development of EIA overseas. The subject then focuses on EIA in Australia and, in particular, draws on case studies of EIA in South Australia. Different levels of EIA are examined alongside the responsibilities for decision-making. A number of major projects with environmental impact statements (EISs) are critically examined together with the EIS process in South

Australia. This includes discussion of recent changes to the relevant legislation.

*assessment:* to be advised

**6573 Environmental Policy (UNEP)**

2 points semester 2

1 workshop per week

This subject is divided into two parts. The first, political theory, investigates the ways environmental thought connects with major threads of traditional political theories. In addition, this section seeks to understand recent innovations which have contributed to what we now understand as modern environmental political thought.

After establishing the theoretical underpinnings, the subject then concentrates on environmental policy making as it has emerged in diverse forms across the globe. There are numerous political processes through which participants pursue green political goals. These range from the informal dynamics of networks, groups and social movements through to the more institutionalised responses of organisations, corporations, political parties and governments. These processes are reviewed using comparative analytical models and extra/inter/national examples taken from Australasia, the Asia-Pacific, North and South America, Europe and Africa.

*assessment:* to be advised

**6979 Environmental Restoration (UNEP)**

2 points semester 2

one workshop per week

This subject examines management strategies for conserving native species and ecosystems in human-dominated environments where the native vegetation cover has been fragmented and persists only as remnant patches and strips scattered within a matrix of introduced vegetation and human constructions on settled (rural-agricultural, industrial and urban) land. The subject considers strategies for the design of 'island and corridor' ecological reserve systems, but concentrates on strategies for the rehabilitation of remnant native ecosystems outside of ecological reserves and strategies intended to promote biological and soil conservation on settled land by restoring analogs of native ecosystems.

In addition to lectures, the subject includes practical sessions involving laboratory and field exercises. These exercises are used to illustrate concepts presented by the lectures and to demonstrate techniques of environmental restoration and rehabilitation.

*assessment:* to be advised

**6500 Environmental Risk Management (UNEP)**

2 points semester 1

1 workshop per week

Changes to Australian environmental Legislation in recent years have caused companies, local government and public utilities to take stock of their exposure to liability for environmental damage, and to put into practice environmental management systems and programs designed to protect the environment, achieve greenhouse and other policy targets, reduce risks and improve productivity. Cleaner production, waste reduction/recycling/reuse, environmental audits, monitoring, environmental risk assessment and integration of environmental management plans with quality management and occupational health and safety plans are being adopted by organisations aiming to run cleaner, better and more profitably. Through lectures from practitioners, workshops and industry visits, this subject gives a practical introduction to these practices and critically examines their contribution to achieving ecologically sustainable development at local and global levels.

*assessment:* to be advised

**6679 Environmental Systems Management (UNEP)**

2 points semester 1

one workshop per week

This subject examines some of the ways in which human societies have sought to modify and manipulate their natural environment from the time of pre-historic hunter-gatherers and the inception of plant and animal domestication until the present day. The aim of the subject is to suggest how our global physical and biological resources may be managed on a more sustainable basis by careful evaluation of both the beneficial and the adverse effects of various forms of human interaction with local, regional and global natural systems.

*assessment:* to be advised

**8008 Gender, Environment, Development (UNEP)**

2 points semester 1

1 workshop per week

This subject examines the connections between gender, environment and development (GED) in two ways: through guided reading and discussion of literature providing a theoretical analysis of GED issues, and by means of workshops in which students will design and discuss the results of their own field-based projects on current GED issues

*assessment:* to be advised

**2717 Managing Coastal  
Environments (UNEP)**

2 points semester 1

1 workshop per week

This subject examines selected strategies for managing coastal environments from around the world, although the main focus is the Australian coast. Where appropriate, local examples are used and followed up with local coastal fieldwork. The subject provides an overview of various coastal processes as a background to an understanding of coastal management issues. A major focus of the subject is on recent coastal management initiatives in Australia by both the Commonwealth Government and the State Governments.

*assessment:* to be advised

**1121 Special Topic in Environmental  
Managements (UNEP)**

2 points semester 1 or 2

1 workshop per week

This subject provides UNEP fellows with the opportunity to study an area of environmental management not covered by the elective subjects offered for the award. The specific program of study for the Special Topic will be decided by the Course Coordinator in consultation with the UNEP fellow and the sponsoring agency.

*assessment:* to be advised

## Graduate Diploma in Applied Demography

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as with the Specific Course Rules set out below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Applied Demography shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2. Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

##### 4.1 Core subjects

All candidates shall complete the following subjects:

9052 Applications of Demography	3
5628 Computer Applications in Demography	3
4101 Demographic Projections and Forecasts	3
2837 Introduction to Demography	3

##### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points selected from the following:

2767 Family Demography	3
2674 Households and Housing	3

2296 International Migration	3
3726 Labour Market Information Systems	3
3750 Mortality and Morbidity	3
4187 Population Ageing	3
3171 Population Mobility and Internal Migration	3
5082 Small Area Demographic Data	3

- 4.3 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5. Status, exemption and credit transfer

- 5.1 Except with the special permission of the Head of the Department of Geography, no candidate will be granted status for any of the core subjects of the Graduate Diploma except candidates who have qualified for the Graduate Certificate in Applied Demography.

- 5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.

- 5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

**6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

**7. Articulation with other awards**

**7.1** A candidate who has been admitted to the Graduate Certificate in Applied Demography and who has been granted status towards the Graduate Diploma for subjects presented for the Graduate Certificate to a value of more than 3 points must surrender the Graduate Certificate before being admitted to the Graduate Diploma.

**7.2** A candidate for the degree of Master of Arts (Applied Demography) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

**Syllabuses**

See Master of Arts (Applied Demography) for syllabus details

## Graduate Diploma in Applied Historical Studies

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the Graduate Diploma in Applied Historical Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2** Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Status, exemption and credit transfer

- 2.1** Except by the special permission of the Head of the Department of History, no student may gain status for the subjects listed for this course, for other studies undertaken in the University or other institutions.
- 2.2** In any case, no student may be granted more than 12 points of status toward the Graduate Diploma.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

Except with the special permission of the Head of Department of History, the course for the Graduate Diploma shall be completed in one year of full-time study or not more than two years of continuous part-time study.

#### 5 Qualification requirements

Students of the Graduate Diploma shall complete 24 points as outlined in Rule 6, below.

#### 6 Course of study/Subjects of study

Students for the Graduate Diploma students shall complete subjects to the value of 24 points as follows:

- 6.1** All students shall satisfactorily complete the following:

6132	Public History: Principles and Practice	6
5935	Heritage and History in Contemporary Australia	6
2850	Practical History Workshop I	6
1303	Practical History Workshop II	6

#### 7 Academic progress

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

#### 8 Assessment and examinations

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of History as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

#### 9 Articulation with other awards

- 9.1** Students who receive a credit average or better in this course are eligible to apply for entry to the Master of Arts (Applied Historical Studies) course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.

### Syllabuses

See Master of Arts (Applied Historical Studies) for syllabus details

## Graduate Diploma in Applied Linguistics

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the Graduate Diploma in Applied Linguistics shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

**1.2** The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the Graduate Diploma, a candidate shall have passed at least one full year of any language other than English (LOTE) at tertiary level, or the equivalent, and satisfactorily complete subjects to the value of 24 points, as follows:

##### 4.1 Core subject

All candidates, except those covered by clauses 5.3 and 5.4 below, shall complete the following subjects:

2207	Foundations of Linguistics IV A	6
9836	Foundations of Linguistics IV B	6
5066	Language other than English (if required)	0

#### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points chosen selected from the following:

8500	Australian Cultural Studies (Linguistics) IV	6
7556	Computer Assisted Language Learning IV	6
8766	Computer Assisted Language Learning Project IV	6
2030	English for Professional Purposes IV	6
8217	Functional Grammar and Discourse IV	6
8538	Karna Language and Language Ecology IV	6
1170	Language and the Environment IV	6
5115	Language Cognition and Reality IV	6
4306	Language Maintenance and Language Planning IV	6
6933	New Literatures in English IV	6
5358	Questions of Postmodernism IV	6
7054	Special Topic in Linguistics IV	6

**4.3** No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

**5.1** No candidate will be granted status for any subject which he or she has completed for another award.

**5.2** No candidate shall be granted status for subjects with a total value of more than 12 points on account of subjects not previously presented for another award.

**5.3** Students who have passed *Foundations of Linguistics II or III* in an undergraduate degree will be exempt from the core topics and will substitute two additional electives.

**5.4** Any candidate who has not passed a language other than English (LOTE) subject at tertiary level is required also to complete one year of study in a LOTE concurrently with the requirements of Rule 4 of the award.

- 5.5** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

- 6.1** There shall be four classifications of pass in any subject for the Graduate Diploma:

Pass with High Distinction;  
Pass with Distinction;  
Pass with Credit; and  
Pass.

- 6.2** (a) A candidate shall not be eligible to be assessed, by examination or otherwise, unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to be assessed, by examination or otherwise, shall be deemed to have failed the subject.
- 6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

A candidate for the degree of Master of Arts (Applied Linguistics) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## **Syllabuses**

---

See Master of Arts (Applied Linguistics) for syllabus details

## Graduate Diploma in Asian Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the Graduate Diploma in Asian Studies shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

**1.2** The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3 Approval of course of study

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

##### 4.1 Core subjects

All candidates shall complete the following subjects:

3480 Asian Studies Research Project 6

##### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 18 points selected from the following:

8079 Arts and Cultures of Asia 6

8172 Asia Today 6

1827 Asian Studies (core topic) 4

9770 Australia and the Asia Pacific III 6

1954 Contemporary China: Politics and Society 6

6510 Contemporary Japan: Economy and Society 6

9803 Contemporary Japan: Politics and Society 6

3195 Development Economics 4

6114 Early China: Sages and Shamans 6

9170 East Asian Capitalism 6

1802 East Asian Economies 4

1706 Enter the Dragon: Chinese Business in Asia 6

1514 Environment and Development in Southeast Asia 6

6179 Foundations of Chinese Thought 6

3409 Imperial China: Glory and Fall 6

8343 Introduction to Chinese Society and Culture 3

3601 Introduction to Japanese Society and Culture 3

8455 Japanese Society: Development and the Environment 6

9272 International Economic History 4

8100 Politics and Foreign Policy in Contemporary Japan 6

7043 The Chinese Economy: Growth, Trade and Development 6

5884 The Making of Modern Indonesia 6

2979 The Political Economy of the Global Village 6

3038 The Southeast Asian Past 6

4936 The State of the World 6

and/or a minimum of 6 points in Chinese, Indonesian, Japanese or Vietnamese language, depending on the candidate's level of ability. See entries under Bachelor of Arts for details.

**4.4** No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

**5.1** No candidate shall be granted status for 3480 Asian Studies Research Project.

**5.2** No candidate shall be granted status for subjects with a total value of more than 12 points.

- 5.3 No candidate shall be granted status for subjects which have been presented for another award.

## **6 Assessment and examinations**

- 6.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## Syllabuses

---

### **3480 Asian Studies Research Project**

6 points semester 1 or 2

Except with the permission of the Head of Department, this subject will be undertaken after the elective subjects have been completed. Candidates will develop an appropriate project in consultation with their supervisor. The project will normally be related to the candidate's professional work.

*assessment:* 8-10000 word project

### **All other elective subjects**

See entries under Asian Studies in the Bachelor of Arts

## Graduate Diploma in Chinese Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Chinese Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Centre for Asian Studies, no student may gain status for the Chinese Language subject, or for the research subject 4682 Special Topic in Chinese Studies for other studies undertaken in the University or other institutions.
- 2.2 No student may be granted more than 12 points of status toward the Graduate Diploma.
- 2.3 Status will not be granted for elective subjects for Level III Asian Studies subjects undertaken as part of an undergraduate award.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or not more than four years of part-time study.

#### 5 Qualification requirements

- 5.1 The course of study for the Graduate Diploma in Chinese Studies shall be made up of Chinese language subjects, the research subject 4682 Special Topic in Chinese Studies, and elective subjects to a total value of 24 points.

#### 6 Course of study/Subjects of study

##### 6.1 Chinese Language subject

All students shall satisfactorily complete either:  
6604 Advanced Chinese (Graduate Diploma) 6  
*or*  
one year of Chinese language appropriate to their level of competence after consultation with the Head of the Centre for Asian Studies.

##### 6.2 Research subject

All students shall satisfactorily complete  
4682 Special Topic in Chinese Studies IV 6

##### 6.3 Electives

Students shall complete elective subjects to the value of six or twelve points, depending on the language subjects they have undertaken from the following:

###### *semester subjects*

2794 China: from Empire to Communist Power III	12
1954 Contemporary China: Politics and Society III	6
6114 Early China: Sages and Shamans III	6
9170 East Asian Capitalism III	6
1802 East Asian Economies II	4
1706 Enter the Dragon: Chinese Business in Asia III	6
6179 Foundations of Chinese Thought III	6
3409 Imperial China: Glory and Fall 1300-1900 III	6
7043 The Chinese Economy: Growth, Development and Trade III	6

#### 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

- 7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Centre for Asian Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

---

### Chinese Language subjects

#### 6604 Advanced Chinese (Graduate Diploma)

6 points semester 1

1.5 hours per week

*prerequisite:* Credit or higher in Chinese III or equivalent

Designed for students who have completed Advanced Chinese IIIS or are fluent native speakers, the subject aims to advance proficiency in literary Chinese. The emphasis is on the study of traditional Chinese texts.

*assessment:* translation 20%; participation 20%; exam 60%

#### All other Chinese language subjects

See Bachelor of Arts for syllabus details:

#### research subject

#### 4682 Special Topic in Chinese Studies IV

6 points semester 1 or 2

Weekly supervision by a supervisor appointed by the Head of Centre

The subject consists of a research essay in candidate's area of interest, an annotated translation or other equivalent piece of work approved by Head of Centre.

*assessment:* 7000 word research essay, marked by two examiners in the Centre

#### elective subjects

2794 **China: From Empire to Communist Power III**

1954 **Contemporary China: Politics and Society III**

6114 **Early China: Sages and Shamans III**

9170 **East Asian Capitalism III**

1802 **East Asian Economies II**

1706 **Enter the Dragon: Chinese Business in Asia III**

6179 **Chinese Thought III**

3409 **Imperial China: Glory and Fall 1300-1900 III**

7043 **The Chinese Economy: Growth, Development and Trade**

See Bachelor of Arts for syllabus details

## Graduate Diploma in Cognitive Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma in Cognitive Science shall have qualified for a degree of the University incorporating major studies in one or more of the following disciplines: philosophy, psychology, linguistics, computer science, neurophysiology, neuroanatomy, mathematics; or have qualified for the Graduate Certificate in Cognitive Science, or for a degree of another institution accepted for the purpose by the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Status, exemption and credit transfer

2.1 Except by the special permission of the Head of the Department of Philosophy, no student may gain status for the subject 3275 Advanced Cognitive Science IV for other studies undertaken in the University or other institutions.

2.2 No student may be granted more than 12 points of status toward the Graduate Diploma.

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or not more than four years of part-time study

#### 5 Qualification requirements

Students of the Graduate Diploma shall complete 24 points of subjects, as outlined in Rule 6, below.

#### 6 Course of study/Subjects of study

Students for the Graduate Diploma shall complete subjects to the value of 24 points as follows:

##### 6.1.1 Core Subjects

All students shall complete the following two subjects:

1207 Cognitive Science: Minds, Brains and Computers IV	4
3275 Advanced Cognitive Science IV	4

(Students who are exempted from studying the subject 1207 Cognitive Science: Minds, Brains and Computers IV due to having previously completed either 8606 Cognitive Science: Minds, Brains and Computers II or 5086 Cognitive Science: Minds, Brains and Computers III, or equivalent, will be required to present a further 4 point elective subject listed in 6.1.2 in lieu of this requirement.)

##### 6.1.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 16 points chosen from the following six groups of subjects, with no more than 8 points of subjects being presented from any one group:

##### Group A Philosophy Subjects

8733 Issues in the Philosophy of Language IV	4
6655 Mental Representation, Consciousness and Self IV	4
3390 Logic IV	4

##### Group B Psychology Subjects

4308 Intelligence IV	2
5296 Neuroscience in Psychology IV	2
2960 Philosophy and Psychology of Consciousness IV	2
8299 Social Psychology IV	2

##### Group C Computer Science Subjects

8352 Artificial Intelligence IV	2
1777 Knowledge Representation IV	2
2340 Advanced Artificial Intelligence IV A (Computer Vision)	2

5042 Advanced Artificial Intelligence IV B  
(Machine Learning) 2

#### **Group D Linguistics Subjects**

4594 Foundations of Linguistic Theory IV 4  
3355 Language, Cognition and Reality IV 6

#### **Group E Histology and Anatomy Subjects**

2967 Integrative and Comparative  
Neuroanatomy (CS) IV 4

#### **Group F Physiology Subjects**

3155 Neurobiology IV 2

The availability of some of the above elective subjects varies from year to year. Students should contact the relevant department(s) for information about subject availability over the projected period of their study program.

Many of these elective subjects have had their normal prerequisites waived for the purposes of this graduate program in Cognitive Science. However, students enrolling in these subjects are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact subject coordinators for information about appropriate background reading.

## **7 Academic progress**

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **9 Articulation with other awards**

- 9.1** Students who receive a credit average or better in this course are eligible to apply for entry to the Master of Cognitive Science course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.
- 9.2** Students who have conferred upon them the award of Graduate Certificate in Cognitive Science who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.
- 9.3** Notwithstanding the above Rules a student who has been enrolled for the degree of Graduate Diploma in Cognitive Science and who has completed the work prescribed for the Graduate Certificate in Cognitive Science and who has not been awarded the Graduate Diploma shall, on written application to the Registrar, be awarded the Graduate Certificate.

## **Syllabuses**

See Master of Cognitive Science for syllabus details

## Graduate Diploma in Creative Writing

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma in Creative Writing shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2. Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

##### 4.1 Core subjects

All candidates shall complete the following subjects:

4581 Advanced Work in Progress	6
4320 Work in Progress	6

##### 4.1 Elective subjects

All candidates shall complete elective subjects to the value of 12 points from the following:

8500 Australian Cultural Studies IV	6
9156 Contemporary Australian Film IV	6
8307 Contemporary Australian Writing IV	6
3255 Drama Since 1900 IV	6
7313 Fiction and Drama in England IV	6
3876 Legal Representations: From Book to Website IV	6

7450 Major English Texts IV	6
9717 Medieval English Literature IV	6
9596 Modern Drama from Europe, America and Britain IV	6
2085 Modernist Literature IV	6
6933 New Literatures in English IV	6
3904 Poetry of the English Renaissance IV	6
5358 Questions of Postmodernism IV	6
9185 Romanticism IV	6
9631 The Idea of Youth: Fiction, Film and Theory IV	6
5845 Twentieth Century American Literature IV	6
1698 Victorian Literature IV	6
8972 Women's Writing in the Nineteenth Century IV	6

4.3 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5. Status, exemption and credit transfer

5.1 Except with the special permission of the Head of the Department of English, no candidate will be granted status for any of the subjects of the Graduate Diploma except candidates who have qualified for the Graduate Certificate in Creative Writing.

5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.

5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

6.1 There shall be four classifications of pass in any subject: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

- 6.2** (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

- 7.1** A candidate who has been admitted to the Graduate Certificate in Creative Writing and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate to a value of more than 3 points must surrender the Graduate Certificate before being admitted to the Graduate Diploma.
- 7.2** A candidate for the degree of Master of Arts (Creative Writing) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## **Syllabuses**

---

See Master of Arts (Creative Writing) for syllabus details

## Graduate Diploma in Education

This course aims to prepare intending secondary school teachers through the systematic study of various issues in Education. The course incorporates two blocks of supervised teaching in schools.

Applications for admission to this course shall be made through the South Australian Tertiary Admissions Centre (SATAC) on the appropriate form by the required date. Successful applicants to the course may not defer their studies to the following year.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

As the course has undergone several structural changes in recent years, part-time students who commenced their course before 1997 will have suitable transitional arrangements determined for them at the time of enrolment.

### Specific Course Rules

<b>1 Admission requirements</b>	5705 Teaching Practice Part I	3
<b>1.1</b> An applicant for admission to the course of study for the Graduate Diploma in Education shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.	9636 Teaching Practice Part II	3
<b>2 Status, exemption and credit transfer</b>	<b>6.2 Curriculum and Methodology</b>	
<b>2.1</b> No student may be granted more than twelve points of status toward the Graduate Diploma for other studies undertaken in the University or other institutions.	Curriculum and Methodology subjects to a value of six points taken from:	
<b>2.2</b> A candidate who has had practical teaching experience may, after enrolment, apply in writing to the Graduate School of Education for status in teaching practice.	<b>Humanities</b>	
<b>3 Approval of course of study at enrolment</b>	6059 Social, Cultural and Australian Studies	2

**7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to sit for an examination, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the examination.

**8 Assessment and examinations**

- 8.1 There shall be one of two systems of classification of pass in individual subjects for the Graduate Diploma: either Non-Graded Pass, or Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**9 Articulation with other awards**

- 9.1 Students who have been admitted to the award of Graduate Certificate in Educational Studies who subsequently successfully complete the requirements of the Graduate Diploma in Education must surrender their first award before being admitted to the Graduate Diploma in Education.
- 9.2 Notwithstanding the above Rules a candidate who has been enrolled for the degree of Graduate Diploma in Education and who has completed the work prescribed herein for the Graduate Certificate in Educational Studies and who has not been awarded the Graduate Diploma shall, on written application to the Faculty, be awarded the Graduate Certificate.

## Syllabuses

---

### course requirements

The Graduate Diploma is a composite course of full-time study lasting for one year and requiring the whole of a candidate's time to be devoted to it. The work consists of attendance at lecture courses, tutorial and seminar classes each week, such practical and written exercises as may be prescribed, visits to schools and other institutions, and periods of supervised teaching practice.

Part-time students may also enrol. While the major focus of the course has been on the preparation of secondary teachers, those involved, or intending to be involved, in higher, adult or tertiary education will find a degree of flexibility in the course which should cater for many of their needs. The part-time course may be completed over two to six years.

### Teaching Practice subjects

#### 5705 Teaching Practice Part I

3 points semester 1 or 2

*pre/corequisites:* at least one Curriculum and Methodology subject

Students will undertake one block of supervised teaching practice. Students who successfully complete the subject are given a non-graded pass.

#### 9636 Teaching Practice Part II

3 points semester 1 or 2

*pre/corequisites:* at least one Curriculum and Methodology subject

Students will undertake one block of supervised teaching practice. Students who successfully complete the subject are given a non-graded pass..

### Curriculum and Methodology subjects

Students are required to complete curriculum and methodology subjects to a total of 6 points. Each subject consists of weekly lectures and/or seminars. Students should take note of both the conditions attached to particular subjects and the *pre/corequisites* laid down for them. The Head of the Department may vary the conditions in any particular case

*assessment:* projects, assignments, seminar participation

*note:* subject availability subject to staffing/ facilities

### Humanities

#### 6059 Social, Cultural and Australian Studies

2 points full year

*preerequisites:* pass in Level II or III Anthropology, Classical Studies, Economics, Geography, History, Law, Politics or other approved subject

#### 3494 Geography Curriculum and Methodology

2 points full year

*prequisites:* pass in Level III geography subject. In certain circumstances students with Level II geography subjects may be accepted

*pre/corequisite:* 6059 Social, Cultural and Australian Studies

#### 6149 History Curriculum and Methodology

2 points full year

*prequisites:* pass in Level III history subject. In certain circumstances students with Level II history subjects may be accepted

*pre/corequisite:* 6059 Social, Cultural and Australian Studies

#### 2309 Legal Studies Curriculum and Methodology

2 points full year

*prequisites:* pass in Level II or III law or legal studies subjects

*pre/corequisite:* 6059 Social, Cultural and Australian Studies

### Business

#### 4134 Accounting Curriculum and Methodology

2 points full year

*prequisites:* pass in Level II or III accounting subject

#### 1464 Business Studies Curriculum and Methodology

2 points full year

*prequisites:* pass in Level II or III business subject

#### 4397 Economics Curriculum and Methodology

2 points full year

*prequisites:* pass in Level II or III economics subject

**English****4721 General English Curriculum and Methodology**

2 points full year  
*prerequisites:* pass in Level II or III English subject

**3439 Senior English Curriculum and Methodology**

2 points full year  
*prerequisites:* pass in Level III English subject or equivalent  
*pre/corequisite:* 4721 General English Curriculum and Methodology

**Performing Arts****9469 Classroom Music Curriculum and Methodology**

3 points full year  
*prerequisites:* degree in Music or a pass in Level III music subject

**6384 Instrumental Music Curriculum and Methodology**

3 points full year  
*prerequisites:* degree in Music, or a pass in Level III music subject, plus recognised instrumental qualifications  
*pre/corequisite:* 9469 Classroom Music Curriculum and Methodology

**Languages other than English****7374 Chinese Curriculum and Methodology**

1 point full year  
*prerequisites:* degree in Music or a pass in Level III music subject; recognised instrumental qualifications  
*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**9075 English as a Second Language**

1 point full year  
*prerequisites:* students with overseas degrees - major in English; students with a LOTE major - Linguistics II and English I; students with no LOTE background - English II and Linguistics II  
*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**6728 French Curriculum and Methodology**

1 point full year  
*prerequisites:* pass at Level III French or equivalent  
*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**2735 German Curriculum and Methodology**

1 point full year  
*prerequisites:* pass at Level III French or equivalent  
*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**7304 Indonesian Curriculum and Methodology**

1 point full year  
*prerequisites:* Indonesian III or equivalent  
*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**7815 Italian Curriculum and Methodology**

1 point full year  
*prerequisites:* pass at Level III Italian or equivalent  
*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**1701 Japanese Curriculum and Methodology**

1 point full year  
*prerequisites:* pass at Level III Japanese or equivalent  
*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**8472 Language Methodology**

3 points full year  
*prerequisites:* pass in a Level II language other than English subject

**3363 Modern Languages Curriculum and Methodology**

2 points full year  
*prerequisites:* pass in a Level II language other than English subject  
 This subject is for students who are not enrolled for a specialist language.

**8396 Other Languages Curriculum and Methodology**

1 point full year

*prerequisites:* pass in the appropriate language at Level III or equivalent

*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**3323 Spanish Curriculum and Methodology**

1 point full year

*prerequisites:* pass at Level III Spanish or equivalent

*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**3574 Vietnamese Curriculum and Methodology**

1 point full year

*prerequisites:* pass at Level III Vietnamese or equivalent

*pre/corequisite:* 8472 Language Methodology or 3363 Modern Languages Curriculum and Methodology

**Mathematics**

**4212 Information Technology Curriculum and Methodology**

2 points not offered in 1999

*prerequisites:* pass at Level III Computer Studies

**9856 Junior Mathematics Curriculum and Methodology**

2 points full year

*prerequisites:* pass in Mathematics I or equivalent

**2640 Senior Mathematics Curriculum and Methodology**

2 points full year

*prerequisites:* pass in Level III mathematics subject

*pre/corequisite:* 9856 Junior Mathematics Curriculum and Methodology

**Science**

**4855 Biology Curriculum and Methodology**

2 points full year

*prerequisites:* pass in a Level III biological science subject

*pre/corequisite:* 2459 Junior Science Curriculum and Methodology

**2918 Chemistry Curriculum and Methodology**

2 points full year

*prerequisites:* pass in Level III chemistry subject

*pre/corequisite:* 2459 Junior Science Curriculum and Methodology

**2459 Junior Science Curriculum and Methodology**

2 points full year

*prerequisites:* pass in two Level I physical and biological sciences subjects

**2598 Physics Curriculum and Methodology**

2 points full year

*prerequisites:* pass in Level III physics subject

*pre/corequisite:* 2459 Junior Science Curriculum and Methodology

**General**

**3779 Adult Learner Curriculum and Methodology**

2 points not offered in 1999

*corequisite or prerequisite:* 1852 Adolescent Learning and development

**6210 Extended Specialist Curriculum**

2 points full year

*restriction:* only with the agreement of Head of School

**9063 Introduction to Curriculum Design and Evaluation**

3 points not offered in 1999

**8345 Practical Curriculum Design**

2 points not offered in 1999

*pre/corequisites:* 9063 Introduction to Curriculum Design and Evaluation

**6797 Practical Curriculum Evaluation**

2 points not offered in 1999

*prerequisites:* Introduction to 9063 Curriculum Design and Evaluation

**6903 Specialist Curriculum**

1 point full year

*restriction:* only with the agreement of Head of School

## Education Studies Subjects

### 3785 Australian Educational Issues

2 points semester 2

2 hours per week

This subject consists of a number of options of which students take 2. Options offered vary from year to year and will be announced at the beginning of the second semester.

*assessment:* 1500 word essay/assignment; group presentation

### 7432 Curriculum in its Context

2 points full year

2-3 hours per week

This subject introduces students to curriculum theory, the context of State and National curricula, education and the law, the statutory constraints impacting upon teachers and current developments in education.

*assessment:* testing on basic information: critique of current issue in education or outline of conceptual bases of main teaching subject

### 5221 Professional Studies

2 points semester 2

Approximately 25 hours at times to be arranged

This subject provides Graduate Diploma in Education students with the opportunity, in the final four weeks of the second Semester, to undertake further studies relating to their work as teachers. The two components are Special Education and New Technologies in Education.

*assessment:* satisfactory attendance; participation in all components of subject; 1500 word assignment

### 5232 Social and Cultural Context of Learning

3 points full year

1 lecture, 1 tutorial a week

This subject is concerned to analyse the social and cultural context of students' learning. In particular, it will examine family and school learning environments, differing models of society, and cultural pluralism and education.

*assessment:* 2000 word essay

### 6227 Student-Teacher Interaction in the Classroom

3 points full year

6 hours per week

This subject considers student-teacher interaction. In particular, it examines classroom/behaviour management; human development, with particular reference to adolescence; aspects of students' learning and the teacher's role in that learning; the practical demands of communication in schools such as listening skills, language use, assertiveness and conflict resolution.

*assessment:* practical exercises; case studies; group presentations; written assignment, reports totalling 2000 words

## Graduate Diploma in Environmental Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

As the course has undergone several structural changes in recent years, continuing students who commenced their course before 1995 will have suitable transitional arrangements determined for them at the time of enrolment.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Environmental Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Director of the Mawson Graduate Centre for Environmental Studies, no student may gain status towards the Graduate Diploma for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 Except with the special permission of the Faculty, the course for the Graduate Diploma shall be completed in one year of full-time study or not more than three years of continuous part-time study.

#### 5 Qualification requirements

- 5.1 Students of the Graduate Diploma shall complete one subject chosen from the Environmental History and Philosophy Group, one subject chosen from the Environmental Science Group, four subjects chosen from the Environmental Policy, Planning and Management Group, and two additional subjects chosen from the Environmental Policy, Planning and Management Group and/or from the list of elective subjects, in consultation with the Director of the Centre.

#### 6 Course of study/Subjects of study

- 6.1 Students for the Graduate Diploma shall complete one subject chosen from each of the following two groups of subjects:

##### Environmental History and Philosophy Group

- |  |   |
|--|---|
| 5941 History and Philosophy of Environmentalism            | 3 |
| 1722 Special Topic in Environmental History and Philosophy | 3 |

##### Environmental Science Group

- |   |   |
|---|---|
| 1201 Principles of Environmental Science    | 3 |
| 8594 Special Topic in Environmental Science | 3 |

- 6.2 Students shall complete four subjects chosen from the following groups of subjects:

##### Environmental Policy, Planning and Management Group

- |   |   |
|---|---|
| 4079 Ecofeminist Theory and Politics                    | 3 |
| 7766 Ecotourism: Opportunities and Impacts              | 3 |
| 1716 Educating for the Environment                      | 3 |
| 2550 Environmental Earth Science                        | 3 |
| 1865 Environmental Futures: Local/Global Sustainability | 3 |
| 9474 Environmental Hazards                              | 3 |
| 8865 Environmental Impact Assessment (Env.St.)          | 3 |
| 7420 Environmental Organisation and Activism            | 3 |
| 2005 Environmental Politics                             | 3 |
| 8249 Environmental Reconstruction and Rehabilitation    | 3 |
| 1683 Environmental Risk Management                      | 3 |
| 3216 Environmental Systems Management                   | 3 |
| 2056 Environmental Writing                              | 3 |
| 4550 Gender, Environment, Development                   | 3 |
| 6631 Managing Coastal Environments                      | 3 |
| 8375 Practical Environmentalism                         | 3 |
| 9873 Special Topic in Environmental Management          | 3 |

2667	Special Topic in Environmental Planning	3
7888	Special Topic in Environmental Policy	3
2267	Special Topic in Environmental Studies	3
2124	Urban Environments	3
<b>6.3</b>	Students shall complete two semester-length subjects chosen from:	
(a)	elective subjects chosen from the following:	
3953	Conservation and Heritage Law (Env St)	3
3741	Conservation Biology S	3
2290	Environmental Economics (Env St)	3
5614	Environmental Linguistics	3
3099	Environmental Planning and Protection Law (Env St)	3
5752	Heritage Conservation Theory	3
1452	Indigenous Australian and Environmental Management S	3
4613	Introduction to SIS	3
3990	Land Use Planning Law (Env St)	3
4358	Population and the Environment (Env St)	3
	<i>and</i>	
(b)	Subjects listed in clause 6.2 above, not already offered to fulfil the requirements of clause 6.2 <i>and</i>	
(c)	Subject to the approval of the Director of the Mawson Graduate Centre for Environmental Studies, environmental studies or related subjects at appropriate levels offered by other faculties.	

## 7 Review of academic progress

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre for Environmental Studies as adequate, attend all or part of a final examination (or supplementary examination if

granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 8 Assessment and examinations

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## 9 Articulation with other awards

- 9.1** Students who receive a credit average or better in this course are eligible to apply for entry to the degree of Master of Environmental Studies course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.
- 9.2** Students who have conferred upon them the award of Graduate Diploma in Environmental Studies who subsequently successfully complete the requirements for the degree of Master of Environmental Studies must surrender their first award before being admitted to the Masters degree.
- 9.3** Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Environmental Studies and who has completed the work prescribed herein for the Graduate Diploma and who has not been awarded the Master's degree shall, on written application to the Faculty, be awarded the Graduate Diploma.
- 9.4** A candidate for the Graduate Diploma who satisfies the requirements for the Graduate Certificate but does not complete the requirements of the Graduate Diploma may be admitted to the Graduate Certificate in Environmental Studies.

## Syllabuses

See Master of Environmental Studies for syllabus details

## Graduate Diploma in International Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in International Studies shall have qualified for a degree of the University in Politics, Asian Studies, Economics, Labour Studies, History, European Studies and Cultural Studies, or related discipline, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2. Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

- 4.1 All candidates shall complete the following subjects:
- |  |    |
|--|----|
| 8414 Graduate International Studies              | 6  |
| 3094 International Studies Seminar               | 6  |
| 2612 Graduate International Studies Dissertation | 12 |
- 4.2 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5. Status, exemption and credit transfer

- 5.1 Except with the special permission of the Convenor of the Award Committee, no candidate will be granted status for any part of the Graduate Diploma on account of subjects studied for another award.
- 5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.
- 5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Convenor of the Award Committee again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

#### 7. Articulation with other awards

- 7.1 A candidate for the degree of Master of Arts (International Studies) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of that degree may be admitted to the Graduate Diploma.

### Syllabuses

See Master of Arts (International Studies) for syllabus details

# Graduate Diploma in Japanese Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Japanese Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Centre for Asian Studies, no student may gain status for the Japanese Language subject, or for the research subject 2732 Special Topic in Japanese Studies for other studies undertaken in the University or other institutions.
- 2.2 No student may be granted more than twelve points of status toward the Graduate Diploma.
- 2.3 Status will not be granted for elective subjects for Level III Asian Studies subjects undertaken as part of an undergraduate award.

### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or not more than four years of part-time study.

### 5 Qualification requirements

- 5.1 The course of study for the Graduate Diploma in Japanese Studies shall be made up of Japanese language subjects, the research subject 2732 Special Topic in Japanese Studies, and elective subjects to a total value of 24 points.

### 6 Course of study/Subjects of study

#### 6.1 Japanese Language subject

All students shall satisfactorily complete either:  
5314 Advanced Japanese (Graduate Diploma) 6  
*or*  
one year of Japanese language appropriate to their level of competence after consultation with the Head of the Centre Asian Studies.

#### 6.2 Research subject

All students shall satisfactorily complete:  
2732 Special Topic in Japanese Studies IV 6

#### 6.3 Electives

Students shall complete elective subjects to the value of six or twelve points, depending on the language subjects they have undertaken from the following:

6510 Contemporary Japan: Economy and Society III	6
9803 Contemporary Japan: Politics and Society III	6
9170 East Asia Capitalism III	
1802 East Asian Economies II	4
6659 Japanese History III	6
8455 Japanese Society III: Development and the Environment	6

### 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Centre for Asian Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## Syllabuses

---

### Japanese language subjects

#### 5314 Advanced Japanese (Graduate Diploma)

6 points semester 1

1.5 hours per week

*prerequisites:* Credit or higher in Japanese III or equivalent

This subject is designed for students who have completed Level III Japanese or are fluent native speakers. It aims to advance proficiency in literary Japanese.

#### All other Japanese language subjects

See Bachelor of Arts for syllabus details

### research subject

#### 2732 Special Topic in Japanese Studies IV

6 points semester 1 or 2

1 hour per week

*prerequisites:* Credit or higher in Japanese II or equivalent

This subject consists of a research essay of 7000 words in the candidate's area of interest as approved by the Head of Centre. Alternatively, an annotated translation or other equivalent piece of work may be submitted with the approval of the Head of Centre. The subject is conducted by weekly supervision by a supervisor appointed by the Head of the Centre.

assessment: research essay, marked by two examiners in the Centre

### elective subjects

9770 Australia and the Asia Pacific III

6510 Contemporary Japan: Economy and Society III

9803 Contemporary Japan: Politics and Society III

9170 East Asia Capitalism III

1802 East Asian Economies II

6659 Japanese History III

8455 Japanese Society: Development and the Environment III

See Bachelor of Arts for syllabus details

## Graduate Diploma in Labour Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: this course is also available externally

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Labour Studies shall have qualified for a degree of the University or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Centre for Labour Studies, no student may gain status towards the Graduate Diploma, except candidates who have qualified for the Graduate Certificate.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or the part-time equivalent. The course may be offered both by internal and external modes or a combination of modes of delivery.

#### 5 Qualification requirements

- 5.1 Candidates shall complete subjects to the value of 24 points as outlined in Rule 6 below.

#### 6 Course of study

Candidates shall complete subjects to an aggregate points value of 24 points chosen from the following:

#### 6.1 Coursework subjects

Candidates shall complete one of the following core subjects:

5718 International Political Economy IV	6
5565 Labour Movements: Theory, Crisis and Response IV	6
4657 Labour Research Networking IV	6
2822 Labour Strategies IV	6
3649 Political Economy of Globalisation IV	6
7489 Social and Labour Research IV	6
8506 Theorising Work and Society IV	6

#### 6.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points from the coursework subjects listed in 6.1 or the following:

5718 International Political Economy IV	6
6112 Labour Market Studies IV	6
4657 Labour Research Networking IV	6
3210 Learning and the Workplace	3
1598 Learning and the Work Place IV	4
3368 Managing Education for Work	3
1882 Managing Education for Work IV	4
4894 Regional Industry Development	3
5194 Regional Industry Development IV	4
4688 Sustaining Regional Development	3
6322 Sustaining Regional Development IV	4
5290 Individual Research Project (Grad.Dip.)	12

#### 7 Review of academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.
- 7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the

Centre for Labour Studies as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

## **9 Articulation with other awards**

- 9.1** A candidate for the Graduate Diploma in Labour Studies who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.
- 9.2** Candidates successfully completing the Graduate Diploma in Labour Studies are eligible to apply for entry to the Master of Arts course in Labour Studies.

## **Syllabuses**

---

### **5290 Individual Research Project (Grad Dip)**

12 points full year

This subject allows the student to develop an area of specialisation related to a selected area of Labour Studies and to demonstrate research skills in the preparation, development and presentation of an extended research paper. Research at an individual level will be directed by and carried out in consultation with a supervisor. Appropriate areas of study will be decided in consultation between the student and the Labour Studies course staff. Students doing an individual project may be required to attend several seminars to discuss work in progress.

See Master of Arts (Labour Studies) for other syllabus details

## Graduate Diploma in Languages

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Languages shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

To qualify for the Graduate Diploma a student shall satisfactorily complete two to three years part-time study.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the Graduate Diploma, a candidate normally shall complete a three year language sequence (as defined in Rule 6 below).

#### 5 Status, exemption and credit transfer

- 5.1 Except by special permission of the Faculty of Arts, no student may gain status for any part of the language sequence of the Diploma in Languages.
- 5.2 No student may be granted status at level III toward the Diploma.
- 5.3 No status will be awarded in the Diploma in Languages for subjects presented for another award.
- 5.4 Where a candidate is exempt from level I in the language because he or she is already at an advanced level or is a native speaker, that candidate may be permitted to complete only levels II and III of the language and substitute general studies subjects which are taught in that language to a maximum of 6 points.

#### 6 Course of study

All candidates shall complete a three year language sequence to a total value of 26 points. The sequence shall consist of:

- 6 points at level I
  - 8 points at level II
  - 12 points at level III
- in a single language

- 6.2 In certain circumstances, this sequence may be varied to consist of:

- 8 points at level II
- 12 points at level III and,
- 6 points of advanced language studies, *or*
- 6 points of area studies (see 5.4)

- 6.3 The languages available are:

- |               |         |
|---------------|---------|
| Ancient Greek | Chinese |
| French        | German  |
| Japanese      | Latin   |
| Vietnamese    |         |

#### 7 Assessment and examination

- 7.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass. The classification of Pass may be in two Divisions: Pass Division I and Pass Division II.
- 7.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.  
(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 7.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

# Graduate Diploma in Logic

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Logic shall have qualified for a degree of the University incorporating studies deemed equivalent to the Graduate Certificate in Logic or have qualified for the Graduate Certificate in Logic, or for a degree of another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Graduate Diploma a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Philosophy, no student may gain status for the subject *3402 Advanced Logic A (PG)* for other studies undertaken in the University or other institutions.
- 2.2 No student may be granted more than 12 points of status toward the Graduate Diploma.

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of the Award

To qualify for the Graduate Diploma a student shall satisfactorily complete a course of one year of full-time study or not more than four years of part-time study

### 5 Qualification requirements

Students of the Graduate Diploma shall complete 24 points of subjects including the core subject *3402 Advanced Logic A (PG)*, *7665 Argument (PG)* and *3890 Major Project in Logic*, as outlined in Rule 6, below.

### 6 Course of study/Subjects of study

Students for the Graduate Diploma students shall complete subjects to the value of 24 points as follows:

### 6.1 Core Subjects

All students shall complete the following subjects:

3402 Advanced Logic A (PG)	6
7665 Argument (PG)	4

(Students who are exempted from studying the subject *3402 Advanced Logic A (PG)* due to having previously completed *4259 Logic IIIA* or its equivalent will be required to present a further 6 points of elective subjects listed in 6.1.2 in lieu of this requirement.)

### 6.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 8 points chosen from the following:

2614 Advanced Logic B (PG)	2
1619 Artificial Intelligence (PG)	2
9669 Graduate Topic in Logic A	2
5048 Graduate Topic in Logic B	2
7889 Graduate Topic in Logic C	2
2043 Graduate Topic in Logic D	2
1998 Intermediate Logic (PG)	4
2254 Knowledge Representation (PG)	2

#### Flinders University Subjects:

COMP 3007 Artificial Intelligence	2
COMP 3009 Computational Logic	2
PHIL 2080 Logic, Reasoning and Argumentation	4

and, subject to the approval of the Department, students may be able to pursue in lieu of 2 elective points further studies towards the requirements of the Project in Logic outlined in 6.1.3, below. Such students will enrol in the following subject:

2637 Supplementary Major Project in Logic	2
concurrently with the subject	
3890 Major Project in Logic	

### 6.3 Project in Logic

All students shall enrol in:

3890 Major Project in Logic	6
-----------------------------	---

## **7 Academic progress**

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

## **8 Assessment and examinations**

- 8.1** There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## **9 Articulation with other awards**

- 9.1** Students who receive a credit average or better in this course are eligible to apply for entry to the Master of Logic course, and if successful, on gaining entry, receive full status for the work they have undertaken in the Graduate Diploma.
- 9.2** Students who have conferred upon them the award of Graduate Certificate in Logic who subsequently successfully complete the requirements of the Graduate Diploma and gain 6 or more points of status for their first award must surrender their Graduate Certificate before being admitted to the Graduate Diploma.
- 9.3** Notwithstanding the above Rules a student who has been enrolled for the degree of Graduate Diploma in Logic and who has completed the work prescribed for the Graduate Certificate in Logic and who has not been awarded the Graduate Diploma shall, on written application to the Registrar, be awarded the Graduate Certificate.

## **Syllabuses**

---

See Master of Logic for syllabus details

## Graduate Diploma in Philosophy

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Philosophy shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2. Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

- 4.1 All candidates shall complete four of the following subjects:
- |      |                                     |   |
|------|-------------------------------------|---|
| 5670 | Introductory Philosophy (PG)        | 6 |
| 9673 | Metaphysics (PG)                    | 6 |
| 4708 | Epistemology (PG)                   | 6 |
| 9522 | Modern Moral Philosophy (PG)        | 6 |
| 4482 | Political and Legal Philosophy (PG) | 6 |
- 4.2 Candidates intending to apply for the Master of Arts (Philosophy) should enrol in 4313 Masters Philosophy Seminar in lieu of one of the subjects above.
- 4.3 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject already presented for another award. Intending students must consult with the Head of Department to discuss their proposed course of study.

#### 5. Status, exemption and credit transfer

- 5.1 Except with the special permission of the Head of the Department, no candidate will be granted status for any of the subjects of the Graduate Diploma except candidates who have qualified for the Graduate Certificate in Philosophy.
- 5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.
- 5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) a candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) for the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

#### 7. Articulation with other awards

- 7.1 A candidate who has been admitted to the Graduate Certificate Philosophy and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate to a value of more than 6 points must surrender the Graduate Certificate before being admitted to the Graduate Diploma.
- 7.2 A candidate for the degree of Master of Arts (Philosophy) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

### Syllabuses

See Master of Arts (Philosophy) for syllabus details

## Graduate Diploma in Population and Human Resources

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma in Population and Human Resources shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University, or have qualified for the Graduate Certificate in Population Studies.

1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2. Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

##### 4.1 Core subjects

All candidates shall complete the following subjects:

3790 Population Studies	4
2924 Computer Applications in Population Studies	4
1556 Population Data Analysis	4
4428 Human Resource Development	4

##### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 8 points selected from the following:

5678 Ageing of Populations	4
1762 Applied Demography	4

4024 Demography of the Family	4
2757 Population and the Environment	4
1613 Population Management and Operations Research	4
4904 Population Mobility	4
9979 Regional Development and Planning	4
1745 Urbanisation and Development	4
7149 Women's Health and Child Survival	4

#### 5. Status, exemption and credit transfer

5.1 Except with the special permission of the Head of the Department of Geography, no candidate will be granted status for any of the core subjects of the Graduate Diploma except candidates who have qualified for the Graduate Certificate in Population Studies.

5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.

5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

5.4 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 6. Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Graduate Certificate: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

**6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

**7.1** A candidate who has been admitted to the Graduate Certificate in Population Studies and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate to a value of more than 4 points must surrender the Graduate Certificate before being admitted to the Graduate Diploma.

**7.2** A candidate for the degree of Master of Arts (Population and Human Resources) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

**7.3** A candidate for the Graduate Diploma in Population and Human Resources who satisfies the requirements for the Graduate Certificate but who does not complete the requirements for the Graduate Diploma may be admitted to the Graduate Certificate.

## **Syllabuses**

---

See Master of Arts (Population and Human Resources) for syllabus details

## Graduate Diploma in Public Affairs

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the Graduate Diploma in Public Affairs shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2. Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points as follows:

##### 4.1 Core subjects

1883 Approaches to Policy	6
1592 Australian Public Policy: Challenge of Change	6

##### 4.2 Elective subjects

All candidate shall complete elective subjects to the value of 12 points selected from the following:

2970 Social Analysis and Feminist Theory (4 pt)	4
7021 Cross Currents: Critical Public Issues (4 pt)	4
8982 Doing Right in Institutions (4 pt)	4
3603 Classics of State Theory (4 pt)	4
5361 Directed Study P/G (4 pt)	4

8974 Social Analysis and Feminist Theory (6 pt)	6
--	---

9629 Cross Currents: Critical Public Issues (6 pt)	6
---	---

9313 Doing Right in Institutions (6 pt)	6
---	---

1080 Classics of State Theory (6 pt)	6
--------------------------------------	---

3691 Directed Study P/G (6 pt)	6
--------------------------------	---

4.3 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5. Status, exemption and credit transfer

5.1 Except with the special permission of the Head of the Department of Politics, no candidate will be granted status for any of the core subjects of the Graduate Diploma except candidates who have qualified for the Graduate Certificate in Public Affairs.

5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.

5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

**6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

**7. Articulation with other awards**

**7.1** A candidate who has been admitted to the Graduate Certificate in Public Affairs and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate to a value of more than 6 points must surrender the Graduate Certificate before being admitted to the Graduate Diploma.

**7.2** A candidate for the degree of Master of Arts (Public Affairs) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## **Syllabuses**

---

See Master of Arts (Public Affairs) for syllabus details

## Graduate Diploma in Social Sciences

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Social Sciences shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University *or*
- 1.2 shall have qualified for the Graduate Certificate in Social Sciences.

#### 2. Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or the equivalent of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to the value of 24 points as follows:

##### 4.1 Core subjects

4462 Approaches to Social Sciences Research (4 pt) 4

*or*

4226 Approaches to Social Sciences Research (6 pt) 6

*and*

- 4.2 core subjects available in the following Social Sciences graduate coursework degrees in the Faculty of Arts: Applied Linguistics, Cognitive Science, Educational Studies, Environmental Studies, International Studies, Labour Studies, Philosophy, Population and Human Resources, Spatial Information Science and Women's Studies.

##### 4.3 Elective subjects

All candidates shall complete elective subjects to the value of 12 points selected from the following Social Sciences graduate coursework degrees in the Faculty of Arts: Applied Linguistics, Cognitive Science, Educational Studies, Environmental Studies, International

Studies, Labour Studies, Philosophy, Population and Human Resources, Spatial Information Science and Women's Studies.

- 4.4 No candidate will be permitted to count for the Graduate Diploma any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

- 5.1 Except with the special permission of Faculty, no candidate will be granted status for any of the core subjects of the Graduate Diploma except candidates who have qualified for the Graduate Certificate in Social Sciences.
- 5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.
- 5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7. Articulation with other awards**

- 7.1 A candidate who has been admitted to the Graduate Certificate in Social Sciences and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate to a value of more than 3 points must surrender the Graduate Certificate before being admitted to the Graduate Diploma.
- 7.2 A candidate for the degree of Master of Social Sciences who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma

## **Syllabuses**

---

See Master of Social Sciences for syllabus details

## Graduate Diploma in Spatial Information Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma in Spatial Information Science shall have qualified for a degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a degree of the University.
- 1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the Graduate Diploma a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the Graduate Diploma.

#### 2 Duration of course

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete one year of full-time study or not more than four years of part-time study.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the Graduate Diploma, a candidate shall satisfactorily complete subjects to a total of 24 points, as follows:

##### 4.1 Core subjects

6155	Introduction to Spatial Data Models	3
4613	Introduction to Spatial Information Systems	3
5107	Spatial Data Modelling & Analysis	3
3088	Spatial Data Visualisation	3
6559	Research Project SIS	6

##### 4.2 Elective subjects

all candidate shall complete elective subjects to a total of 6 points selected from the following

2445	Advanced Raster Analysis	3
2523	Field Sampling Techniques	3
2833	New Technologies in GIS	3
9342	Social Applications in GIS	3

Students may also select from elective subjects offered by the Department of Environmental Science and Rangeland Management.

- 4.3 No candidate will be permitted to count for the Graduate Certificate any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 5 Status, exemption and credit transfer

- 5.1 Except with the special permission of the Head of the Department concerned, no candidate will be granted status for any of the core subjects of the Graduate Diploma except candidates who have qualified for the Graduate Certificate in Spatial Information Science.
- 5.2 No candidate shall be granted status for subjects with a total value of more than 12 points.
- 5.3 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6 Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7. Articulation with other awards**

- 7.1** A candidate who has been admitted to the Graduate Certificate in Spatial Information Science and who has been granted status toward the Graduate Diploma for subjects presented for the Graduate Certificate must surrender the Graduate Certificate before being admitted to the Graduate Diploma.
- 7.2** A candidate for the degree of Master of Spatial Information Science who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Graduate Diploma in Women's Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Students who commenced studies in the award of Graduate Diploma in Women's Studies prior to 1998 should refer to the 1997 Calendar Volume II. Such students who wish to transfer to the new program should consult the department regarding any transition arrangements which may apply.

**Note:** Some electives may be available by external study.

## Bachelor of Educational Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

The Bachelor of Educational Studies award represents a professional development course, designed for practising teachers. It offers advanced studies in educational theory and practice, together with further studies intended to enhance and develop the range of areas in which they are qualified to teach.

### Specific Course Rules

#### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the degree of Bachelor of Educational Studies shall have qualified for a degree of the University, or for a degree of another institution accepted for the purpose by the University and have qualified for a Graduate Diploma in Education of the University or for an award accepted by the University as equivalent.

**1.2** The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Duration of course

**2.1** To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising one year of full-time study or not more than four years of part-time study.

#### 3 Approval of course of study at enrolment

**3.1** Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 24 points, as follows:

##### 4.1 Educational subjects

All candidate shall complete at least 6 points and up to 18 points from the following:

4599 Adult Psychology and Education (6 pt)	6
1900 Counselling in Education (6 pt)	6
3691 Directed Study (6 pt)	6
8296 Education in Multilingual Settings (6 pt)	6
8947 Families, Schools and Students' Outcomes (6 pt)	6
5274 Gender, Education and Social Change (6 pt)	6

7823 Honours Mathematics (Education) 12 pt	12
9422 Issues for Australians (6 pt)	6
5841 Making Sense of the Scientific World (6 pt)	6
5165 Mathematics Education (6 pt)	6
3417 Multicultural Society and Educational Policy (6 pt)	6
1688 Religion, Education and Social Change (6 pt)	6
8963 Schools as Cultural Systems (6 pt)	6
7884 Scientific Revolutions and Education (6 pt)	6
6540 Teaching the Australian Studies Curriculum (6 pt)	6
7421 The Nature of Science and Science Curricula (6 pt)	6
6224 Theories of Psychology in Education (6 pt)	6

##### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of at least 6 points and up to 18 points selected from the subjects listed for undergraduate and graduate degrees of the University which are appropriate to teaching in schools. Advice on appropriate options is available from the Graduate School of Education

#### 5 Status, exemption and credit transfer

**5.1** No candidate shall be granted status for subjects with a total value of more than 12 points on account of subjects presented for any other award.

**5.2** No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

**5.3** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

- 6.1** There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 6.2** (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

- 7.1** Candidates may be granted credit towards the Bachelor of Educational Studies on account of the Graduate Certificate in Australian Studies (or other appropriate Graduate Certificate) for up to 8 points without surrendering the award, or up to 12 points upon surrender of the award.
- 7.2** A candidate who has met the requirements for the Bachelor of Educational Studies may apply for entry to the Master of Educational Studies, and if successful, receive status of up to 18 points for subjects listed in the Specific Course Rules of the Master of Educational Studies. A candidate for Master of Educational Studies who has been granted status toward the degree for subjects presented for the Bachelor of Educational Studies to a value of 12 or more points must surrender the Bachelor of Educational Studies before being admitted to the degree.

# Master of Arts

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty of Arts may accept as a candidate for the degree of Master of Arts any person who:

- (a) is recommended by a Department or Departments within the Faculty able and willing to provide supervision and facilities for the candidate's work towards the degree *and*
- (b) has obtained an Honours degree, or other qualification accepted by the University as equivalent to an Honours degree, in a subject or subjects to which the candidate's proposed field of study relates.

1.2 Subject to the approval of the Board of Graduate Studies acting with authority wittingly devolved to it by Council, the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not hold the qualification specified in clause 1.1 above, but who has given evidence satisfactory to the Faculty of their fitness to undertake work for the degree.

1.3 Before deciding such a person's fitness the Faculty may, if it so desires, require them to complete prescribed preliminary work and thereafter, or alternatively to complete a prescribed course of study and pass a qualifying examination of honours standard.

1.4 The form and assessment of any preliminary work and/or of any course of study shall be proposed by the department or departments concerned and approved by the Faculty. In any qualifying examination at least two examiners, approved by the Faculty for the purpose, must contribute to the assessment of the candidate's performance.

### 2 Duration of course

2.1 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the thesis or dissertation submitted:

- (a) in the case of a full-time candidate, not less than one year nor more than three years from the date at which candidature was accepted by the Faculty *or*

- (b) in the case of a part-time candidate, not less than one year nor more than five years from the date at which candidature was accepted by the Faculty.

### 3 Qualification requirements

3.1 Every candidate shall either:

- (a) present a thesis; or
- (b) pursue a course of advanced study, which may include practical exercises and present a thesis or dissertation.

3.2 The subject of any thesis or dissertation shall be approved by the Department or Departments concerned and by the Faculty.

### 4 Assessment and examinations

4.1 The content and method of assessment of any course of advanced study, shall be approved by the department or departments concerned and by the Faculty. Assessment shall in every case be by not less than two examiners of whom at least one shall be external to the University. The names of the examiners and the relative weighting of any course work and the thesis or dissertation in the overall assessment shall be proposed by the department or departments concerned and approved by the Faculty.

4.2 On completion of work for the degree the candidate shall:

- (a) inform the Head or Heads of the Department or Departments in which the candidate's work has been done, and the candidate's supervisor or supervisors of their intention to submit their thesis or dissertation. The Head or Heads shall forthwith propose the names of examiners for approval by the Faculty
- (b) lodge with the Registrar three copies of the thesis or dissertation prepared in accordance with directions given to candidates from time to time.

4.3 The examiners of the thesis or dissertation may recommend that it either

- (a) the candidate be awarded the degree of Master of Arts *or*

- (b) the candidate be awarded the degree of Master of Arts but that minor amendments be made to the thesis *or*
- (c) the candidate be awarded the degree of Master of Arts subject to the amendments specified elsewhere in this report being made to the thesis *or*
- (d) the candidate be **not** awarded the degree of Master of Arts but be permitted to resubmit the thesis in revised form for re-examination *or*
- (e) the candidate be **not** awarded the degree of Master of Arts.

4.4 The examiners of a thesis or dissertation re-submitted following recommendation 4.3(e) above may recommend only 4.3(a), (b), (c) or (d).

### Notes by Departments

The attention of candidates is directed to 'Notes and Instructions to candidates for higher degrees' which gives general advice to candidates and sets out the specifications for theses. (*see* Table of Contents)

### Anthropology

#### 1 Master of Arts Qualifying

This course will be open to students with no previous training in Anthropology or closely related disciplines and to students holding a degree not considered by the Discipline to be equivalent to Bachelor of Arts Honours. Students will do the Bachelor of Arts Honours course work and must produce a 15,000 word qualifying essay.

#### 2 Master of Arts Program

Potential candidates for the degree of Master of Arts in Anthropology are advised to consult the Head of the Discipline. Candidates should have a good Honours degree or equivalent in Anthropology or a closely related social science discipline. They must present a thesis, on a subject approved by the Faculty of Arts, of approximately 30,000 to 40,000 words.

### Asian Studies

#### 1 Master of Arts Qualifying

The program is intended to supplement the present honours programs in Chinese and Japanese studies. It is aimed at, for example, overseas students whose first language is Chinese or Japanese or students who can demonstrate considerable fluency in Chinese or Japanese but lack training in relevant social science disciplines or history.

A student in the Master's Qualifying program will essentially do the work of an honours student. This will entail successful completion of:

- the methodology component and
- directed readings, leading to the submission of the honours thesis

The only difference with the honours course concerns the advanced textual readings component of the core reading course. Given a Master's Qualifying student's established fluency in Chinese or Japanese, in lieu of the advanced readings, the student will be expected to complete two one-semester lecture subjects concerning the relevant area or country of specialisation at third-year level, with marks of credit or above.

This substitution is designed to enhance a student's command of method and analytical skills and to ensure that the student possesses writing skills adequate to postgraduate work.

#### 2 Master of Arts Program

Potential candidates for the degree of Master of Arts in the Centre for Asian Studies are advised to consult the Head of the Centre. Candidates should have a good Honours degree or equivalent in Asian Studies or a closely related social science discipline and must be qualified to conduct research using original language sources. They must present a thesis, on a subject approved by the Faculty of Arts, of approximately 30,000 to 40,000 words.

### Classics

Candidates for the degree of Master of Arts in Classics must present a thesis on a subject, and in a form, approved by the Faculty of Arts. The length of the thesis should be about 40,000 words.

The Department may also require candidates to present themselves for examination in a portion of work chosen with reference to the subject area of the thesis. Such an examination must be passed to the satisfaction of the Head of the Department, but will not form part of the assessment for the award of the degree. If the degree is in Classical Studies additional language work may be included in the examinable work specified above.

The qualifications required of applicants to be admitted as candidates for the degree are set out in the regulations of the degree of Master of Arts. In general, a candidate should have obtained a good Honours degree in Greek and/or Latin or Classical Studies.

The degree is intended to be obtained normally by one year of full-time or two years of part-time study. Work towards the degree is pursued under a supervisor or supervisors appointed by the Faculty, and consists largely of preparatory reading, until the candidate is ready to begin writing the thesis. The thesis itself, though of an advanced standard, is not intended necessarily to contain material that is a new contribution to knowledge.

Potential candidates should consult the Head of the Department of Classics in the first instance.

### **English Language and Literature**

Candidates for the degree of Master of Arts in English Language and Literature are advised to consult the Head of the Department. It is advisable that the length of the Master of Arts thesis should not exceed 50,000 words.

### **French Language and Literature**

Candidates for the degree of Master of Arts in French Language and Literature are advised to consult the Head of the Department at the earliest opportunity.

Candidates who seek to qualify under Specific Course Rule 1.2 are normally required to have already passed at a good standard in French I, II and III, or their equivalents, and, then, to take the fourth-year Honours course in French Language and Literature. At the end of one year, if full-time, or at the end of two years, if part-time, they will be required to pass, at a satisfactory standard, the following examinations: the thesis and the three papers required for Honours in French Language and Literature.

### **Geography**

Candidates for the degree of Master of Arts in Geography are advised to obtain the Departmental Postgraduate Handbook and to consult the Head of the Department. Candidates should have at least a Class IIA Honours degree or equivalent in Geography, or, with the permission of the Head, in an associated discipline. Persons whose qualifications are in a discipline other than Geography may be required to complete prescribed supplementary work in Geography to the satisfaction of the Head.

### **German Language and Literature**

Candidates for the degree of Master of Arts in German Language and Literature are advised to consult the Head of the Department.

### **History**

Candidates for the degree of Master of Arts in History are advised to consult the Head of the Department.

### **Labour Studies**

Candidates for the degree of Master of Arts in Labour Studies are advised to consult the Postgraduate Coordinator at the earliest opportunity.

### **Linguistics**

Candidates in the Master of Arts in Linguistics are advised to consult the Professor of Linguistics at the earliest opportunity.

### **Music**

Candidates will be expected to undertake a composite master's degree course comprising:

### **Musicology:**

- (a) the presentation of a thesis or a scholastic and performing edition of a major musical work or collection of musical works involving palaeographic skills, a substantial editorial introduction and commentaries
- (b) four seminars listed under the Master of Music Degree (Musicology).

The degree of Master of Arts in Music is also available in Ethnomusicology, and Music in Education.

### **Philosophy**

Candidates for the degree of Master of Arts in Philosophy are advised to consult the Head of the Department within the first month of the academic year where possible about the subject and the course of reading for their thesis.

### **Politics**

Candidates for the degree of Master of Arts in Politics are advised to consult the Postgraduate Coordinator at the earliest opportunity.

### **Women's Studies**

Candidates for the degree of Master of Arts (Women's Studies) are advised to contact the Head of Department. Candidates intending to enrol for the degree of Master of Arts in another Department of Faculty of Arts may, with the agreement of that Department, be jointly supervised by a member of staff from the Department of Women's Studies and by a member of staff in another Department. Prerequisites are those of the Department in which the candidate is enrolling, but candidates should usually have undertaken some Women's Studies coursework as part of their Honours work. It is possible to combine Honours work in a Department in the Faculty of Arts with work in the Department of Women's Studies.

# Master of Arts (Applied Demography)

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as with the Specific Course Rules set out below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1. Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Arts (Applied Demography) shall

- (a) have qualified for an Honours degree of the University or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University;
- (b) have qualified for a Graduate Diploma in Applied Demography; or
- (c) have qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience.

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

### 2. Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters of full-time study or not more than six years of part-time study.

### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 4. Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points as follows:

#### 4.1 Core subjects

All candidates shall complete the following subjects:

9052 Applications of demography	3
5628 Computer applications in demography	3
4101 Demographic projections and forecasts	3
2837 Introduction to demography	3

#### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points selected from the following:

2767 Family demography	3
2674 Households and housing	3
2296 International migration	3
3726 Labour market information systems	3
3750 Mortality and morbidity	3
4187 Population ageing	3
7131 Population mobility and internal migration	3
5082 Small area demographic data	3

#### 4.3 Research dissertation

All candidates shall satisfactorily complete the subject Dissertation (MA Applied Demography), which entails undertaking a research project and presentation of a dissertation of approximately 18,000 words on a topic approved by the Faculty. The Faculty shall appoint one or more supervisors to guide the candidate's research.

3183 Dissertation in Applied Demography	12
---	----

### 5. Status, exemption and credit transfer

5.1 Except with the special permission of the Head of the Department of Geography, no candidate will be granted status for any of the core or elective subjects except candidates who have qualified for the Graduate Certificate in Applied Demography or the Graduate Diploma in Applied Demography.

5.2 No candidate shall be granted status for subjects with a total value of more than 12 points, except students who have completed the Graduate Diploma in Applied Demography, who may be granted up to 24 points (see 7.1 below).

- 5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.
- 5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## 6. Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the Master's degree: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## 7. Articulation with other awards

- 7.1 A candidate who has been admitted to the Graduate Diploma in Applied Demography and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree.
- 7.2 A candidate for the degree of Master of Arts (Applied Demography) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

### 9052 Applications of Demography

3 points semester 1 or 2

The subject is a core requirement for the Graduate Certificate and Graduate Diploma in Applied Demography. Its purpose is to explore the way in which demographic theory, methods and data can contribute to decision making in government and the private sector. The first part of the subject consists of a series of lectures and guided reading. The remainder (the majority) of the subject examines the application of demography to problems such as setting Australia's immigration intake, establishing a system to monitor small area demographic change, evaluating the prospects for urban consolidation, and identifying markets for consumer products. Selected applications will be examined first in workshop format. Students will then work in small groups to elaborate how demography can contribute to solving a selected problem, assembling the requisite data, arguments and insights in the form of a short report.

*assessment:* project work

### 5628 Computer Applications in Demography

3 points semester 1 or 2

This subject is a core requirement for the Graduate Certificate and Graduate Diploma in Applied Demography. It aims to introduce students to the use of computers in demography including access to machine readable data sets, the use of spreadsheets and graphics, Internet resources for demographers and the application of software packages including computer mapping, data analysis and population projection software. Emphasis is placed on developing an understanding of the various data sources and software available, their uses and limitations, and on acquisition of practical skills in the use of computers to access and analyse demographic data.

*assessment:* practical work, project

### 4101 Demographic Projections and Forecasts

3 points semester 1 or 2

This subject is a core requirement for the Graduate Certificate and Graduate Diploma in Applied Demography. It aims to provide students with a sound understanding of the range of techniques used for making projections of population, households, and other demographic phenomena including participation in education and the labour market. Topics covered include the differences between estimates, predictions and forecasts; projection methods applicable at different levels of scale their advantages and

limitations; the scope and nature of forecasting work undertaken by various levels of Government in Australia and overseas; and the software packages available for forecasting. Emphasis is placed on developing applied skills in making projections and forecasts.

*assessment:* practical work, exam

### 2767 Family Demography

3 points semester 1 or 2

This subject examines the dynamics and determinants of family and household formation. It aims to provide students with a clear understanding of the nature of the family and household, the key demographic processes involved in their formation, change and dissolution, the social and economic circumstances which influence these processes, and the measures and techniques used in their analysis. Topics covered include definitions of the family and household; trends in the key processes influencing family and household formation (eg leaving the parental home, formation of marriage and consensual unions, fertility, separation, divorce and widowhood); demographic measures of fertility, marriage, divorce, etc, and how they are calculated; regional and local variations in family and household type; the evolution of the family and household in Australia and likely future trends.

*assessment:* practical work, essay, exam

### 2674 Households and Housing

3 points semester 1 or 2

This subject examines the relationship between population, family and household formation on the one hand, and the housing market on the other. Family and household formation influences the demand for housing and the type of housing that is required; in turn, the nature of the housing market affects the potential for household formation and the types of households that are formed. This subject aims to provide students with a clear understanding of the nature of this relationship and its implications for the housing sector, housing policy, and the analysis of household change at the national, regional and local levels. Emphasis is placed on emerging trends in household formation and the implications of demographic changes for the housing sector. Topics covered include sources of data on the housing sector; the overall housing circumstances of Australians and regional variations; housing careers; modelling the relationship between households and the housing market; and the implications of demographic change for housing policy.

*assessment:* project, essay, exam

### **2296 International Migration**

3 points semester 1 or 2

This subject examines the dynamics and determinants of international migration, with particular reference to Australia. It aims to provide students with a clear understanding of historical and contemporary patterns of immigration, to examine their impacts and implications, and to teach students appropriate methods of data interpretation and analysis. Emphasis is placed on current issues and emerging trends in immigration, including temporary labour migration, and their relationship to and implications for immigration policy. Topics covered include sources of data on immigration and emigration (past and present); theories of international migration; the role of immigration in Australia's population growth and distribution; settlement patterns of immigrants; Australia's immigration policy; temporary international labour migration; immigration and Australia's Asian context; and contemporary issues in immigration policy formulation.

*assessment:* practical work, essay, exam

### **2837 Introduction to Demography**

This subject provides the foundation for the Graduate Certificate and Graduate Diploma in Applied Demography. It aims to introduce student to the basic theories, concepts, data and methods of analysis employed in demography. Topics covered include: the main sources and types of demographic data available in Australia and their interpretation; concepts of population change including the key dynamics of fertility, mortality, internal and international migration, ageing, family and household formation and dissolution, an overview of common analytical techniques including rates, ratios, standardisation, and elements of life table analysis; and an introduction to major demographic theories including the demographic, mobility and epidemiological transitions. The final section of the subject examines some of the key applications of demography. By the end of the course students should have a sound understanding of the scope and methods of demography, its fundamental theories and major applications.

*assessment:* practical work, essay, examination

### **3726 Labour Market Information Systems**

3 points semester 1 or 2

This subject is concerned with the relationship between demographic trends and the labour market, with a particular focus on data sources containing labour market information, their use and interpretation. The subject first examines the range and quality of labour market data available in Australia at the national,

regional and local levels, drawing on various sources including the Census, labour market surveys, and the Department of Social Security. Attention is then given to the application of these data to contemporary issues in Australian labour market dynamics. Topics covered include the derivation of labour market statistics; trends in labour market participation, employment and unemployment; the concept of natural labour markets, self-containment and work-residence relationships; the spatial distribution of unemployment; synthetic estimation; and the implications of labour market trends.

*assessment:* practical work, essay, exam

### **3750 Mortality and Morbidity**

3 points semester 1 or 2

This subject examines the dynamics and determinants of mortality and morbidity in Australia. It aims to provide students with a clear understanding of historical trends and contemporary patterns in these key demographic processes and the standard demographic techniques employed for their analysis. Topics covered include sources of data and their interpretation, classification of causes of death, measures and techniques of analysis (including rates, survival analysis, and standardisation); simple and multiple decrement life tables; analysis of small area data; measurement of morbidity, morbidity data and patterns of hospitalisation. Emphasis is placed on equipping students with a clear working knowledge of techniques of analysis and on understanding their application to contemporary issues.

*assessment:* practical work, essay, exam

### **4187 Population Ageing**

This subject is concerned with the dynamics of population ageing and its implications. It examines contemporary trends in population ageing at the national, regional and local levels and seeks to place the Australian situation in its national context. Measures of ageing and concepts such as population momentum will be explored. Attention is also given to regional and local variations in age structure and their determinants, focusing particularly on the relative significance of migration and ageing-in-place. The subject then turns to the impacts and implications of ageing for a range of social and economic issues, including the provision of housing, income, health and other aged services.

*assessment:* practical work, essay, exam

**7131 Population Mobility and Internal Migration**

3 points semester 1 or 2

This subject examines the dynamics and determinants of population mobility and internal migration, focusing particularly on Australia. It aims to provide students with a clear understanding of contemporary levels of mobility, patterns of migration and techniques of analysis, and to examine the impacts and implications of mobility. Topics covered include the conceptual and analytical definitions of mobility and migration; source of migration data and their interpretation; methods and techniques of analysis (including mobility rates, migration expectancies, chronic mobility and duration of residence); theories of migration; analysis of small area data; contemporary patterns of population redistribution; mobility differentials; life course analysis of migration careers; and migration modelling. Emphasis is placed on equipping students with a clear working knowledge of techniques of analysis and on understanding their application to contemporary issues.

*assessment:* practical work, essay, examination

**5082 Small Area Demographic Data**

3 points semester 1 or 2

This subject is concerned with methods of analysis and interpretation of demographic data at the small area level, such as LGAs, SLAs, postcodes and CCDs. Its scope extends to a wide range of substantive material from different sources including Census data, administrative by-product statistics (such as unemployment data), land and housing information and local government records. The aim of the course is to acquaint students with the range of data which are available at the small area level, methods of accessing such data, and techniques of analysis and interpretation. Emphasis is placed on the use of such data to address a range of policy issues at the local and regional level.

*assessment:* practical work, essay, exam

**3183 Dissertation in Applied Demography**

12 points semester 1 or 2

A dissertation of approximately 20,000 words to be written under the supervision of one or more staff members on a topic approved by the Faculty. It should demonstrate the candidate's capability in applying the knowledge, skills and techniques learned in the course work undertaken for the degree to a contemporary problem or issue in the field of population studies.

## Master of Arts (Applied Historical Studies)

This award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with the General Course Rules as well as the Specific Course Rules below, they are advised to refer to them to understand their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the Master of Arts (Applied Historical Studies) degree must have qualified for an Honours degree from a University at First Class or IIA standard in History or other appropriate field of study, or the Graduate Diploma in Applied Historical Studies at an academic standard acceptable to the Department, or other qualification accepted for the purpose by the University.
- 1.2** Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.

#### 2 Status, exemption and credit transfer

- 2.1** Except by the special permission of the Head of the Department of History, no student may gain status towards the Research Project for other studies undertaken in the University or other institutions.
- 2.2** Students of the Masters degree who have successfully completed the Graduate Diploma in Applied Historical Studies will be awarded status for any subjects completed in the Graduate Diploma which form part of the requirements of Rule 6.1, below. Students who are granted status to the value of 18 or more points for their Graduate Diploma studies under this provision will be required to surrender their Graduate Diploma before being admitted to the Masters degree (see 9.2, below).

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the degree a student shall satisfactorily complete a course of one and one-half years of full-time study or not more than four years of continuous part-time study.

#### 5 Qualification requirements

The course of study for the degree of Master of Arts (Applied Historical Studies) shall be made up of two parts with an aggregate points value of 36 points, consisting of coursework subjects to the value of 24 points and a 12 point Dissertation.

#### 6 Course of study/Subjects of study

All students shall satisfactorily complete the following two parts:

##### 6.1 Coursework Subjects

All students shall satisfactorily complete the following:

6132 Public History: Principles and Practice	6
5935 Heritage and History in Contemporary Australia	6
2850 Practical History Workshop I	6
1303 Practical History Workshop II	6

##### 6.2 Special Research Project

All students shall complete one 12-point Research Project of up to 20,000 words:

*either*

2515 Research Project in Applied Historical Studies F/T 12

*or*

5854 Research Project in Applied Historical Studies P/T 12

#### 7 Academic progress

- 7.1** A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2** A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

#### 8 Assessment and examinations

- 8.1** There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**8.2** For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of History as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**9 Articulation with other awards**

**9.1** Students who complete the Graduate Diploma in Applied Historical Studies incorporating a Research Project at credit level or higher are eligible to apply for the Master of Arts (Applied Historical Studies) course, and if successful, on gaining entry, receive status for appropriate elective components for the work they have passed in the Graduate Diploma.

**9.2** Students who have conferred upon them the award of Graduate Diploma in Applied Historical Studies who subsequently successfully complete the requirements of the Master of Arts (Applied Historical Studies) and who have been granted 18 or more points of status on behalf of their Graduate Diploma must surrender their first award before being admitted to the degree of Master of Arts (Applied Historical Studies).

**9.3** Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Arts (Applied Historical Studies) and who has completed the work prescribed for the Graduate Diploma in Applied Historical Studies and who has not been awarded the Masters degree shall, on written application to the Faculty, be awarded the Graduate Diploma.

## Syllabuses

### **6132 Public History: Principles and Practice**

6 points semester 1

This subject provides an overview of the current situation, problems and opportunities of public history. Topics to be covered include social uses of the past, relations between 'academic' and 'professional' history, the historian as expert, popular history, history and/in the media, history and cultural identity, and varieties of historical writing. There will be a program of assigned readings for each week, together with lectures and guest speakers.

*assessment:* essay, seminar papers, group project

### **5935 Heritage and History in Contemporary Australia**

6 points semester 2

This subject explores changing attitudes towards the built natural environment, raising questions about the visible past and why we should (or should not) seek to save it. Topics covered include the definition of heritage, the rise of heritage consciousness, heritage and public policy, historical buildings, sites and precincts, and the presentation of the past in historical museums.

*assessment:* essay, seminar papers, group project

### **2850 Practical History Workshop I**

6 points semester 1

4 hours, including workshops, a week

This subject will provide an introduction to methods and techniques of research and presentation for the applied historian, including sessions on bibliography, interview techniques, archives and manuscripts, computers and the historian, historical writing and editing. Students also undertake an internship in a local historical agency or institution.

*assessment:* essays, exercises, workshop participation

### **1303 Practical History Workshop II**

6 points semester 2

4 hours, including workshops, a week

Units in this subject vary according to the availability of expertise and student demand, but could include some or all of the following: Built Environment and the Historian, Local and Commissioned History, Regional History, Business History, Family History, Aboriginal History, History and Tourism, Archives and Records Management, Museums Skills for the historian. Students also undertake an internship in a local historical agency or institution.

*assessment:* essays, exercises, workshop participation

### **2515 Research Project in Applied Historical Studies F/T**

12 points semester 1 or 2

### **5854 Research Project in Applied Historical Studies P/T**

12 points full year

Special Research Project for private or public client developed in consultation with, and approved by, the subject convenor.

*assessment:* dissertation/report of up to 20,000 words or equivalent of comparable substance

# Master of Arts (Applied Linguistics)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the degree of Master of Arts (Applied Linguistics) shall have:
- (a) qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University *or*
  - (b) qualified for a Graduate Diploma in Applied Linguistics at a standard acceptable to the Department *or*
  - (c) qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience.

### 2 Duration of course

To qualify for the degree, a candidate shall satisfactorily complete one and a half years of full-time study or not more than six years of part-time study.

### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 4 Course requirements

To qualify for the degree, a candidate shall have passed at least one full year of any language other than English (LOTE) at tertiary level, or the equivalent, and satisfactorily complete subjects to the value of 36 points, as follows:

#### 4.1 Core subject

All candidates, except those covered by clauses 5.3 and 5.4 below, shall complete the following subjects:

2207	Foundations of Linguistics IV A	6
9836	Foundations of Linguistics IV B	6
5066	Language other than English (if required)	0

### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points chosen selected from the following:

8500	Australian Cultural Studies (Linguistics) IV	6
7556	Computer Assisted Language Learning IV	6
8766	Computer Assisted Language Learning Project IV	6
2030	English for Professional Purposes IV	6
8217	Functional Grammar and Discourse IV	6
8538	Karna Language and Language Ecology IV	6
1170	Language and the Environment IV	6
3355	Language Cognition and Reality IV	6
4306	Language Maintenance and Language Planning IV	6
6933	New Literatures in English IV	6
5358	Questions of Postmodernism IV	6
7504	Special Topic in Linguistics IV	6

- 4.3** No candidate will be permitted to count for the award any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

#### 4.4 Dissertation

All candidates shall complete either the full-time or the part-time version of the dissertation:

5049	Dissertation in Linguistics (F-T)	12
<i>or</i>		
3498	Dissertation in Linguistics (P-T)	12

### 5 Status, exemption and credit transfer

- 5.1** No candidate will be granted status for any subject which has already been presented for another award.

- 5.2** No candidate shall be granted status for subjects with a total value of more than 12 points on account of subjects not previously presented for another award, except candidates who have qualified for the Graduate Diploma in Applied Linguistics who may be granted up to 24 points of status (see 7.1 below)

**5.3** Students who have taken Foundations of Linguistics II or III in an undergraduate degree will be exempt from the core topics Foundations of Linguistics IVA and IVB and will substitute two additional electives.

**5.4** Any candidate who has not passed a language other than English (LOTE) subject at tertiary level is required also to complete one year of study in a LOTE concurrently with the requirements of Rule 4 of the award.

**5.5** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

**6.1** There shall be four classifications of pass in any subject for the Masters degree:

Pass with High Distinction;  
Pass with Distinction;  
Pass with Credit; and  
Pass.

**6.2** (a) A candidate shall not be eligible to be assessed, by examination or otherwise, unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

**6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

**7.1** A candidate who has been admitted to the Graduate Diploma in Applied Linguistics and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree.

**7.2** A candidate for the degree of Master of Arts (Applied Linguistics) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

Dissertation of 18000 words.

## Master of Arts (Creative Writing)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: Postgraduate tuition fees apply to this course.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Arts (Creative Writing) shall

- (a) have qualified for the Graduate Diploma in Creative Writing at a standard acceptable to the Department *or*
- (b) have qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University *and*
- (c) have presented a suitable portfolio of creative writing.

1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2. Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters of full-time study or the equivalent of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, as follows:

##### 4.1 Core subjects

All candidates shall complete the following subjects:

4581	Advanced Work in Progress	6
8628	Creative Writing Workshop	6
4320	Work in Progress	6

#### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points selected from the following:

8500	Australian Cultural Studies IV	6
9156	Contemporary Australian Film IV	6
8307	Contemporary Australian Writing IV	6
3255	Drama Since 1900 IV	6
7313	Fiction and Drama in England IV	6
3876	Legal Representations: From Book to Website IV	6
7450	Major English Texts IV	6
9717	Medieval English Literature IV	6
9596	Modern Drama from Europe, America and Britain IV	6
2085	Modernist Literature IV	6
6933	New Literatures in English IV	6
3904	Poetry of the English Renaissance IV	6
5358	Questions of Postmodernism IV	6
9185	Romanticism IV	6
9631	The Idea of Youth: Fiction, Film and Theory IV	6
5845	Twentieth Century American Literature IV	6
1698	Victorian Literature IV	6
8972	Women's Writing in the Nineteenth Century IV	6

#### 4.3 Dissertation

All candidates shall complete either the full-time or part-time version of the following subject:

8787	Creative Writing Dissertation	18
------	-------------------------------	----

#### 5. Status, exemption and credit transfer

5.1 Except with the special permission of the Head of the Department of English, no candidate will be granted status for any of the core subjects of the degree except candidates who have qualified for the Graduate Diploma in Creative Writing.

- 5.2 No candidate shall be granted status for subjects with a total value of more than 12 points, except candidates who have qualified for the Graduate Diploma in Creative Writing who may be granted up to 24 points of status (see 7.1 below).
- 5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.
- 5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

- 6.1 There shall be four classifications of pass in any subject: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

- 7.1 A candidate who has been admitted to the Graduate Diploma in Creative Writing and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree.
- 7.2 A candidate for the degree of Master of Arts (Creative Writing) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

---

### 4320 Work in Progress

6 points semester 1

This subject provides a forum for presentation and discussion of current student writing in various creative genres, notably novel, short fiction, poetry and drama. Discussions will focus on literary themes, theories and models, through analysing a variety of works in all genres. Written exercises will emphasise both critical analysis and student experimentation with a wide variety of literary forms.

### 4581 Advanced Work in Progress

6 points semester 2

*prerequisite:* 1887 Work in Progress seminar

This subject provides a forum for presentation and discussion of current student writing in various creative genres, notably novel, short fiction, poetry and drama, building on the work of the first semester

### 8628 Creative Writing Workshop

6 points full year

2 hour seminar per week

*prerequisite:* Grad. Dip. Creative Writing or equivalent

This advanced workshop will enable final-year candidates engaged in extensive writing projects in a single literary genre to present, criticise and revise them regularly.

*assessment:* continuous assessment

### 8787 Creative Writing Dissertation

18 points full year

Supervision, arranged with course convener

*prerequisite:* Grad. Dip. Creative writing or equivalent

An extended writing project in a single literary genre.

*assessment:* dissertation of a length appropriate to the genre of creative writing selected, as determined by agreement with course convener

See entries for English under the B.A. for syllabus details of elective subjects

## Master of Arts (International Studies)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Arts (International Studies) shall

- (a) have qualified for the Graduate Diploma in International Studies or for the Graduate Diploma in International Economics, or the equivalent, at a standard acceptable to the Award Committee *or*
- (b) have qualified for an Honours degree of First Class or Second Class Division A standard in an appropriate social science discipline *or*
- (c) have qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience.

1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2. Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising two years of full-time study or not more than six years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 48 points, as follows:

#### 4.1 Core subjects

Candidates shall complete the following subjects:

8414 Graduate International Studies	6
3094 International Studies Seminar	6
2612 Graduate International Studies Dissertation	12
2576 Advanced International Studies	12

#### 4.2 Dissertation

Candidates shall complete the following subject:

3880 International Studies Dissertation (MA)	12
--	----

#### 5. Status, exemption and credit transfer

5.1 Except with the special permission of the Convener of the Award Committee no candidate will be granted status for any part of the degree except candidates who have qualified for the Graduate Diploma in International Studies or who are admitted to the course under Specific Course Rule 1.1(b).

5.2 No candidate shall be granted status for subjects with a total value of more than 24 points.

5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

#### 6. Assessment and examinations

6.1 There shall be four classifications of pass in subjects for the award: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## 7 Articulation with other awards

7.1 A candidate who has been admitted to the Graduate Diploma in International Studies or the Graduate Diploma in International Economics and who has been granted status toward the degree for subjects presented for the Graduate Diploma to the value of more than six points must surrender the Graduate Diploma before being admitted to the degree.

7.2 A candidate for the degree of Master of Arts (International Studies) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

### 2576 Advanced International Studies

12 points full year

Tutorials, 90 minute seminar per week

*prerequisites:* Graduate Diploma in International Studies or equivalent

The content of this subject will be concerned with the structure and international activity of nation states which are of contemporary significance. This subject will comprise one 90 minute seminar per week. The first month will consist of organisational, research method and induction procedures. Subsequently, each student will be expected to present two research papers for thirty minutes and two commentaries of up to ten minutes on other research papers. The content of the papers will be determined by the program's academic specialists who will also periodically chair seminars. The seminar topics will be designed to provide students with insights into leading edge problems, controversies and research methods appropriate to the major International Studies issues of the day. Students will be given a set time to present set topics using contemporary technologies and later, to submit a written 8,000 word report, incorporating seminar discussion outcomes, for assessment. The seminar is designed to generate information, heighten awareness and increase familiarity with a range of research techniques, reveal intellectual and public policy controversies and develop presentation methods.

*assessment:* two 8,000 word essays, two tutorial presentations

### 8414 Graduate International Studies

6 points semester 1

2 hours lectures, 1 hour tutorial a week

*prerequisites:* a Bachelor's degree in Politics, Asian Studies, Economics, Labour Studies, History, European Studies and Cultural Studies or related discipline from an Australian university or equivalent

*restrictions:* 6168 Honours International Studies

This seminar course runs for one semester and deals with international relations in the Asia Pacific region since the end of the Cold War. It analyses the withdrawal of European colonialism; the decline of Soviet and US superpower conflict in the region; the possible rise of local superpowers, including China and Japan; the consolidation of regional state apparatuses and their political and military power; the phenomenon of rapid economic growth in much of the region; regional organisations like APEC, ASEAN, EAEC and the South Pacific Forum; examines some of the major strategic conflicts in the area, including Taiwan, the Spratley Is, environmental issues in the Pacific and

border problems; and concludes with an analysis of Australia's role in the region.

*assessment:* essays, seminar presentations

### 2612 Graduate International Studies Dissertation

12 points semester 1 or 2

*prerequisites:* a Bachelor's degree in Politics, Asian Studies, Economics, Labour Studies, History, European Studies and Cultural Studies or related discipline from an Australian university or equivalent

*restrictions:* 6168 Honours International Studies

Dissertation on an International Studies Topic which meets the criteria for International Studies developed by the International Studies award committee.

*assessment:* dissertation

### 3880 International Studies Dissertation (M.A.)

12 points full year

*prerequisites:* Graduate Diploma in International Studies or equivalent

Dissertation of up to 25,000 words on a topic approved by the Award Committee and supervised by one of its members or nominee. The dissertation should demonstrate the candidate's ability to apply the knowledge learned in the coursework undertaken for the degree or in international studies undertaken elsewhere to a contemporary problem or issue in the field of international studies.

*assessment:* examination of dissertation

### 3094 International Studies Seminar

6 points semester 1 or 2

*prerequisites:* a Bachelor's degree in Politics, Asian Studies, Economics, Labour Studies, History, European Studies and Cultural Studies or related discipline from an Australian university or equivalent

*restrictions:* 6168 Honours International Studies

Six points of Graduate Diploma course or equivalent in Arts or Economics as approved by the Award Committee

*assessment:* essays, seminar presentations

# Master of Arts (Labour Studies)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Note: this course is also offered externally

## Specific Course Rules

### 1 Admission requirements

- 1.1** An applicant for admission to the course of study for the degree of Master of Arts (Labour Studies) shall:
- have qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University
  - have qualified for a Graduate Diploma in Labour Studies at a standard acceptable to the Department *or*
  - have qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience.

### 2 Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters of full-time study or not more than six years of part-time study.

### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 4 Course requirements

#### 4.1 Core subject

All candidates shall complete coursework subjects to the value of 12 points selected from the following:

5565 Labour Movements IV	6
2822 Labour Strategies IV	6
3649 Political Economy of Globalisation IV	6
7489 Social and Labour Research IV	6
8506 Theorising Work and Society IV	6

### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of at least 12 points chosen from the core subjects listed in 4.1 or the following:

5718 International Political Economy IV	6
6112 Labour Market Studies IV	6
4657 Labour Research Networking IV	6
3210 Learning and the Workplace	3
1598 Learning and the Work Place IV	4
3368 Managing Education for Work	3
1882 Managing Education for Work IV	4
4894 Regional Industry Development	3
5194 Regional Industry Development IV	4
4688 Sustaining Regional Development	3
6322 Sustaining Regional Development IV	4

- 4.3** No candidate will be permitted to count for the coursework M.A.(Labour Studies) any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

### 4.4 Research project

All candidates shall complete either the full-time or the part-time version of the following subject:

4625 Labour Studies Dissertation F/T	12
7132 Labour Studies Dissertation P/T	12

### 5 Status, exemption and credit transfer

- 5.1** Except with the special permission of the Faculty, no candidate will be granted status for any of the core subjects of the degree except candidates who have qualified for the Graduate Diploma in Labour Studies.
- 5.2** No candidate shall be granted status for subjects with a total value of more than 12 points, except candidates who have qualified for the Graduate Diploma in Labour Studies who may be granted up to 24 points of status (see 7.1 below).

5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Convenor concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## 6 Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Masters degree:

Pass with High Distinction;  
Pass with Distinction;  
Pass with Credit; and  
Pass

6.2 (a) A candidate shall not be eligible to be assessed, by examination or otherwise, unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## 7 Articulation with other awards

7.1 A candidate who has been admitted to the Graduate Diploma in Labour Studies and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree.

7.2 A candidate for the degree of Master of Arts (Labour Studies) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

### 5718 International Political Economy IV

6 points not offered in 1999

3 hours per week; visits to local institutions with links to the international economy

Theories of International Political Economy; the establishment of world markets; Post World War II International Political Economy; the General Agreement on Tariffs and Trade and the World Trade Organisation, the International Monetary Fund and the World Bank, Multinational Corporations; the breakdown of the Cold War International Political Economy; the COMECON system; the alleged decline of US hegemony; the demise of socialism in the Soviet Union, Eastern Europe and its decline in China; the economic integration of Europe; the North American Free Trade Area; Japan and the Asian 'Tigers'; China and the Asian 'Tigers'; Asian regionalism including Asia Pacific Economic Cooperation (APEC), East Asia Economic Caucus (EAEC) and the Association of South East Asian Nations (ASEAN); Globalisation; changes in technology, investment, trade, finance, currency and labour arrangements; deregulation and restructuring of the nation state - the "Washington Consensus"; the domestic consequences of Globalisation for Australia - political and economic.

*assessment:* essays to total of 8000 words

### 6112 Labour Market Studies IV

6 points semester 1

3 hour class each week

This subject provides an overview of models of labour markets in terms of both orthodox and heterodox economic theory. It aims to develop students' ability to evaluate current developments with respect to patterns of participation in paid and unpaid work, wages dispersion and relativities, employment and unemployment policy, labour market programs and education and training.

*assessment:* essay, other written work to total of 8000 words

### 5565 Labour Movements: IV

6 points not offered in 1999

*restrictions:* 8640 Union studies IIIA; 1247 Union Studies IIIA (BA); 7612 Union Studies III; 2264 Union Studies III (BA); Union Studies IVA

Theories about industrial relations and unions are explored with a focus upon the explanations for current union decline and prospects for unions in the future. The implications of unitarist, pluralist, marxist, feminist and post-modernist theories and critiques are explored. Experience in unionism in the U.S. and England is investigated with a particular focus on

union survival, democracy, organising and the situation of women and other under-organised and under-represented groups.

*assessment:* essays to a total of 8000 words

### 4657 Labour Research Networking IV

6 points semester 1

Subject to demand

This subject aims to introduce students to the wealth of labour research data available on the Australian Academic Research Data Network and the Internet. Students will have the opportunity to develop their skills in a range of search techniques using information server networks such as the gopher and the World Wide Web, and remote data bases such as automated library catalogues and social science data sets. They are required to find relevant research data and to retrieve it by electronic mail or file transfer in order to process it with word-processing, spreadsheet and database management software on a local personal computer.

*assessment:* computer communications exercise 12.5%, word processing exercise 12.5%, spreadsheet exercise 12.5%, database management exercise 12.55; 4000 word essay 50%

### 2822 Labour Strategies IV

6 points semester 2

*restrictions:* 7295 Union Studies IIIB; 1749 Union Studies IIIB (BA); 7612 Union Studies III; 2264 Union Studies III (BA); Union Studies IVB

Approaches to the study of trade unions and industrial relations; theoretical frameworks for the explanation of industrial disputation and the repertoire of roles played by employers, managers, workers and their unions; the legal framework for the regulation of industrial relations and for safety and equity in employment, the relationship between the industrial relations strategy of the trade union movement and the economic development strategy of the government.

### 3210 Learning and the Workplace

3 points not offered in 1999

1 lecture, 2 hour seminar per week

Trends and issues in learning and work- learning organisations, workers as learners, organisational learning, the role of organisations in learning. Models for learning organisations, workplace learning. Australian approaches to workplace learning. Learning organisations in the Asian context.

*assessment:* position paper 20%, seminar paper 30%, action learning project 50% equivalent to 1200 words per point

### 1598 Learning and the Workplace IV

4 points not offered in 1999

See 3210 Learning and Workplace for syllabus details

### 3368 Managing Education for Work

3 points not offered in 1999

1 lecture, 2 hour seminar per week

Education, the economy and work - the impact of globalisation, educational responses, local/international case studies. Development and change in vocational education and training in Australia - global/national/local challenges. Emergent discourses - lifelong learning, learning societies. Managing educational change.

*assessment:* essay 25%, seminar paper 15%, negotiated policy/practice project 60% to equivalent of 1200 words per point

### 1882 Managing Education for Work IV

4 points not offered in 1999

See 3368 Managing Education for Work for syllabus details

### 3649 Political Economy of Globalisation IV

6 points semester 2

*restrictions:* 7380 Political Economy; 3294 Political Economy IIIB (BA); 1310 Political Economy III; 4211 Political Economy III (BA); 5099 Political Economy IVB

The role of the state in a capitalist economy; the public sector and the state process; the policy making process in Australia - the major actors and institutions; the involvement of trade unions in Australian public policy making; women and public policies; macroeconomic government strategies; government budgetary policies on taxation; government budgetary expenditures; monetary policy; trade and industry policy; labour market, wages and other work-related policies; the size and role of the public sector.

### 4894 Regional Industry Development

3 points semester 1

2 lectures, 1 tutorial per week

This subject examines the economic role of government in Australia in relation to key issues in contemporary industry and regional development policy. It aims to provide students with a clear understanding of the key state and federal policies that have influenced economic, industry and regional development in Australia over the past decade. It examines intra and inter governmental decision making processes and the influence of business,

community and trade unions on policy formulation and implementation. Topics covered include an understanding of the role of government in industry and regional development; globalisation; contemporary debates on the economic role of government in public policy; state and federal relations; the impact of competition policy on the States; the impact of privatisation and contracting out on the role of government; organisational structures and development within regions; and a review of contemporary strategies for economic, industry and regional development, a national and international comparative analysis.

*assessment:* written work equivalent to 1200 words per point

### 5194 Regional Industry Development IV

4 points semester 1

See 4894 Regional Industry Development for syllabus details

### 7489 Social and Labour Research IV

6 points semester 1

An investigation of social and labour research paradigms, approaches and methods; policy development processes and outcomes; policy and research as approaches to social analysis; emergent trends and issues in social and labour research.

*assessment:* seminar paper 20%; case study 30%; essay 50%

### 4688 Sustaining Regional Development

3 points semester 2

2 lectures, 1 tutorial per week

This subject provides students with a practical understanding of employing integrated industry auditing and GIS technologies in the development of economic, industry and regional development policies for government and in the formulation of investment decisions for the private sector. The subject focuses on the role of networking in regional and industry development. Topics covered include: labour market analysis and skills audits; applications of economic modelling; preparation and analysis of location quotients; infrastructure and land use needs assessment for future economic and industry development; social auditing and benchmarking; integrating GIS applications with industry auditing; networking as industrial strategy.

*assessment:* written work equivalent to 1200 words per point

**6322 Sustaining Regional Development IV**

4 points semester 2

See 4688 Sustaining Regional Development for syllabus details

**8506 Theorising Work and Society IV**

6 points not offered in 1999

*restrictions:* 2407 Work Studies III; 5465 Work Studies III; 3894 Work Studies IIIA; 9278 Work Studies IIIA (BA); Work Studies IVA

This subject extends the analysis of issues raised in previous studies of work and society from the perspectives of class, gender and ethnicity. The content will focus on current theoretical debates in the following areas: changes in work and family life under capitalism; the structure of labour markets; labour process theory and its critiques, work and technology; Fordism, post-Fordism and new production systems; contemporary management strategies and workplace relations; flexibility in the workplace and the labour market; the future of paid and unpaid work.

*assessment:* essays to a total of 8000 words

**dissertation**

## Master of Arts (Philosophy)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1. Admission requirements

- 1.1** An applicant for admission to the course of study for the degree of Master of Arts (Philosophy) shall have qualified for a Graduate Diploma in Philosophy with a credit average and have obtained at least 70% in two Advanced Philosophy electives.
- 1.2** The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2. Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising one and one-half years of full-time study or not more than six years of part-time study.

#### 3. Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4. Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, as follows:

- 4.1** All candidates shall satisfactorily complete the following subjects
- |  |   |
|--|---|
| 4313 Masters Philosophy Seminar          | 6 |
| <i>and</i> three of the following:       |   |
| 4708 Epistemology (PG)                   | 6 |
| 5670 Introductory Philosophy (PG)        | 6 |
| 9673 Metaphysics (PG)                    | 6 |
| 9522 Modern Moral Philosophy (PG)        | 6 |
| 4482 Political and Legal Philosophy (PG) | 6 |

#### 4.2 Dissertation

All candidates shall complete one of the following subjects:

- |                                     |    |
|-------------------------------------|----|
| 5398 Dissertation in Philosophy F/T | 12 |
| <i>or</i>                           |    |
| 1695 Dissertation in Philosophy P/T | 12 |

#### 5. Status, exemption and credit transfer

- 5.1** Except with the special permission of the Head of the Department of Philosophy, no candidate will be granted status for any of the subjects of the degree except candidates who have qualified for the Graduate Diploma in Philosophy. Intending students must consult with the Head of Department to discuss their proposed course of study.
- 5.2** No candidate shall be granted status for subjects with a total value of more than 24 points.
- 5.3** No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.
- 5.4** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.
- #### 6. Assessment and examinations
- 6.1** There shall be four classifications of pass in any subject: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2** (a) a candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned
- (b) for the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

**7 Articulation with other awards**

**7.1** A candidate who has been admitted to the Graduate Diploma in Philosophy and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree.

**7.2** A candidate for the degree of Master of Arts (Philosophy) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

---

### core subject

#### 4313 Masters Philosophy Seminar

6 points semester 1 or 2

The seminar program will examine in more depth at least three of the fields of Metaphysics, Epistemology, Ethics, and Political and Legal Philosophy addressed in the Graduate Diploma program, with students required to present major papers to the seminar group in two of these.

*assessment:* essays, seminar presentation

### elective subjects

#### 4708 Epistemology (PG)

6 points semester 1 or 2

2 lectures, 1 tutorial per week

*restrictions:* 5902/1415 Theory of Knowledge II/III

A graduate level approach to modern epistemology. This subject will cover a range of topics including scepticism, relativism, foundationalism, the coherence theory and the problem of induction

*assessment:* 3 x 3000 word essays

#### 5670 Introductory Philosophy (PG)

6 points semester 1 or 2

2 lectures, 1 tutorial per week

*restrictions:* 9014 Philosophy IA; 5704 Philosophy IB

A graduate level approach to an introduction to philosophy. Topics covered include metaphysics, epistemology, moral and social philosophy

*assessment:* essays and exam

#### 9673 Metaphysics (PG)

6 points semester 1 or 2

2 lectures, 1 tutorial per week

*restrictions:* 5192 Metaphysics III

A graduate level approach to metaphysics. The subject will include a study of the problem of universals and related questions and will have a substantial historical content.

*assessment:* 3 x 3000 word essays

#### 9522 Modern Moral Philosophy (PG)

6 points semester 1 or 2

2 lectures, 1 tutorial per week

*restrictions:* 3538/1237 Moral Problems II/III

A graduate level approach to modern moral philosophy focusing on practical ethics. Problems discussed will include abortion, euthanasia, invitro-fertilisation, genetic engineering, pornography and censorship, environmental ethics and sexual morality.

*assessment:* 3 x 3000 word essays

#### 4482 Political and Legal Philosophy (PG)

6 points semester 1 or 2

2 lectures, 1 tutorial per week

*restrictions:* 7457/2305 Moral, Political and Legal Philosophy II/III. In addition, students may not include an elective which contains substantially the same material as any Philosophy subject which they may have taken at undergraduate level

A graduate level approach to political and legal philosophy. The subject will cover such areas as conceptions of democracy, feminism, liberalism, punishment and the nature of law and judicial decision.

*assessment:* 3 x 3000 word essays

### dissertation

#### 6398 Dissertation in Philosophy F/T

12 points semester 1 or 2

#### 1695 Dissertation in Philosophy P/T

12 points full year

*prerequisites:* Graduate Diploma in Philosophy

An original piece of research determined in consultation with the Head of the Department.

*assessment:* examination of dissertation

## Master of Arts (Population and Human Resources)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

- 1 Admission requirements**
- 1.1** An applicant for admission to the course of study for the degree of Master of Arts (Population and Human Resources ) shall
- have qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University *or*
  - have qualified for a Graduate Diploma in Population and Human Resources at a credit level or better *or*
  - have qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience.
- 1.2** The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.
- 2 Duration of course**
- To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters of full-time study or not more than six years of part-time study.
- 3 Approval of course of study**
- Each candidate's course of study shall be approved by the Faculty at enrolment each year.
- 4 Course requirements**
- To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, as follows:
- 4.1 Core subjects**
- All candidates shall complete the following subjects:
- |  |   |
|--|---|
| 3790 Population Studies                          | 4 |
| 2924 Computer Applications in Population Studies | 4 |
| 1556 Population Data Analysis                    | 4 |
| 4428 Human Resource Development                  | 4 |
- 4.2 Elective subjects**
- All candidates shall complete elective subjects to the value of 8 points selected from the following:
- |  |   |
|--|---|
| 5678 Ageing of Populations                         | 4 |
| 1762 Applied Demography                            |   |
| 4024 Demography of the Family                      | 4 |
| 2757 Population and the Environment                | 4 |
| 1613 Population Management and Operations Research | 4 |
| 4904 Population Mobility                           | 4 |
| 9979 Regional Development and Planning             | 4 |
| 1745 Urbanisation and Development                  | 4 |
| 7149 Women's Health and Child Survival             | 4 |
- 4.3 Research project**
- All candidates shall complete either the full-time or the part-time version of the following subject:
- |   |    |
|---|----|
| 4193 Research Project (MA Population and Human Resources F/T) | 12 |
| <i>or</i>   |    |
| 1065 Research Project (MA Population and Human Resources P/T) | 12 |
| <i>or</i>   |    |
| 6874 Research Paper in Population and Human Resources         | 8  |
| <i>and</i>  |    |
| one additional elective from the list above                   | 4  |
- 5 Status, exemption and credit transfer**
- 5.1** Except with the special permission of the Head of the Department of Geography, no candidate will be granted status for any of the core subjects of the degree except candidates who have qualified for the Graduate Diploma in Population and Human Resources .

- 5.2** No candidate shall be granted status for subjects with a total value of more than 12 points, except candidates who have qualified for the Graduate Diploma in Population and Human Resources who may be granted up to 24 points of status (see 7.1 below).
- 5.3** No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.
- 5.4** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

- 6.1** There shall be four classifications of pass in any subject for the Master of Arts (Population and Human Resources): Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2** (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

- 7.1** A candidate who has been admitted to the Graduate Diploma in Population and Human resources and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 8 points must surrender the Graduate Diploma before being admitted to the degree.
- 7.2** A candidate for the degree of Master of Arts (Population and Human Resources) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

The University of Adelaide and Flinders University of South Australia jointly offer subjects for the Master of Arts in Population and Human Resources. Teaching of the subjects is divided between Flinders and Adelaide Universities. However, students should enrol at the University of Adelaide.

### compulsory core subjects

#### 2924 Computer Applications in Population Studies

4 points semester 1 or 2

This subject is offered to complement the core topic Population Data Analysis as a cognate and to provide students undertaking thesis work with a working knowledge of the use of the computer and SPSS. Students are introduced to the use of both the micro and mainframe computer to carry out exercises in the Population Data Analysis course. This course also demonstrates the use of a range of software packages, eg Microsoft Word, graphic packages, population estimation and analysis programs.

*assessment:* satisfactory completion of workshops

#### 4428 Human Resource Development

4 points semester 1 or 2

An examination of human resource issues and planning with special reference to Indonesia and the Asia-Pacific Region. The topic includes analysis of labour force and labour markets in developing countries, an introduction and critical evaluation of major approaches to manpower planning and educational planning, policies and planning of health and nutritional improvement, inter-relationships between education, health and population, and policies and planning for population distribution and mobility. The topic provides an overview to analysis and issues, and deals with selected case studies in the Asia-Pacific region on all those subjects.

*assessment:* exam, major essay, minor essay, tutorial papers, presentations

#### 1556 Population Data Analysis

4 points semester 1 or 2

4 hours per week

The subject aims to give students a working knowledge of a range of the basic techniques required in the analysis of population change and distribution, and of population development interrelationships. It will impart practical skills in analysis and interpretation of population data and trends, focusing particularly on analysis of fertility, migration and labour force data,

and on projections. It will also highlight the major variables of interest in the study of population and development, critically examining and providing students with practical experience in applying various techniques to testing major theories in this field.

*assessment:* workshop; project; exam

#### 3790 Population Studies

4 points semester 1 or 2

3 hours per week

The subject aims to give students a background in the major concepts, theories and approaches to demography. It introduces students to major world demographic patterns and then takes each major demographic process in turn and examines the major methods of measurement which are used for that process, the major patterns of that process in more developed and less developed countries, differentials between groups with respect to the process and major explanations of changes in that process. This approach is applied to consideration of mortality, fertility, internal migration, international migration, urbanisation, ageing, labour force and human resource issues.

*assessment:* exam, essay and written tutorial paper, review of journal article

### elective subjects

#### 5678 Ageing of Populations: Causes and Consequences

4 points semester 1 or 2

This subject aims firstly to give students a thorough background in contemporary patterns and levels of growth of the older population in both Less Developed and More Developed countries. It examines the causes of the current and impending rapid growth of the aged and the complex interface between ageing of populations and economic development and social change in relation to the changing relationships between generations. The changing characteristics of the elderly in LDCs and MDCs are explored. The implications of ageing for provision of health services, providing economic support for the aged, housing and other areas of public policy are discussed in relation to both LDCs and MDCs. Changing patterns of behaviour of the elderly with respect to housing, permanent and temporary migration and health are also examined.

*assessment:* essay; book review; seminar; exam

### 1762 Applied Demography

4 points semester 1 or 2

This subject provides students with the theoretical basis, methodological skills and concepts to apply demographic knowledge to real world social planning and business problems. The basis of all planning in the public and private sectors is an understanding of the people for which they are providing goods and services to. However, the incorporation of demographic elements into planning and policy making is lacking in Australia. The course involves a strong methodological component and addresses particularly the issue of anticipating population change and the whole area of population projection. Another focus will be the use of small area demographic data for planning the spatial distribution of goods and services. In addition, the use of demography in human resource planning, corporate planning and site location. Full consideration is made of appropriate data sources and computer software.

*assessment:* exam; project; essay; seminar participation

### 4024 Demography of the Family

4 points semester 1 or 2

This subject aims firstly to give students a thorough background in contemporary patterns and levels of growth of the older population in both Less Developed and More Developed countries. It examines the causes of the current and impending rapid growth of the aged and the complex interface between ageing of populations and economic development and social change in relation to the changing relationships between generations. The changing characteristics of the elderly in LDCs and MDCs are explored. The implications of ageing for provision of health services, providing economic support for the aged, housing and other areas of public policy are discussed in relation to both LDCs and MDCs. Changing patterns of behaviour of the elderly with respect to housing, permanent and temporary migration and health are also examined.

*assessment:* essay; book review; seminar; exam

### 2757 Population and the Environment

4 points semester 1 or 2

The topic introduces basic concepts and analysis of ecosystems and key interrelationships between population and environment within the context of development issues and policies. It deals with resource depletion and management, land use and agricultural systems related to population pressure, population mobility, urbanisation and the environment and integrated approaches to population-environment planning.

*assessment:* essays; tutorial papers; major project

### 1613 Population Management and Operations Research

4 points : semester 1 or 2

This subject is designed particularly for students with a professional background or specialised interest in the management of population programs including family planning and health. The major components of the course include population policies, population programs and projects, project management including its substantive and financial aspects, and management information systems. The course will also include a review of case studies from both developed and developing countries.

### 4904 Population Mobility

4 points semester 1 or 2

The topic aims firstly to cover in depth the major conceptual and measurement issues related to population movement in developing and developed societies. It deals with the major theories of population movement, its causes and consequences for social and economic change. Finally there is a consideration of planning and policy issues related to population movement, especially in developing countries.

*assessment:* 2 major essays; written, verbal tutorial work; exam

### 9979 Regional Development and Planning

4 points semester 1 or 2

This topic may include a study of the significance of the region and spatial analysis in development theory and practice, an examination of theories of regional development, case studies of particular regions, and a study of regional development policies. Particular emphasis may be given to the problems of low income regions in developing countries, and to the role of migration in regional development.

*assessment:* 1500 word paper; major report, essay

### 1745 Urbanisation and Development

4 points semester 1 or 2

An examination of the relationships between urbanisation and development with particular reference to Southmost Asia. The topic includes study of the causes of urbanisation, the relationships between urbanisation and development, the problems produced by urbanisation and urbanisation policies.

*assessment:* critique of 1,000 words and exam

**7149 Women's Health and Child Survival**

4 points semester 1 or 2

This subject is designed particularly for students with a professional background or specialised interest in the issues of women's health and child survival. The course will mainly comprise: (1) status of women's health in developing and developed countries and factors affecting them, giving particular attention to women's reproductive health, sexually transmitted diseases, and ante- and post-partum health care; and (2) child survival issues focussing on the Mosely-Chen framework for child survival analysis. Measurement and estimation of maternal, infant and child mortality will also be discussed.

**research**

**6874 Research Paper in Population and Human Resources**

8 points semester 1 or 2

A supervised research paper of 6000-8000 words on a specific topic in the field of population and human resources. The research task will involve a literature review and an evaluation of research materials and/or the analysis of a data set relating to a particular problem/issue associated with the chosen topic. The paper should be in a form suitable for publication in a journal.

*assessment:* research paper of 6000-8000 words to be examined by a member of staff other than the supervisor

**4193 Research Project (Population and Human Resources) F/T**

12 points semester 1 or 2

**1065 Research Project (Population and Human Resources P/T)**

12 points full year

A report on a research task of 12,000 to 15,000 words, written under the supervision of a member of staff with expertise in the field of study. The project will enable students to develop areas of interest relating to the theoretical and research literature in Population Studies and Human Resources. The research task may involve a literature review, a study of a particular problem through collection and evaluation of research materials and/or the analysis of a data set.

## Master of Arts (Public Affairs)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Arts (Public Affairs) shall

- (a) have qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University
- (b) have qualified for the Graduate Diploma in Public Affairs at a standard acceptable to the Department *or*
- (c) have qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters of full-time study or not more than six years of part-time study.

#### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, as follows:

#### 4.1 Core subjects

All candidates shall complete the following subjects:

1883 Approaches to Policy	6
1592 Australian Public Policy: The Challenge of Change	6

#### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points selected from the following:

2970 Social Analysis and Feminist Theory (4 pt)	4
7021 Cross Currents: Critical Public Issues (4 pt)	4
8982 Doing Right in Institutions (4 pt)	4
3603 Classics of State Theory (4 pt)	4
5361 Directed Study P/G (4 pt)	4
8974 Social Analysis and Feminist Theory (6 pt)	6
9629 Cross Currents: Critical Public Issues (6 pt)	6
9313 Doing Right in Institutions (6 pt)	6
1080 Classics of State Theory (6 pt)	6
3691 Directed Study P/G (6 pt)	6

#### 4.3 Dissertation

All candidates shall complete either the full-time or the part-time version of the following subject:

9426 Master of Arts (Public Affairs) Dissertation F/T	12
6221 Master of Arts (Public Affairs) Dissertation P/T	12

#### 5 Status, exemption and credit transfer

5.1 Except with the special permission of the Head of Department, no candidate will be granted status for any of the core subjects of the degree except candidates who have qualified for the Graduate Diploma in Public Affairs.

5.2 No candidate shall be granted status for subjects with a total value of more than 12 points, except candidates who have qualified for the Graduate Diploma in Public Affairs who may be granted up to 24 points of status (see 7.1 below).

5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

6.1 There shall be four classifications of pass in any subject for the Master of Arts (Public Affairs): Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## **7 Articulation with other awards**

7.1 A candidate who has been admitted to the Graduate Diploma in Public Affairs and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree.

7.2 A candidate for the degree of Master of Arts (Public Affairs) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

### compulsory core subjects

#### 1883 Approaches to Policy

6 points

semester 1

This subject provides a comprehensive introduction to divergent theories and methodologies of policy and policy making. Students will be encouraged to reflect upon the strengths and weaknesses of the following perspectives in the study of policy formation and analysis: the rational-comprehensive approach or 'technical rationalism'; politically rational models of policy making; public choice models of policy making; post-positivist approaches to policy.

A goal in the subject will be to encourage students to think about the different social roles and skills assumed on behalf of policy analysts in these several approaches, for example, analyst as expert, as functionary, as social critic, as political actor. Topics and themes to be covered will include empiricism, incrementalism, rational choice theory, value norms in policy making and policy as discourse.

*assessment:* seminar paper, major essay

#### 1592 Australian Public Policy: The Challenge of Change

6 points

semester 2

This subject examines the key recent debates on the institutions and processes of public policy formulation and the adequacy of policy administration and provision in Australia. Students will be introduced to the policy roles of the South Australian and Commonwealth public service in evolving institutional and political contexts. Attention will be paid to debates over public/private provision of services and the implications of recent changes for the future of Australia's constitutional and parliamentary structures. Leading executives and public servants will participate in seminar discussions.

*assessment:* seminar paper, major essay

### elective subjects

#### 3603 Classics of State Theory (4 pt)

4 points

semester 1

#### 1080 Classics of State Theory (6 pt)

6 points

semester 1

In this subject, students will learn about the critical moments in the development of the state and develop an understanding of the essential parameters of statecraft. Students will examine the greatest issues in the history of the state as well as the most historically influential analyses of those issues.

The subject will deal, both chronologically and thematically, with the following themes: idealist and realist understandings of statecraft; principles for the acquisition and retention of power; the preservation of order in a time of civil war; the idea of the balance of powers; the relationship between economic prosperity and liberal society; disputes over the idea of progress; the political rights of women; the development of the liberal democratic state; the multiform nature of modern liberal democratic constitutions; communist and fascist dictatorships; individual and social rights; the pros and cons of social justice.

*assessment:* seminar paper and major essay

#### 7021 Cross Currents: Critical Public Issues (4 pt)

4 points

semester 1

#### 9629 Cross Currents: Critical Public Issues (6 pt)

6 points

semester 1

This subject will examine strategies for identifying and evaluating critical global issues of the next century, including population, land use, food, energy and resources, global warming and global economic integration. Emphasis will be given to the global context of these issues and to the policy parameters which institutions, governments and corporations will face in coming decades.

*assessment:* seminar paper, major essay

#### 8982 Doing Right in Institutions (4 pt)

4 points

semester 2

#### 9313 Doing Right in Institutions (6 pt)

6 points

semester 2

Before 1990, it was rare to find a business with a code of ethics; now, it is rare to find one without a code (Farrel and Cobbin 1995). Universities, hospitals and research institutions have also established ethics committees. Talk-back radio, pronouncing on everything from genetic engineering to IVF, provides a popular forum for ethical debate and has the potential to impose the sanction of exposure. Where has this fascination with ethics come from? Why now? How does a secular, plural society arrive at common values and shared goals? What is a moral act, and how do we decide? Do we have moral obligations only as individuals, or does society have responsibilities of its own? And are our responsibilities limited to other humans, or do animals and the natural environment have a claim on us?

From workplace relations to sexuality, from the history of moral thought to contemporary debates, this subject will introduce you to the burgeoning field of 'applied ethics,' while allowing you room to concentrate on issues of particular interest or professional relevance to you.

*assessment:* seminar paper, major essay

**5361 Directed Study P/G (4 pt)**

4 points semester 1 or 2

**3691 Directed Study P/G (6 pt)**

6 points semester 1 or 2

*restriction:* only with permission of Course Convenor

This subject will allow candidates to pursue an independent project or area of investigation developed in collaboration with a supervisor.

*assessment:* seminar paper and major essay

**2970 Social Analysis and Feminist Theory (4 pt)**

4 points semester 2

**8974 Social Analysis and Feminist Theory (6 pt)**

6 points semester 2

The purpose of the subject is to introduce students to broad categories of applied feminist social analysis, with a specific focus on feminist theory in relation to public policy and social practice in all spheres of society. Attention will be given to liberal, radical and socialist streams of feminist thought, as well as new developments in feminist critique including postcolonial, materialist and postmodernist feminism. Students will be encouraged to reflect upon the ways in which these perspectives open up essentially political questions about the inter-related constraints of personal lives, economic roles and public policy.

*assessment:* seminar paper, major essay

**dissertation**

**9426 Master of Arts (Public Affairs) Dissertation F/T**

12 points semester 1 or 2  
*or*

**6221 Master of Arts (Public Affairs) Dissertation P/T**

12 points full year

All candidates shall satisfactorily complete the subject Dissertation MA (Public Affairs) which entails undertaking a research project and presentation of a dissertation of 15-20,000 words on a topic approved by the Course Coordinator. The Course Coordinator will appoint a supervisor(s) to guide the candidate's research.

# Master of Arts (Women's Studies)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

Students who commenced studies in the award of Master of Arts (Women's Studies) prior to 1998 should refer to the 1997 Calendar Volume II. Such students who wish to transfer to the new program should consult the department regarding any transition arrangements which may apply.

**Note:** some electives may be available through external study.

## Specific Course Rules

### 1 Admission requirements

**1.1** An applicant for admission to the course of study for the degree of Master of Arts (Women's Studies) shall

- (a) have qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University; or
- (b) have qualified for the Graduate Diploma in Women's Studies with a pass at credit level or higher in 6881 Contemporary Approaches to Feminist Research (or prior to 1998, a pass at credit level or higher in the Research Project).

### 2 Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters (one and a half years) of full-time or the equivalent of part-time study.

### 3 Approval of course of study

**3.1** Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, as follows:

#### 4.1 Core subjects

All students shall satisfactorily complete the following subjects:

- 6881 Contemporary Approaches to Feminist Research 6
- 5528 Theories of Feminism 6

**4.1.1** Candidates who did not complete 6881 Contemporary Approaches to Feminist Research as part of the Graduate Diploma in Women's Studies will be required to complete that subject

as part of the Master's program and achieve a result of Credit or higher prior to enrolling for the dissertation (see 4.3 below).

### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 12 points selected from the following:

- 9410 Australian Feminist History: A Survey 6
- 3612 Autobiographical Writings 6
- 4434 Exploring Sexualities 6
- 3919 Gender in a Post Colonial World IV 6
- 2649 Gender, Environment, Development (Women's Studies) 6
- 2360 Gender Relations and Social Policy 6
- 4588 Popular Culture, Film and Representation (PG) 6
- 5756 Power and Difference: Post Colonial Perspectives PG 6
- 3326 Twentieth Century Women Writers 6
- 3045 Women, Work and Economics 6
- 9008 Women's Studies Special Topic 6

Graduate level subject offered in Women's Studies at the Flinders University of South Australia also may be included.

### 4.3 Dissertation

All candidates shall complete either the full-time or the part-time version of the following subject:

- 4493 Dissertation in Women's Studies F/T 12
- 4817 Dissertation in Women's Studies P/T 12

### 5 Status, exemption and credit transfer

**5.1** Except with the special permission of the Head of Department, no candidate will be granted status for any of the core subjects of the degree except candidates who have qualified for the Graduate Diploma in Women's Studies.

- 5.2 No candidate shall be granted status for subjects with a total value of more than 12 points, except candidates who have qualified for the Graduate Diploma in Women's Studies who may be granted up to 24 points of status (see 7.1 below).
- 5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.
- 5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

## **6 Assessment and examinations**

- 6.1 There shall be four classifications of pass in any subject for the Master of Arts (Women's Studies): Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

## **7 Articulation with other awards**

- 7.1 A candidate who has been admitted to the Graduate Diploma in Women's Studies and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree of Master of Arts (Women's Studies).
- 7.2 A candidate for the degree of Master of Arts (Women's Studies) who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma).

## Syllabuses

### core subjects

#### 6881 Contemporary Approaches to Feminist Research

6 points semester 1

Note: Students in the Graduate Diploma in Women's Studies intending to apply for the Master of Arts (Women's Studies) must complete this subject at credit level or higher. Students who do not intend to apply for entry to the Master of Arts (Women's Studies) may substitute an elective for this subject if they wish

Students will become familiar with a range of methods and procedures employed in current feminist research and acquire the knowledge and skills required to initiate a successful research project. They will consider arguments for and against a specifically feminist methodology, examine the relations between feminist theory and feminist research, investigate the uses of qualitative and quantitative models, and consider philosophical, ethical and ideological assumptions underlying various modes of research.

*assessment:* 1500 word annotated bibliography, 1500 word, 3000 word critical review essays, 1500 word dissertation proposal

#### 5528 Theories of Feminism

6 points semester 1

3 hours per week

*restriction:* 1780 History of Feminist Thought, 6359 Feminist Theory, 9904 Feminist Thought III

This subject introduces students to a range of feminist positions. Topics include: mainstream views of women's social position; Liberal feminism; Marxist feminism; Radical feminism; Socialist feminism; Psychoanalysis and feminism; Post-modernism/post-structuralism and the significance of race within feminism, amongst others.

*assessment:* internal: 4500 word essay 60%, 2500 word seminar paper 30%, participation 10%; external: workbook/journal 50%, 4500 word essay 50%

### elective subjects

#### 9410 Australian Feminist History: A Survey

6 points semester 1

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 9959/2345 Gender Divisions in Some Western Societies Since 1700 II/III, 1489 History IIIB (Women in History)

A survey of Australian feminist history set in a context of recent debates in feminist history. Topics include Aboriginal women, the historiography of the women

convicts, pioneer women, women's separate sphere, first-wave feminism, sexuality, the birth rate, women's paid and unpaid work, the depression and the world wars.

*assessment:* internal: 4000 word essay or oral history project, 1500 word seminar paper/research, seminar presentation and participation; external: workbook and journal 50%, 4000 word major essay 50%

#### 3612 Autobiographical Writings

6 points semester 2

also offered externally

3 hours per week

*restriction:* 7116/6566 Autobiography and Creative Writing

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

In this subject students will read autobiographies and autobiographical fiction written by women from various cultures and career backgrounds and explore the similarities and differences of life experiences. The subject will explore current feminist, postcolonial, poststructuralist and deconstructive narrative theories of self-presentation in relation to the autobiographical text. Students will also engage in creative writing activities.

*assessment:* seminar paper, projects equivalent to 8000 words

#### 5133 Environmental Feminism

6 points not offered in 1999

3 hours lectures/seminars/ tutorials a week

This subject explores the interface between environmental studies and women's studies. In particular, the subject is concerned with the development of environmental feminism as a theoretical discourse and a political practice. Introductory sessions examine Western concepts of the society/environment relation from a range of feminist perspectives (liberal, Marxist, socialist, radical and ecofeminist). This introduction is followed by a series of sessions dealing with feminist theory and practice relevant to the analysis of women's environmental perception, behaviour and agency. The theme of these sessions is 'many women, many environments'. In the context of 'many women' they deal with the effects of class, ethnicity, sexuality and ableness on women's environmental relations. In the contact of 'many environments', they explore women's environmental relations in situations ranging from Western cities and suburbs to the dwindling pockets of tropical rainforest in the Third World. The concluding sessions of the

subject consider feminist critiques of science and technology, particularly as these critiques relate to the scientific production of environmentally damaging scientific modelling and managerial techniques to understand and control the environment.

assessment: to be advised

#### 4434 Exploring Sexualities

6 points semester 1  
also offered externally

3 hours per week

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 6873/9996 Female Sexuality

In this subject, students will examine the cultural factors which have influenced the construction of sexualities in western society, past and present; explore contemporary theoretical perspectives from semiotics, psychoanalysis, cultural and queer theory, and French theory as they theorise sexuality, subjectivity and the body; and consider how feminine positions are maintained and challenged in culture through the dynamics of female desire.

*assessment:* 4000 word research paper; journal, 2 x 1500 word journal progress reports; 2000 word paper

#### 3919 Gender in a Post Colonial World IV

6 points semester 2

The subject examines theories and issues of western feminism from the perspective of the 'other', from women writing beyond the English-speaking west, including Asia, Africa, South America and fourth world peoples and non-English speaking background immigrants in western nations. While the subject explores the experiences of women in other cultures, the focus will be on how we think western feminist issues differently when they are viewed from beyond Anglo-feminist frameworks.

*assessment:* major and minor essays, reports, oral presentations up to 9000 words

#### 2649 Gender, Environment and Development (Women's Studies)

6 points semester 1

Since the late 1980s the connection between gender, environment and development (GED) has emerged as an area of special interest for academics, policy makers and activists. GED is now a focus of international research in both Gender Studies and Environmental Studies, has entered the rhetoric of policy makers at the highest international levels and has generated an international NGO network. This subject will explore

the theoretical and political implications of linking gender, environment and development by analysing current global GED issues and selected examples of local GED issues in the Australasian region.

*assessment:* tutorial participation 10%; tutorial presentations/exercises 30%; essays/reports totalling 6000 words 60%

#### 2360 Gender Relations and Social Policy

6 points not offered in 1999

3 hours per week

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 8382 Women and Policy III; 1102/1260 Women and Social Policy

This subject examines the role of the state and social policies in Australia in order to investigate the ways in which they structure and maintain gender roles. Policies such as those emanating from government and unions, for example, and power relationships between makers, deliverers and recipients of policies will be considered. Topics include law, welfare, housing, economic policy, etc.

*assessment:* internal: 2000 word seminar paper 30%, participation 10%, 4000 word essay/project 60%; external: 3500 word journal 40%, 4,000 word essay/project 60%

#### 4588 Popular Culture, Film and Representation

6 points semester 1

3 hours per week

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 4700/9670 Women and the Media II/III or 6193/6182 Women and Popular Culture.

Students will examine a variety of approaches to popular culture and analyse the constructions of masculinity and femininity the popular media. The focus will be on visual media, particularly on film and film theory, although it may also include an analysis of newspapers, advertisements, women's magazines, romance fiction and the like. The subject will consider contemporary debates concerning the production and consumption of popular culture, the significance of spectator positions, and the dynamic of pleasure and desire in the maintenance of gender representations in the media.

*assessment:* 1500 word applied analysis 20%; 4000 word project/research paper 60%; 1000 word seminar presentation paper 20%

**5756 Power and Difference: Postcolonial Perspectives PG**

6 points not offered in 1999

3 hours per week

*restrictions:* 3708/9279 Power and Difference

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

Students will consider feminist, postmodern and postcolonial perspectives on constructions of race, class and gender differences with specific (but not exclusive) reference to Australian culture (19th and 20th century). With reference to the work of postcolonial, French feminist, psychoanalytic, Foucauldian and deconstructive critics students will examine the role of high and mass cultural materials (novels and art forms, histories, journalism, traveller's tales, the tabloid press, film, cartoons, photography, newspapers and the like) in constructing networks of knowledge and power through representations of difference/marginality. The subject will examine the possibilities for maintaining and resisting dominant power relations in the operations of language, social institutions and everyday life experiences. It will also consider reading and viewing practices to understand how readers are positioned by texts and how to read 'otherwise'.

*assessment:* 1500 word applied analysis 20%; 1000 word seminar presentation/paper 20%; 4000 word project research paper 60%

**3326 Twentieth Century Women Writers**

6 points not offered in 1999

3 hours per week

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 1549/5687 Women's Writing the Nineteenth Century II/III; 6312/4617 Women Writers and the Literary Tradition

In this subject, students will study representative female novelists, poets and prose writers of the nineteenth and twentieth centuries in terms of historical and social backgrounds, the texts themselves and their critical reputations. Students will also examine feminist critical theories of writing and difference, modernist and post-modernist understanding of identity, subjectivity, the author and author function in criticism, and French feminist perspectives on *écriture féminine*.

*assessment:* 4000 word research paper; 3 critical applications of 1,000 words each

**3045 Women, Work and Economics**

6 points semester 2  
external mode only

3 hours per week

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

*restriction:* 3465/6750 Women and Labour; 1846/7692 Women and Work

This subject examines competing definitions of work in relation to women in the light of theoretical approaches ranging from neo-classical to post-modern. Special attention will be given to contemporary debates, eg on the public/private split, on difference and on sexuality at work, and to 'race'/ethnicity which cuts across class and gender structures. Students are able to investigate the effects of government policies on the sexual divisions of labour. This can include policies in the Australian context regarding equal employment opportunity, equal pay, taxation, child care, award restructuring and enterprise bargaining, which may be compared and contrasted with experiences in other countries. Women's work will be placed within the wider context of economic and social change in Australia, and of global economic restructuring.

*assessment:* internal: tutorial presentation and participation, 2000 word seminar paper, 4000 word research essay/project; external: journal exercises; 4000 word essay/project.

**9008 Women's Studies: Special Topic**

6 points semester 1 or 2

*prerequisites:* 5528 Theories of Feminism or permission of Head of Department

The content will be decided by the availability of specialist scholars, visiting research fellows etc., the department will set up the special seminar accordingly, depending on the expertise and specialisation in the area of women's studies.

*assessment:* 1500 word applied analysis 20%; 1000 word seminar presentation paper 20%; 4000 word project research paper 60%

Note :graduate level subjects offered in Women's Studies at Flinders University may also be presented as electives in this degree. Contact department for details.

**dissertation**

**4493 Dissertation In Women's Studies F/T**

12 points semester 1 or 2

**4817 Dissertation in Women's Studies P/T**

12 points full year

An original piece of research on a topic developed in consultation with supervisor

assessment: dissertation of 15000-18000 words

# Master of Cognitive Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Master of Cognitive Science degree must have qualified for an Honours degree from the University at First Class or IIA standard in the field of Cognitive Science or other appropriate field of study in Departments of the Faculty of Arts or the Faculty of Mathematical and Computer Sciences, or the Graduate Diploma in Cognitive Science, or other qualification accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.

### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department Philosophy, no student may gain status towards the Thesis component of the course for other studies undertaken in the University or other institutions.
- 2.2 Students of the Masters degree who have successfully completed the Graduate Diploma in Cognitive Science will be awarded status for any subjects completed in the Graduate Diploma of Cognitive Science which form part of the requirements of Rule 6.1, below. Students who apply for and are granted status to the value of 18 or more points for their Graduate Diploma studies under this provision will be required to surrender their Graduate Diploma before being admitted to the Masters degree (see 9.2, below).

### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

### 4 Duration of the Award

To qualify for the degree a student shall satisfactorily complete a course of one and one-half years of full-time study or not more than six years of part-time study.

### 5 Qualification requirements

To qualify for for the degree of Master of Cognitive Science candidates shall complete a program of study to a total of 36 points as outlined in Rule 6 below.

### 6 Course of study/Subjects of study

All students shall satisfactorily complete the following two parts:

#### 6.1 Coursework Subjects

All students shall satisfactorily complete 24 points of coursework subjects as follows:

##### 6.1.1 Core Subjects

All students shall complete the following two subjects:

3275 Cognitive Science: Minds, Brains and Computers IV	4
1207 Advanced Cognitive Science IV	4

(Students who are exempted from studying the subject 1207 Cognitive Science: Minds, Brains and Computers IV due to having previously completed either 8606 Cognitive Science: Minds, Brains and Computers II or 5086 Cognitive Science: Minds, Brains and Computers III or its equivalent will be required to present a further 4 point elective subject listed in 6.1.2 in lieu of this requirement.)

##### 6.1.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 16 points chosen from the following six groups of subjects, with no more than 8 points of subjects being presented from any one group:

#### Group A Philosophy Subjects

8733 Reality, Truth and Meaning	4
6655 Mental Representation, Consciousness and Self IV	4
3390 Logic IV	4

#### Group B Psychology Subjects

4308 Intelligence IV	2
5296 Neuroscience in Psychology IV	2
2960 Philosophy and Psychology of Consciousness IV	2
8299 Social Psychology IV	2

<b>Group C Computer Science Subjects</b>	
8352 Artificial Intelligence IV	2
1777 Knowledge Representation IV	2
2340 Advanced Artificial Intelligence IV A (Computer Vision)	2
5042 Advanced Artificial Intelligence IV B (Machine Learning)	2

<b>Group D Linguistics Subjects</b>	
4594 Foundations of Linguistic Theory IV	4
3355 Language, Cognition and Reality IV	6

<b>Group E Histology and Anatomy Subjects</b>	
2967 Integrative and Comparative Neuroanatomy (CS) IV	4

<b>Group F Physiology Subjects</b>	
3155 Neurobiology IV	2

The availability of some of the above elective subjects varies from year to year. Students should contact the relevant department(s) for information about subject availability over the projected period of their study program.

Many of these elective subjects have had their normal prerequisites waived for the purposes of this graduate program in Cognitive Science. However, students enrolling in these subjects are expected to do sufficient background reading to attain a basic understanding of the subject area. Prospective students should contact subject coordinators for information about appropriate background reading.

## 6.2 Dissertation

All students shall complete:

2042 Dissertation in Cognitive Science F/T	12
<i>or</i>	
5778 Dissertation in Cognitive Science P/T	12

## 7 Academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

## 8 Assessment and examinations

8.1 There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 9 Articulation with other awards

9.1 Students who complete the Graduate Diploma in Cognitive Science at credit level or higher are eligible to apply for the Master of Cognitive Science course, and if successful, on gaining entry, receive status for the work they have undertaken in the Graduate Diploma.

9.2 Students who have conferred upon them the award of Graduate Diploma in Cognitive Science who subsequently successfully complete the requirements of the Master of Cognitive Science and who have been granted 18 or more points of status on behalf of their Graduate Diploma must surrender their first award before being admitted to the degree of Master of Cognitive Science.

9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Cognitive Science and who has completed the work prescribed for the Graduate Diploma in Cognitive Science and who has not been awarded the Masters degree shall, on written application to the Faculty, be awarded the Graduate Diploma.

## Syllabuses

### core subjects

#### 1207 Cognitive Science: Minds, Brains and Computers IV

4 points semester 1

2 lectures, 1 hour tutorial a week

*restrictions:* 8606/5086 Cognitive Science: Minds Brains and Computer II/III

This subject provides an introduction to the philosophical foundations of Cognitive Science, which is a relatively new interdisciplinary field of study that embraces aspects of philosophy, psychology, computer science and neuroscience. Topics to be discussed will include some of the following: the nature of commonsense psychology and its relevance to a mature theory of mind; the computer as a model of the mind; classical and connectionist computational theories of cognition; computational models of consciousness.

*assessment:* essays, tutorial participation

#### 3275 Advanced Cognitive Science IV

4 points semester 2

2 lectures a week

*prerequisites:* 8606 Cognitive Science: Minds, Brains and Computers II, 5086 Cognitive Science: Minds, Brains and Computers III or 1207 Cognitive Science: Minds, Brains and Computers IV, and 8 points of elective subjects

This subject builds on the material presented in 1207 Cognitive Science: Minds, Brains and Computers IV. The subject will be particularly concerned with classical and connectionist computational models of cognition

*assessment:* essays

### elective subjects

#### Group A Philosophy Subjects

##### 6655 Mental Representation, Consciousness and Self IV

4 points not offered in 1999

2 lectures, 1 tutorial a week

*restrictions:* 1938/3679 Issues in the Contemporary Philosophy of Mind or Mental Representation, Consciousness and Self II/III

In spite of the huge advances made in other areas of natural science, much about the human mind remains mysterious. In particular, there are three outstanding problems concerning the mind and its relationship to the world that have yet to be resolved - how does the

mind construct mental representations of the world, and in so doing impose meaning on a material universe? what is the nature of consciousness and how can it be naturalistically explained? what is the nature of the self and how is it constructed by the human brain? This subject will examine each of these questions and survey the most promising answers put forward by contemporary philosophers of mind.

*assessment:* essay, tutorial participation

#### 3390 Logic IV

4 points semester 1

2 lectures, 1 tutorial a week

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

*restrictions:* 9286 Logic II, 4259 Logic IIIA, 3037 Logic II

Standard first-order logic and its meta-theory, topics from the philosophy of logic.

*assessment:* exam, essay - attendance at lectures and tutorials is required

#### 8733 Reality, Truth and Meaning IV

4 points semester 2

2 lectures, 1 tutorial per week

*restrictions:* 4549/2915 Issues in the Philosophy of Language or Reality Truth and Meaning II/III

This subject will examine the interrelated issues of truth, reference and meaning from a primarily analytical perspective. Key concepts will include truth-conditions, realism and naturalism. It will also devote some time to comparative critical discussion of rival structuralist and hermeneutical approaches to language and meaning.

*assessment:* 2500 word essay, take home exam, tutorial participation.

#### Group B Psychology Subjects

##### 4308 Intelligence IV

2 points semester 2

1 lecture per week; 4 tutorials, practical work

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

*restrictions:* 1508 Intelligence, prior to 1989, 7196 Intelligence III

This subject reviews recent cognitive analytical approaches to the study of individual differences in

intelligence, comparing the psychometric paradigm with various information processing models. Particular emphasis is given to the consequences of mental retardation, brain damage, and ageing for intellectual functioning.

*assessment:* final exam; report of a practical exercise

### 5296 Neuroscience in Psychology IV

2 points semester 2

1 lecture per week; 4 tutorials, practical work

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

*restrictions:* 8743 Physiological Psychology prior to 1989, 4770 Neuroscience in Psychology III

This subject seeks to expose further some of the difficulties of understanding Psychology in brain terms, and to develop an impression of what, in principle, can be achieved by an interchange of ideas between the two disciplines, Psychology and Neuroscience: examining, on the one hand, emotion as a representative psychological construct, and on the other, what can be understood of the brain's functional organisation.

The subject consists, essentially, of three principal components: theoretical contemplations of the 'structure' of emotion, and its functional relevance in psychological explanation; research approaches in its various aspects; and the implications of physiological perspectives in a consideration of emotion.

*assessment:* final exam, report of a practical exercise

### 8299 Social Psychology IV

2 points semester 1

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

*restrictions:* 6423 Social Psychology and Intergroup Relations III, 4553 Cognition and Affect in Social Relationships III, 8659 Social Psychology and Intergroup Relations II, 8659 Social Psychology III

An expanding body of research in contemporary social psychology has been the study of social cognition. This tradition concerns itself with the way in which individuals and groups attend to, process, interpret, mentally represent and understand complex social information. While this field borrows models and concepts from cognitive psychology, the study of social objects is markedly different from the study of non-social objects. The acquisition and processing of social knowledge requires the consideration of a range of affective, social, cultural and symbolic influences. Concepts predominant within social cognition research

include attribution theory and the concepts of schema, script and prototype. These will be considered along with less mainstream approaches, such as the French tradition of research in social representations theory. A practical exercise will be conducted to illustrate some of the processes central to the study of social cognition.

*assessment:* final exam; report of practical exercise

### 2960 Philosophy and Psychology of Consciousness IV

2 points semester 1

1 lecture per week; 4 tutorials, practical work

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

*restrictions:* 1967- The Philosophy and Psychology of Consciousness; prior to 1989 - 5673 Philosophy and Psychology of Consciousness III

This subject examines the place in Psychology of the phenomena associated with such terms as 'consciousness', 'awareness' and 'experience'. Lectures and tutorials deal with the place of these types of concept in an overall scientific program, considering relevant issues at levels ranging from the philosophical to the physiological. Specific topics covered include the mind-body problem, the feasibility of a reductionist approach, the place of phenomenology and existentialism, and the suggestions of physiologists on the nature of the mechanisms that might underlie consciousness.

*assessment:* final exam; report of a practical exercise

### Group C Computer Science Subjects

#### 8352 Artificial Intelligence IV

2 points semester 1

2 lectures, 2 hours practical work a week; tutorial every 3 weeks

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

*restrictions:* 6378 Artificial Intelligence III

AI methodology and fundamentals; description matching and goal-reduction; ANALOGY; and/or trees; exploiting natural constraints: Waltz algorithm; search: hill-climbing, beam, best-first, A\*; minimax procedure and alpha-beta pruning for game-playing; learning: parameter-adjustment and Winston near-miss/reinforcement procedure; means-end analysis and GPS; rule-based systems: forward- and backward-chaining, MYCIN, Xcon; generate and test paradigm with Dendral. Representation issues: inheritance, demons, defaults, perspectives, frames, primitives;

aspects of Prolog; neural networks: recurrent backpropagation technique.

assessment: 2 hour exam, practicals and exercises

### 1777 Knowledge Representation IV

2 points not available in 1999

2 lectures, 2 hours practical work per week; tutorial every 3 weeks

*prerequisites:* 6378 Artificial Intelligence III or 8352 Artificial Intelligence IV

*restrictions:* 3007 Knowledge Representation III

Issues in knowledge representation, the frame problem, the qualification problem, predicate logic as knowledge representation, the closed world assumption, inheritance hierarchies, theorem proving, resolution, natural deduction, logic programming, introduction to nonmonotonic reasoning, logics for nonmonotonic reasoning, statistical reasoning, Bayes' theorem, Bayesian Networks, Dempster-Shafer Theory, fuzzy logic.

*assessment:* 2 hour exam, practicals and exercises

### 2340 Advanced Artificial Intelligence IVA (Comp. Vision)

2 points semester 1 or 2

*assumed knowledge:* First year, and preferably, second year mathematics

*restrictions:* 5689 Advanced Artificial Intelligence A (Computer Vision)

This subject aims to convey the nature and difficulty of many of the problems in vision, and to explain a variety of techniques to overcome them. Emphasis is placed on aspects of 3-D vision and the gaining of practical experience in image-processing via a TV-camera facility. Various models of vision are considered, primarily those in the early phase of processing. These models include: the detection of contrast edges in intensity image arrays and the accumulation of edge data to form lines; the use of a stereo image pair to derive depth information; the exploitation of image shading (or intensity variation) to obtain surface normal data; motion detection in time-varying imagery; lightness computation; Marr's theory as a framework for visual information processing; generalised cylinders and their role in the recognition of objects depicted in images; scene analysis and the interpretation of line-drawings of polyhedra.

*assessment:* practical assignments

### 5042 Advanced Artificial Intelligence IVB (Machine Learning)

2 points semester 1 or 2

*prerequisite:* 6378 Artificial Intelligence III OR 8352 Artificial Intelligence IV

*restrictions:* 2651 Advanced Artificial Intelligence B (Advanced Artificial Intelligence and Machine Learning)

This subject concentrates on various issues involving AI and machine learning. In particular we examine inductive learning - learning from examples, explanation based learning; abduction, genetic algorithms and classifier systems; program synthesis. Other issues covered include: conceptual structures, abduction, natural language and dialogue management and computational design.

*assessment:* practical assignments, term paper, exam

### Group D Linguistics Subjects

#### 4594 Foundations of Linguistic Theory IV

4 points semester 1

2 lectures a week, 1 tutorial a fortnight

*restrictions:* 7892/4914 Foundations of Linguistics II/III

No previous knowledge of linguistics is assumed. The subject will give students an overview of the field of modern linguistics and basic skills in linguistics and sociolinguistic analysis

*assessment:* practical exercises, project or essay, exam

#### 3355 Language, Cognition and Reality IV

6 points semester 2

1 lecture, 1 tutorial a week

*restrictions:* 8262 Language, Cognition and Reality

This subject is concerned with the role the lexical and grammatical structures of languages play in shaping their users' perceptions of reality. It will begin with the classical Sapir-Whorf hypothesis of linguistic relativity and consider more recent findings in the area of categorisation, environmental discourse and political rhetoric. Particular attention will be paid to the role of linguistic and conceptual diversity in the 21st century.

*assessment:* essay, tutorial presentation and exam

**Group E Histology and Anatomy Subjects**

**2967 Integrative and Comparative Neuroanatomy (CS) IV**

4 points semester 1

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

See 4231 Integrative and Comparative Neuroanatomy IV in the Faculty of Medicine for syllabus details

**Group F Physiology Subjects**

**3155 Neurobiology IV**

2 points semester 2

2 lectures a week

*restrictions:* 4632 Neurobiology III, 8546 Neurobiology, 7117 Human Movement Studies III

*assumed knowledge:* basic understanding of subject area through background reading - prospective students should contact course coordinator for information

This subject will acquaint students with current views on the function of the nervous system, and the methods used for investigating its function. Particular attention will be paid to the role of sensory systems in the control of movements.

*assessment:* final written exam

**dissertation**

**2042 Dissertation in Cognitive Science F/T**

12 points semester 1 or 2

**5778 Dissertation in Cognitive Science P/T**

12 points full year

A dissertation of 15-18000 words.

## Master of Education

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the degree of Master of Education shall:

(a) have qualified for at least a Class II honours degree of the University or of another University accepted for the purpose by the University, and have qualified for the Graduate Diploma in Education of the University or for a qualification accepted by the University as equivalent *or*

(b) have qualified for the degree of Master of Educational Studies of the University.

1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions or preliminary work (if any) as it may see fit to impose in each case, accept as a student for the Master's degree a person who does not hold the above qualifications but has given evidence satisfactory to the Faculty of fitness to undertake work for the master's degree.

#### 2 Status, exemption and credit transfer

2.1 With the permission of the Head of the Department of Education, students may be granted up to a maximum of six points worth of coursework status for other studies undertaken in the University or other institutions.

#### 3 Approval of course of study at enrolment

3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

4.1 Except with the special permission of the Faculty, the Coursework/Research Induction component of the Masters degree shall be completed in one semester of full-time study or not more than three semesters of part-time study.

4.2 Except with the special permission of the Faculty, the Research component of the Masters degree shall be completed in not less than one year of full-time study or not more than three years of part-time study.

#### 5 Qualification requirements

5.1 All students shall satisfactorily complete a coursework component to the value of six points, a research methodology subject, and a thesis.

#### 6 Course of study/Subjects of study

All students shall satisfactorily complete:

##### 6.1 Coursework subjects

Students shall take six points of coursework from coursework subjects, and one of the research methodology subjects listed for the degree of Master of Educational Studies.

##### 6.2 Thesis

All students shall carry out research work and present a satisfactory thesis on a subject approved by the Faculty. The Faculty shall appoint a supervisor or supervisors to guide the student.

#### 7 Review of academic progress

7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the Department of Education as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

#### 8 Assessment and examinations

8.1 There shall be four classifications of pass at the final examination in any coursework subject: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

- 8.2 On completion of work the student shall lodge with the Registrar three copies of the thesis prepared in accordance with directions given to students from time to time.
- 8.3 The Department shall appoint at least two examiners of the thesis, of whom at least one shall be an external examiner.
- 8.4 At the discretion of the examiners a student may be examined orally on the student's thesis and may also be required to pass a written examination connected with the subject of the thesis.
- 8.5 The examiners may recommend:
- (a) that the thesis be accepted as satisfactory for the purposes of 5 above *or*
  - (b) that the thesis be accepted as satisfactory for the purposes of 5 above after minor amendments have been made to the thesis *or*
  - (c) that the thesis be returned to the student for revision and resubmission *or*
  - (d) that the thesis be not accepted.

## 9 Articulation with other awards

- 9.1 A student who holds the degree of Master of Educational Studies of The University of Adelaide and is granted 12 points of status shall surrender that degree before being admitted to the degree of Master of Education.

## Syllabuses

---

### Course requirements

Subjects for this degree usually take the form of weekly two-hour seminars. Reading lists for each subject will be given in the Departmental Handbook.

### Assessment

Assessment in each subject usually includes a combination of three or more of the following: seminar papers, seminar participation, essays, minor research project, book reviews and an examination.

See Master of Educational Studies for syllabus details

## Master of Educational Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

The Master of Educational Studies award aims to provide practising teachers with the opportunity to pursue advanced studies in education and to learn about educational research related to their interests and professional contexts.

Students who commenced studies in the award of Master of Educational Studies prior to 1999 should consult the Graduate School of Education regarding appropriate transition arrangements.

### Specific Course Rules

#### 1 Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Educational Studies shall:

- (a) have qualified for a degree of the University, or for a degree of another institution accepted for the purpose by the University and have qualified for a Graduate Diploma in Education of the University or for an award accepted by the University as equivalent
- (b) have qualified for the Bachelor of Educational Studies of the University or a Bachelor of Education of another institution accepted for the purpose by the University;

1.2 The Faculty may, subject to such conditions as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

#### 2 Duration of course

2.1 To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters of full-time study or the equivalent of part-time study.

#### 3 Approval of course of study

3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, as follows:

#### 4.1 Research Methodology subjects

All candidates shall complete one of the following research methodology subjects:

5537 Evaluation in Education (6 pt)	6
9619 Introduction to Statistics in Educational Research (6 pt)	6
4298 Qualitative Approaches to Educational Research (6 pt)	6
8977 Quantitative Educational Research (6 pt)	6

#### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of 18 points selected from the following:

##### Educational Issues

4599 Adult Psychology and Education (6 pt)	6
2269 Advanced English Language for Academic and Educational Purposes	6
3213 Approaches to Understanding Learning at University	6
1900 Counselling in Education (6 pt)	6
8296 Education in Multilingual Settings (6 pt)	6
7481 English Language Teaching in Specific Settings	6
8947 Families, Schools and Students' Outcomes (6 pt)	6
5274 Gender, Education and Social Change (6 pt)	6
7269 Learning and Teaching at University	6
3417 Multicultural Society and Educational Policy (6 pt)	6
1688 Religion, Education and Social Change (6 pt)	6
8963 Schools as Cultural Systems (6 pt)	6
7884 Scientific Revolutions and Education (6 pt)	6
6224 Theories of Psychology in Education (6 pt)	6

**Curriculum Studies**

9422 Issues for Australians (6 pt)	6
6540 Teaching the Australian Studies Curriculum (6 pt)	6
7823 Honours Mathematics (Education) 12 pt	12
5841 Making Sense of the Scientific World (6 pt)	6
5165 Mathematics Education (6 pt)	6
7421 The Nature of Science and Science Curricula (6 pt)	6

**General Studies**

3691 Directed Study (6 pt)	6
----------------------------	---

*and*

Approved subjects listed for any relevant coursework Masters program. Advice on appropriate options is available from the Graduate School of Education.

**Transition Subjects**

5361 Directed Study (4 pt)	4
4655 Directed Study (2 pt)	2

**4.3 Research Project**

All candidates shall complete the following:

3156 Education Research Project F/T	12
<i>or</i>	
3777 Education Research Project P/T	12
<i>or</i>	
7394 Education Research Project M/Y	12
<i>or</i>	
4175 Education Minor Project	6

*and*  
one additional elective from 4.2 above

**5 Status, exemption and credit transfer**

**5.1** Except with the special permission of the Head of Department, no candidate will be granted status for any of the research methodology subjects of the degree.

**5.2** No candidate shall be granted status for subjects with a total value of more than 12 points on account of subjects presented for any other award, except the Bachelor of Educational Studies where up to 18 points on account of education subjects may be awarded.

**5.3** No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

**5.4** A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned.

**6 Assessment and examinations**

**6.1** There shall be four classifications of pass at the final examination in any subject for the Graduate Diploma; Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

**6.2** (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

**6.3** A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed

**7 Articulation with other awards**

**7.1** A candidate who has been admitted to the Bachelor of Educational Studies and who has been granted status toward the degree for subjects presented for the Bachelor of Educational Studies to a value of 12 or more points must surrender the Bachelor of Educational Studies before being admitted to the degree.

**7.2** A candidate for the degree of Master of Educational Studies who does not complete the requirements of the degree may be admitted to the Bachelor of Educational Studies.

## Syllabuses

---

### **4599 Adult Psychology and Education (6 pt)**

6 points not offered in 1999

2 hours of seminars a week

An introduction to the concepts of life-span developmental psychology with the emphasis on the implications for adult educators.

*assessment:* essay, seminar paper, reviews

### **2269 Advanced English Language for Academic and Educational Purposes**

6 points not offered in 1999

The aim of this subject is to extend students' own command of English Language as it is used in academic and educational inter-cultural communication contexts. Principles of register and genre will be employed to involve students in the grammatical, textual and contextual aspects of using English for academic and professional education purposes

### **3213 Approaches to Understanding Learning at University**

6 points not offered in 1999

The subject is designed for students who are teaching or intend to teach at university. It focuses on different approaches to the study of learning and motivation in undergraduate and postgraduate contexts. Participants will discuss quantitative and qualitative approaches to research and the different models of student learning developed in these paradigms. The subject will include the discussion of the impact on student learning of current issues in higher education including internationalisation, student diversity and information technology.

*assessment:* project or teaching portfolio totalling 8000-9000 words

### **1900 Counselling in Education (6 pt)**

6 points semester 2

subject to availability of staff

2 hours per week

This unit will not constitute professional preparation for school counsellors, but is intended for teachers who have undertaken, or are likely to undertake, administrative or pastoral roles which involve counselling. It will include an introduction to counselling theory, an examination of organisational structures in education, family dynamics, the roles of designated school counsellors and some common psychological and social problems relevant to school children (e.g. Attention Deficit Disorder and other

learning and development difficulties, child abuse, domestic and school violence, drug and alcohol abuse).

*assessment:* c.4000 word paper - aspect of counselling in schools 50%; counselling skills practical 50%

### **3691 Directed Study P/G (6 pt)**

6 points semester 1 or 2

2 hours per week

*restriction:* with permission of Head of Department

This subject will allow candidates to pursue an independent project or area of investigation developed in collaboration with a supervisor.

*assessment:* essay/s to a total of 8000 words

### **8296 Education in Multilingual Settings (6 pt)**

6 points not offered in 1999

2 hours a week

The subject will consider basic concepts from the sociology of language in the work of scholars such as Haugen and Fishman. Attention will be focused on recent studies of bilingualism and biliteracy within their regional contexts, with special reference to the 'lesser used' languages of Europe, Asia, North America and the USSR. Scholars whose research will be considered include Lambert, Giles, Clyne, Cummins, Skutnabb-Kangas, Paulston and Andersson. Emphasis will be placed on the role of the school in helping to maintain and/or acquire bilingualism and early biliteracy, especially through Australian educational systems.

*assessment:* 2 x 4000 word essays; seminar paper

### **7481 English Language Teaching in Specific Settings**

6 points semester 1

The subject will explore the contemporary TESOL methods in the light of their application within a specific setting selected by the student. Current approaches to the analysis of spoken and written text will be used as the basis for developing an English Language teaching program to suit each student's professional context.

### **5537 Evaluation in Education (6 pt)**

6 points semester 1

2 hours per week

The aim of this subject is to enable students to gain an understanding of current theories and practices for evaluation in education. It will provide opportunities

for students to: analyse critically the political and economic demands for accountability and evaluation; consider current approaches to evaluation; use procedures for design, data collection, analysis, recording and reporting of evaluations and assessments; develop an appropriate model for the evaluation of a school, a program, students or teachers depending on their particular background or interests; examine current issues such as quality assurance, student assessment, teacher appraisal, school review.

assessment: 2 assignments of 2000, 1 x 4000 words

### 8947 Families, Schools and Students' Outcomes (6 pt)

6 points semester 1

2 hours seminars a week

If our understanding of variations in students' outcomes is to be enhanced then it is important that we increase our understanding of the intricate nature of the relations between learning environments and students' outcomes. It is the purpose of this subject to examine theoretical orientations and empirical studies that have investigated the complexities of the associations among families, schools and outcomes for students in differing social contexts.

assessment: seminar participation, 2 x 4000 word, 1 x 8000 word essay

### 5274 Gender, Education and Social Change (6 pt)

6 points not offered in 1999

2 hours of seminars a week

restrictions: 3487 Class, Gender and Schooling in Australia

This subject analyses the ways in which formal education has contributed to the definition and transmission, or transformation, of gender roles and gender identity in Australia and other western societies since the eighteenth century. It aims to provide a crucial historical perspective to current issues in our education system concerning the nature of femininity and masculinity and the relations between the sexes. Recent historical research and theoretical scholarship have reassessed the changes in women's education since the nineteenth century and the related changes in their social roles. Very recently, the implications of our understanding of masculinity have begun to be investigated. The varying religious ideals of womanhood and manhood pursued in church schools will be pursued as well as the changing gender assumptions embodied in the policies and organisation of the state education system. The importance of sport in inculcating a particular model of masculinity, and in altering traditional conceptions of femininity, will be among topics studied. The question of whether middle

class norms of masculinity and femininity have differed from working class will be explored for its implications for schooling.

assessment: seminar participation; 2x 4000 word essays

### 7823 Honours Mathematics (Education)

12 points full year

prerequisites: qualification in Mathematics acceptable to Department of Education and relevant departments in Mathematical Sciences. Prospective students should consult with Education Mathematics course coordinator before enrolling

restriction: shall not be presented unless 2051 Education Mathematics is also presented

Three units not already passed, from those offered in Honours Pure Mathematics, Honours Applied Mathematics, Honours Statistics, Honours Computer Science and Honours Mathematical Physics.

assessment: see relevant Mathematics unit

### 9619 Introduction to Statistics in Educational Research

6 points not offered in 1999

2 hours seminars a week

This subject will provide students with an introduction to the use of statistics in educational research. Emphasis will be placed on students achieving an understanding of the statistical procedures considered so that they can think critically about suitable procedures for the collection and analysis of data, and about the educational usefulness of calculated statistics. Students will gain experience with using the SPSS package on the Arts Faculty's computer suite.

assessment: course work, exam. Pass, but no higher grade, may be obtained on coursework assessments only

### 9422 Issues for Australians (6 pt)

6 points not offered in 1999

2 hour seminar a week

The subject aims to introduce students to the analysis of contemporary issues. Current debates, concerns and theoretical perspectives will be canvassed by academics from various disciplines. The subject will address a range of areas such as Australian literature and media, tourism, identity, and environment.

assessment: 2 x 1500 word papers; 5000 word major paper

### **7269 Learning and Teaching at University**

6 points semester 2

The subject is designed for students who are teaching or intend to teach in a university. It investigates approaches to learning and teaching in a range of university settings, and includes issues in postgraduate supervision, assessment, curriculum design, and evaluation of teaching. Research and teaching are linked through an individually negotiated project which is undertaken in one of the topic areas and presented in a seminar at the end of the course. Small scale teaching/learning sessions (microteaching) provide opportunities to practise teaching in large and small groups, with observation and feedback from peers in a constructive and supportive environment. These classes are interactive, building on participants' experience and knowledge to encourage reflection on one's own educational practices and values.

*assessment:* project consisting of proposal, literature review and evaluation, totalling 8000-9000 words

### **5841 Making Sense of the Scientific World (6 pt)**

6 points not offered in 1999

2 hours a week

*assumed knowledge:* science background, others may enrol with permission

A great deal of recent research in science education has focused on how untutored students view aspects of the world, and how these views change after teaching. This subject will examine some of this research, and its implications for teaching - research studies which have used different methodologies to identify students' beliefs on selected scientific topics will be examined. Each student will nominate a science topic of personal interest and select and use an appropriate methodology to identify students' views. In most cases it is expected that this will be a near replicate of another study. Where students' views differ from those of scientists, change is required, but this proves to be quite difficult. Different methodologies and suggested requirements for effecting this change have been proposed and tested by several authors. Some of these will be critically examined.

*assessment:* paper describing the individual project; 4000 word essay

### **5165 Mathematics Education (6 pt)**

6 points not offered in 1999

2 hours seminars a week

*prerequisites:* pass in Level III Mathematics subject or other qualification accepted by Education Department

A study of current research and theory in mathematics education.

*assessment:* essays and assignments

### **3417 Multicultural Society and Educational Policy (6 pt)**

6 points semester 1

2 hours per week

The theoretical framework of this subject is provided by humanistic sociology. This is extended to social systems and developed in relation to ethnically plural societies. The key concepts are those of core values of different cultures, and personal cultural systems that individuals construct from the group values that are provided for them in society. Alternative orientations to cultural and structural pluralism are examined with special reference to curriculum and school organisations. Future cultural outcomes are then related to educational policy.

*assessment:* 2 x 4000 word essays; seminar paper

### **4298 Qualitative Approaches to Educational Research (6 pt)**

6 points semester 1

2 hour seminar a week

This subject is designed to provide students with an overview of qualitative research approaches. In addition to considering various theoretical frameworks and methodological approaches, there will be a focus on practical aspects of setting up research projects through the stages of formulating a proposal, preparing a budget, collecting and analysing data, writing up results and formally presenting the thesis.

*assessment:* seminar participation; practical data collection; either development of research proposal and concise outline, or essay on a methodological approach in educational research, totalling 8000 words

### **8977 Quantitative Educational Research (6 pt)**

6 points semester 2

2 hours of seminars a week

The subject examines the use of quantitative methods in educational research. In particular, regression techniques such as multiple regression and path analyses are discussed. The subject will be taught in the computer laboratory where students will work through a set of exercises using the SPSS program.

*assessment:* analysis of data, presentation in form of research article

**1688 Religion, Education and Social Change (6 pt)**

6 points semester 1  
2 hours of seminars a week

This subject analyses the ways in which religion and education have and do intersect in Australian society. It aims to provide a critical historical perspective to the current issues in our education system, particularly focusing on government funding to non-government schools and the Federal government's latest policy. Other areas of study will be the emergence of denominational schools in the 19th century and the controversies surrounding the education acts; the varying responses of religious groups; the reasons for the emergence of large numbers of low fee paying schools in the 20th century; and the diverse religious gender roles both past and present. Student response to their religious school environment particularly in terms of curriculum and teachers will be canvassed. Personal research into archival materials will be encouraged, and various theoretical perspectives on these issues presented.

*assessment:* seminar participation, 2 x 4000 word essays

**8963 Schools as Cultural Systems (6 pt)**

6 points semester 2  
2 hours of seminars a week

Humanistic sociology of culture is developed in relation to schools that are viewed as distinct cultural systems in society. Various types of schools are examined and members of the systems concerned are studied by the juxtaposition of the humanistic sociological and structural functional approaches in sociology.

*assessment:* seminar participation; theoretical essay and data analysis exercise, totalling 8000 words

**7884 Scientific Revolutions and Education (6 pt)**

6 points semester 2  
*prerequisites:* Science qualifications or permission of the Head of the Department of Education  
2 hours of seminars a week

The subject involves a critical analysis of the work of Thomas Kuhn. Case-histories are then studied to illustrate the application of different aspects of Kuhn's theory to various branches of science. The educational consequences of Kuhn's thesis are examined and conclusions drawn in regard to its relativistic and prescriptive qualities.

*assessment:* essays to a total of 8000 words

**6540 Teaching The Australian Studies Curriculum (6 pt)**

6 points not offered in 1999  
2 hour seminar per week

This subject aims to introduce students to the major issues in teaching Australian Studies at the senior secondary level. The course is intended to equip teachers of the SACE course in Australian Studies with the appropriate theoretical and methodological tools to become critical and successful practitioners in the inter-disciplinary study of Australian society. The main reference point for the course will be the SSABSA subject framework for Australian Studies, but students will also examine a set of questions relating to the nature of interdisciplinary studies, the content of Australian Studies courses and appropriate methodologies.

*assessment:* curriculum project based on SACE; major essay outside the SACE parameters

**7421 The Nature of Science and Science Curricula (6 pt)**

6 points not offered in 1999  
2 hours of seminars a week

*assumed knowledge:* science background, others may enrol with permission

Many school science courses expressly intend students to develop an understanding of scientific method. What is this scientific method? What, if anything, is unique to science and scientists? Commonly held views of science and scientists will be identified and alternative views examined. Relationships between existing science courses and particular notions will be explored.

*assessment:* essays to a total of 8000 words

**6224 Theories of Psychology in Education (6 pt)**

6 points semester 1  
2 hours seminars a week

This subject will be concerned with selected psychological theories of demonstrable consequence to education. A critical examination will be made of these theories, their educational interpretations and the research they have generated. The subject necessitates consulting articles from several journals of psychology and education. These, together with relevant books, will be detailed as the course progresses.

*assessment:* essays

**transition subjects**

**5361 Directed Study P/G (4 pt)**

**4655 Directed Study P/G (2 pt)**

**Research Component subjects**

**4175 Education Minor Project**

6 points semester 1 or 2

Self-directed study under supervision.

This subject consists of a survey and review of the literature relating to some aspect of the theory and practice of education arising out of one of the earlier Masters course work subjects completed. Students will present a topic proposal which will be discussed with a supervisor who will recommend appropriate reading. Progress will be monitored through regular discussions between the supervisor and the student.

assessment: 8000 word literature review

*or*

**3156 Education Research Project F/T**

12 points semester 1 or 2

**3777 Education Research Project P/T**

12 points full year

**7394 Education Research Project M/Y\***

12 points semester 2 of one year  
semester 1 of following year

This may take the form of an essay which provides evidence of the writer's ability to group, synthesise and critically assess the major issues involved in the area treated or of a minor research project which makes an original contribution to knowledge in a particular limited area. The total length should be around 18,000 words.

\* students must re-enrol in February

## Master of Environmental Studies

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the degree of Master of Environmental Studies must have obtained an Honours degree, or other qualification accepted by the University as equivalent to the Honours degree, or the Graduate Diploma in Environmental Studies.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the Master's degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Master's degree.

#### 2 Status, exemption and credit transfer

- 2.1 Students who have previously completed the requirements of the Graduate Diploma in Environmental Studies shall receive full status for Part I of the degree as outlined in 5 and 6 below.
- 2.2 No student may be granted more than 24 points of status toward the Masters degree.

#### 3 Approval of course of study at enrolment

- 3.1 Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of course

- 4.1 Except with the permission of the Faculty, the course for the degree, if taken full-time, will normally be completed in one and a half years of full-time study, depending on the nature of the environmental research project; and not less than two, or more than five years of part-time study.

#### 5 Qualification requirements

- 5.1 The course of study for the degree of Master of Environmental Studies shall be made up of two parts. Unless exempted therefrom by the Faculty, every student for the degree shall complete both Part I and Part II. Part I consists of the coursework component of the degree, Part II, the research component.

- 5.2 Candidates shall provide three bound copies of the dissertation (Environmental Research Methodology and Project) to the Mawson Graduate Centre.

#### 6 Course of study/Subjects of study

Students shall complete both Part I and Part II as follows:

##### 6.1 Part I

- 6.1.1 Students shall complete one semester-length subject chosen from each of the following two groups of subjects:

##### Environmental History and Philosophy Group

- 5941 History and Philosophy of Environmentalism 3
- 1722 Special Topic in Environmental History and Philosophy 3

##### Environmental Science Group

- 1201 Principles of Environmental Science 3
- 8594 Special Topic in Environmental Science 3

- 6.1.2 Students shall complete four semester-length subjects chosen from the following groups of subjects:

##### Environmental Policy, Planning and Management Group

- 4079 Ecofeminist Theory and Politics 3
- 7766 Ecotourism: Opportunities and Impacts 3
- 1716 Educating for the Environment 3
- 2550 Environmental Earth Science 3
- 1865 Environmental Futures: Local/Global Sustainability 3
- 9474 Environmental Hazards 3
- 8865 Environmental Impact Assessment (Env.St.) 3
- 7420 Environmental Organisation and Activism 3
- 2005 Environmental Politics 3
- 8249 Environmental Reconstruction and Rehabilitation 3
- 1683 Environmental Risk Management 3
- 3216 Environmental Systems Management 3

- |  |   |
|--|---|
| 2056 Environmental Writing                     | 3 |
| 4550 Gender, Environment, Development          | 3 |
| 6631 Managing Coastal Environments             | 3 |
| 7921 Managing Marine Environments              | 3 |
| 8375 Practical Environmentalism                | 3 |
| 9873 Special Topic in Environmental Management | 3 |
| 2667 Special Topic in Environmental Planning   | 3 |
| 7888 Special Topic in Environmental Policy     | 3 |
| 2267 Special Topic in Environmental Studies    | 3 |
| 2124 Urban Environments                        | 3 |
- 6.1.3 Students shall complete two semester-length subjects chosen from:
- (a) elective subjects chosen from the following:
- |   |   |
|---|---|
| 3953 Conservation and Heritage Law (Env St)               | 3 |
| 3741 Conservation Biology S                               | 3 |
| 2290 Environmental Economics (Env St)                     | 3 |
| 5614 Environmental Linguistics                            | 3 |
| 3099 Environmental Planning and Protection Law (Env St)   | 3 |
| 1452 Indigenous Australian and Environmental Management S | 3 |
| 4613 Introduction to SIS                                  | 3 |
| 3990 Land Use Planning Law (Env St)                       | 3 |
| 4358 Population and the Environment (Env St)              | 3 |
- and
- (b) Subjects listed in clause 6.2 above, not already offered to fulfil the requirements of clause 6.2 and
- (c) Subject to the approval of the Director of the Mawson Graduate Centre for Environmental Studies, environmental studies or related subjects at appropriate levels offered by other faculties.

**6.2 Part II Dissertation**

- |   |    |
|---|----|
| 7704 Environmental Research Project F/T | 12 |
| or                                      |    |
| 7084 Environmental Research Project P/T | 12 |

**7 Review of academic progress**

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.

7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

7.3 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Director of the Mawson Graduate Centre as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

**8 Assessment and examinations**

8.1 There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.

8.2 On completion of the research project the student shall lodge with the Director of the Centre three copies of the research project report prepared in accordance with directions given to students from time to time.

**9 Articulation with other awards**

9.1 Students who gain entry to the degree of Master of Environmental Studies on the basis of the completed Graduate Diploma in Environmental Studies shall receive full status for the work they have undertaken in the Graduate Diploma.

9.2 Students who have conferred upon them the award of Graduate Diploma in Environmental Studies who subsequently successfully complete the requirements for the degree of Master of Environmental Studies must surrender their first award before being admitted to the Master's degree.

9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Environmental Studies and who has completed the work prescribed for the Graduate Diploma and who has not been awarded the Master's degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

9.4 Students enrolled in the Master's degree will be required to complete the degree before enrolling for the degree of Doctor of Philosophy.

## Syllabuses

### coursework

#### 3953 Conservation and Heritage Law (Env.St.)

3 points not offered in 1999

3 hours lectures, seminars per week

quota will apply

*restrictions:* 9844 Conservation and Heritage Law

*prerequisites:* 3099 Environmental Planning and Protection Law (Env.St.)

The philosophy of conservation including the role of law, economics and science; conservation of biodiversity; conservation through reserved areas including national parks and world heritage areas; conservation of built heritage, national, state, local and Aboriginal; conservation of natural resources, land, water, air and marine.

*assessment:* to be advised

#### 3741 Conservation Biology S

3 points semester 2

2 lectures, 1 tutorial, 3 hours of practical work per week

This subject deals with key biological characteristics of native plant and animal species which influence their survival in increasingly disturbed and fragmented habitats. Topics include reproduction and renewal, population genetics, plant-animal interaction, habitat management, endangered species management, population viability analysis, reserve design in theory and practice, fragmentation. Some emphasis is given to the forests and woodlands of the sclerophyll land systems, but examples are taken from other system when appropriate.

*assessment:* to be advised

#### 4079 Ecofeminist Theory and Politics

3 points not offered in 1999

3-hour workshop each week

quota will apply

*restrictions:* 3133 Environmental Feminism; 3208 Women and Environments

This subject explores the interface between environmental studies and women's studies. In particular, the subject is concerned with the development of ecofeminism as a spectrum of theoretical discourse and political practice. Introductory lectures examine Western concepts of the Society-Environment relation from a range of ecofeminist perspectives (liberal to poststructural),

comparing these perspectives with conventional environmentalist perspectives.

The series of lectures critically examine ecofeminist accounts of the origin of a 'dysfunctional' Society-Environment relation in the West and ecofeminist proposals for the transformation of the Society-Environment relation currently dominant in Western and Westernised societies.

*assessment:* to be advised

#### 7766 Ecotourism: Opportunities and Impacts

3 points semester 1

3 hour workshop each week; fieldwork

This subject examines ecotourism from an environmental management perspective rather than a tourism industry perspective. The subject will focus on the identification of ecotourism opportunities in natural environments (particularly the arid/semi-arid environments of South Australia), the assessment of the potential impacts of ecotourism activities in these environments and the development of strategies to manage these impacts so that activities will be ecologically sustainable.

*assessment:* to be advised

#### 1716 Educating for the Environment

3 points semester 2

3 hour workshop each week; fieldwork

Educating for the Environment adds to the generally accepted purposes of education, the development of an environmental consciousness among learners in order to change values, attitudes, actions and behaviours in ways that will help in saving our environment and creating an improved future world.

The first objective of this subject will be to identify the principles on which the development of this environmental consciousness should be based and document its spread in formal educational systems. The problem of incorporating Environmental Education into conventional models of curriculum development will also be considered. Objective 2 will be to consider how educational processes in both formal and informal spheres of education reflect the principles on which environmentalism is based: an active, committed, less hierarchical system of education.

The third objective is to examine educational practices in formal institutions at all levels and in informal situations including business, union, community and other organisations.

In pursuing each of these objectives, examples from Australia, from other countries and international initiatives will be studied.

*assessment:* to be advised

### 2550 Environmental Earth Science

3 points semester 1

3-hour workshop per week

This subject deals with the evolution and characteristics of the earth's major terrestrial and marine environments and with the natural processes which gave rise to these environments. It also aims to provide a general overview of the global and regional environmental fluctuations resulting from interactions between the geosphere, biosphere and atmosphere from the time of the earliest recognisable human societies onwards. Particular attention is focused on the ways in which human activities have accelerated or modified natural processes and interactions, often to the detriment of both human societies and their environment.

*assessment:* to be advised

### 2290 Environmental Economics

3 points semester 1

2 hours per week

This subject will consider the following topics: Economics as the science of choice; Human satisfaction and demand; Production and supply; The interplay of supply and demand and the notion of the market; Failure of the market externalities, information deficiencies; Time in economies. Problems of inter-generational allocation; Benefit/cost analysis and social decision making; Taxes, subsidies and bans as remedies for market failure; Income distribution effects of environmental policy and its remedies; Global economic issues: Resource depletion, irreversibility, extinction, etc.; No growth economics: limits to growth; Sustainable development.

Overall the object is not to produce instant economists, but rather, to enable the students to converse with economists and know when economists are up to no good! To this end the course will attempt to outline basic neo-classical micro-economic analyses, but always critically.

*assessment:* to be advised

### 1865 Environmental Futures: Local and Global Sustainability

3 points semester 2

3 hour workshop each week; fieldwork

Redefining our vision of sustainable living, and changing the vision into reality through management for

sustainability, is the challenge facing communities, local and global. How do we - clarify our vision? learn to think strategically? mind-map complexity? negotiate with those with different views? harness existing community strengths? integrate sectoral management expertise? plan for local government involvement? prioritise environmental management actions? This subject combines recent environmental management tools and thinking with international and local case studies in environmental management for integrated ecological, social and economic sustainability.

*assessment:* to be advised

### 9474 Environmental Hazards

3 points not offered in 1999

2 lectures, 1 tutorial per week

*restrictions:* 7195 Environmental Hazards III

This subject gives an introduction to the description, classification and human perception of environmental hazards. It covers rapid onset events such as earthquakes, storms and cyclones, flooding, volcanic activity, together with human induced events such as explosions, oil and chemical spills, nuclear accidents and major transport disasters. The subject also covers risk assessment, adjustment to hazards, disaster preparedness and planning. The course uses Australian and/or local examples where appropriate.

*assessment:* to be advised

### 8865 Environmental Impact Assessment (Env.St.)

3 points semester 2

3-hour workshop per week

*restrictions:* 1183 Environmental Impact Assessment Practice

This subject introduces the methodology of environmental impact assessment (EIA) and examines the development of EIA overseas. The subject then focuses on EIA in Australia and, in particular, draws on case studies of EIA in South Australia. Different levels of EIA are examined alongside the responsibilities for decision-making. A number of major projects with environmental impact statements (EISs) are critically examined together with the EIS process in South Australia. This includes discussion of recent changes to the legislation..

*assessment:* to be advised

**5614 Environmental Linguistics**

3 points semester 2  
3-hour workshop per week  
quota will apply

*restrictions:* 2267 Special Topic in Environmental Studies (1994)

This subject explores the role of language in human perceptions of the environment. It will address both the question what principled limitations are imposed by the grammar and lexicon of selected languages and the ways in which a language such as English can be used to create different discourses on environmental topics. Some of the topics to be discussed will include: ecospeak; linguistic and natural classes; environmental metaphors; upgrading environmental terminology; environmental disclosure in non-European languages.

*assessment:* to be advised

**6049 Environmental Management of Mining**

3 points not offered in 1999  
3-hour workshop per week

Mining, oil production and other development for mineral extraction rarely fail to generate controversy. Are mineral extraction and environmental conservation incompatible? This question is examined within a framework of ecologically sustainable development and in the context of modern methods of mining and new systems of environmental management and land rehabilitation.

The monitoring and mitigation of environmental impacts (physical, biological, social/cultural) of mineral extraction (onshore and offshore, surface and underground) are described through local and international case studies. As well as receiving a practical introduction to best-practice environmental management, students will investigate political and environmental issues generated by recent mining developments.

*assessment:* to be advised

**7420 Environmental Organisation and Activism**

3 points semester 1  
3-hour workshop each week; fieldwork

There are many forms of environmental policy advocacy. Some environmentalists seek change through government and/or corporate practices. This subject, however, concentrates on the non-institutional components of the environment movement. In this vein, the role and scope of green non-government organisations, networks, associations and groups are reviewed. Apart from understanding the mechanics of

decision-making and power-distribution within these collective forms, students investigate numerous environmental campaigns which have been fought by non-government, non-profit groups.

This theoretical dimension is complemented by a strong local, fieldwork component. Students will work in small teams on environmental projects involving environmental 'grass-roots' groups and non-profit organisations.

*assessment:* to be advised

**3099 Environmental Planning and Protection Law (Env.St.)**

3 points semester 1  
2-hour lecture a week; fortnightly seminars  
quota will apply

*restrictions:* 7272 Environmental Planning and Protection Law

*prerequisites:* 2594 Bridging Environmental Law

This subject examines regulatory mechanisms that address environmental problems and focuses particularly upon the regulation of development. An introductory section examines the nature of environmental problems in Australia and the general structure of environmental law. Specific topics addressed subsequently are constitutional responsibilities and powers with respect to environmental planning and protection; land-use planning systems; environmental impact assessment; and legislation to promote development.

A further section of the subject, which will vary in content from year to year, examines more recent forms of environmental regulation, to be selected from the following topics: pollution controls (air, water, noise); waste disposal (solid and hazardous wastes); regulation of hazardous substances (pesticides, environmental contaminants, radioactive substances, lead, asbestos); regulation of human-ingested products (food additives, therapeutic substances). Finally, a section on environmental litigation will examine tortious actions, criminal and civil enforcement of environmental legislation and statutory appeal procedure. The role of courts and lawyers on the resolution of environmental disputes will also be discussed.

*assessment:* to be advised

**2005 Environmental Politics**

3 points semester 2  
2 lectures, 1 tutorial per week

*restrictions:* 7731 Green Politics and Policy III

This subjects is divided into two parts. The first, political theory, investigates the ways environmental

thought connects with major threads of traditional political theories. In addition, this section seeks to understand recent innovations which have contributed to what we now understand as modern environmental political thought.

After establishing the philosophical and epistemological underpinnings, the subject then concentrates on policy making. There are numerous political processes through which participants pursue political goals. These range from the informal dynamics of networks, groups and social movements through to the more institutionalised responses of organisations, corporations, political parties and governments. These processes are reviewed using comparative analytical models and extra/inter/national examples taken from Australasia, the Asia-Pacific, North and South America, Europe and Africa.

*assessment:* to be advised

### **8249 Environmental Reconstruction and Rehabilitation**

3 points semester 2

2 lectures, 3 hours of practical work per week; fieldwork

*restrictions:* 2438 Conservation in Human-Dominated Landscapes; 8905 Environmental Reconstruction and Rehabilitation III

This subject examines management strategies for conserving native species and ecosystems in human-dominated environments where the native vegetation cover has been fragmented and persists only on patches and strips of remnant natural land scattered within a matrix of introduced vegetation and human constructions on settled (rural-agricultural, industrial and urban) land. The subject considers strategies for the design of 'island and corridor' ecological reserve systems, but concentrates on strategies for the rehabilitation of remnant natural land outside of ecological reserves and strategies intended to promote biological and soil conservation on settled land by restoring analogs of native ecosystems.

In addition to lectures, the subject includes practical sessions involving laboratory and field exercises. These exercises are used to illustrate concepts presented by the lectures and to demonstrate techniques of environmental restoration and rehabilitation.

*assessment:* to be advised

### **1683 Environmental Risk Management**

3 points semester 1

3 hour workshop each week; fieldwork

quota may apply

*restrictions:* 2667 Special Topic in Environmental Planning (1996)

Changes to Australian environmental legislation in recent years have caused companies, local government and public utilities to take stock of their exposure to liability for environmental damage and to put into practice environmental management systems and programs designed to protect the environment, achieve greenhouse and other policy targets, reduce risks and improve productivity. Cleaner production, waste reduction/recycling/reuse, environmental audits, monitoring, environmental risk assessment and the integration of environmental management plans with quality management and occupational health and safety plans are being adopted by organisations aiming to run cleaner, better and more profitably. Through lectures from practitioners, workshops and industry visits, this subject gives a practical introduction to these practices and critically examines their contribution to achieving ecologically sustainable development at local and global levels.

*assessment:* to be advised

### **3216 Environmental Systems Management**

3 points semester 1

2 lectures, 1 tutorial per week

*restrictions:* 4088 Environmental Systems Management III

This subject examines some of the ways in which human societies have sought to modify and manipulate their natural environment from the time of prehistoric hunter-gatherers and the inception of plant and animal domestication until the present day. The aim of the subject is to suggest how our global physical and biological resources may be managed on a more sustainable basis by careful evaluation of both the beneficial and the adverse effects of various forms of human interaction with local, regional and global natural systems. Topics considered include deforestation, biodiversity and global carbon storage; land degradation and desertification; salinisation and integrated catchment management; soil, water and air pollution; plant and animal extinctions; global warming and climatic change; management of toxic wastes; ozone depletion; disease; international waters; UNEP, UNDP and the Global Environment Facility; the International Geosphere-Biosphere Program; and environmental management in Australia.

*assessment:* to be advised

**2056 Environmental Writing**

3 points not offered in 1999

3-hour workshop per week

This subject explores the relationships between culture and nature through literature. The subject is divided into two specific parts. The first part - environmental literatures - examines a selection of predominantly Western non-fiction which focuses on the connectedness between humans and concepts of place. The second part - environmental writing - includes an environmental writing workshop, where students are encouraged to produce their own works of environmental non-fiction.

*assessment:* to be advised**4550 Gender, Environment, Development**

3 points semester 1

3-hour workshop per week

This subject examines the connections between gender, environment and development (GED) in two ways: through guided reading and discussion of literature providing a theoretical analysis of GED issues, and by means of workshops in which students will design and discuss the results of their own field-based projects on current GED issues

*assessment:* to be advised**5941 History and Philosophy of Environmentalism**

3 points semester 1

2 lectures, 1 tutorial per week

*restrictions:* 5886 History and Philosophy of Environmentalism III

this subject sets those scientific, political, social, ethical ideas and aspirations we call environmentalism into the mainstream of the development of western thought and culture. It shows that the dominant western attitudes to our environment have been formed primarily by despotic rather than stewardship religious views, reductionist rather than holistic scientific methods, anthropocentric rather than ecocentric philosophical attitudes and exploitative rather than conservative economic theories and practices. The way that these erstwhile dominant attitudes are changing are described.

The subject will examine the variety of philosophical and ethical arguments why humans should protect and conserve the environment of which they are a component. A particular feature of this subject will be practical investigations of ethical, political and economic dilemmas raised by a variety of particular, often personal issues such as genetic engineering,

vegetarianism, ecotourism, nonviolent direct action and others.

*assessment:* to be advised**1452 Indigenous Australians and Environmental Management S**

3 points semester 1

Contact hours to be advised

Contemporary land and resource use and management by Aboriginal people, and its relationship to sustainable development. Theoretical frameworks drawing on development studies, emphasising concepts of empowerment and indigenous self determination and participatory approaches to resource management. Exploration of the positive and negative impacts of Australian resource management on indigenous people. Aboriginal world views, social organisation and relationships to country. Skills in communicating and negotiating with Aboriginal people. Specific topics covered include Aboriginal ecologies; subsistence economies; land and sea rights including native title; co-management regimes; heritage management; the role of Aboriginal organisation in environmental management.

*assessment:* to be advised**4613 Introduction to S.I.S.**

3 points semester 1

This topic is concerned with the identification and description of the hardware and software components of Spatial Information Systems; database models; data capture; nature and characteristics of spatial data; data vector and raster S.I.S.s; data analysis; geographic modelling; data integration.

*assessment:* essay workshop report 60%; exam 40%**3990 Land Use Planning Law (Env.St.)**

3 points semester 2

2-hour lecture per week, plus fortnightly seminars

*restrictions:* 7225 Land-Use Planning Law, 7730 Land Use Planning Law*prerequisites:* 3099 Environmental Planning and Protection Law (Env.St.), or equivalent

The focus of this subject is upon the control of land development under the South Australian planning system. The subject commences with an examination of the historical evolution of the planning system, and then considers the nature of the planning procedures under the Development Act 1993 and of controls imposed thereunder. It examines the powers and procedures of planning authorities and, through the seminar program, it considers the methods of dealing

with selected planning issues, including shopping, housing segregation and aesthetics. The subject also considers the role of appeal tribunals and public participation procedures; alternative modes of planning; control of government development, particularly transport; and responsibility for housing. The subject concentrates upon legal analysis of planning problems.

*assessment:* to be advised

### **6631 Managing Coastal Environments**

3 points semester 1

3 -hour workshop per week, plus field work.

This subject examines selected strategies for managing coastal environments from around the world, although the main focus is the Australian coast. Where appropriate, local examples are used and followed up with local coastal fieldwork. The subject provides an overview of various coastal processes as a background to an understanding of coastal management issues. A major focus of the subject is on recent coastal management initiatives in Australia by both the Commonwealth Government and State Governments.

*assessment:* to be advised

### **4358 Population and the Environment (Env.St.)**

3 points semester 2

Two 4 hour workshops per week

*restrictions:* 2757 Population and the Environment

This subject introduces basic concepts and analysis of ecosystems and key interrelationships between population and environment within the context of development issues and policies. It deals with resource depletion and management, land use and agricultural systems related to population pressure, population mobility, urbanisation and the environment and integrated approaches to population-environment planning.

*assessment:* to be advised

### **8375 Practical Environmentalism**

3 points semester 2

3 hour workshop each week; fieldwork

quota may apply

this subject examines the most common behaviours, activities and means of control advocated by or urged on environmentalists. The objectives are to determine whether, to what extent and in what circumstances, the measures advocated are appropriate and effective in conserving resources and protecting the environment. The subject will assist students to make effective

lifestyle choices, help them minimise their own adverse environmental impacts and give them knowledge and skills to argue rigorously and effectively for their opinions.

*assessment:* to be advised

### **1201 Principles of Environmental Science**

3 points semester 2

3-hour workshop per week

The focus of this subject is upon the interactions between the different natural systems which together provide the basis for life on earth. Particular emphasis is given to the dynamic nature of these interactions over time and space. The subject also considers some of the ways in which an analysis of past environmental variations can be a powerful means of understanding the likely range and magnitude of natural system responses to future environmental changes.

*assessment:* to be advised

### **9873 Special Topic in Environmental Management**

3 points semester 1 or 2

3-hour workshop per week

Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

### **1722 Special Topic in Environmental Philosophy and Ethics**

3 points semester 1

Contact hours to be advised

details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

### **2667 Special Topic in Environmental Planning**

3 points semester 1 or 2

3-hour workshop per week

Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

**7888 Special Topic in Environmental Policy**

3 points semester 1 or 2

3-hour workshop per week

Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

**8594 Special Topic in Environmental Science**

3 points semester 1 or 2

3-hour workshop per week

Details of this subject will be provided in the prospectus for the Mawson Graduate Centre when specialist teaching is available.

*assessment:* to be advised

**2267 Special Topic in Environmental Studies**

3 points semester 1 or 2

3-hour workshop per week

Details of this subject will be provided in the Mawson Graduate Centre for Environmental Studies prospectus when specialist teaching is available.

*assessment:* to be advised

**2124 Urban Environments**

3 points semester 2

3 hour workshop per week, plus field work and supervised group-project work

*restrictions:* 2267 Specialist Topic in Environmental Studies, as offered in 1992

This subject concentrates on people and urban environments. It is divided into two major parts. First, the political and social theory literature which pertains to urban environments will be examined. There is a heavy emphasis on politics and social equity in urban environments. Secondly, certain urban environmental issues will be focused upon to bring this theory to life. Some of these issues will include: housing, transport, 'lifestyle', urban planning, domestic arrangements, 'amenity' provision, and local government.

*assessment:* to be advised

**dissertation****7704 Environmental Research Methodology and Project I**

12 points semester 1 or 2

*restrictions:* 8245 Environmental Research Project, 8211 Environmental Research Methodology, 2989 Minor Dissertation (Env.St.), 4520 Minor Dissertation, 7084 Environmental Research Methodology and Project II

This subject will introduce students to the process of environmental research and assist them to acquire the skills necessary to successfully plan, undertake and present the results of an environmental research project. To successfully complete the subject students must attend and participate in all the required methodology workshops, submit a satisfactory proposal for an environmental research project and a satisfactory research plan early in the first semester, provide a satisfactory account of progress made in the research project by mid-year, and submit a satisfactory dissertation on the methodology and results of the research project by the end of the year.

*assessment:* dissertation of 15000-20000 words

**7084 Environmental Research Methodology and Project II**

12 points full year

*restrictions:* 8245 Environmental Research Project, 8211 Environmental Research Methodology, 2989 Minor Dissertation (Env.St.), 4520 Minor Dissertation, 7704 Environmental Research Methodology and Project I

Will introduce students to the process of environmental research, and assist them to acquire the skills necessary to successfully plan, undertake and present the results of an environmental research project. To successfully complete the subject students must attend and participate in all the required methodology workshops, submit a satisfactory proposal for an environmental research project and a satisfactory research plan early in the first semester, provide a satisfactory account of progress made in the research project by mid-year, and submit a satisfactory dissertation on the methodology and results of the research project by the end of the year

*assessment:* dissertation of 15000-20000 words

## Master of Logic

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Master of Logic degree must have qualified for an Honours degree from the University at First Class or IIA standard in the field of Logic or other appropriate field of study in Departments of the Faculty of Arts or the Faculty of Mathematical and Computer Sciences, or the Graduate Diploma in Logic, or other qualification accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council the Faculty may, in special cases and subject to such conditions (if any) as it may see fit to impose in each case, accept as a student for the degree a person who does not hold a degree of a tertiary institution but has given evidence satisfactory to the Faculty of fitness to undertake work for the Masters degree.

#### 2 Status, exemption and credit transfer

- 2.1 Except by the special permission of the Head of the Department of Philosophy, no student may gain status towards the Thesis component of the course for other studies undertaken in the University or other institutions.
- 2.2 Students of the Masters degree who have successfully completed the Graduate Diploma in Logic will be awarded status for any subjects completed in the Graduate Diploma of Logic which form part of the requirements of Rule 6.1, below. Students who apply for and are granted status to the value of 18 or more points for their Graduate Diploma studies under this provision will be required to surrender their Graduate Diploma before being admitted to the Masters degree (see 9.2 below).

#### 3 Approval of course of study at enrolment

Each student's course of study shall be approved by the Faculty at enrolment each year.

#### 4 Duration of the Award

To qualify for the degree a student shall satisfactorily complete a course of one and one-half years of full-time study or not more than six years of part-time study.

#### 5 Qualification requirements

The course of study for the degree of Master of Logic shall be made up of two parts with an aggregate points value of 36 points, consisting of coursework subjects to the value of 24 points and a 12 point dissertation.

#### 6 Course of study/Subjects of study

All students shall satisfactorily complete the following two parts:

##### 6.1 Coursework Subjects

###### 6.1.1 Core Subjects

All students shall complete the following subjects:

3402 Advanced Logic A (PG)	6
7665 Argument (PG)	4

(Students who are exempted from studying the subject 2614 Advanced Logic A (PG) due to having previously completed 4259 Logic IIIA or its equivalent will be required to present a further 6 points of elective subjects listed in 6.1.2 in lieu of this requirement.)

###### 6.1.2 Elective Subjects

All students shall complete elective subjects to an aggregate value of 8 points chosen from the following:

2614 Advanced Logic B (PG)	2
1619 Artificial Intelligence (PG)	2
9669 Graduate Topic in Logic A	2
5048 Graduate Topic in Logic B	2
7889 Graduate Topic in Logic C	2
2043 Graduate Topic in Logic D	2
1998 Intermediate Logic (PG)	
2254 Knowledge Representation (PG)	2

###### Flinders University Subjects:

COMP 3007 Artificial Intelligence	2
COMP 3009 Computational Logic	2
PHIL 2080 Logic, Reasoning and Argumentation	4

and, subject to the approval of the Department, students may be able to pursue in lieu of 2 elective points further studies towards the

requirements of the Project in Logic outlined in 6.1.3, below. Such students will enrol in the following subject:

- 2637 Supplementary Major Project in Logic 2
- concurrently with the subject
- 3890 Major Project in Logic

### 6.1.3 Project in Logic

All students shall enrol in:

- 3890 Major Project in Logic 6

### 6.2 Dissertation

All students shall complete:

- 6383 Dissertation in Logic F/T 12
- or*
- 8081 Dissertation in Logic P/T 12

## 7 Academic progress

- 7.1 A student who fails a subject and desires to take the subject again shall again attend lectures and satisfactorily do such written and practical work as the teaching staff concerned may prescribe.
- 7.2 A student who has twice failed a subject may not enrol for that subject again except by special permission to be obtained in writing from the Faculty and then only under such conditions as may be prescribed.

## 8 Assessment and examinations

- 8.1 There shall be four classifications of pass in any subject for the Masters degree: Pass with High Distinction, Pass with Distinction, Pass with Credit, and Pass.
- 8.2 For the purposes of this clause a student who is refused permission to be assessed, by examination or otherwise, or who does not, without a reason accepted by the Head of the relevant Department as adequate, attend all or part of a final examination (or supplementary examination if granted) after having enrolled for at least two thirds of the normal period during which the subject is taught, shall be deemed to have failed the subject.

## 9 Articulation with other awards

- 9.1 Students who complete the Graduate Diploma in Logic at credit level or higher are eligible to apply for the Master of Logic course, and if successful, on gaining entry, receive status for the work they have undertaken in the Graduate Diploma.
- 9.2 Students who have conferred upon them the award of Graduate Diploma in Logic who subsequently successfully complete the requirements of the Master of Logic and who

have been granted 18 or more points of status on behalf of their Graduate Diploma must surrender their first award before being admitted to the degree of Master of Logic.

- 9.3 Notwithstanding the above Rules a student who has been enrolled for the degree of Master of Logic and who has completed the work prescribed for the Graduate Diploma in Logic and who has not been awarded the Masters degree shall, on written application to the Registrar, be awarded the Graduate Diploma.

## Syllabuses

### 3402 Advanced Logic A (PG) (see 4259 Logic 111A)

6 points semester 2

2 lectures, 1 tutorial per week

*prerequisites:* 3037 Logic 2 or 1998 Intermediate Logic (PG) or 5780 Logic 111 or 2614 Advanced Logic B, or, with permission, an equivalent standard

Infinite sets, semantics of first order logic, computability, non-classical logic, inconsistent mathematics, philosophical aspects of logic, mathematics and computing.

*assessment:* examination and essay

### 2614 Advanced Logic B (PG)

2 points semester 2

2 lectures per week; tutorial every 3 weeks

*prerequisites:* either 9786 Mathematics 1 (Pass Div 1) or 9595 Mathematics 1M (Pass Div 1) or 3037 Logic 11 or 1998 Intermediate Logic (PG)

Propositional logic, first order theories, interpretations and models, Godel's completeness theorem for predicate logic. Computability: Turing machines, recursive functions and the halting problem. Undecidability of the predicate calculus. Godel's theorem for elementary number theory.

*assessment:* 2 hour exam; a small percentage may be allocated for class exercises

### 7665 Argument (PG)

2 points semester 1

2 lectures, 1 tutorial per week

A course in applied logic: truth, validity, soundness, necessity, contingency, impossibility, definition, circularity, Venn diagrams, structure of arguments, legal reasoning, opinion, fallacies, induction, explanation, science and pseudoscience.

*assessment:* examination and essays

### 1619 Artificial Intelligence (PG)

2 points semester 1

2 lectures, 2 hours practical work per week; tutorial every 3 weeks

*prerequisites:* none, but students must consult with the degree coordinator over assumed knowledge

AI methodology and fundamentals, description, matching and goal reduction, ANALOGY, and/or trees, exploiting natural constraints, Waltz algorithm, search, hill climbing, beam, best-first, A\*, minimax procedure and alpha-beta pruning for game-playing, learning,

parameter-adjustment and Winston near-miss/reinforcement procedure, means-end analysis and GPS, rule-based systems, forward- and backward-chaining, MYCIN, Xcon, generate and test paradigm with Dendral. Representation issues: inheritance, demons, defaults, perspectives, frames, primitives, aspects of Prolog, neural networks, recurrent backpropagation technique.

*assessment:* 2 hour exam, practicals and exercises

### 9669 Graduate Topic in Logic A

2 points semester 1

2 hour seminar a week

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

A selection of advanced topics in classical logic.

*assessment:* examination or essay

### 5048 Graduate Topic in Logic B

2 points semester 1

2 hour seminar a week

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

A selection of advanced topics in non-classical logic.

*assessment:* examination

### 7889 Graduate Topic in Logic C

2 points semester 2

2 hour seminar a week

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

A selection of advanced topics in category theory.

*assessment:* examination

### 2043 Graduate Topic in Logic D

2 points semester 2

2 hour seminar a week

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

A selection of advanced topics in semantics.

*assessment:* examination

### 1998 Intermediate Logic (PG)

4 points semester 1

2 lectures, 1 tutorial per week

*prerequisites:* Logic 1 or equivalent

Proof theory and introduction to semantics of first order logic with identity, alternative notations and alternative logics, many-valued logics, modal logic, introduction to philosophical aspects of logics.

*assessment:* examination and essay

### 2254 Knowledge Representation (PG)

2 points not offered in 1998

2 lectures, 2 hours practicals per week; tutorial every 3 weeks

*prerequisites:* 6378 Artificial Intelligence 111 or 8352 Artificial Intelligence IV

Issues in knowledge representation, the frame problem, the qualification problem, predicate logic as knowledge representation, the closed world assumption, inheritance hierarchies, theorem proving, resolution, natural deduction, logic programming, introduction to nonmonotonic reasoning, statistical reasoning, Bayes Theorem, Bayesian networks, Dempster-Shaffer theory, fuzzy logic.

*assessment:* 2 hour exam, practicals and exercises

### 3890 Major Project in Logic

6 points full year

Supervision as appropriate

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

This subject is intended as a research project which may be taken as the last subject for the Grad Dip Log.

*assessment:* project

### 2637 Supplementary Major Project in Logic

2 points full year

Supervision as appropriate

*prerequisites:* 3402 Advanced Logic A or 4259 Logic 111A

This subject is intended as a supplementary subject to extend the Major Project in Logic

*assessment:* project

### dissertation

### 9573 Dissertation in Logic F/T

12 points semester 1 or 2

### 4019 Dissertation in Logic P/T

12 points full year

A dissertation of 15-18000 words

## Flinders University Subjects

These subjects are offered by Flinders University of . Students enrolled at the University of Adelaide, in the Graduate Certificate, Graduate Diploma or Masters course in Logic, wishing to take these subjects (within the limits indicated in the Schedules) will be granted appropriate credit towards their Adelaide award.

Students taking any of the subjects must comply with Flinders University enrolment procedures, details of which are available from the Flinders University Enrolments Officer. Students must present a copy of their official results from Flinders University to the Faculty of Arts so that status can be awarded in their Adelaide degree.

### COMP 3007 Artificial Intelligence

2 points semester 2

2 lectures, 1 tutorial per week

*assumed knowledge:* students must consult with the degree coordinator

*restrictions:* 8352 Artificial Intelligence IV or 6378 Artificial Intelligence.

Topics chosen from: methodologies of AI, philosophical issues, cognition and perception, knowledge representation methods, automated inference, rule-based systems, search methods, machine learning, knowledge engineering, computer vision, natural language understanding, game playing. PROLOG will be the major vehicle for assignments.

*assessment:* to be advised

### COMP 3009 Computational Logic

2 points semester 1

Lectures, 1 tutorial per week.

*assumed knowledge:* students must consult with the degree coordinator

A study of the language and methods of logic, conceived as providing natural tools for writing and evaluating computer programs. Topics include concepts of propositional and predicate logic, theories with equality, and modal logic as applied to artificial intelligence. A major emphasis will be the way research into automated theorem proving has spawned the PROLOG language and the logic programming paradigm.

*assessment:* examination

Arts — M.Log.

**PHIL 2080 Logic, Reasoning and  
Argumentation**

2 lectures, one tutorial per week.

4 points semester 2

A study of propositional and predicate logic, emphasising its role in analytical problems, including those involving in heterogeneous (spatial and verbal) forms.

*assessment:* to be advised

# Master of Social Sciences

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Social Sciences shall:

- (a) have qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University
- (b) have qualified for the Graduate Diploma in a related field at a standard acceptable to the Faculty *or*
- (c) have qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience

### 2 Duration of course

To qualify for the degree, a candidate shall satisfactorily complete a course of study comprising three semesters of full-time study or not more than six years of part-time study.

### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 4 Course requirements

To qualify for the degree, a candidate shall satisfactorily complete subjects to the value of 36 points, as follows:

#### 4.1 Core subjects

4462 Approaches to Social Sciences  
Research (4 pt) 4

*or*

4226 Approaches to Social Sciences  
Research (6 pt) 6

*and*

4.2 core subjects available in the following Social Sciences graduate coursework degrees in the Faculty of Arts: Applied Linguistics, Cognitive Science, Educational Studies, Environmental

Studies, International Studies, Labour Studies, Philosophy, Population and Human Resources, Spatial Information Science and Women's Studies.

#### 4.3 Elective subjects

All candidates shall complete elective subjects to the value of 12 points selected from the following Social Sciences graduate coursework degrees in the Faculty of Arts: Applied Linguistics, Cognitive Science, Educational Studies, Environmental Studies, International Studies, Labour Studies, Philosophy, Population and Human Resources, Spatial Information Science and Women's Studies.

4.4 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award

#### 4.5 Research Project or Dissertation

All candidates shall complete either the full-time or the part-time version of the following subject:

6010 Social Sciences Dissertation (F-T) 12

1274 Social Sciences Dissertation (P-T) 12

*or*

8477 Research Project in Social Sciences 8

*and*

one additional elective subject to the value of not less than 4 points.

### 5 Status, exemption and credit transfer

5.1 Except with the special permission of the Head of Department, no candidate will be granted status for any of the core subjects of the degree except candidates who have qualified for the Graduate Diploma in Social Sciences or a Graduate Diploma in a related field of study.

5.2 No candidate shall be granted status for subjects with a total value of more than 12 points, except candidates who have qualified for the Graduate Diploma in Social Sciences, or a Graduate Diploma in a related field of study, who may be granted up to 24 points of status (see 7.1 below).

5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned..

## 6 Assessment and examinations

6.1 There shall be four classifications of pass in any subject for the Master of Social Sciences: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.

6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.

(b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.

6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## 7 Articulation with other awards

7.1 A candidate who has been admitted to the Graduate Diploma in Social Sciences and who has been granted status toward the degree for subjects presented for the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree.

7.2 A candidate for the degree of Master of Social Sciences who satisfies the requirements for the Graduate Diploma but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

---

### compulsory core subjects

#### 4462 Approaches to Social Sciences Research (4 pt)

4 points semester 1

#### 4226 Approaches to Social Sciences Research (6 pt)

6 points semester 1

This core subject provides students with a basic understanding of the philosophical underpinnings of modern social science. The various approaches to social science research are explored and students are taught basic skills in the collection o, analysis and presentation of social science information. There is a computer and practical component included in the 6 point version of the subject.

### elective subjects

#### 5361 Directed Study P/G (4 pt)

4 points semester 1 or 2

#### 3691 Directed Study P/G (6 pt)

6 points semester 1 or 2

restrictions: only with permission of Course convenor

This unit will allow candidates to pursue an independent project or area of investigation developed in collaboration with a supervisor.

*assessment:* seminar paper, major essay

**Please refer to graduate social sciences degrees named in the Specific Course Rules for syllabus details of other elective subjects.**

### dissertation

#### 6010 Social Science Dissertation F/T

12 points semester 1 or 2

#### 1274 Social Science Dissertation P/T

12 points full year

Candidates undertake an original piece of research in the field in which they have chosen to specialise through their elective options.

*assessment:* 15000-20000 word dissertation on a topic approved by Course Coordinator.

#### 8477 Research Project in the Social Sciences

8 points semester 1 or 2

Candidates who choose this option complete a piece of individual research of a standard suitable for publication in a journal appropriate to the field of study.

# Master of Spatial Information Science

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

## Specific Course Rules

### 1 Admission requirements

1.1 An applicant for admission to the course of study for the degree of Master of Spatial Information Science shall

- (a) have qualified for an Honours degree of the University in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent to a Honours degree of the University
- (b) have qualified for a Graduate Diploma in Spatial Information Science at a standard acceptable to the Department *or*
- (c) have qualified for an Ordinary degree of the University of Adelaide in an appropriate field of study, or a degree of another institution accepted by the Faculty for the purpose as equivalent, plus have at least two years' approved professional work experience.

1.2 The Faculty may, subject to such conditions (if any) as it may see fit to impose in each case, accept as a candidate for the degree a person who does not satisfy the requirements of Rule 1.1 above but who has presented evidence satisfactory to the Faculty of fitness to undertake work for the degree.

### 2 Duration of course

To qualify for the degree, a candidate shall satisfactorily complete three semesters of full-time study or not more than six years of part-time study.

### 3 Approval of course of study

Each candidate's course of study shall be approved by the Faculty at enrolment each year.

### 4 Course of Study

To qualify for the Master of Spatial Information Science, a candidate shall satisfactorily complete subjects to a total of 36 points, as follows:

### 4.1 Core subjects

All candidates shall complete the following subjects:

6155	Introduction to Spatial Data Models	3
4613	Introduction to Spatial Information Systems	3
5107	Spatial Data Modelling and Analysis	3
3088	Spatial Data Visualisation	3

### 4.2 Elective subjects

All candidates shall complete elective subjects to the value of at least 12 points selected from the following:

2445	Advanced Raster Analysis	3
2523	Field Sampling Techniques	3
2833	New Technologies in GIS	3
9342	Social Applications in GIS	3

Students may also select from elective subjects offered by the Department of Environmental Science and Rangeland Management.

### 4.3 Research project

All candidates shall complete either the full-time or the part-time version of the following subject:

9137	Dissertation (SIS) F/T	12
8147	Dissertation (SIS) P/T	12

### 5 Status, exemption and credit transfer

5.1 Except with the special permission of the Head of the Department concerned, no candidate will be granted status for any of the core subjects of the degree except candidates who have qualified for the Graduate Certificate in Spatial Information Science.

5.2 No candidate shall be granted status for subjects with a total value of more than 12 points, except candidates who have qualified for the Graduate Diploma in Spatial Information Science who may be granted up to 24 points of status (see 7.1 below).

5.3 No candidate will be permitted to count for the degree any subject that, in the opinion of the Faculty, contains substantially the same material as any other subject which he or she has already presented for another award.

- 5.4 A candidate who fails a subject and desires to repeat that subject shall, unless exempted partially therefrom by the Head of Department concerned, again complete the required work in the subject to the satisfaction of the teaching staff concerned

## 6 Assessment and examinations

- 6.1 There shall be four classifications of pass in any subject for the degree: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 6.2 (a) A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned.
- (b) For the purpose of this Rule, a candidate who is refused permission to sit for examination shall be deemed to have failed the examination.
- 6.3 A candidate who has failed a subject twice may not re-enrol in that subject except by special permission of the Faculty and then only under such conditions as may be prescribed.

## 7 Articulation with other awards

- 7.1 A candidate who has been admitted to the Graduate Diploma in Spatial Information Science and who has been granted status toward the degree for subjects presented toward the Graduate Diploma to a value of more than 6 points must surrender the Graduate Diploma before being admitted to the degree. These candidates are required to complete the 12 point research project (as listed in 4.3) to qualify for the degree of Master of Spatial Information Science.
- 7.2 A candidate for the degree of Master of Spatial Information Science who satisfies the requirements of the Graduate Certificate in Spatial Information Science but who does not complete the requirements of the degree may be admitted to the Graduate Certificate.
- 7.3 A candidate for the degree of Master of Spatial Information Science who satisfies the requirements of the Graduate Diploma in Spatial Information Science but who does not complete the requirements of the degree may be admitted to the Graduate Diploma.

## Syllabuses

### core subjects

#### 6155 Introduction to Spatial Data Models

3 points semester 1  
20 hours lectures, 30 hours practicals, 20 hours to be advised

*prerequisites:* Introduction to Spatial Information Systems

It is important for any person involved with using digital spatial data to have a sound understanding of how those data are represented within the computer. How reality is modelled within the computer system has vast implications for both the methodologies used to manipulate and analyse, and the final evaluation of any output. Lectures and practicals cover both raster and vector models with examples derived from applications ranging from satellite image analysis through to urban digital cadastres and the 1996 Census.

Topics include: introduction - storing and manipulating numbers within a computer, introduction storing spatial data within a computer system, the Vector vs Raster debate; storing vector data, vector data models - storing coordinates, coordinate accuracy, coordinate precision, storing topology, network models, vector based surface models (TINs,) proprietary models e.g. ARC/INFO georelational model; storing Raster data, raster data models - types of rasters and their storage methods, raster based surface models, 3D data models, vector-to-raster conversion; storing attribute data -introduction to database issues.

*assessment:* essay 20%; project 35%; exam 45%

#### 4613 Introduction to Spatial Information Systems

3 points semester 1  
20 hours lectures, 30 hours practicals, 20 hours to be advised

This subject will introduce - basic concepts associated with inputting, storing, manipulating, modelling and visualising spatial data, some of the problems likely to be encountered, and some of the methods and types of software used. It covers the two dominant models for dealing with spatial data, the raster and vector models. A general introduction to the spatial data and spatial data handling, including: Definitions of both IS and GIS; some examples of GIS & RS applications, especially to illustrate their diversity; some comments on computer cartography and the history of the GIS field; some fundamental concepts; projections, coordinate systems and scale.

The development of remote sensing to the present day; the division between visual interpretation and computer assisted interpretation of raster images -

spatial data input, methods of input, digitizing vs scanning, other sources of spatial data e.g. the Census, Cadastral Archives, GPS, remotely sensed data; storing spatial data, an introduction to spatial data models, methods of modelling reality (conceptual level), issues and implications of generalisation; manipulating Spatial Data, projections, transformations; vector data modelling; Raster data modelling, map algebra, Simple computer enhancements of image data; visualisation of spatial data; 2, 2.5, 3D visualisation techniques; Visualising multidimensional data.

*assessment:* essay 20%; project 35%; exam 45%

#### 5107 Spatial Data Modelling and Analysis

3 points semester 1  
20 hours lectures, 30 hours practicals, 20 hours to be advised

*prerequisites:* Introduction to Spatial Information Systems

Over the last 10 years Spatial Information Systems have developed to handle the increasingly large amounts of digital spatial data available. Spatial analytical techniques derived from Geography and Remote Sensing are used to search, and refine these large amounts of data to produce timely, relevant information. This module provides a broad introduction to both the vector and raster analytical methods commonly in used within Spatial Information Systems.

Raster based Analysis - advanced computer enhancements of raster data; radiometric rectification and spectral transformations of remotely sensed raster data; classification of Raster data; classification by unsupervised techniques; supervised classification using spectral techniques; supervised classification using non-spectral decision Rules; surface analysis of Raster Data. Vector based Analysis - point methods, clustering techniques; line methods, network analysis; area methods, overlay analysis. Analysis of Error

*assessment:* essay 20%; project 35%; exam 45%

#### 3088 Spatial Data Visualisation

3 points semester 1  
20 hours lectures, 30 hours practicals, 20 hours to be advised

*prerequisites:* Introduction to Spatial Information Systems

Modern visualisation techniques are increasingly used to explore and analyse spatial data as well as their more traditional role of distributing spatial information. The initial aim of the module is to provide students with a high level of cartographical knowledge and the

computing skills to produce high quality graphical and cartographical output from SIS. This knowledge can then be used within an analytical framework to explore, summarise and analyse large spatial databases (e.g. 1996 Census). Topics include - cartographic communication and cartographic design; cartographic and graphical methods for spatial analysis; graphical interface design; integration of Internet and GIS technologies; and distributing spatial information.

*assessment:* essay 20%; project 35%; exam 45%

### elective subjects

#### 2445 Advanced Raster Analysis

3 points semester 2

20 hours lectures, 30 hours practicals, 20 hours to be advised

*prerequisites:* core subjects

This unit carries on from the work commenced in Introduction to Remote Sensing. Topics include: advanced computer enhancements of image data; image data radiometric rectification; image data spectral transformations; image data classification by unsupervised techniques; supervised classification using spectral techniques; inclusion of texture; supervised classification using non-spectral decision Rules, inclusion of GIS data in supervised classification, role of neural networks in supervised classification; integration of raster and vector GIS in remote sensing.

*assessment:* essay 25%; project 50%; presentation 25%

#### 2523 Field Sampling Techniques

3 points semester 2

10 hours tutorials, 20 hours to be advised, 30 minute presentation

*prerequisites:* core subjects

Syllabus details to be advised

#### 2833 New Technologies in Geographical Information Systems

3 points semester 2

20 hours lectures, 30 hours practicals, 20 hours to be advised

*prerequisites:* core subjects

GIS as a science has evolved from experiments with computer cartographic modelling in the 1960/70's to a discipline now encompassing developments such as, spatial data analysis using artificial intelligence techniques, immersive visualisation and distributed networking strategies. Technology has been the driving

influence in this discipline and this module will explore these newer technologies to gauge their impact on the discipline. Lectures will provide theory and context for these areas: artificial intelligence, visualisation and information retrieval strategies. Practicals will focus on developing software solutions for one of these three computing domains.

*assessment:* essay 25%; project 50%; exam 25%

#### 9342 Social Applications in Geographical Information Systems

3 points semester 2

20 hours lectures, 30 hours practicals, 20 hours to be advised

*prerequisites:* core subjects

There are an increasing number of large complex digital data sets of relevance to social scientists be they working in an academic, governmental or commercial environment. Because of their complex derivation and nature, these data sets require a high level of skill and a detailed level of knowledge to be used intelligently. The aim of this course is to provide these skills and knowledge.

This subject will cover the following three major areas - introduce the student to the main types of large scale data sets commonly available to social scientists e.g. the various Census data sets (CDATA96), the Cadastral database for South Australia (DCDB), Medical data sets from the Health Commission; identify the limitations and problems associated with using these datasets. Introducing their implications to different types of analysis; introduction and practical application of the main spatial methodologies used to interrogate and analysing these data sets.

*assessment:* essay 25%; project 50%; exam 25%

### research subjects

#### 9137 Dissertation (SIS) F/T

12 points semester 1 or 2

or

#### 8147 Dissertation (SIS) P/T

12 points full year

10 hours tutorials, 20 hours to be advised, 30 minute presentation

Syllabus details to be determined in consultation with supervisors

## Doctor of Letters

### Regulations

- 1
  - (a) The Faculty of Arts may accept as a candidate for the degree of Doctor of Letters a person who has qualified for any degree in The University of Adelaide.
  - (b) On the recommendation of the Faculty of Arts, the Board of Graduate Studies acting with authority wittingly devolved to it by Council may accept as a candidate for the degree a person who (i) has obtained in another university or institution of higher education a qualification accepted for the purpose by the University as equivalent to a degree of the University and (ii) has, or has had, a substantial association with the University.
  - (c) No person may be admitted to the degree of Doctor of Letters before the expiration of five years from the date on which he or she obtained the qualification prescribed in (a) or (b)(i) above.
- 2
  - (a) A person who desires to become a candidate for the degree shall give notice of his intended candidature in writing to the Registrar and with such notice shall furnish particulars of his or her scholarly achievements and of the work which he or she proposes to submit for the degree.
  - (b) The Faculty of Arts shall examine the information submitted and decide whether or not to allow the applicant to proceed.
  - (c) If the Faculty accepts the candidature it shall nominate examiners, of whom two at least shall be external examiners.
- 3
  - (a) To qualify for the degree the candidate shall furnish satisfactory evidence that he or she has made an original and substantial contribution of distinguished merit to the knowledge or understanding of any subject with which the Faculty is directly concerned.
  - (b) The degree shall be awarded primarily on a consideration of such of his or her published works as a candidate may submit for examination, but the examiners may take into account any unpublished original work that he or she may submit in support of his or her candidature.
  - (c) The candidate in submitting his or her work shall, where applicable, state generally in a preface and specifically in notes the main sources from which his or her information is derived and the extent to which he or she has availed him or herself of the work of others, especially where joint publications are concerned. He or she may also signify in general terms the portions of his or her work which he or she claims as original.
  - (d) The candidate shall indicate what part, if any, of his or her works has already been submitted for a degree in this or any other university.
- 4 The candidate shall lodge with the Registrar three copies of the works submitted for the degree, any unpublished work being prepared in accordance with the directions given in sub-paragraph (b) of clause 2B of Chapter XXV of the Statutes. If the work is accepted for the degree the Registrar will transmit two of the copies to the University Library.
- 5 A candidate who complies with the foregoing conditions and satisfies the examiners may, on the recommendation of the Faculty of Arts, be admitted to the degree of Doctor of Letters.
- 6 Notwithstanding anything contained in the preceding regulations, the Faculty may recommend the award of the degree to any person who is not a member of the staff of the University. Any such recommendation must be accompanied by evidence that the person for whom the award is proposed has made an original and substantial contribution of distinguished merit to the knowledge or understanding of a subject with which the Faculty is directly concerned, of a standard not less than that required by regulation 3.

Regulations allowed 16 December, 1971.

Amended 15 January, 1976: 6. 21 Feb. 1991: 1(b).

## Regulations

### Of Awards in the Faculty of Dentistry

- 1 In the Faculty of Dentistry there shall be the following awards:

Diploma in Dental Therapy  
Ordinary degree of  
Bachelor of Dental Surgery  
Honours degree of  
Bachelor of Science in Dentistry  
Graduate Certificate in Dentistry  
Graduate Diploma in Clinical Dentistry  
Graduate Diploma in  
Forensic Odontology  
Master of Dental Surgery  
Master of Dental Surgery  
(Community and Preventive Dentistry)  
Master of Dental Surgery  
(Dento-Maxillo-Facial Radiology)  
Master of Dental Surgery  
(Endodontics)  
Master of Dental Surgery  
(Forensic Odontology)  
Master of Dental Surgery  
(General Dental practice)  
Master of Dental Surgery  
(Gerodontics)  
Master of Dental Surgery  
(Oral and Maxillo-Facial Surgery)  
Master of Dental Surgery  
(Oral Pathology)  
Master of Dental Surgery  
(Orthodontics)  
Master of Dental Surgery  
Paediatric Dentistry)  
Master of Dental Surgery  
(Periodontics)  
Master of Dental Surgery  
(Prosthodontics)

Master of Dental Surgery  
(Tropical Oral Pathology)  
Master of Science in Dentistry  
Doctor of Dental Science

- 2 The courses for the awards listed in Regulation 1 shall be governed by the General Course Rules and Specific Course Rules that the Council shall prescribe from time to time.
- 3 The syllabuses of subjects shall be specified by the Council.

Regulations effective from 1 August 1994.

Regulations amended 8 February 1996, 20 February 1997.

note (not forming part of the Regulations)

- 1 Council has delegated the power to approve minor changes to the General Course Rules to the Convenor of the Academic Board.
- 2 Council has delegated the power to approve minor changes to the Specific Course Rules to the Deans of Faculties.
- 3 Council has delegated the power to specify syllabuses to the Head of each department or centre concerned, such syllabuses to be subject to approval by the Faculty or by the Dean on behalf of the Faculty. The Head of department or centre and the Principal of the School of Dental Therapy may approve minor changes to any previously approved syllabus.
- 4 The Faculty also offers a Doctor of Dental Science (D.D.Sc.). Higher doctorates are governed by their own sets of Regulations as printed in this volume of the Calendar.

# Diploma in Dental Therapy

## Specific Course Rules

### 1. Admission requirements

- 1.1 Applicants shall, unless exempted by the Faculty, have satisfied the University's admission requirements under the South Australian Certificate of Education or the equivalent.
- 1.2 Applicants shall, in addition to meeting the admission requirements in 1.1 above, satisfactorily participate in a selection interview conducted by the Course Selection Committee appointed by Faculty.
- 1.3 The Faculty may accept as a candidate for the course an applicant who does not satisfy the requirements for admission under 1.1 above but who satisfies the Course Selection Committee of fitness to undertake work for the Diploma.

### 2. Approval of enrolment

The following students must have their course of study approved by the Dean or nominee at the time of enrolment in the year concerned:

- (a) students who have been granted or are seeking status or exemption from these Rules under section 1.4.20 of the General Course Rules
- (b) students who are repeating a subject or subjects; such students may be required to resume at a point in the course and/or undertake such additional or special program of study as the Dean of Faculty deems appropriate
- (c) students who have obtained permission from the Faculty to intermit their course for reasons approved in each case.

### 3. Duration of the course

The course of study for the Diploma in Dental Therapy shall extend over two years of full-time study.

### 4. Course of study

To qualify for the Diploma a candidate shall regularly attend lectures, tutorials and clinical practice, do written and laboratory or other practical work to the satisfaction of the Principal of the School of Dental Therapy and pass the prescribed examinations.

The following are the subjects of study for the First Annual Therapy Examination:

- 2895 Dental Sciences IT
- 3284 Clinical Dentistry IT
- 1352 Applied Clinical Practice IT
- 4399 Social and Preventive Dentistry IT

### 3896 First Annual Therapy Examination

The following are the subjects of study for the Second Annual Therapy Examination:

- 8442 Dental Sciences IIT
- 7964 Clinical Dentistry IIT
- 3005 Applied Clinical Practice IIT
- 7228 Social and Preventive Dentistry IIT

### 9209 Second Annual Therapy Examination

### 5. General

A candidate shall satisfactorily complete each annual examination before entering upon the work of the following year's course of study provided that:

- (a) A candidate shall enrol in all clinical streams of the year undertaken and shall enrol in any other subjects that the Faculty mandates. Except by permission of the Faculty the candidate may not enrol concurrently for any additional subjects from the following year
- (b) A candidate may begin the first semester's work in the following year's course of study pending the result of any supplementary examination for which the candidate has been permitted to present
- (c) A supplementary examination shall not be awarded on academic grounds if the student has achieved an aggregate score of less than 36%
- (d) The annual examination at the end of the second year shall be known as the Final Examination. In exceptional circumstances a candidate's results in the Final Examination may be withheld if the candidate's performance in the required clinical work is considered unsatisfactory by the Board of Examiners. In such a case, the candidate will be required to complete satisfactorily such additional work as the Head of the Department may recommend to the Board of Examiners.

## **6. Status and exemption**

- 6.1 No candidate may be granted more than 24 points of status toward the Diploma for other studies undertaken in the University or other institution.
- 6.2 A candidate who has previously passed subjects or whose employment has included appropriate clinical experience may, on written application to the Dean, be exempted from part of the requirements of a subject.

## **7 Assessment and examinations**

- 7.1 There shall be four classifications of pass in the final assessment of any subject for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass. The Pass result in the Annual Therapy Examinations shall be Non-Graded.
- 7.2 In determining a candidate's final result in a subject (or part of a subject) the examiners may take into account oral, written, clinical, practical and examination work.
- 7.3 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the academic staff concerned.
- 7.4 A candidate who fails a subject shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that subject to the satisfaction of the teaching staff concerned. Such a candidate may be required to attend concurrently such lectures, clinical practice, laboratory and other practical work as the Faculty may prescribe, in other subject(s) of an annual examination.
- 7.5 A candidate who has twice failed the examination in any subject for the Diploma may not enrol for that subject again except by special permission of the Faculty and then only under such conditions as Faculty may prescribe.

## Syllabuses

### Proficiency in English

Experience has shown that students who do not have a good ability to communicate in spoken and written English have difficulties with this course. For the following syllabus items, proficiency in English is assumed.

#### First Year

##### 1352 Applied Clinical Practice IT

12 points full year

63 lecture hours, 423 practical hours

*corequisite:* 3284 Clinical Dentistry IT

Applied Clinical Practice contains two components: Clinical Practice I and Operative Techniques, and provides the opportunity to integrate theoretical practice and practical skills with a rationale and philosophy for effective contemporary dental practice.

*assessment:* Clinical Practice (about 20% of subject) - written and practical assignments; Operative Techniques (about 80%) - summation of a continuing assessment of practical work throughout the year. Students must pass all components to pass the subject

##### 3284 Clinical Dentistry IT

12 points full year

202 lecture hours, 5 tutorial hours, 84 practical hours

Clinical Dentistry IT contains three components: Dental Anatomy, Operative Dentistry and Dental Radiography and provides the theory and background information essential to the development of knowledge, practices and attitudes which enable effective practice of restorative dentistry for children and adolescents.

*assessment:* assignments, exams, radiography practical; assessment reflects likely contribution of each component to subject - Dental Anatomy 10%, Dental Radiography 30%, Operative Dentistry 60%. Students must pass all components to pass the subject

##### 2895 Dental Sciences IT

3 points full year

93 lecture hours, 51 tutorial hours, 13 practical hours, 7 case study hours

Dental Sciences contains components of Histology, Anatomy and Physiology, General and Oral Pathology and Microbiology, and provides the biological grounding upon which the practice of dentistry rests. It is an introduction to the anatomy and physiology of the human body and in particular the teeth and oro-facial

regions, and involves the study of diseases of the teeth and their supporting tissues..

*assessment:* assignments, semester exams - assessment reflects likely contribution to subject to subject: Histology 10%, Anatomy and Physiology 45%, General and Oral Pathology and Microbiology 45%. Students must pass all components to pass the subject

##### 4399 Social and Preventive Dentistry IT

3 points full year

111 lecture hours, 25 seminar hours, 32 practical hours

Social and Preventive Dentistry contains the components of community health and awareness; dental disease; prevention of dental disease; and dental health education: theory and practice. This subject provides an introduction to the complex interrelationships of attitudes, behaviours and requirements which impact on the health professional, client and the community in the maintenance of general and dental health. The types and etiologies of dental disease are introduced in this subject with a strong focus on the methods of prevention and control of these diseases. Dental Health Education: Theory and Practice is designed to develop knowledge and skills in the practice of teaching.

*assessment:* assignments, semester exams - assessment reflects likely contribution of each component to subject: Social Health and Oral Health Promotion 30%, Dental Diseases 20%, Prevention of Dental Diseases 35%, Dental Health Education: Theory and Practice 15%. Students must pass all components to pass the subject

#### Second Year

##### 3005 Applied Clinical Practice IIT

12 points full year

52 lecture hours, 3 tutorial hours, 6 seminar hours, 63 practical hours, 18 case study hours, 651 clinical hours

*prerequisites:* 1352 Applied Clinical Practice IT and 3284 Clinical Dentistry IT

Applied Clinical Practice IIT contains components of Clinical Practice II, Clinical Radiography and Clinical Dentistry (Practical). It provides formalisation of knowledge and skills gained in Applied Clinical Practice IT, incorporates clinical statistics and field experience, and makes provision for students to align this knowledge and skill within the policies of the SA Dental Service.

*assessment:* assignments, tutorials, patient presentations. continuous clinical assessment. Assessment reflects the likely contribution of each component to subject: Clinical Practice II 20%,

Clinical Radiography 10%, Clinical Dentistry Practical 70%. Students must pass all components to pass the subject

### **8442 Dental Sciences IIT**

3 points full year

82 lecture hours, 20 tutorial hours, 4 practical hours

*prerequisite:* 2895 Dental Sciences IT

Dental Sciences IIT contains components of Applied Oral Pathology, Medicine and Pharmacology and Applied Oral Anatomy, and instructs students in aspects of diagnosis and management of pathological conditions, medicine, pharmacology and anatomy which relate to the delivery of dental care.

*assessment:* tests, case presentations, exams - likely contribution of components: Applied Oral Pathology 35%, Applied Oral Anatomy 5%, Medicine and Pharmacology 60%. Students must pass all components to pass the subject

### **7964 Clinical Dentistry IIT**

3 points full year

66 lecture hours, 9 tutorial hours, 9 practical hours, 15 seminar hours

*prerequisites:* 3284 Clinical Dentistry IT and 1352 Applied Clinical Practice IT

Clinical Dentistry IIT contains components Clinical Dentistry (Theory), Orthodontics and Periodontology and develops and applies the principles of restorative dentistry, periodontal disease and orthodontics gained in Clinical Dentistry IT.

*assessment:* assignments, case presentations, exams - assessment reflects likely contribution of each component to subject: Clinical Dentistry (Theory) 60%, Orthodontics 20%, Periodontology 20%. Students must pass all components to pass the subject

### **7228 Social and Preventative Dentistry IIT**

6 points full year

94 lecture hours, 25 tutorial hours, 15 seminar hours

*prerequisites:* Social and Preventative Dentistry IT

Social and Preventative Dentistry contains the components of Developmental Psychology, Communication, Sociology, Sociology of Health, Epidemiology and Biostatistics and Dental Public Health. The subjects focus on specific areas which are designed to promote personal and professional awareness and development, complementing and enhancing clinical experience and future professional dental therapy practice. Students are introduced to health analysis and assessment, concentrating on dental health principles and policies. The social and

behavioural sciences components have been designed to develop awareness and understanding of the knowledge associated with the various psychological and sociological influences implicated in human behaviour. Emphasis is placed on the provision of care in an interpersonal setting and on the requirement for developing effective interpersonal skills.

*assessment:* assignments, semester exams - assessment reflects likely contribution of each component to subject: Developmental Psychology 25%, Communication 10%, Sociology of Health 15%, Dental Public Health 30%, Epidemiology and Biostatistics 10%, Sociology 10%. Students must pass all components to pass the subject

## Bachelor of Dental Surgery

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Assessment and examinations

- 1.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the academic staff concerned.
- 1.2 In determining a candidate's final result in a stream (or part of a stream) the examiners may take into account oral, written, clinical, practical and examination work, provided that the candidate has been given adequate notice at the commencement of the teaching of the stream of the way in which work will be taken into account and of its relative importance in the final result.
- 1.3 There shall be four classifications of pass in the final assessment of any stream for the Ordinary degree, as follows: Pass with High Distinction, Pass with Distinction, Pass with Credit, Pass.
- 1.4 (a) A candidate who fails a stream shall, unless exempted wholly or partially therefrom by the Head of the Department concerned, again complete the required work in that stream to the satisfaction of the teaching staff concerned. Such a candidate may be required to attend concurrently such lectures, clinical practice, laboratory and other practical work as the Faculty may prescribe, in other streams of annual examination.
- (b) Except in the case of the First Annual Examination, a candidate who is exempted from part of any stream shall not be granted a classified pass in that stream.
- 1.5 A candidate who has twice failed the examination in any stream for the Ordinary degree may not enrol for that stream again or for any other stream which in the opinion of the Faculty contains a substantial amount of the same material, except by special permission of the Faculty and then only under such conditions as Faculty may prescribe.

#### 2 Course of study

##### 2.1 Duration of course

The course of study for the degrees of Bachelor of Dental Surgery, unless otherwise approved by the Council on the recommendation of the Faculty, shall extend over five years of full-time study.

A candidate may interrupt his or her studies for the course:

- (a) for the purpose of proceeding to the Honours degree of Bachelor of Science in Dentistry *or*
- (b) for such period and on such conditions as may in each case be determined by the Faculty.

Students wishing to interrupt their studies in accordance with 1.2 above must apply through the Registrar for permission and obtain beforehand the approval of the Dean on behalf of the Faculty for leave of absence for a defined period.

A student who leaves the course without approval or who extends leave of absence beyond the time period approved by the Dean shall be deemed to have withdrawn his or her candidature for the degree but shall be permitted to reapply for admission to the course in accordance with the procedures in operation at the time.

Students who have interrupted their studies in the prescribed subjects may be required to resume at such a point in the course and/or to undertake such additional or special program of study as the Dean of the Faculty deems appropriate.

##### 2.2 Approval of enrolment

The following students must have their courses approved by the Dean or nominee at the time of enrolment in the year concerned:

- (a) students who have been granted or are seeking status or exemption from these Rules under section 1.4.20 of the General Course Rules
- (b) students who are repeating a stream or streams; such students may be required to resume at a point in the course and/or undertake such additional or special program of study as the Dean of Faculty deems appropriate.
- (c) students who have obtained permission from the Faculty to intermit their course, either to proceed to the Honours degree of Bachelor of Science in Dentistry, or for other reasons approved in each case.

## 2.3 Lectures, practical work, clinical instruction

The course for the degree of Bachelor of Dental Surgery shall extend over five years. To qualify for the degree a candidate shall regularly attend lectures, tutorials and clinical practice, do written and laboratory or other practical work to the satisfaction of the academic staff concerned, and pass the prescribed examinations. Students shall attend at clinics of the South Australian Dental Service and other teaching hospitals and health centres as required for their clinical instruction.

### 2.3.1 Curriculum

#### First Year:

During the first year every student shall attend courses of instruction in: (a) Human Biology, (b) General Studies, (c) Dental and Health Science, (d) Dental Clinical Practice.

#### Second Year:

During the second year every student shall attend courses of instruction in: (a) Structure and Function of the Body, (b) General Studies, (c) Dental and Health Science, (d) Dental Clinical Practice.

#### Third Year:

During the third year every student shall attend courses of instruction in: (a) Diseases and Disorders of the Body, (b) Dental and Health Science, (c) Dental Clinical Practice.

#### Fourth Year:

During the fourth year every student shall attend courses of instruction in: (a) Selectives, (b) Dental and Health Science, (c) Dental Clinical Practice.

#### Fifth Year:

During the fifth year every student shall attend courses of instruction in: (a) Selectives, (b) Dental and Health Science, (c) Dental Clinical Practice.

## 3 Subjects of study

### 3.1 Curriculum

#### 3.1.1 5770 First Annual Examination

At the First Annual Examination the candidate shall satisfy the examiners in each of the following streams:

7713 Dental and Health Science I

2839 Dental Clinical Practice I

8471 General Studies ID

6700 Human Biology ID

#### 3.1.2 6626 Second Annual Examination

At the Second Annual Examination the candidate shall satisfy the examiners in each of the following streams:

1145 Dental and Health Science II

1421 Dental Clinical Practice II

5453 General Studies IID

3567 Structure and Function of the Body IID

#### 3.1.3 9494 Third Annual Examination

At the Third Annual Examination the candidate shall satisfy the examiners in each of the following streams:

7413 Dental and Health Science III

4450 Dental Clinical Practice III

9310 Diseases and Disorders of the Body IIID

#### 3.1.4 9097 Fourth Annual Examination

At the Fourth Annual Examination the candidate shall satisfy the examiners in each of the following streams:

1448 Dental and Health Science IV

4978 Dental Clinical Practice IV

7571 Dental Selectives IV

#### 3.1.5 6753 Fifth Annual (Final) Examination

At the Fifth Annual Examination the candidate shall satisfy the examiners in each of the following streams:

9983 Dental and Health Science V

7137 Dental Clinical Practice V

5181 Dental Selectives V

### 3.2 General

A candidate shall complete each annual examination before entering upon the work of the following year's course of study provided that:

(a) A candidate shall enrol in all clinical streams of the year undertaken and shall enrol in any other streams that the Faculty mandates. Except by permission of Faculty the candidate may not enrol concurrently for any additional streams from the following year.

(b) A candidate may begin the first semester's work in the following year's course of study pending the result of any supplementary examination for which the candidate has been permitted to present.

(c) A candidate shall not be re-examined at a supplementary examination in any stream previously passed at the annual

examination. A supplementary examination shall not be awarded on academic grounds in any stream where the student obtained an aggregate score of 35% or less.

- (d) The annual examination at the end of the fifth year shall be known as the Final Examination. In exceptional circumstances a candidate's results in the Final Examination may be withheld if the candidate's performance in the required clinical work is considered unsatisfactory by the Board of Examiners. In such a case, the candidate will be required to complete satisfactorily such additional work as the Head of the Department may recommend to the Board of Examiners.

#### **4 Rules for the admission of dental students to the practice of the South Australian Dental Service and other teaching hospitals and health centres**

- 4.1 Each dental student of the University of Adelaide shall attend clinics of the South Australian Dental Service, or other teaching hospitals or health centres, as directed by the Dean of the Faculty of Dentistry; and each student shall be admitted to the practice of the South Australian Dental Service or other teaching hospitals or health centres under the disciplinary control of the Chief Executive Officer, in the case of the former, or the Medical Superintendent or Director, in the case of the latter, whilst in attendance.
- 4.2 No student may introduce visitors into any of the said clinics, hospitals or health centres without permission of the above designated officers.
- 4.3 Students shall conduct themselves with propriety and discharge the duties assigned, and pay for or replace any article damaged, lost or destroyed by them together; and make good any loss sustained by their negligence.
- 4.4 Each student shall at all times be under the direction and supervision of a duly appointed member of the teaching staff of the University of Adelaide, or a person who has been granted appropriate University status, and shall carry out such work as shall be allotted
- 4.5 No student shall administer treatment to any patient without the approval of an appointed teacher.
- 4.6 Except in the performance of the associated clinical duties, no student may disclose any information whatsoever concerning a patient

without the permission of both the patient and the Senior Dental or Medical Officer in charge.

- 4.7 No student shall publish a report on any case without the written permission of the Chief Executive Officer in the case of the South Australian Dental Service, or the Medical Superintendent or Director in the case of teaching hospitals or health centres, and the Senior Dental or Medical Officer under whose care the patient is or has been.
- 4.8 No student shall communicate directly to the press, radio or television any matter concerning the clinical practice of the institution to which that student is attached
- 4.9 Students shall pay such fees as are laid down by the South Australian Dental Service in consultation with the Dean, Faculty of Dentistry; no student shall be admitted to clinics until such fees are paid.
- 4.10 Misconduct or infringement of any of these rules, may lead to temporary suspension by the Chief Executive Officer, South Australian Dental Service, or the Medical Superintendent or Director, other teaching hospitals or health centres. In the case of such temporary suspension, written notice shall immediately be given to the Dean of the Faculty of Dentistry.

## Syllabuses

### proficiency in English

Experience has shown that students who do not have a good ability to communicate in spoken and written English and do not have a background in Year 12 PES Physics and Chemistry will have difficulties with the course. Proficiency in English and a background knowledge of Year 12 PES Physics and Chemistry are assumed.

### 5770 First Annual Examination

#### 7713 Dental and Health Science I

7 points full year

7 hours per week, including class meetings, learning laboratories and tutorials

*corequisites:* 2839 Dental Clinical Practice I

This stream aims to emphasise the scientific basis of dentistry; to highlight new developments and to outline important ethical issues in the health professions; to describe the normal appearance of the oral soft tissues, the morphology and development of the teeth and main features of the masticatory system as a basis for the study of oral health and disease; to discuss the aetiology and prevention of the common dental diseases at both the individual and the community level; to introduce students to behavioural sciences and psychology applied to dentistry; to provide exposure to career roles and begin an examination of contexts in which a dentist works. A number of problem-based dental learning packages are provided in this stream to give a context to student learning.

Topics include: history and philosophy of dentistry; oral surface features; morphology of the teeth; tooth emergence and calcification; introduction to dental occlusion, radiographic anatomy; culture, health and disease; nature and distribution of dental diseases; preventive dentistry; fear and anxiety in dentistry; management and motivation of dental patients; dentist-patient communication; behavioural consequences of oral diseases; community dental health issues; dental education and the shaping of the professional; the professional environment; the dentist's role - past and present; career pathways; adaptation to change and the possible future for dentistry.

*assessment:* assignments, short tests, trial test, practical exercises, short answer problem based exam, interview

*prescribed texts:* Townsend GC & Winning T *Dental and Health Science I Manual* Department of Dentistry  
Locker D *An Introduction to Behavioural Science and Dentistry* (Tavistock/Routledge); Harris NO & Christen AG *Primary Preventive Dentistry* 4th edn (Appleton and Lange)

### 2839 Dental Clinical Practice I

7 points full year

7 hours per week including clinical, practical sessions

*corequisites:* 7713 Dental and Health Science I

This stream aims to give students a broad understanding of dentistry at clinical ancillary, technical and office management levels. Skills will be developed in various technical and clinical areas.

Topics include: clinical examinations; records and recording; operative hazards; instruments, sterilisation and maintenance; infection and moisture control; dental impressions; mouthguards; dental radiology; diagnostic procedures; preventive dentistry: fluorides sealants, diet and plaque control; manipulation and assessment of commonly used dental materials; introduction to periodontics; prophylaxis and simple scaling; minimal intervention dentistry.

*assessment:* assignments, clinical and laboratory assessment, workbooks and exam each semester. More details will be given in the Clinical Practice Workbook

*prescribed texts:* Harris NO & Christen AG *Primary Preventative Dentistry* 4th edn (Appleton and Lange); Roberts-Thomson K & Hirsch R *Clinical Practice I Workbook* Department of Dentistry

### 8471 General Studies ID

3 points full year

3 hours per week

*corequisites:* 7713 Dental and Health Science I

This stream includes units that will be made available to students during first and second years.

Aspects of basic physics: the aspects of basic physics forming the prerequisite knowledge for the major streams in the BDS course.

Aspects of basic chemistry: the aspects of basic chemistry forming the prerequisite knowledge for the major streams in the BDS course.

Biostatistics: provides students with an appreciation of the nature and scope of statistics applied to biological problems (biostatistics) as well as a working knowledge of basic statistics, including presentation, interpretation and analysis of data.

Computing: provides students with a basic understanding of computers and computing with particular reference to the needs of dental students and dentists.

Communication and learning: introduces students to the educational philosophy of the BDS course and emphasises the needs to be proficient in communication skills.

Research methodology: gives students an appreciation of research methodology and to develop the skills needed to access and critically review scientific literature effectively, particularly literature relating to clinical dentistry.

Social context of dentistry: aims to provide an understanding of the diversity of the Australian community and how that diversity influences the process of dental care and oral health outcomes.

assessment: students advised of assessment modes at beginning of the stream. Students must demonstrate proficiency in each unit. An assessment of English communication proficiency is included

*prescribed texts:* to be advised

### 6700 Human Biology ID

7 points full year

7 hours per week, including class meetings, practical sessions, research-based laboratory sessions, tutorials

This stream aims to provide an overview of the biology of the human species including an evolutionary perspective of the vertebrate, especially the human, masticatory system, to provide students with a basic knowledge of classical and molecular genetics and to indicate where this knowledge is applicable to dentistry, to provide an introduction to cell biology and to the anatomy of the human body at the gross and histological levels, and to provide an integrated coverage of the anatomy and physiology of selected body systems.

Topics include: human evolution including evolution of head form, human adaptability, essentials of body chemistry, introduction to the human body and its organisation, cell structure and function, tissue histology, heredity and variation, genes and chromosomes, linkage, molecular organisation of chromosomes, genetic structure and variation of human populations, genetic engineering, structure and function of the skeletal and neuromuscular systems, skin and sense organs.

*assessment:* see First Year Mouth Book

*prescribed texts:* Titora GJ & Grabowski SR *Principles of Anatomy and Physiology* 8th edn (Harper and Rowe or Martini *Fundamentals of Anatomy and Physiology* 3rd edn; Ross MH Romrell LJ & Kaye GI (1995) *Histology: A Text and Atlas*, 3rd edn (Williams & Wilkins) Sherwood LS *Human Physiology: From Cells to Systems* (West); Genetics text to be advised

## 6626 Second Annual Examination

### 1145 Dental and Health Science II

7 points full year

7 hours per week including class meetings, learning laboratories, tutorials

*prerequisites:* 7713 Dental and Health Science I

*corequisites:* 1421 Dental Clinical Practice II

This stream aims to provide students with a detailed understanding of the embryology and histology of the dento-facial structures; to provide a basic understanding of the biochemistry of the human body with particular reference to the oral cavity; to develop an appreciation of the scientific aspects of clinical dentistry including functioning of the masticatory system and the importance of occlusion in all branches of dentistry; to develop further appreciation of behavioural science in dentistry.

Topics include: embryology of face; odontogenesis including enamel and dentine formation; histology of the oral tissues; dental caries; the structural basis of biochemistry; principles of nutrition; molecular organisation - including bioenergetics and the principles of metabolism; the integration and control of metabolism; hormones and growth factors; the biochemistry of soft tissues - including blood, epithelium and connective tissue; the biochemistry of calcified tissues - bone, dentine, cementum and enamel; the oral environment - including saliva, gingival crevicular fluid and dental plaque; development of occlusion; occlusal variation; orofacial sensation; masticatory function; aspects of behavioural science. A number of problem-based dental learning packages are provided in this stream to give a context to student learning.

*assessment:* tests, written exam, performance in tutorials and learning laboratories, project

*prescribed texts:* Ten Cate AR *Oral Histology* (Mosby); Cole AS & Eastoe JE *Biochemistry and Oral Biology* (Wright); Champe and Harvey, *Lippincott's Illustrated Reviews Biochemistry* 2nd Ed., JB Lippincott Co 1994; Lehninger, Nelson and Cox (1993) *Principles of Biochemistry*, 2nd Ed. Worth, New York.

### 1421 Dental Clinical Practice II

7 points full year

12 hours per week including clinical, practical, resource sessions

*prerequisites:* 2839 Dental Clinical Practice I

*corequisites:* 1148 Dental and Health Science II

This subject builds upon 2839 Dental Clinical Practice I with regard to the acquisition and consolidation of

dental clinical skills. Experience will be gained in patient management emphasising communication and behaviour management, clinical examination procedures and diagnostic methods before working with selected patients of the SA Dental Service.

Topics include: clinical assessment and recording of dental health data; diagnosis; introductory treatment planning; obtaining intra-oral radiographs; preventative regimes; basic restorative dentistry; properties of commonly used dental materials; introduction to management of emergencies; introduction to gingival and periodontal conditions; introduction to local anaesthesia.

*assessment:* practically (laboratory and clinic); academically (assignments and examinations). Details given in the Dental Clinical Practice Manual

*prescribed texts:* Schwartz RS, Summitt JB & Robbins JW *Fundamentals of Operative Dentistry A Contemporary Approach* (Quintessence) 1996; Whaites *Essentials of Dental Radiography and Radiology* (Churchill Livingstone). Other texts to be advised.

### 5453 General Studies IID

3 points full year  
3 hours per week

*prerequisites:* 8471 General Studies ID

As for 8471 General Studies ID. The units in this stream are available to students during both the first and second years of the course.

*assessment:* to be advised

*prescribed texts:* to be advised

### 3567 Structure and Function of the Body IID

7 points full year

7 hours per week, including class meetings, practical sessions, research-based laboratory sessions, tutorials

*prerequisites:* 6700 Human Biology ID

This stream aims to provide: an integrated coverage of the anatomy and physiology of selected body systems; a detailed description of the gross topographical anatomy of the head and neck emphasising aspects of functional and clinical importance; a description of the anatomy of the central nervous system.

Topics include: structure and function of the alimentary, cardiovascular, respiratory, lymphoid, endocrine and renal systems; detailed osteology of the skull; applied anatomy of face and scalp, infratemporal region, temporomandibular joints, pterygopalatine fossa, submandibular region, pharynx, larynx, cranial nerves; central nervous system; sensory and motor pathways; autonomic nervous system; blood supply of

the brain; anatomy related to local anaesthesia in dentistry.

*assessment:* advised at the beginning of the stream - includes written exams, case scenarios, problem-based learning

*prescribed texts:* Sherwood L *Human Physiology: From Cells to Systems* (West); Ross MH et al (1995) *Histology: a Text and Atlas* 3rd edn (Williams & Wilkins); Snell RJ *Clinical Neuroanatomy for Medical Students* 3rd edn (Little Braun & Co); Johnson DR & Moore WJ *Anatomy for Dental Students* 2nd edn (OUP)

## 9494 Third Annual Examination

### 7413 Dental and Health Science III

6 points full year

7 hours per week (approx)

*prerequisites:* 1145 Dental and Health Science II

*corequisites:* 4450 Dental Clinical Practice III

This stream aims to: describe the normal functioning of the masticatory system, the importance of occlusion and the characteristics of an optimal occlusion, describe the morphological and functional changes that occur in the masticatory system as a result of normal growth and ageing, and the adaptability of the system to these changes; emphasise the importance of occlusion in all branches of dentistry and consider the methods available for diagnosis and treatment of disorders of the masticatory system; consider the causes and effects of disease and stress on the masticatory system; describe human growth and development with particular emphasis on aspects relevant to dentistry; provide an introduction to aspects of orthodontic examination diagnosis and treatment. A number of problem-based dental learning packages are provided in this stream to give a context to student learning.

Topics include: orofacial sensation, jaw muscles and receptors; jaw reflexes, mastication and swallowing, temporomandibular joint function and loading, parafunction, occlusal therapy, concepts of physical growth and development, methods for studying growth, factors affecting growth, development of the skull, factors affecting normal dento-facial growth, indices of maturation, facial aesthetics, normal changes in dental arch form, aetiology of orthodontic problems.

*assessment:* short tests, general review, practical exercises, problem-based written examination

*prescribed texts:* Mohl ND et al (1988) *A Textbook of Occlusion* (Quintessence), Proffit WR (1993) *Contemporary Orthodontics* (Mosby).

#### 4450 Dental Clinical Practice III

12 points full year

14 hours per week, including class meetings, laboratory sessions and clinic sessions

*prerequisites:* 1421 Dental Clinical Practice II; 1145 Dental and Health Science II; 3567 Structure and Function of the Body II

*corequisites:* 7413 Dental and Health Science III

This stream builds upon Dental Clinical Practice II with regard to the consolidation of preventive, periodontal and restorative clinical skills, through manikin exercises and by provision of treatment for selected patients of the South Australian Dental Service. The pain control component of the stream covers local anaesthetic techniques. The stream includes a laboratory program in removable prosthodontics and in cast gold restorations. Clinical experience will be gained in removable prosthodontics and anterior endodontics.

Topics include: patient assessment for local anaesthesia, pharmacological aspects of local anaesthesia, basic principles of local anaesthesia; aspects of advanced restorative dentistry; treatment planning principles of preparation for indirect gold, resin and porcelain restorations; laboratory stages of cast gold restorations; bonding systems; philosophies and practices of removable partial denture prosthodontics; periodontics aetiology and treatment; pulpal, periapical and periradicular pathology; dental materials.

*assessment:* see Third Year Mouth Book

*prescribed texts:* see Third Year Mouth Book, other texts to be advised

#### 9310 Diseases and Disorders of the Body IIID

6 points full year

5 hours per week

*prerequisites:* 3567 Structure and Function of the Body II

This stream introduces students to pathology, microbiology, immunology and oral pathology in the context of human disease. The course aims to provide students with a detailed understanding of core pathological and immunological reactions that can occur and how such processes relate to clinical disease; to provide students with detailed knowledge of the structure and biology of bacteria, viruses and fungi and how these organisms relate to human disease states and processes; to provide a detailed understanding of the normal oral microflora and its relationship to oral health and specific dental diseases such as caries and periodontal disease; to provide a detailed

understanding of the processes of neoplasia and hyperplasia generally and in relation to the mouth.

Topics include: cell injury, acute and chronic inflammation, healing, the cellular composition and function of the normal immune system, immune system reactivity, immunological hypersensitivities; microbial physiology, metabolism and genetics; principles and practice of disinfection and sterilisation, antibiotic therapy, infection control; host-parasite relationships including mechanism of pathogenicity; bacterial, viral and fungal diseases of relevance in dentistry; the oral microbiota and its relation to caries and periodontal diseases; hyperplasia and oral hyperplastic lesions, HIV/AIDS, neoplasia and oral neoplasia.

*assessment:* advised at the beginning of the subject

*prescribed texts:* Slots, Taubman (1992) *Contemporary Oral Microbiology and Immunology* Marsh, Martin (1990) *Oral Microbiology* 3rd edn, or Schuster (1990) *Oral Microbiology and Infectious Diseases* 3rd edn; Regezi and Sciubba *Oral Pathology: Clinical-Pathologic Correlations* 2nd edn (W.B. Saunders); Lakhan, Dilly, Findlayson *Basic Pathology* 1993

#### 9097 Fourth Annual Examination

##### 1448 Dental and Health Science IV

8 points full year

Contact hours to be determined

*prerequisites:* 7413 Dental and Health Science III

*corequisites:* 4978 Dental Clinical Practice IV

This stream builds on knowledge gained in the first, second and third years in the Human Biology, Structure and Function of the Body, Diseases and Disorders of the Body and Dental and Health Science streams. It is closely integrated with Dental Clinical Practice IV.

The principal thrust of this stream is to provide an understanding of the interactions between general health, general disease and medical treatment with dental treatment. Topics to be presented will include: General and Oral Pathology; General Medicine; Pharmacology and Therapeutics; General Surgery; Social and Community Aspects of Health and Pain Control. Dental learning packages (DLP's) will be presented in coordination with the Dental Clinical Practice IV stream.

The stream aims to: provide a systematic overview of the clinical and other pathologic features of various diseases/lesions that may be encountered in the tissues of the oral region; describe the systemic diseases and disorders of the body of relevance to dentists; provide an appreciation of the principles of drug administration, distribution, action and elimination; provide instruction on important classes of drugs with emphasis on their modes of administration and action,

therapeutic uses, adverse effects and interactions; discuss the role of pharmacology and therapeutics in dental practice; discuss the management of medically compromised patients; provide an overview of surgery including knowledge of metabolic response to injury and shock, bleeding and transfusion and surgical infection; discuss social and community aspects of disease including the burden of illness, inequalities of health, determinants of health, health promotion, care and policy.

An understanding of the basic principles and clinical and microscopic features of disease is assumed, particularly: developmental disorders, inflammation, basic immunopathology, hyperplasia, neoplasia, degenerative disease, hormonal-metabolic disease, physiology, biochemistry and microbiology.

*assessment:* short tests, projects, dental learning packages and written examinations

*prescribed texts:* Little JW & Falace DA (1993) *Dental Management of the Medically Compromised Patient* Hardman JGG Gilman A & Limbird LL (1995); Neidle EA & Jagiela JA (1989) *Pharmacology and Therapeutics for Dentistry* 3rd edn (Mosby); Regezi JA & Sciubba JJ (1993) *Oral Pathology: Clinical-Pathologic Correlations* 2nd edn (Saunders).

#### 4978 Dental Clinical Practice IV

12 points full year

Contact hours to be determined

*prerequisites:* 4450 Dental Clinical Practice III

*corequisites:* 1448 Dental and Health Science IV

This stream builds upon previous years with regard to the acquisition and consolidation of dental clinical skills.

*assessment:* to be advised

*prescribed texts:* to be advised

#### 7571 Dental Selectives IV

4 points full year

Contact hours to be determined

*prerequisites:* 9494 Third Annual Examination

The program is designed to give students the opportunity to explore aspects of the course in more detail or gain additional experience in certain areas or take part in one or more activities not included in other parts of the course. This might include coursework from appropriate courses, supervised research projects, additional experience in advanced aspects of a clinical speciality or exchange visits to other dental schools. Students are strongly advised to discuss their proposed selective program with the coordinator as soon as possible.

*assessment:* by supervisors; presentation of work carried out in the November selective program

*prescribed texts:* to be advised

#### 6753 Fifth Annual Examination

#### 9983 Dental and Health Science V

8 points full year

6 hours per week (approx)

*prerequisites:* 1448 Dental and Health Science IV

*corequisites:* 7137 Dental Clinical Practice V

This stream builds upon 1448 Dental and Health Science IV. A population perspective on oral health and access to dental care is presented as a context for the consideration of a number of problem-based learning packages on the organisation and delivery of dental care, particularly to disadvantaged groups. These problem-based learning packages are supported by guided reading, seminars and resource talks.

Clinical applications of oral pathology and oral medicine is covered including the principles of diagnosis of systemic and local diseases affecting the oral cavity. Instruction is given in the use of clinical and laboratory diagnostic procedures. Methods of treatment of oral disease are considered and emphasis is placed on interactions between dental treatment and medical conditions.

Topics related to community dentistry, practice management, working with auxiliaries, legal and ethical issues, as well as updates in a variety of clinical disciplines are discussed in a series of interdisciplinary seminars during the second semester.

*assessment:* to be advised

*prescribed texts:* Little JW & Falace DA *Dental Management of the Medically Compromised Patient* (Mosby); Regezi and Sciubba *Oral Pathology: Clinical-Pathologic Correlations* 2nd edn (W.B. Saunders); Lakhan, Dilly, Findlayson (1993) *Basic Pathology*

#### 7137 Dental Clinical Practice V

12 points full year

Contact hours to be determined

*prerequisites:* 4978 Dental Clinical Practice IV

*corequisites:* 9983 Dental and Health Science V

This stream builds upon previous years with regard to the acquisition and consolidation of dental clinical skills in different disciplines including general dental practice, oral diagnosis, dental radiology, oral surgery, paediatric dentistry and orthodontics, pain control and removable prosthodontics.

Students gain clinical experience of the comprehensive management of patients, based on the coordination of skills from individual disciplines. Seminars and clinical tutorials explore a wide range of topics relating to general practice. Emphasis is placed on treatment planning, reviews of completed treatments and prognosis. Oral diagnosis and dental radiology components continue on from the fourth year with increasing emphasis on development of treatment planning and communication skills.

Lectures on oral surgery presented during the fourth year are followed and expanded in class meetings and clinical sessions that form part of the Dental Clinical Practice V stream. Major aspects of oral surgery including dento-alveolar surgery, maxillo-facial injuries, preprosthetic surgery, orthognathic surgery, temporomandibular joint surgery and aspects of cleft surgery and head and neck oncology are covered.

Clinical practice in oral surgery includes patient assessment, diagnosis, selection of appropriate analgesia/anaesthesia, routine exodontia, minor oral surgery and elective oral surgery on outpatients at the Royal Adelaide Hospital. Students gain further knowledge in the management of apprehension and pain, including general anaesthesia.

During the first semester students continue to gain experience in paediatric dentistry and orthodontics.

A series of seminars are presented on selected topics in removable prosthodontics

*assessment:* self assessment; tutor assessment; written clinical assessments - minimum standards required in each discipline to satisfactorily complete the requirements for the stream

*prescribed texts:* to be advised

### **5181 Dental Selectives V**

4 points

full year

Contact hours to be determined

*prerequisites:* 9097 Fourth Annual Examination, and for some clinical selectives, students must have satisfactorily completed the prerequisite level of knowledge.

This subject follows on from Dental Selectives IV with the intention of allowing students to customise aspects of their dental course by exploring selected aspects of dentistry in more detail, gaining additional experience in certain areas, or taking part in activities not included in the core component of the undergraduate dental course. This might include additional experience in advanced aspects of dental clinical practice, dental and health sciences, or human biology. Coursework from other appropriate educational institutions, supervised research projects, or exchange visits to other dental schools. See 7511 Dental Selectives IV

*assessment:* as required by supervisors. This may include clinical assessment, written reports, oral presentations; satisfactory completion of the requirements of other approved educational institutions.

*prescribed texts:* to be advised

## Bachelor of Science in Dentistry (Honours)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

### Specific Course Rules

#### 1 Admission requirements

1.1 Before entering upon the course of study for the degree a candidate must:

- (a) have completed the prerequisite work, or work accepted by the Faculty of Dentistry as appropriate for the proposed course of study *and*
- (b) be deemed by the Head of the Department concerned to be a suitable candidate for advanced work.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall undertake advanced study extending over one academic year as a full-time candidate, or with the approval of the Faculty of Dentistry, over a period of not more than two academic years as a half-time candidate and satisfy the examiners at the first attempt.

#### 3 Assessment and examinations

3.1 A candidate shall not be eligible to attend for examination unless the prescribed work has been completed to the satisfaction of the teaching staff concerned

3.2 The names of the candidates who qualify for the degree shall be published within the following classes and divisions in each subject:

First Class

Second Class      Division A  
                                 Division B

Third Class

3.3 The examination for the degree may consist of such written, oral and practical examinations as may be required. Assessments of any essays submitted by the candidate, practical work completed during the course, and the report on a research investigation may be taken into account.

#### 4 Course of study

4.1 A course of study for the degree may be undertaken in one of the following:

1739 Honours Anatomy and Histology  
6777 Honours Biochemistry

2190 Honours Dentistry  
7599 Honours Genetics  
7751 Honours Materials Science  
1551 Honours Pathology  
3950 Honours Pharmacology  
6740 Honours Physiology

#### 4.2 Assumed knowledge

All courses of study assume a pass in the Third Annual Examination for the degree of Bachelor of Dental Surgery; or an Ordinary degree in another field of study that the Faculty deems equivalent.

Honours Genetics specifically assumes a pass in the subject Genetics II as prescribed for the degree of Bachelor of Science.

#### 4.3 A course of study will consist of such of the following as may be required:

- (a) reading in selected fields and submissions of essays
- (b) attendance at lectures
- (c) practical work *and*
- (d) the undertaking of a research investigation on a topic assigned early in the course.

## Syllabuses

---

Intending candidates should consult the Head of the appropriate Department prior to commencement of the program for details of required reading and of assessment.

### **2190 Honours Dentistry**

Candidates may, with the approval of the Head of the Department, enrol in the Honours Dentistry program after they have successfully completed the third year of the Ordinary degree of Bachelor of Dental Surgery, or after they have obtained the Ordinary degree of Bachelor of Dental Surgery or equivalent. Under certain circumstances, candidates who have obtained an ordinary degree in another Faculty may be admitted to an Honours program in Dentistry.

Candidates may choose as their principal area of study one of the current research thrusts of the Department of Dentistry. Candidates will be required to undertake on a full time basis for one year (unless in half-time if approved by the Head of the Department), a course of study which may include essays, seminars, laboratory work, clinical work and a research project under the supervision of a member of the Department. A candidate may be required to undertake such formal courses of study in related subjects as are deemed desirable. Prospective candidates are advised to consult the Head of the Department and staff members in the year preceding the honours year to discuss the area of proposed study.

### **1739 Honours Anatomical Sciences**

### **6777 Honours Biochemistry**

### **2190 Honours Dentistry**

### **7599 Honours Genetics**

### **7751 Honours Materials Science**

### **1551 Honours Pathology**

### **3950 Honours Pharmacology**

### **6740 Honours Physiology**

# Graduate Certificate in Dentistry

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course

## Specific Course Rules

### 1 Admission requirements

- 1.1 The Faculty of Dentistry may accept as a candidate for the Graduate Certificate any person who:
- has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery
  - has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent for the purpose to the qualification specified in Specific Course Rule 1.1(a) hereof.

### 2 Duration of course

- 2.1 To qualify for the Graduate Certificate, a candidate shall:
- complete satisfactorily an approved course of study extending over a period of not more than three years as a part-time candidate *and*
  - pass such written, oral, clinical and practical examinations as may be required by the Faculty.
- 2.2 The programme of study, examination and such other work as may be required and the period of study for each candidate shall be specified by the Head of Department and approved by the Faculty.
- 2.3 Unless the Faculty, on the advice of the Head of the Department, approves an extension of time in a particular case, the work for the Graduate Certificate shall be completed within the period of study approved for the particular candidate under Specific Course Rule 2.1.

### 3 Review of academic progress

- 3.1 A candidate's progress may be reviewed at any time by the Head of Department. If, in the opinion of the Department a candidate is not making satisfactory progress the Faculty may, with the consent of Council, terminate the candidature.

### 4 Assessment and examinations

- 4.1 A candidate shall not be eligible to present for examination unless the required course of study has been completed to the satisfaction of the Head of the Department.

4.2 The Faculty shall appoint examiners for written, oral, clinical and other assessments.

4.3 There shall be two types of classifications of pass in any subject for the Graduate Certificate: Non Graded Pass; or Pass with High Distinction, Pass with Distinction, Pass with credit and Pass

### 5 General

5.1 To qualify for the Graduate Certificate, a candidate shall satisfactorily complete Graduate Certificate in Dentistry subjects to an aggregate of 12 points.

### 6 Course of study/Subjects of study

6.1 All students shall satisfactorily complete the compulsory subject

1089 Contemporary Dental Practice \* 6

Students shall complete elective subjects to the value of six points taken from the following (subject to availability):

8170 Adhesive Dentistry C 2

8187 Advanced Restorative Dentistry C 2

2866 Endodontics C 2

2625 High Risk Caries C 2

5727 Implantology C 2

6194 Occlusion/TMJ Dysfunction C 2

4735 Oral Pathology - Oral Medicine C 2

1824 Oral Surgery C 2

6456 Orthodontics C 2

6003 Periodontics C 2

4877 Removable Prosthodontics (full) C 2

6605 Removable Prosthodontics (partial) C 2

8123 Special Patient Care C 2

Other subjects as they become available

\* Available in External Mode only

### 7 Articulation with other awards

Students who complete the Graduate Certificate are eligible to apply for entry to the Diploma in Clinical Dentistry course and if successful on gaining entry, receive status for studies they have undertaken in the Graduate Certificate.

## Syllabuses

---

note: all subjects are available through open learning

### 8170 Adhesive Dentistry C

2 points

This subject covers in detail the theory and techniques applying to mechanisms of adhesion of materials to teeth and the reasons for success or failure.

*assessment:* Satisfactory participation in technical projects and seminar performance.

### 8187 Advanced Restorative Dentistry C

2 points

This module covers recent trends in crown and bridge work and the dental materials related to the area. Topics covered include diagnosis and treatment planning for crown and bridge work, design of preparations, occlusion, impression materials, recording inter-maxillary relationships, fabrication and cementation of temporary restorations and selection and manipulation of crown and bridge cements.

*assessment:* seminar performance, clinical work

### 1089 Contemporary Dental Practice

6 points

An external study mode module which aims to review and update current concepts in: Advanced Restorative; Basic Restorative; Behavioural Science; Community Dentistry; Dental Materials; Endodontics; Implants; Infection Control; Oral Medicine; Oral Pathology; Oral Surgery; Orthodontics, Pain Control; Pedodontics; Periodontics; Pharmacology; Preventive Dentistry; Radiology; Removable Prosthodontics; TMJ Dysfunction.

*assessment:* multiple choice questions, short or long essay papers; two Interviews

### 2866 Endodontics C

2 points

This module covers the diagnosis of pulpal and periapical conditions, emergency treatment procedures, vital pulp therapy and non vital pulp therapy. Areas covered include consideration of microbiological and immunological aspects, instrumentation, medication and root filling techniques. Periapical surgery management of traumatic injuries bleaching and apification will also be included.

*assessment:* seminar performance, clinical work

### 2625 High Risk Caries C

2 points

This module covers the assessment of oral disease and related problems, identification of prevention and control measures, selection of appropriate measures and evaluation of the results.

*assessment:* seminar performance, clinical work

### 5727 Implantology C

2 points

This subject covers the basic principles of osseointegration for single tooth treatment, treatment of edentulous ridges and the assessment of sites for implant placement.

*assessment:* seminar performance, open learning

### 6194 Occlusion/TMJ Dysfunction C

2 points

This subject is designed to update the general and specialist practitioner on current concepts of craniomandibular disorders. The subject will cover the sequelae of masticatory muscle hyperactivity and the progression from myogenous to arthrogenous dysfunction.

*assessment:* seminar performance, clinical work

### 4735 Oral Pathology - Oral Medicine C

2 points

This subject reviews common and/or important topics in Oral Pathology and demonstrates their laboratory and clinical applications. The course is a combination of review presentations, seminars and clinical demonstrations.

Participants will be sent reading materials prior to the course. Prior completion of the Oral Pathology Study Module will be an advantage to candidates. Participants will be asked to bring along interesting or problem cases for discussion.

*assessment:* seminar performance, satisfactory attendance/performance in clinical sessions; any assigned work.

### 1824 Oral Surgery C

2 points

The subject covers academic and clinical aspects of modern dento-alveolar surgery relevant to general dental practitioners including removal of teeth.

*assessment:* seminar performance, clinical work

**6456 Orthodontics C**

2 points

This subject covers the principles of examination and orthodontic diagnosis on patients which includes the use of cephalometrics and radiology, the properties and uses of orthodontic materials and clinical orthodontic treatment, particularly with removable appliances.

*assessment:* seminar performance, open learning

**6003 Periodontics C**

2 points

This subject is aimed for the general practitioner wishing to upgrade skills in diagnosis, treatment planning and simple surgical procedures, including frenectomies and grafts and use of gortex membranes where applicable.

*assessment:* seminar performance, clinical work

**4877 Removable Prosthodontics (Full) C**

2 points

This subject covers at an advanced level the management of edentulous patients. Students will undertake diagnosis and treatment planning for complete and immediate dentures.

*assessment:* seminar performance, clinical work

**6605 Removable Prosthodontics (Partial) C**

2 points

This subject covers at an advanced level the management of partially edentulous patients. Students will undertake diagnosis and treatment planning for removable partial dentures.

*assessment:* seminar performance, clinical work

**8123 Special Patient Care C**

2 points

This subject deals with clinical management of physically, intellectually and medically compromised patients. Students will learn broad principles of treatment relating to patients who have haemophilia, head and neck tumours, organ transplants and HIV/AIDS and the management of patients with physical and intellectual disabilities.

*assessment:* seminar performance, open learning

## Graduate Diploma in Clinical Dentistry

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

- 1.1** The Faculty of Dentistry may accept as a candidate for the Graduate Diploma any person who:
- has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery *or*
  - has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent for the purpose to the qualification specified in Specific Course Rule 1.1(a) hereof.

#### 2 Duration of course

- 2.1** To qualify for the Graduate Diploma, a candidate shall:
- complete satisfactorily an approved course of study extending over at least one year as a full-time student, or with approval of Faculty, over a period of not more than three years as a part-time candidate *and*
  - pass such written, oral, clinical and practical examinations, and submit such reports as may be required by the Faculty.
- 2.2** The program of study, examination, reports and such other work as may be required and the period of study for each candidate shall be specified by the Head of Department and approved by the Faculty.
- 2.3** Unless the Faculty, on the advice of the Head of the Department, approve an extension of time in a particular case, the work for the Graduate Diploma shall be completed within the period of study approved for the particular candidate under Specific Course Rule 2.1.

#### 3 Review of academic progress

- 3.1** A candidate's progress may be reviewed at any time by the Head of Department. If, in the opinion of the Department a candidate is not making satisfactory progress the Faculty may, with the consent of Council, terminate the candidature.

#### 4 Assessment and examinations

- 4.1** There shall be four classifications of pass in subjects for the Graduate Diploma: Pass with High Distinction, Pass with Distinction, Pass with Credit and Pass.
- 4.2** A candidate shall not be eligible to present for examination unless the required course of study has been completed to the satisfaction of the Head of the Department.
- 4.3** The Faculty shall appoint examiners for written, oral, clinical and other assessments.

#### 5 General

- 5.1** A candidate who complies with the foregoing conditions and satisfies the examiners and the Faculty shall be awarded the Graduate Diploma of Clinical Dentistry.
- 5.2** No candidate will be permitted to count for the Graduate Diploma in Clinical Dentistry any subject that in the opinion of the Faculty contains substantially the same material as any subject which he or she presented already for another qualification, other than the Graduate Certificate in Dentistry and then only upon its surrender.

#### 6 Course of study

The course of study shall be in one of two streams. Candidates are required to complete satisfactorily subjects to the value of 24 points in one of the following streams:

##### 6.1 Stream A

Candidates shall satisfactorily complete

- the following compulsory subjects:
 

1089	Contemporary Dental Practice	6
5305	Research Methods and Ethics	2
- elective subjects to the value of 16 points taken from the following\*:
 

8170	Adhesive Dentistry C	2
8187	Advanced Restorative Dentistry C	2
2866	Endodontics C	2
2625	High Risk Caries C	2

5727	Implantology C	2
6194	Occlusion / TMJ Dysfunction C	2
4735	Oral Pathology-Oral Medicine C	2
1824	Oral Surgery C	2
6456	Orthodontics C	2
6003	Periodontics C	2
4877	Removable Prosthodontics (Full) C	2
6605	Removable Prosthodontics (Partial) C	2
8123	Special Patient Care C	2

Other clinical subjects may be considered from time to time.

\* See Grad. Cert. Dentistry for syllabus details

## 6.2 Stream B

Candidates shall satisfactorily complete

(a) the following subjects:

4660	Basic and Applied Dental Sciences	2
5305	Research Methods and Ethics	2

(b) elective subjects to the value of 20 points taken from the following:

8241	Advanced Restorative Dentistry D	4
4269	Community and Preventive Dentistry D	4
9275	Dentistry for the Medically Compromised D	4
6028	Dento-Maxillo-Facial Radiology D	4
1398	Endodontics D	4
2031	Forensic Odontology D	4
8120	Oral Surgery D	4
5512	Orthodontics D	4
3767	Periodontics D	4
3979	Prosthodontics D	4
8106	Tooth Wear D	4

Other clinical subjects may be considered from time to time.

## Syllabuses

---

### **8241 Advanced Restorative Dentistry D**

4 points full year

This subject covers recent trends in crown and bridge work and the dental materials related to the area. Topics covered include diagnosis and treatment planning for crown and bridge work, design of preparations, occlusion, impression materials, recording inter-maxillary relationships, fabrication and cementation of temporary restorations and selection and manipulation of crown and bridge cements.

*assessment:* continuous clinical assessment, assignments, written exam

### **4660 Basic and Applied Dental Sciences**

4 points semester 2

See M.D.S. (Community and Preventive Dentistry) for syllabus details

### **4269 Community and Preventive Dentistry D**

4 points full year

This subject covers the nature and distribution of oral diseases and related problems, their aetiology and prognosis, and clinical interventions that may prevent or control them at an individual or population level.

*assessment:* continuous assessment; assignments; open book, written exam

### **9275 Dentistry for the Medically Compromised D**

4 points semester 1 or 2

This subject deals with clinical management of medically compromised patients. Students will learn principles of treatment relating to patients who have haemophilia, head and neck tumours, organ transplants and HIV/AIDS. Students will also become familiar with relevant laboratory and clinical diagnostic tests.

*assessment:* seminar performance, clinical work

### **6028 Dento-Maxillo-Facial Radiology D**

4 points semester 1 or 2

This subject addresses techniques and advances in dental radiology with reference to biological and radiological sciences, radiography and radiology, coupled with diagnostic skills relating to aspects of oral pathology, oral diagnosis and oral medicine.

*assessment:* continuous clinical assessment via log book and case studies; assignments; written exam

### **1398 Endodontics D**

4 points semester 1 or 2

This subject covers the diagnosis of pulpal and periapical conditions, emergency treatment procedures, vital and non-vital pulp therapies. Areas covered include consideration of microbiological and immunological aspects, instrumentation, medication and root filling techniques, periapical surgery, management of traumatic injuries, bleaching and apification

*assessment:* seminar performance, clinical work

### **2031 Forensic Odontology D**

4 points semester 1 or 2

This subject covers the history of forensic odontology, current principles and trends in the methods of forensic odontology with particular emphasis on identification and bite mark analysis techniques.

*assessment:* seminar performance, casework

### **8120 Oral Surgery D**

4 points semester 1 or 2

This subject covers academic and clinical aspects of modern oral and maxillofacial surgery relevant to general dental practitioners including removal of teeth and dento-alveolar surgery.

*assessment:* seminar performance, clinical work

### **5512 Orthodontics D**

4 points semester 1 or 2

This subject covers the principles of examination and orthodontic diagnosis on patients which includes the use of cephalometrics and radiology, the properties and uses of orthodontic materials and clinical orthodontic treatment, particularly with removable appliances.

*assessment:* seminar performance, clinical skills

### **3767 Periodontics D**

4 points semester 1 or 2

This subject covers the aetiology and epidemiology of periodontal disease and clinical management of patients with periodontal disease. Areas covered include examination procedures and recording of data, clinical diagnosis and classification, dental education and motivation, treatment planning, periodontal treatment and assessment.

*assessment:* seminar performance, casework

**3979 Prosthodontics D**

4 points semester 1 or 2

This subject covers at an advanced level the management of edentulous and partially edentulous patients. Students will undertake diagnosis and treatment planning for removable complete and partial dentures.

*assessment:* seminar performance, clinical work

**5305 Research Methods and Ethics**

2 points semester 2

See M.D.S. (Community and preventive Dentistry) for syllabus details

**8106 Tooth Wear D**

4 points semester 1 or 2

Students will acquire an understanding of the significance of tooth wear from an anthropological and clinical perspective, will be able to clinically assess the various tooth wear processes commonly affecting patients and will acquire a knowledge of different treatment and monitoring techniques as they relate to tooth wear.

*assessment:* seminar performance, clinical work

## Graduate Diploma in Forensic Odontology

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 An applicant for admission to the course of study for the Graduate Diploma shall have qualified for the degree of Bachelor of Dental Surgery in the University of Adelaide, or hold qualifications in Dentistry from another institution accepted for the purpose by the University.
- 1.2 Subject to the approval of the Council, the Faculty may accept as a candidate an applicant who does not satisfy the requirements of Specific Course Rule 1.1 above but who have given evidence satisfactory to the Faculty of fitness to undertake advanced work in dentistry.

#### 2 General

- 2.1 For each candidate, the Faculty shall appoint a supervisor or supervisors for guidance.
- 2.2 A candidate for the diploma shall regularly attend lectures and tutorials, do such written, clinical and other practical work, and pass such examinations, as may be required by the Head of the Department of Dentistry.
- 2.3 Students shall at all times be under the direction and supervision of a member of the teaching staff, duly appointed by the Chairman or the Director of the Forensic Odontology Unit, and shall carry out such work as shall be allocated

#### 3 Duration of course

- 3.1 To qualify for the Diploma a candidate shall satisfactorily complete a course of full-time study extending over one year, or of part-time study extending over at least two years. Except with special permission of the Faculty, the course for the Graduate Diploma shall be completed in not more than three years.

#### 4 Assessment and examinations

- 4.1 The Faculty may appoint a Board of Examiners to carry out or supervise the examination of candidates for the Graduate Diploma in accordance with the schedules and syllabuses.
- 4.2 A candidate shall not be eligible to attend for examination unless the prescribed course of study has been completed to the satisfaction of the Head of the Department.

#### 5 Qualification requirements

- 5.1 To qualify for the diploma a candidate shall pass the following subjects
  - 3914 Anatomy and Forensic Anthropology
  - 4660 Basic and Applied Dental Sciences
  - 6760 Casework in Forensic Odontology
  - 9472 Oral and Forensic Pathology
  - 8843 Principles and Methods of Forensic Odontology
  - 5305 Research Methods and Ethics

#### 6 Review of academic progress

- 6.1 If in the opinion of the Faculty a candidate is not making satisfactory progress, the Faculty may, with the consent of Council, terminate the candidature.

## Syllabuses

### 3914 Anatomy and Forensic Anthropology

4 points full year

2 hour seminar per week

The scope and history of physical anthropology generally and in South Australia. Osteology of the skull. Comparative anatomy and evolution of head form and the masticatory system. Principles and methodology for study of human growth and development. Craniofacial growth and development and normal age changes. Human and dental genetics. Craniofacial malformations and paleopathology. Somatometry, craniometry and cephalometry with emphasis on new imaging techniques. Osteology of race. Disaster victim identification including cultural factors, management and international protocol.

*assessment:* to be advised

### 4660 Basic and Applied Dental Sciences

2 points

See Master of Dental Surgery for syllabus details

### 6760 Casework in Forensic Odontology

8 points full year

Supervision as required

The subject will require students to participate in routine casework undertaken by the Forensic Odontology Unit including attendance at Coroner's mortuary and Courts of Law. Students will undertake a small research project in an approved topic.

*assessment:* to be advised

### 9472 Oral and Forensic Pathology

4 points full year

2 hour seminar per week

This subject introduces general principles of forensic pathology. Emphasis is given to diagnosis and time of death, rigor mortis, time since death, age at death. Methods of forensic pathology examinations and identification of the dead are introduced including medical identification, injuries, serology and DNA identification. Age determination by dental methods and dental histopathology.

*assessment:* to be advised

### 8843 Principles and Methods of Forensic Odontology

4 points full year

2 hour seminar per week

History and role of forensic odontology in community dentistry. Legal systems and role and jurisdiction of courts of law. The coronial system and practice of the Coroner's Office. Expert evidence. Methods of investigation of civil and criminal matters. Relationship of police to forensic odontology. Preservation and recovery of dental evidence from scene. Forensic dental photography. Principles and techniques of video and computer imaging in cranio facial superimposition. Procedures for investigation of bitemarks.

*assessment:* to be advised

### 5305 Research Methods and Ethics

2 points

See Master of Dental Surgery for syllabus details

## Master of Dental Surgery (Community and Preventive Dentistry)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** tuition fees may apply to this course

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
- (b) has completed at least two years of relevant practical experience since qualifying for that degree.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry.

2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:

- (a) in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature *or*
- (b) in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Community and Preventive Dentistry and co-supervisor(s) for guidance.

#### 4 Subjects of study and research projects

Candidates shall satisfactorily complete:

- (a) the following subjects:
 

4660	Basic and Applied Dental Sciences	2
5305	Research Methods and Ethics	2
- (b) the following subjects unless the Faculty specially approves otherwise:
 

4870	Community and Preventive Dentistry VI	12
8786	Community and Preventive Dentistry VII	16
- (c) the following four subjects which shall be taken sequentially:
 

5016	MDS Research A	4
1975	MDS Research B	4
2536	MDS Research C	4
1167	MDS Research D	4

#### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.

5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## **6 Assessment and examinations**

### **6.1 Research component**

6.1.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

6.1.2 The Faculty shall appoint two examiners external to the Faculty

6.1.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### **6.2 Recommendations of Master's Examination Committee**

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow *or*
- (d) be not awarded the degree.

## Syllabuses

---

### **4660 Basic and Applied Dental Sciences**

2 points semester 2

2 hours per week

*prerequisites:* 5305 Research Methods and Ethics

The course of seminars aims to provide postgraduate students with a broad appreciation of current knowledge in the basic and applied dental sciences, and to enable them to become acquainted with research programs within the Department of Dentistry.

*assessment:* to be advised

### **4870 Community and Preventive Dentistry VI**

12 points not offered in 1999

12 hours per week

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

Lectures, seminars and practicals covering the nature and distribution of oral diseases and related problems, their aetiology and prognosis, and clinical interventions that may prevent or control them at an individual or population level.

*assessment:* continuous - assignments, final open book exam

### **8786 Community and Preventive Dentistry VII**

16 points not offered in 1999

16 hours per week

*prerequisites:* 4870 Community and Preventive Dentistry VI

Lectures, seminars and practicals covering the assessment of oral disease and related problems, identification of prevention and control measures, selection and implementation of appropriate measures and evaluation of the results.

*assessment:* continuous - assignments, open book exam

### **5016 MDS Research A**

4 points semester 1 or 2

10 hours per week

Students will undertake a research project related to the discipline named on the degree.

*assessment:* demonstration of progress within research project; submission of research proposal

### **1975 MDS Research B**

4 points semester 1 or 2

10 hours per week

*prerequisites:* 5016 MDS Research A

Students will undertake a research project related to the discipline named on the degree.

*assessment:* demonstration of progress within research project; completion of literature review

### **2536 MDS Research C**

4 points semester 1 or 2

10 hours per week

*prerequisites:* 1075 MDS Research B

Students will continue a research project related to the discipline named on the degree.

*assessment:* demonstration of progress within research project; completion of experimental work

### **1167 MDS Research D**

4 points semester 1 or 2

10 hours per week

*prerequisites:* 5236 MDS Research C

Students will continue a research project related to the discipline named on the degree.

*assessment:* completion of research project including submission of written report to Faculty in accordance with Specific Course Rule 5.2.1 of the degree; assessment to satisfaction of Masters Examination Committee

### **5305 Research Methods and Ethics**

2 points semester 1

2 hours per week

The course of seminars provides an appreciation of the scientific method and of ethics as well as practical aspects of biostatistics, experimental design, research methodology, laboratory safety and infection control, use of computers and bibliographic databases, preparation of initial research proposal, evaluation of research papers, scientific writing and presentation of research findings. Where possible, the material presented will be selected to meet the specific requirements of the students enrolled.

*assessment:* short test in biostatistics, evaluation of short written critique of given scientific paper

## Master of Dental Surgery (Dento-Maxillo-Facial Radiology)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
- (b) has completed at least two years of relevant practical experience since qualifying for that degree.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry.

2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:

- (a) in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature *or*
- (b) in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Dento-Maxillo-Facial Radiology and co-supervisor/s for guidance.

#### 4 Subjects of study and research projects

Candidates shall satisfactorily complete

- (a) the following subjects:
 

4660 Basic and Applied Dental Sciences	2
5305 Research Methods and Ethics	2
- (b) the following subjects unless the Faculty specially approves otherwise:
 

3804 Dento-Maxillo-Facial Radiology VI	12
2961 Dento-Maxillo-Facial Radiology VII	16
- (c) the following four subjects which shall be taken sequentially:
 

5016 MDS Research A	4
1975 MDS Research B	4
2536 MDS Research C	4
1167 MDS Research D	4

#### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.

5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not

making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## 6 Assessment and examinations

### 6.1 Clinical component

6.1.1 All candidates shall undertake an examination at the end of the first year and at the end of their final year on the content of the course. The examination shall be in several parts including written examination, viva voce and clinical presentation. The Master's Examination Committee shall appoint two examiners to review progress of the candidate of whom at least one of whom shall be external. Should a candidate not succeed in the examination, the candidature will be reviewed by the Master's Examination Committee.

### 6.2 Research component

6.2.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume

6.2.2 The Faculty shall appoint two examiners external to the Faculty

6.2.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### 6.3 Recommendations of Master's Examination Committee

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow; *or*
- (d) be not awarded the degree.

## Syllabuses

### 4660 Basic and Applied Dental Sciences

2 points semester 2

2 hours per week

*prerequisites:* 5305 Research Methods and Ethics

See M.D.S.(Comm. & Prev. Dentistry) for syllabus details

### 3804 Dental Radiology VI

12 points full year

10 hours per week

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

The subject comprises advanced aspects of dental radiology, including biological sciences, radiological sciences, radiography and radiology with advanced work being undertaken in the related disciplines of oral pathology, oral diagnosis and oral medicine. Students will attend radiology clinics in the Adelaide Dental Hospital, Royal Adelaide Hospital, Flinders Medical Centre as well as private clinics.

*assessment:* in consultation with Coordinator.

### 2961 Dental Radiology VII

16 points not offered in 1999

10 hours per week

*prerequisites:* 3804 Dental Radiology VI

See 3084 Dental Radiology VI for syllabus details

### 5016 MDS Research A

4 points semester 1 or 2

10 hours per week

### 1975 MDS Research B

4 points semester 1 or 2

10 hours per week

### 2536 MDS Research C

10 points semester 1 or 2

10 hours per week

### 1167 MDS Research D

4 points semester 1 or 2

10 hours per week

### 5305 Research Methods and Ethics

2 points semester 1

2 hours per week

See M.D.S.(Comm. & Prev. Dentistry) for syllabus details for these subjects

## Master of Dental Surgery (Endodontics)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
- (b) has completed at least two years of relevant practical experience since qualifying for that degree *and*
- (c) has successfully completed the Primary Examinations of the Royal Australasian College of Dental Surgeons or equivalent.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry

2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:

- (a) in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature *or*
- (b) in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Endodontics and co-supervisor/s for guidance.

#### 4 Subjects of study and research projects

Candidates shall satisfactorily complete:

- (a) the following subjects:
 

4660 Basic and Applied Dental Sciences	2
5305 Research Methods and Ethics	2
- (b) the following subjects unless the Faculty specially approves otherwise:
 

9642 Endodontics VI	12
9130 Endodontics VII	16
- (c) the following four subjects which shall be taken sequentially:
 

5016 MDS Research A	4
1975 MDS Research B	4
2536 MDS Research C	4
1167 MDS Research D	4

#### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.

5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## **6 Assessment and examinations**

### **6.1 Clinical component**

6.1.1 All candidates shall undertake an examination at the end of the first year and at the end of their final year on the content of the course. The examination shall be in several parts including written examination, viva voce and clinical presentation. The Master's Examination Committee shall appoint two examiners to review progress of the candidate of whom at least one of whom shall be external. Should a candidate not succeed in the examination, the candidature will be reviewed by the Master's Examination Committee.

### **6.2 Research component**

6.2.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.

6.2.2 The Faculty shall appoint two examiners external to the Faculty.

6.2.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### **6.3 Recommendations of Master's Examination Committee**

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow *or*
- (d) be not awarded the degree.

## Syllabuses

### 4660 Basic and Applied Dental Sciences

2 points semester 2

2 hours per week

*prerequisites:* 5305 Research Methods and Ethics

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details

### 9642 Endodontics VI

12 points full year

12 hours per week

*prerequisites:* successful completion of primary examinations of Royal Australasian College of Dental Surgeons (or equivalent)

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

The program aims at fulfilling the requirements for graduate education as laid down in guidelines published by the Australian Society of Endodontology. The coursework component consists of lectures and seminars in the following: endodontology, oral and general pathology, oral microbiology, immunology, lecturing and public speaking, oral surgery, restorative dentistry, periodontology and radiology.

The clinical component provides experience within the discipline of endodontology in the form of technique work on the human skull, clinical practice, observations in private endodontic and oral surgery practices.

*assessment:* arranged in consultation with Coordinator

### 9130 Endodontics VII

16 points not offered in 1999

12 hours per week

*prerequisites:* 9642 Endodontics VI

See 9642 Endodontics VI for syllabus details

### 5016 MDS Research A

4 points semester 1 or 2

4 points semester 1 or 2

10 hours per week

### 2536 MDS Research C

4 points semester 1 or 2

10 hours per week

### 1167 MDS Research D

4 points semester 1 or 2

10 hours per week

### 5305 Research Methods and Ethics

2 points semester 1

2 hours per week

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details for these subjects

## Master of Dental Surgery (Forensic Odontology)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
- (b) has completed at least two years of relevant practical experience since qualifying for that degree.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry.

2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:

- (a) in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature *or*
- (b) in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Forensic Odontology and co-supervisor(s) for guidance.

#### 4 Subjects of study and research projects

Candidates shall satisfactorily complete:

- (a) the following subjects:

4660 Basic and Applied Dental Sciences	2
5305 Research Methods and Ethics	2
- (b) the following subjects unless the Faculty specially approves otherwise:

6699 Forensic Odontology VI	12
5299 Forensic Odontology VII	16
- (c) the following four subjects which shall be taken sequentially:

5016 MDS Research A	4
1975 MDS Research B	4
2536 MDS Research C	4
1167 MDS Research D	4

#### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.

5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## 6 Assessment and examinations

### 6.1 Research component

- 6.1.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume
- 6.1.2 The Faculty shall appoint two examiners external to the Faculty
- 6.1.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### 6.2 Recommendations of Master's Examination Committee

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow *or*
- (d) be not awarded the degree.

## Syllabuses

### 4660 Basic and Applied Dental Sciences

2 points semester 2

2 hours per week

*prerequisites:* 5305 Research Methods and Ethics

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details

### 6699 Forensic Odontology VI

12 points full year

10 hours per week

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

This subject covers similar material to that covered in the Graduate Diploma in Forensic Odontology but in greater depth. The student will be required to undertake extra work in one or more of the specialised areas within the field of Forensic Odontology. Details will be determined in consultation with staff.

*assessment:* in consultation with Coordinator

### 5299 Forensic Odontology VII

16 points not offered in 1999

10 hours per week

*prerequisites:* 6699 Forensic Odontology VI

See 6699 Forensic Odontology VI for syllabus details

### 5016 MDS Research A

4 points semester 1 or 2

10 hours per week

### 1975 MDS Research B

4 points semester 1 or 2

10 hours per week

### 2536 MDS Research C

4 points semester 1 or 2

10 hours per week

### 1167 MDS Research D

4 points semester 1 or 2

10 hours per week

### 5305 Research Methods and Ethics

2 points semester 1

2 hours per week

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details for these subjects

## Master of Dental Surgery (General Dental Practice)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
- (b) has completed at least two years of relevant practical experience since qualifying for that degree.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry.

2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:

- (a) in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature *or*
- (b) in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of General Dental Practice and co-supervisor(s) for guidance.

#### 4 Subjects of study and research projects

Candidates shall satisfactorily complete:

- (a) the following subjects:
 

4660	Basic and Applied Dental Sciences	2
5305	Research Methods and Ethics	2
- (b) the following subjects unless the Faculty specially approves otherwise:
 

3992	General Dental Practice VI	12
8003	General Dental Practice VII	16
- (c) the following four subjects which shall be taken sequentially:
 

5016	MDS Research A	4
1975	MDS Research B	4
2536	MDS Research C	4
1167	MDS Research D	4

#### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.

5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## 6 Assessment and examinations

### 6.1 Clinical component

- 6.1.1 All candidates shall undertake an examination at the end of the first year and at the end of their final year on the content of the course. The examination shall be in several parts including written examination, viva voce and clinical presentation. The Master's Examination Committee shall appoint two examiners to review progress of the candidate of whom at least one of whom shall be external. Should a candidate not succeed in the examination, the candidature will be reviewed by the Master's Examination Committee.

### 6.2 Research component

- 6.2.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume.
- 6.2.2 The Faculty shall appoint two examiners external to the Faculty.
- 6.2.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### 6.3 Recommendations of Master's Examination Committee

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow *or*
- (d) be not awarded the degree.

## Syllabuses

### 4660 Basic and Applied Dental Sciences

2 points semester 2  
2 hours per week

*prerequisites:* 5305 Research Methods and Ethics

See M.D.S.(Comm. & Prev. Dentistry) for syllabus details

### 3992 General Dental Practice VI

12 points not offered in 1999  
12 hours per week

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

Advanced clinical experience of the comprehensive management of patients, based upon the co-ordination of skills from individual disciplines. Seminars and clinical tutorials explore a wide range of topics relating to general practice at the Masters level. Emphasis is placed on treatment planning, reviews of completed treatments and prognosis.

*assessment:* in consultation with Coordinator

### 8003 General Dental Practice VII

16 points not offered in 1999  
12 hours per week

*prerequisites:* 3992 General Dental Practice VI

See 3992 General Dental Practice VI for syllabus details

### 5016 MDS Research A

4 points semester 1 or 2  
10 hours per week

### 1975 MDS Research B

4 points semester 1 or 2  
10 hours per week

### 2536 MDS Research C

4 points semester 1 or 2  
10 hours per week

### 1167 MDS Research D

4 points semester 1 or 2  
10 hours per week

### 5305 Research Methods and Ethics

2 points semester 1  
2 hours per week

See M.D.S.(Comm. & Prev. Dentistry) for syllabus details for these subjects

## Master of Dental Surgery (Gerodontology)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

- 1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:
- has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
  - has completed at least two years of relevant practical experience since qualifying for that degree.
- 1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

- 2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry.
- 2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:
- in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature; or
  - in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Gerodontology and co-supervisor(s) for guidance.

#### 4 Subjects of study and research projects

Candidates shall satisfactorily complete:

- the following subjects:
 

4660	Basic and Applied Dental Sciences	2
5305	Research Methods and Ethics	2
- and the following subjects unless the Faculty specially approves otherwise:
 

4759	Gerodontology VI	12
8813	Gerodontology VII	16
- and the following four subjects which shall be taken sequentially:
 

5016	MDS Research A	4
1975	MDS Research B	4
2536	MDS Research C	4
1167	MDS Research D	4

#### 5 Review of academic progress

- 5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.
- 5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:
- recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
  - consider the reports of the examiners of the research report and the results of any examination *and*
  - recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.
- 5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in

the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## 6 Assessment and examinations

### 6.1 Clinical component

- 6.1.1 All candidates shall undertake an examination at the end of the first year and at the end of their final year on the content of the course. The examination shall be in several parts including written examination, viva voce and clinical presentation. The Master's Examination Committee shall appoint two examiners to review progress of the candidate of whom at least one of whom shall be external. Should a candidate not succeed in the examination, the candidature will be reviewed by the Master's Examination Committee.

### 6.2 Research component

- 6.2.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume
- 6.2.2 The Faculty shall appoint two examiners external to the Faculty
- 6.2.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### 6.3 Recommendations of Master's Examination Committee

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow *or*
- (d) be not awarded the degree.

## Syllabuses

### 4660 Basic and Applied Dental Sciences

2 points semester 2

2 hours per week

*prerequisites:* 5305 Research Methods and Ethics

See M.D.S.(Comm. & Prev. Dentistry) for syllabus details

### 4759 Gerodontology VI

12 points not offered in 1999

10 hours per week

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

The subject aims to comprehensively cover all aspects of treatment of the ageing population. This comprises the clinical aspects of managing the aged patient, with emphasis on conservative and prosthetic dentistry. Aspects which affect the aged patient such as medical, sociological, epidemiological factors will also be covered.

*assessment:* in consultation with Coordinator

### 8813 Gerodontology VII

16 points not offered in 1999

10 hours per week

*prerequisites:* 4759 Gerodontology VI

See M.D.S.(Comm. & Prev. Dentistry) for syllabus details

### 5016 MDS Research A

4 points semester 1 or 2

10 hours per week

### 1975 MDS Research B

4 points semester 1 or 2

10 hours per week

### 2536 MDS Research C

4 points semester 1 or 2

10 hours per week

### 1167 MDS Research D

4 points semester 1 or 2

10 hours per week

### 5305 Research Methods and Ethics

2 points semester 1

2 hours per week

See M.D.S.(Comm. & Prev. Dentistry) for syllabus details for these subjects

## Master of Dental Surgery (Oral and Maxillofacial Surgery)

This course is designed to satisfy the requirements of the guidelines for accreditation of training programs and positions in Oral and Maxillofacial Surgery as established by the Royal Australasian College of Dental Surgeons.

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent **and**
- (b) has completed at least two years of relevant practical experience since qualifying for that degree including satisfactory progress in the employ of the Oral and Maxillofacial Surgery Unit of the South Australian Dental Service and/or the Royal Adelaide Hospital, and
- (c) has successfully completed the Primary Examinations of the Royal Australasian College of Dental Surgeons or equivalent.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry

2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:

in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Oral and Maxillofacial Surgery and co-supervisor/s for guidance.

#### 4 Subjects of study and research projects

(a) the following subjects:

3550	Bridging Studies in Anatomy	3
8824	Clinical Science and Skills	5
5305	Research Methods and Ethics	2

(b) the following subjects unless the Faculty specially approves otherwise:

1597	Oral and Maxillofacial Surgery VI	12
1449	Oral and Maxillofacial Surgery VII	16

(c) the following three subjects which shall be taken sequentially:

5016	MDS Research A	4
1975	MDS Research B	4
4939	MDS Research C/D	4

#### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.

5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the

opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## **6 Assessment and examinations**

### **6.1 Clinical component**

- 6.1.1 All candidates shall undertake an examination at the end of the first year and at the end of their final year on the content of the course. The examination shall be in several parts including written examination, viva voce and clinical presentation. The Master's Examination Committee shall appoint two examiners to review progress of the candidate of whom at least one of whom shall be external. Should a candidate not succeed in the examination, the candidature will be reviewed by the Master's Examination Committee.

### **6.2 Research component**

- 6.2.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume
- 6.2.2 The Faculty shall appoint two examiners external to the Faculty
- 6.2.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### **6.3 Recommendations of Master's Examination Committee**

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow *or*
- (d) be not awarded the degree.

## Syllabuses

### 3550 Bridging Studies in Anatomy

3 points full year

Self study and present for Viva

A course of study which bridges the teaching of anatomy between the undergraduate program for dentistry and medicine. This subject focusses on below clavical gross anatomy.

### 8824 Clinical Science and Skills

5 points

1 lecture, 1 demonstration, 1 tutorial a week

This subject is intended to introduce the student to the skills of medical practice, the scientific study of the processes of disease states and the ethics of medicine. Emphasis will be placed on the acquisition of skills in clinical interviewing and communication as well as those required to elicit and record a clinical history and to perform a physical examination. Clinical data gathered at the bedside is to be interpreted in the context of a scientific understanding of the aetiology, pathophysiology and prognosis of common disease processes, aided where appropriate by information derived from elementary laboratory and other diagnostic investigations. In the study of biomedical ethics, the student will be equipped with the conceptual tools to think clearly about ethical problems and reach sound ethical judgements in a clinical context.

*assessment:* continuous in demonstration and tutorial work; project in biomedical ethics; written exam in clinical science; *viva* in clinical skills

### 5016 MDS Research A

4 points semester 1 or 2

10 hours per week

### 1975 MDS Research B

4 points semester 1 or 2

10 hours per week

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details for these subjects

### 4939 MDS Research C/D

4 points semester 1 or 2

10 hours per week

Students will undertake a research project related to the discipline named on the degree.

*assessment:* research project including all experimental work; the submission of written report to the Faculty.

### 1597 Oral and Maxillofacial Surgery VI

12 points full year

Part time course with concurrent appointment as Junior Registrar with the Royal Adelaide Hospital

*prerequisites:* successful completion of Primary Examinations of Royal Australian College of Dental Surgeons and satisfactory progress with employment at the Royal Adelaide Hospital.

The subject covers all academic and clinical aspects of modern Oral and Maxillofacial Surgery. This includes dento alveolar surgery, maxillofacial injuries, preprosthetic surgery including implants, orthognathic surgery, temporomandibular joint surgery and aspects of cleft surgery and head and neck oncology.

*assessment:* continuous 60%; coursework 10%; research 30%

### 1449 Oral and Maxillofacial Surgery VII

16 points full year

Part time subject with concurrent appointment as Junior Registrar with the Royal Adelaide Hospital

*prerequisites:* 1597 Oral and Maxillofacial Surgery VI

*corequisites:* selected subjects from second and third years of M.B.B.S. program

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details

### 5305 Research Methods and Ethics

2 points semester 1

2 hours per week

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details

# Master of Dental Surgery (Oral Pathology)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

## Specific Course Rules

### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
- (b) has completed at least two years of relevant practical experience since qualifying for that degree.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry.

2.2 Unless the Faculty expressly approves an extension of time in a particular case, the work for the degree shall be completed and the research report submitted:

- (a) in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature *or*
- (b) in the case of a half-time candidate who is able to devote at least half of the time to the approved program of work for the degree, in not less than four and not more than six calendar years from the date of admission to candidature.

### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Oral Pathology and co-supervisor(s) for guidance.

### 4 Subjects of study and research projects

Candidates shall satisfactorily complete:

- (a) the following subjects:
 

4660 Basic and Applied Dental Sciences	2
5305 Research Methods and Ethics	2
- (b) the following subjects unless the Faculty specially approves otherwise:
 

1055 Oral Pathology VI	12
4133 Oral Pathology VII	16
- (c) the following four subjects which shall be taken sequentially:
 

5016 MDS Research A	4
1975 MDS Research B	4
2536 MDS Research C	4
1167 MDS Research D	4

### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
- (c) recommend the appointment of examiners to examine a candidate under Specific Course Rule 6.2.3 if it concurs with a recommendation by the examiners under that Rule.

5.3 A candidate's progress shall be reviewed by the Master's Examination Committee at the end of the first year of the course or after two years in the case of a half-time candidate. If, in the opinion of the Committee, a candidate is not making satisfactory progress the Faculty may, with the consent of the Council, terminate the candidature.

## **6 Assessment and examinations**

### **6.1 Research component**

- 6.1.1 On completion of their research candidates shall lodge with the Faculty Registrar three copies of the research report for assessment which shall be prepared in accordance with directions given from time to time. Candidates should refer to the Guidelines on Higher Degrees by Research and Specifications for Thesis in this volume
- 6.1.2 The Faculty shall appoint two examiners external to the Faculty
- 6.1.3 The examiners may recommend that a candidate be examined orally or otherwise on the subject of the research report and the general field of knowledge in which it falls.

### **6.2 Recommendations of Master's Examination Committee**

The Master's Examination Committee may recommend to Faculty through the Higher Degrees and Scholarships Committee that the candidate:

- (a) be awarded the degree
- (b) be awarded the degree subject to such minor amendments of the research report as the examiners may have suggested
- (c) be not awarded the degree but be allowed to revise and resubmit the research report within such period as the Faculty may allow *or*
- (d) be not awarded the degree.

## Syllabuses

### 4660 Basic and Applied Dental Sciences

2 points semester 2

2 hours per week

*prerequisites:* 5305 Research Methods and Ethics

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details

### 5016 MDS Research A

4 points semester 1 or 2

10 hours per week

### 1975 MDS Research B

4 points semester 1 or 2

10 hours per week

### 2536 MDS Research C

4 points semester 1 or 2

10 hours per week

### 1167 MDS Research D

4 points semester 1 or 2

10 hours per week

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details for these subjects

### 1055 Oral Pathology VI

12 points full year

10 hours per week

*corequisites:* 5305 Research Methods and Ethics, 4660 Basic and Applied Dental Sciences

This subject deals with the systematic pathology and histopathology of the oral mucosa, the jawbones, the salivary glands, the temporomandibular joint, the maxillary sinus, the teeth, cancer of the oral region and odontogenic tumours at the postgraduate level. During the two year program candidates are involved in both theoretical and practical aspects of general pathology and all facets of diagnostic oral histopathology. A minor research project is undertaken as part of the program. At the completion of the course the student will be a competent diagnostician with comprehensive knowledge of all aspects of diagnostic oral histopathology.

*assessment:* in consultation with Coordinator

### 4133 Oral Pathology VII

16 points full year

*prerequisites:* 1055 Oral Pathology VI

10 hours per week

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details

### 5305 Research Methods and Ethics

2 points semester 1

2 hours per week

See M.D.S. (Comm. & Prev. Dentistry) for syllabus details

## Master of Dental Surgery (Orthodontics)

The above award has been developed within the framework of the General Course Rules printed at the beginning of this volume of the Calendar. As all students must comply with these rules, they are advised to refer to them to gain an understanding of their rights and responsibilities regarding course matters.

**Note:** Postgraduate tuition fees may apply to this course.

### Specific Course Rules

#### 1 Admission requirements

1.1 The Faculty of Dentistry may accept as a candidate for the degree any person who:

- (a) has qualified in the University of Adelaide for the degree of Bachelor of Dental Surgery, or has qualified in another university for a degree or degrees in dentistry which the Faculty regards as equivalent *and*
- (b) has completed at least two years of relevant practical experience since qualifying for that degree.

1.2 A person who wishes to become a candidate for the degree shall apply to the Faculty Registrar.

#### 2 Duration of course

2.1 To qualify for the degree a candidate shall satisfactorily complete a course of study and a research project on a topic approved by the Faculty of Dentistry

2.2 Unless the Faculty expressly approve an extension of time in a particular case, the work for the degree shall be completed in not less than three and not more than four years and the research report submitted and assessed in the case of a full-time candidate, in not less than two and not more than three calendar years from the date of admission to candidature

#### 3 Supervision

For each candidate, the Faculty shall appoint a principal supervisor from the discipline of Orthodontics and co-supervisor(s) for guidance.

#### 4 Subjects of study and research projects

Candidates shall satisfactorily complete:

- (a) the following subjects:
 

4660 Basic and Applied Dental Sciences	2
5305 Research Methods and Ethics	2

(b) the following subjects unless the Faculty specially approves otherwise:

1764 Orthodontics VI	12
6708 Orthodontics VII	16
6303 Orthodontics VIII	24

(c) the following four subjects which shall be taken sequentially:

5016 MDS Research A	4
1975 MDS Research B	4
2536 MDS Research C	4
1167 MDS Research D	4

#### 5 Review of academic progress

5.1 There shall be a Master's Examination Committee which shall consist of the Principal Supervisor and the Postgraduate Coordinator.

5.2 For each candidate the Faculty shall appoint a Master's Examination Committee which shall:

- (a) recommend the appointment of examiners under Specific Course Rule 6.1.1 and 6.2.2
- (b) consider the reports of the examiners of the research report and the results of any examination *and*
