

# **IMPACT OF OMEGA-3 FATTY ACIDS ON PERIODONTAL INFLAMMATION**

**A thesis submitted to the University of Adelaide in  
partial fulfilment of the requirements of the Degree  
of Doctor of Clinical Dentistry (Periodontology)**

**Boram Park**

# Table of Contents

<b>List of Tables</b> .....	<b>iii</b>
<b>List of Figures</b> .....	<b>iv</b>
<b>Declaration</b> .....	<b>v</b>
<b>Acknowledgements</b> .....	<b>vi</b>
<b>Chapter 1. Literature Review</b> .....	<b>1</b>
1.1 Abstract .....	1
1.2 Periodontitis .....	2
1.3 Host Modulatory Therapy .....	3
1.4 What is Fish Oil and Why do we Take it? .....	3
1.5 Acute and Chronic Inflammation.....	8
1.6 Specialised Pro-resolving Lipid Mediators (SPMs).....	9
1.6.1 <i>Lipoxins</i> .....	11
1.6.2 <i>Resolvin</i> .....	12
1.6.3 <i>Protectins</i> .....	14
1.6.4 <i>Maresins</i> .....	15
1.7 Possible Mechanisms of Fish Oil to Improve Periodontal Outcomes.....	16
1.7.1 <i>Reducing Inflammation</i> .....	16
1.7.2 <i>Limiting Bone Resorption</i> .....	18
1.7.3 <i>Antimicrobial Actions of LCn3PUFA</i> .....	19
1.8 Studies Supporting Fish Oil and Periodontitis .....	19
1.9 Why Gingival Crevicular Fluid?.....	22
1.10 GCF in Different Stages of Gingival Inflammation.....	23
1.11 Cytokines.....	24
1.11.1 <i>Prostaglandin E<sub>2</sub></i> .....	24
1.11.2 <i>Tumor Necrosis Factor-<math>\alpha</math> and Interleukin-1<math>\beta</math></i> .....	26
1.11.3 <i>C-Reactive Protein</i> .....	27
1.12 Concluding Remarks.....	28
1.13 Aim.....	29
1.14 References .....	30
<b>Chapter 2. Impact of Omega-3 Fatty Acids on Periodontal Inflammation</b> .....	<b>48</b>
2.1 Introduction .....	48
2.2 Materials and Methods .....	50
2.2.1 <i>Patient Selection</i> .....	51

2.2.2 Subject Inclusion and Exclusion Criteria.....	51
2.2.3 DHA and EPA Supplements .....	52
2.2.4 Time Period .....	53
2.2.5 Non-Surgical Periodontal Therapy .....	54
2.2.6 GCF and Plaque Sample Collection and Storage.....	54
2.2.7 Blood Sample Collection .....	55
2.2.8 Assessments of Fatty Acid Profiles.....	56
2.2.9 Analysis of Inflammatory Mediators .....	56
2.2.9.1 C-Reactive Protein.....	56
2.2.9.2 Tumor Necrosis Factor- $\alpha$ and Interleukin-1 $\beta$ .....	57
2.2.10 Statistical Analysis.....	58
2.3 Results .....	58
2.4 Discussion .....	66
2.5 Conclusion.....	70
2.6 References .....	72
<b>Appendix 1. Periodontitis and Fish Oil Telephone Screening Questionnaire.....</b>	<b>77</b>
<b>Appendix 2. Information Sheet.....</b>	<b>80</b>
<b>Appendix 3. Storage of Perio Strips .....</b>	<b>86</b>

## List of Tables

Table 2.1. Inclusion and exclusion criteria .....	52
Table 2.2. Demographics of subjects recruited into the study.....	60
Table 2.3. Baseline clinical parameters of all study participants.....	60
Table 2.4. Baseline fatty acid profile as measured in plasma.....	61
Table 2.5. Fatty acid levels at baseline and 4 months for both groups presented in % of total fatty acids in the erythrocyte membranes. ....	62
Table 2.6. Percentage of samples with detectable levels of inflammatory markers.....	65

## List of Figures

Figure 1.1. Eicosanoids from arachidonic acid.....	5
Figure 1.2. Eicosanoids production from arachidonic acid and eicosapentaenoic acid. ....	6
Figure 1.3. The role of lipid mediators in resolution of acute inflammatory response. ....	10
Figure 1.4. Acute inflammation to either chronic inflammation or to resolution.....	11
Figure 1.5. Lipid mediators produced from arachidonic acid (AA), eicosapentaenoic acid (EPA), and docosahexaenoic acid (DHA). ....	12
Figure 1.6. Different types of specialised pro-resolving mediators and their target cells. ...	13
Figure 1.7. Lipid mediators and their receptors.....	16
Figure 2.1. Timeline of the study.....	54
Figure 2.2. Flow chart of the study design. ....	59
Figure 2.3. Concentration of IL-1 $\beta$ in GCF samples.....	63
Figure 2.4. Concentration of TNF- $\alpha$ in GCF samples. ....	63
Figure 2.5. Concentration of CRP in GCF samples.....	64
Figure 2.6. Concentration of CRP in plasma samples. ....	64

## **Declaration**

This work contains no material which has been accepted for the award of any other degree in any university or tertiary institution to Boram Park and, to the best of my knowledge and belief, contains no material previously published or written by any other person, except where due reference has been made in the text.

I give consent to this copy of my thesis when deposited in the University Library, being made available for loan and photocopying, subject to the provisions of the Copyright Act 1968.

I also give permission for the digital version of my thesis to be made available on the internet, via the University's digital research repository, the Library catalogue, the Australasian Digital Theses Program (ADTP) and also through web search engines, unless permission has been granted by the university to restrict access for a period of time.

## **Acknowledgements**

Firstly I would like to express my deep gratitude to Professor Mark Bartold, Dr Bryon Kardachi and Dr Alison Coates, my research supervisors, for their patient guidance and enthusiastic encouragement throughout past three years.

My grateful thanks to Dr Tracy Fitzsimmons for her assistance in the laboratory analysis as well as proofreading, to Ms Ceilidh Marchant who helped with sample preparation and storage, and to Ms Suzanne Edwards for her help with statistical data analysis.

I would also like to extend my thanks to co-researcher, Dr Brian Chee for his support, to Ms Catherine Offler for keeping everyone on track, to all the members of Colgate Australian Clinical Dental Research Centre (CACDRC), and maybe most importantly to all participants who have taken their time to turn up to their appointments and taken their capsules every day for many months, without all your help this thesis would not have been possible.

Finally I would like to thank my family, Mom, Dad, Narae and Sunwoo, and friends for their love and encouragement throughout my study.
